[Demo] NLP Dataset for Customer Service Automation

Company Type	Natural Gas Companies
Inquiry Category	Guidance on energy-saving tips
Inquiry Sub-Category	Heating and cooling
Description	Customers seeking tips on efficient use of their heating and cooling systems, including recommended set temperatures and usage habits.
Data Size	7,957 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

Masked sample paraphrases of one "Natural Gas Company" customer inquiry. (Purchased data will not be masked.)

Is it better to _____ a _____ _____ or _____ _____ _____ day _____ efficient _____?

Do you think it's _____ _____ _____ _____ _____ _____ or to change _____ throughout _____ day?

Is _____ throughout _____ day more efficient when _____ _____ _____ heating _____ _____?

Can _____ tell _____ it would be _____ _____ _____ a steady temperature _____ _____ adjust _____?

_____ keeping the _____ constant _____ _____ idea for _____?

Is it _____ to _____ a _____ _____ _____ to vary _____ settings throughout _____ _____ to _____ _____ a space?

_____ it _____ efficient to _____ for optimum _____ _____ cooling capacities _____ _____ hours, if I strive _____ _____ _____?

Does having _____ constant _____ make _____ difference to _____ _____?

_____ _____ _____ consistent _____ better than adjusting it _____ _____ _____ for efficient _____ and cooling?

Should one keep a steady _____ _____ _____ the settings _____ _____ _____ to _____ _____ _____ space?

_____ it _____ for _____ _____ _____ for a _____ temperature or adjust _____ regularly?

_____ is _____ _____ _____ steady temperatures or _____ _____ of heating/cooling systems?

Is _____ throughout the _____ _____ _____ for _____ _____ _____ than maintaining a _____ temperature?

_____ _____ _____ to strive for consistent temperatures _____ to _____ _____ _____ heating _____ cooling capacities during _____ day?

_____ _____ _____ _____ the day can _____ efficient heating/cooling.

Is _____ better _____ have uniform indoor _____ _____ _____ long or be _____ in _____ _____ _____ and _____ efficiently?

_____ _____ advisable _____ _____ the temperature constant _____ change occasionally?

_____ maintaining _____ good for _____ heating _____ _____?

Is _____ wise _____ keep _____ _____ constant or _____?

Should periodic _____ _____ _____ _____ _____ be used _____ achieve economical cooling/heating?

_____ you tell me _____ _____ would be _____ to maintain a _____ _____ _____ _____ _____ it?

_____ I keep _____ _____ all day, _____ _____ _____ occasionally _____ optimal heating and _____ performance?

_____ _____ beneficial _____ stick _____ _____ singular temperature _____ optimum _____ _____ heat and cooling?

Which is better: adjusting _____ _____ _____ _____ _____ _____ maintaining it?

Is _____ _____ better idea to _____ _____ _____ temp or _____ around _____ day?

Do adjusting the _____ or keeping _____ steady _____ _____ _____ heating/cooling _____?

Which is _____ _____ - _____ the _____ the same _____ _____ it?

_____ _____ _____ the temperature _____ for _____ heating and AC performance _____ _____ to one _____ _____ all day?

Is _____ _____ to _____ _____ _____ temperature or to vary _____ _____ the day to efficiently _____ and cool _____ _____?

_____ _____ a constant _____ better for _____ efficiency _____ changing it _____?

Should I _____ _____ temperature constant or _____ _____ _____ _____ day?

Keeping temperatures constant or _____ _____ _____ _____ for _____ heating _____ cooling.

_____ it helpful to _____ with _____ _____ _____ for _____ use _____ heat and cooling _____?

Do _____ _____ _____ keep _____ consistent _____ or _____ it regularly?

Which _____ more efficient; _____ the _____ constant _____ adjusting it _____ _____ _____?

Is it _____ to _____ _____ _____ temperatures all day _____ or be _____ _____ _____ to _____ and _____ efficiently?

Is _____ a steady _____ a _____ _____ _____ heating and _____ efficiency?

_____ is _____ maintaining _____ constant temperature or adjusting _____ _____ _____?

_____ keeping an unchanging _____ _____ _____ than _____ it occasionally?

Is it _____ to _____ constant _____ control _____ periodic _____?

Is adjusting _____ _____ _____ more _____ than _____ a _____ temperature?

Is _____ more beneficial _____ _____ _____ temperature _____ to adjust _____ regularly?

_____ _____ may be better for heating _____ _____ than _____ _____ _____ frequently.

_____ _____ more _____ efficient: maintaining a constant temperature _____ _____ _____?

_____ _____ recommend maintaining a _____ _____ _____ _____ things constantly for better _____ efficiency?

_____ keeping _____ constant _____ _____ _____ is _____ throughout the _____ _____ _____ for heating and cooling?

Is adjusting _____ _____ _____ _____ _____ than keeping a _____ temperature?

Does it help _____ a _____ _____ _____ _____ _____ _____ the day more efficient?

Is _____ better _____ _____ _____ _____ temperature or adjust _____ _____ the day?

Is _____ _____ _____ _____ a consistent temperature or _____ _____ it _____ the day?

_____ _____ _____ be kept constant or _____ throughout the day _____ _____ _____?

Does it _____ to _____ a constant _____ or is _____ throughout _____ _____ more _____ _____ heating and _____?

_____ is more _____ keeping the _____ constant or _____ _____ during _____ _____.

Does _____ make _____ sense _____ _____ _____ _____ _____ or make changes throughout _____ day?

_____ I keep _____ _____ _____ or _____ I adjust it _____ _____ day to save _____?

Which is _____ _____ warm/cold _____ _____ modifying by _____?

_____ _____ _____ constant _____ fluctuated for efficient _____?

Does having a _____ temp _____ to _____ efficient _____ _____ _____?

Is it _____ to keep _____ _____ _____ or adjust it _____ _____ _____.

_____ it better _____ maintain _____ constant _____ or adjust _____ the _____?

_____ _____ _____ constant temp _____ to better _____ efficiency.

Is it _____ to keep a consistent _____ _____ the _____ _____ _____ _____ _____ cooling?

Should _____ keep one _____ all day, or change _____ _____ _____ _____ _____ and _____ performance?

_____ _____ aim _____ a steady _____ _____ adjust _____ regularly _____ optimal heating and cooling _____?

Maintaining _____ steady temperature point is _____ _____ than _____ _____ _____ throughout the _____.

_____ it more efficient _____ _____ _____ steady or _____ it _____ _____ day?

_____ it _____ better to _____ a _____ climate _____ _____ _____ as needed?

Would it _____ better to maintain _____ _____ temperature _____ _____ _____ _____ it?

_____ _____ better to _____ for consistent temperatures or _____ _____ for _____ heating _____ _____ capacities _____ daytime hours.

_____ _____ _____ day or _____ better?

_____ is _____ energy _____ keeping _____ consistent _____ or _____ it?

_____ _____ better to stick _____ one _____ _____ play _____ _____ day for efficient heating _____ _____?

What's _____ maintaining _____ constant _____ or _____ _____ the day?

_____ _____ more efficient: steady temperatures _____ _____ adjustments in _____ _____ systems?

_____ _____ _____ _____ _____ a steady temperature or to vary _____ _____ the day to efficiently heat and _____ _____ _____?

Which is _____ _____ _____ regular adjustments _____ _____ temperatures?

Should the settings be _____ _____ _____ day _____ efficiently _____ a _____?

Should a person aim _____ a steady _____ _____ _____ _____ _____ for _____ _____ and cooling _____?

Is _____ throughout the _____ more efficient _____ _____ _____ cooling or is it _____ _____ maintain _____ _____ temperature?

_____ I _____ a _____ temperature or _____ _____ _____ _____ day to conserve energy?

Do you _____ _____ a _____ _____ to keep a consistent _____ or _____ _____ the _____?

Is the _____ stable or _____ _____ _____ _____?

Do _____ prefer maintaining _____ _____ temperature or _____ _____ the _____ _____ _____ efficient _____ and cooling?

Does a _____ temp lead _____ _____ efficiency in _____ _____ _____?

Will adjusting _____ the day be _____ efficient for heating _____ _____ than _____ _____ _____ _____?

_____ it be better to stick _____ _____ _____ or _____ it during _____ _____?

Is it a good idea _____ _____ _____ temperature control or periodic _____ _____ achieve _____ _____ _____ _____?

Does _____ make _____ sense _____ keep a consistent _____ _____ adjust _____ the _____?

Do _____ _____ it's _____ to _____ _____ temperature constant or change _____ _____?

_____ _____ _____ to keep temperature stable _____ _____ _____ during the day?

_____ maintaining _____ _____ _____ _____ with efficient cooling/ heating?

_____ _____ _____ it would _____ _____ to keep _____ _____ temperature _____ adjust throughout the day?

_____ it better to keep _____ consistent _____ _____ _____ it throughout _____ _____?

Does it help to keep _____ _____ constant _____ _____ it more _____ _____ _____ throughout _____ _____?

Does maintaining _____ unchanging temperature help with _____ _____ when compared _____ _____ _____ _____?

Will it be _____ to keep _____ consistent _____ or _____ _____ _____ _____ day?

_____ _____ efficient to adjust _____ optimal heating _____ _____ _____ _____ _____ hours if I want _____ strive _____ consistent temperatures?

_____ it _____ _____ stick with _____ temp _____ play around _____ _____ day?

Is _____ _____ _____ _____ with one set _____ all day or change _____ occasionally for optimal _____ _____ _____ _____?

_____ I _____ _____ _____ control or _____ _____ achieve economical cooling/heating?

_____ _____ _____ _____ _____ with one _____ temperature or _____ change it during the _____ for adequate _____?

Do you think _____ _____ be _____ to stick _____ one _____ _____ or _____ it during the _____ _____ adequate _____?

_____ temperatures constant or _____ _____ regularly yields _____ _____ _____ cooling.

_____ _____ _____ a _____ temperature or change it throughout the day _____ _____ _____ _____?

Is it better to _____ _____ a _____ _____ or adjust _____ _____ the _____?

Is keeping _____ consistent _____ more efficient _____ adjusting _____ the _____ _____ efficient _____ and _____?

Does keeping _____ constant temperature _____ _____ is adjusting _____ _____ _____ _____ _____ for heating and _____?

_____ _____ if it's more efficient to _____ for optimal _____ _____ cooling _____ _____ daytime _____.

Is it _____ to stay _____ _____ _____ _____ _____ _____ throughout the day.

Should I _____ _____ temperature _____ _____ optimal _____ _____ AC _____ or stick _____ the _____ set _____ all day?

Should one keep a _____ _____ _____ _____ settings _____ the day _____ efficiently _____ _____ cool _____ space?

_____ temperature or _____ it _____ _____ better?

_____ _____ _____ _____ is more _____ to _____ a _____ temperature _____ adjust throughout the day?

Do you think _____ _____ _____ temperature would _____ _____ _____ _____ _____ adjusting throughout the day?

Does it _____ sense _____ _____ _____ steady temperature or _____ it for _____ heating _____ _____?

Is _____ _____ single _____ _____ for _____ _____ of heat _____ _____ resources than changing them?

Is it better to _____ _____ _____ _____ or _____ throughout the _____?

Do _____ think _____ _____ to _____ with _____ temp _____ play _____ all day?

_____ _____ _____ to _____ _____ steady climate _____ to change as necessary?

_____ it a _____ idea _____ _____ one set _____ all _____ _____ or change it _____ for _____ _____ _____ AC performance?

_____ it possible to _____ heating/cooling _____ _____ keeping _____ steady _____?

Do you _____ keeping a consistent temperature _____ _____ _____ efficient _____ _____ throughout _____ _____?

_____ it _____ _____ _____ a constant temperature _____ to _____ it periodically?

_____ to a _____ temperature or adjusting _____ throughout the day _____ _____ _____ _____?

_____ is superior _____ _____ steady temperatures _____ _____ adjustments?

_____ you _____ _____ _____ if you kept a _____ setting or _____ it _____?

_____ approach is better for _____ use: steady _____ _____ _____ _____?

_____ having _____ constant temp _____ _____ better heating _____ _____ efficiency?

_____ _____ wise _____ _____ with one set temperature _____ _____ _____ during the _____ for _____ heating and cooling?

_____ it _____ good idea _____ maintain _____ _____ temperature _____ adjust _____ _____ the day?

_____ approach gives _____ _____ efficiency: maintaining _____ in _____ or _____ as needed _____ _____ day?

_____ _____ better toSticking to _____ consistent _____ or _____ it _____ the _____?

Is it better to _____ _____ _____ _____ _____ _____ long, or vary _____ occasionally?

Is _____ better _____ _____ _____ constant temp or _____ change _____?

_____ _____ better to have a _____ _____ or adjust _____ the _____?

_____ _____ _____ more energy efficient, maintaining a consistent temperature _____ _____ _____?

_____ it better _____ _____ _____ consistent temperatures _____ adjust _____ optimal heating _____ _____ capacities _____ daytime hours?

Which is _____ Steady _____ _____ on or _____ _____ hours?

_____ _____ _____ _____ _____ adjust for optimal heating _____ cooling _____ during _____ hours if I strive _____ consistency?

Should _____ _____ _____ _____ frequently or _____ _____ heating and cooling?

How _____ is _____ _____ _____ the _____ steady _____ adjust it during _____ day?

_____ adjusting temp throughout the _____ _____ _____ _____?

Is _____ a _____ temp better _____ heating _____ _____?

_____ it better to _____ a _____ temperature _____ change _____ _____ _____ _____ heating and cooling?

_____ having _____ _____ temperature lead to _____ _____ efficiency?

_____ _____ is if one _____ aim _____ a _____ _____ _____ adjust it regularly.

_____ _____ _____ it _____ _____ to keep the temperature constant or _____ it _____?

In _____ of efficiency, _____ _____ be better _____ _____ with one temperature _____ modify _____ _____ _____ day?

Do _____ think it helps _____ _____ a _____ _____ _____ is _____ _____ _____ day more efficient?

_____ _____ is _____ _____ steady temperatures _____ _____ adjustments in heating/cooling systems?

_____ a consistent temperature would _____ more energy-efficient _____ _____ _____ _____ day.

How about sticking _____ _____ consistent _____ _____ _____ _____ _____ adjusting it throughout the _____?

Do _____ _____ _____ _____ _____ _____ temperature or adjust it _____ the day?

Would _____ be better _____ stick with one set _____ _____ change _____ _____ _____ day _____ better _____?

Would _____ _____ _____ to _____ _____ one set _____ or modify it _____ the _____ for adequate heating _____ _____?

_____ it _____ _____ to _____ _____ temperature constant or change it _____?

_____ keeping a consistent temperature _____ important _____ adjusting throughout _____ day _____ _____ heating _____ _____?

Which approach _____ energy _____ by maintaining consistency _____ _____ or _____ _____ _____?

Is _____ _____ _____ have a _____ climate _____ _____ change as necessary?

Does _____ an _____ temperature save _____ _____ compared _____ adjusting it _____?

For _____ _____ is it _____ effective _____ keep a consistent temperature _____ _____ _____ the _____?

_____ _____ better _____ keep one temperature _____ day _____ _____ to change _____ _____ for optimal heating _____ AC _____?

Are _____ temp more _____ _____ adjusting _____ the _____?

Should I _____ constant _____ control _____ periodic adjustments _____ economical _____ _____ _____?

_____ _____ _____ temperature or _____ as needed throughout _____ day offer greater _____ _____.

It's better to _____ _____ constant _____ _____ to adjust _____ _____ the _____.

_____ approach has _____ energy efficiency, _____ _____ _____ temperature _____ adapting?

Is it _____ _____ to adjust _____ _____ _____ _____ cooling _____ _____ daytime hours if I _____ _____ strive _____ consistent temperatures?

_____ _____ constant _____ setting may _____ better for efficient _____ and _____.

Would _____ be better _____ _____ a _____ _____ _____ _____ vary the settings _____ _____ day to _____ a space?

Is it _____ _____ _____ _____ same inside _____ all _____ _____ adjusting better?

_____ _____ tell me if _____ is _____ to _____ a _____ temperature _____ _____ continually _____ it?

_____ _____ a consistent _____ help _____ cooling _____ heating?

Is it better _____ stick _____ a _____ temperature _____ _____ use _____ heat _____ _____ resources?

_____ _____ better _____ keep one _____ setting _____ to _____ it intermittently for _____ best _____ _____?

_____ you think keeping _____ _____ temp _____ lead _____ better heating/cooling _____?

_____ _____ _____ efficient _____ _____ for _____ _____ _____ cooling capacities during the day than _____ strive for consistent _____?

_____ you _____ a constant _____ _____ do _____ prefer _____ _____ the day?

_____ _____ think _____ _____ constant temp _____ to better heating/cooling _____?

Is _____ _____ _____ _____ _____ _____ _____ setting or to _____ it occasionally for _____ heating and cooling?

Is _____ better to _____ to one temperature or _____ _____ _____ _____ _____?

_____ approach offers better _____ _____ _____ consistency _____ temperature _____ adjusting throughout the _____?

_____ is more _____ - _____ _____ _____ periodic adjustments?

_____ I _____ constant temperature control or periodic _____ _____ _____ _____ cooling/heating?

Is _____ better _____ _____ _____ _____ _____ heating _____ cooling or stick with _____ temp?

_____ _____ a _____ idea to _____ with one _____ _____ _____ _____ _____ or to change it occasionally?

_____ _____ make more _____ to keep a _____ temperature or _____ _____ _____ _____ day?

_____ it _____ to stick _____ _____ set _____ or to _____ _____ _____ the _____ _____ adequate heating and cooling?

_____ _____ _____ to _____ a constant _____ point or to change _____ _____?

Is it _____ effective _____ adjust the _____ throughout _____ _____?

_____ _____ will result in higher energy _____ _____ _____ _____ _____ or _____ it throughout the _____?

_____ _____ better _____ keep a consistent _____ _____ adjust during _____ day.

Do _____ _____ keeping a consistent _____ _____ changing it _____?

Keeping _____ _____ _____ altering _____ _____ _____ help improve _____ and cooling effectiveness.

Is _____ _____ _____ _____ a _____ _____ _____ to change the settings throughout _____ day to _____ heat and cool _____ _____?

_____ sticking with a _____ temperature good for _____ use _____ _____ and _____ _____?

_____ don't _____ if _____ _____ keep _____ set temperature all day or change _____ _____ for optimal _____ _____ _____ performance.

Is it _____ _____ _____ with _____ set _____ all day long _____ change _____ _____?

_____ _____ the temperature _____ adjusted or maintained _____ adequate _____ and _____?

Does _____ temp _____ to _____ heating/cooling _____?

_____ _____ know if _____ would be better to maintain _____ _____ _____ _____ _____ _____ for efficient heating and _____?

_____ _____ be _____ to _____ a constant _____ setting or to change _____ _____?

_____ _____ _____ efficient _____ have _____ constant _____ point or _____ it frequently?

_____ it _____ to _____ for _____ steady temperature _____ _____ _____ it regularly?

_____ one aim for a constant _____ _____ adjust _____ frequently for _____ heating _____ _____ _____?

_____ a _____ temperature better _____ _____ _____ for heating?

_____ _____ better to _____ _____ constant temperature _____ or _____ adjust _____ for _____ heating _____ cooling?

_____ _____ _____ _____ to have consistent temperatures for _____ heating/cooling _____?

Is _____ a _____ temperature point _____ _____ than changing it constantly _____ _____ _____?

_____ I _____ the _____ constant to _____ _____ _____ and heating?

Is _____ _____ to have _____ _____ control _____ _____ adjustments to achieve economical _____?

It is _____ to _____ a constant _____ _____ to adjust _____ _____ the _____.

_____ _____ better to _____ a constant temperature _____ _____ _____ it occasionally for _____ _____ _____ cooling?

_____ _____ steady _____ would be better than _____ _____ _____ the day _____ efficiently heat and cool _____ _____.

Is keeping a _____ temperature _____ _____ _____ the settings _____ the _____ to efficiently heat _____ _____ a _____?

_____ _____ help to maintain a _____ _____ _____ _____ adjusting _____ the day more efficient _____ heating and _____?

Which _____ _____ _____ _____ for _____ steady temperatures _____ periodic adjustments?

Which is more energy _____ _____ a _____ _____ _____ _____ it _____ the day?

Is _____ _____ to _____ _____ consistent temp _____ change it frequently _____ energy _____?

Is it better _____ maintain _____ _____ _____ _____ to change _____ regularly?

_____ to _____ _____ _____ or _____ _____ throughout the _____ yields efficient _____ and cooling.

Are it _____ to keep _____ _____ temperature _____ to _____ adjust it _____ _____ _____ and _____?

_____ is _____ effective- keeping the temperature steady _____ _____ _____ during _____ _____?

_____ I keep one set temperature _____ day long _____ _____ _____ _____ _____ optimal _____?

Is it _____ _____ keep the same temperature, _____ _____ adjust _____ _____?

Is it _____ to _____ the temperature _____ or _____ _____ _____?

_____ _____ wise _____ keep a constant temperature _____ _____ to _____ _____ periodically?

Is it _____ _____ _____ _____ _____ _____ temperature or to modify it during _____ day for _____ _____?

_____ _____ preferable _____ _____ _____ steady temperature or to vary _____ _____ _____ the day to _____ a space?

_____ _____ _____ _____ temperature _____ or adjustments to achieve _____ cooling/heating?

_____ _____ _____ the _____ or different for efficient _____?

Is it _____ to _____ uniform indoor temperatures _____ day long, _____ to adapt _____ _____ _____ _____ _____ heat _____ _____ efficiently?

What's _____ energy- efficient, _____ a _____ temperature _____ adjusting _____?

_____ you _____ _____ _____ _____ keep a _____ _____ or _____ adjust throughout the day?

_____ is better: constant _____ always _____ or _____ _____ hours?

Which approach _____ _____ _____ _____ maintaining _____ in temperature or _____?

_____ _____ results in higher _____ efficiency, maintaining a _____ _____ _____ _____ it _____ the day?

_____ maintaining a _____ _____ _____ effective _____ adjusting it _____ needed?

_____ _____ results in _____ _____ efficiency, keeping _____ consistent _____ or _____ it throughout the _____?

_____ maintaining _____ _____ _____ better for energy _____ than adjusting it _____?

Is _____ a _____ temperature _____ _____ heating and _____ efficiency?

_____ _____ heating/cooling, is it better _____ _____ _____ consistent temperature _____ _____ throughout _____ day?

Does _____ make sense _____ _____ _____ temperature constant _____ change _____ _____ for effective _____?

_____ it _____ _____ _____ _____ for optimal heating and cooling capacities _____ the day if _____ _____ for _____ _____?

_____ _____ _____ efficient to adjust for _____ heating _____ cooling capacities during _____ _____ if _____ _____ to strive _____ _____ temperatures?

_____ adjusting _____ the _____ more _____ than maintaining a _____ _____?

Does keeping a _____ temperature _____ _____ _____ adjusting throughout the day _____ _____ _____ _____ _____ cooling?

Should _____ _____ to _____ uniform indoor temperatures _____ _____ long, or _____ when necessary _____ _____ to _____ and _____?

_____ _____ more _____ _____ temperature constant or adjusting during _____ _____?

_____ is _____ question about whether one should _____ _____ a _____ _____ or _____ _____ regularly.

_____ having constant temp _____ _____ _____ _____ efficiency?

Keeping _____ _____ _____ _____ _____ adjusting when necessary, which _____ better?

_____ _____ a constant _____ _____ change _____ constantly for better _____ efficiency?

Keeping temperatures _____ _____ altering them frequently can _____ _____ heating _____ _____ _____.

Correct, _____ steady _____ all _____ time, or adjust _____ _____?

Which _____ is _____ for efficient _____ steady _____ _____ periodic _____?

Is it _____ _____ maintain a constant _____ _____ to _____ _____ for _____ heating and _____?

Should _____ _____ _____ temperature _____ or periodic adjustments _____ _____ _____ _____ economical cooling and heating?

Do you _____ it would be _____ _____ idea to keep _____ _____ _____ or _____ _____ adjust _____?

Which _____ is _____ for energy _____ maintaining _____ in _____ _____ _____ to the _____?

_____ _____ _____ _____ idea to maintain the temperature _____ _____ change it _____?

Is it _____ _____ keep the _____ constant, _____ _____ _____ periodically?

Does maintaining an unchanging temperature _____ _____ _____ _____ compared _____ adjusting _____ _____?

Is _____ better to _____ _____ _____ _____ or _____ change it occasionally?

Is _____ _____ good _____ _____ stick to _____ _____ or _____ it all day _____?

_____ you _____ keeping _____ _____ _____ is more _____ _____ adjusting throughout the _____ for efficient _____?

_____ there a constant temp doing _____ _____ changing _____ _____ _____?

Does it make _____ to _____ _____ _____ temp _____ change it _____?

_____ _____ a _____ temperature more efficient _____ _____ _____ _____ day for efficient heating/cooling?

Is it _____ _____ _____ _____ temperature _____ or to change _____ periodically.

_____ I strive _____ _____ uniform indoor _____ all day long or _____ when _____ _____ order _____ _____ or _____ efficiently?

_____ _____ think _____ wise to stick _____ one temp _____ play _____ throughout _____ _____?

Which approach _____ _____ for _____ _____ temperatures or periodic _____?

_____ option _____ the better _____ _____ regular adjustments _____ _____ temperatures?

Is _____ better _____ adjust _____ _____ throughout _____ day or keep _____ same _____?

_____ it _____ to _____ the _____ _____ for optimal _____ of _____ and cooling _____?

Is keeping _____ _____ _____ preferable _____ is _____ better to vary _____ _____ _____ day?

For efficient _____ and cooling _____ _____ temperature _____ _____ or _____?

I don't know if _____ more _____ to _____ for _____ heating _____ _____ _____ _____ daytime _____.

Does _____ _____ maintain a constant temperature, or is adjusting throughout _____ _____ _____ efficient _____ _____ _____ _____?

Keeping _____ _____ or _____ throughout _____ day _____ better _____ heating _____ cooling.

_____ _____ keep _____ _____ setting or change _____ intermittently, would _____ get better _____?

_____ _____ _____ _____ a steady temp _____ adjusting _____ will improve _____ efficiency?

_____ you think it's _____ to keep _____ _____ _____ or adjust throughout _____ _____?

Is it _____ to _____ _____ temperature _____ _____ _____ _____ up all day?

Is _____ _____ strategy that _____ _____ energy _____ regular adjustments _____ _____ temperatures?

_____ _____ _____ _____ day more _____ for heating _____ _____ than keeping _____ constant temperature?

How about _____ a _____ temperature or _____ _____ as _____?

_____ _____ _____ to _____ _____ same temperature, _____ to change it when _____?

_____ maintaining a consistent temperature _____ best _____ _____ _____ _____ efficiency?

_____ you _____ _____ _____ would _____ better to maintain a steady _____ _____ _____ adjust it?

Is it more _____ _____ _____ _____ stable _____ to _____ it _____ the day?

Do you think _____ a _____ _____ _____ _____ throughout _____ _____ is better?

Would it be _____ _____ _____ _____ _____ _____ or _____ change it _____ for efficient heating and _____?

Should _____ _____ to have _____ indoor temperatures _____ _____ long _____ adapt _____ needed _____ heat _____ cool efficiently?

_____ _____ think _____ a consistent temperature would _____ _____ energy-efficient?

Keeping _____ _____ temperature _____ adjusting it _____ the _____ _____ lead _____ higher _____ efficiency.

Is _____ _____ to keep _____ _____ constant _____ _____ change it during _____ day?

Are it _____ to keep a _____ _____ or _____ _____ _____?

Is _____ better _____ have _____ constant temperature _____ or _____ _____?

_____ it _____ _____ stick _____ _____ single set temperature or _____ modify it _____ _____ _____ _____ adequate heating and cooling?

_____ _____ advisable to keep the _____ _____ or _____ it?

Is _____ _____ good _____ to keep the temperature _____ _____ change _____?

Is it more efficient to _____ a _____ _____ _____ or _____ _____ _____?

Which _____ preferable: Steady warm/cold _____ _____ or _____ _____ hours?

Is it _____ to _____ _____ constant temp, _____ change _____ _____?

Is _____ a _____ _____ to keep the _____ _____ or _____?

Does keeping _____ _____ _____ _____ adjusting _____ improve heating/cooling efficiency?

_____ _____ _____ _____ _____ for a _____ temperature or _____ _____ frequently for optimum heating _____ cooling efficiency?

_____ keeping a _____ temp _____ adjusting _____ _____ for _____ and cooling?

_____ _____ constant temp _____ to better heating _____ _____ efficiency?

_____ _____ _____ inside temperature all _____ or adjusting _____?

Does _____ make more _____ _____ maintain _____ stable _____ or _____ _____ as needed?

_____ it _____ to aim _____ _____ steady _____ _____ _____ it regularly _____ optimal heating _____ cooling efficiency?

_____ you prefer to _____ _____ constant _____ _____ _____ things constantly _____ better heating?

_____ it better to maintain _____ constant _____ _____ _____ _____ things frequently _____ better _____?

_____ keeping _____ temperature _____ good for heating _____ _____?

I want to _____ _____ _____ more _____ to adjust _____ _____ _____ and _____ capacities during _____ hours.

Is it more _____ _____ _____ _____ optimal heating _____ _____ _____ _____ _____ daytime hours, or should _____ _____ for consistent temperatures?

_____ it _____ _____ keep the temp _____ or change _____ _____?

Which is more _____ keeping _____ _____ constant or _____ _____?

Which _____ _____ steady warm/cold always _____ _____ modifying by _____?

_____ it ideal to _____ _____ _____ temperature, _____ _____ change when necessary?

_____ it more _____ _____ adjust for optimal _____ _____ cooling capacities _____ daytime hours or _____ _____ strive _____ _____?

_____ it a _____ idea _____ _____ the temperature _____ or change _____ _____ for _____?

_____ _____ _____ to _____ uniform indoor temperatures _____ day _____ or do _____ need _____ adapt _____ _____ to heat _____ cool efficiently?

_____ it _____ _____ stick _____ one set _____ all _____ _____ or to change it _____?

Complying _____ _____ consistent _____ _____ adjusting _____ throughout _____ _____ can yield efficient heating/cooling.

_____ you _____ it _____ wise _____ keep the _____ constant or _____ it _____?

_____ _____ _____ to _____ _____ constant _____ setting _____ change _____ periodically for efficient _____ and cooling?

Consistency _____ _____ adjustments would _____ needed for _____ heating _____ _____?

How _____ _____ _____ constant _____ or _____ throughout the day?

Which _____ offers _____ most _____ _____ consistency in temperature or _____ _____ _____ day?

Is _____ _____ singular temperature _____ _____ _____ _____ _____ heat and cooling resources _____ _____ them periodically?

_____ _____ _____ to keep a _____ temperature, or _____ _____ _____ to change the _____ _____ the day?

Is _____ _____ good idea _____ _____ _____ _____ temp or change it _____?

Is _____ beneficial to _____ with _____ single temperature _____ optimal use _____ _____ _____ _____ _____ resources?

Is it better _____ keep _____ _____ _____ or _____ change it _____?

Does maintaining a _____ _____ _____ with _____ _____?

Is _____ better to keep _____ _____ temperature _____ _____ _____ day or _____ change it _____?

Is _____ _____ the day _____ efficient _____ heating _____ _____ than _____ the temperature _____?

_____ efficient _____ _____ _____ _____ remain constant or fluctuate?

_____ you achieve better results _____ _____ _____ _____ constant _____ or _____ it intermittently?

Is _____ _____ _____ to _____ _____ consistent temperature _____ adjust throughout _____ day?

_____ it better to keep _____ _____ or _____ _____ _____ regularly?

_____ it _____ _____ _____ _____ to _____ a _____ temperature throughout the day?

Should _____ _____ _____ _____ temperature during the day or _____ it throughout _____ _____?

_____ having _____ _____ temp lead to better efficiency _____ _____ _____?

Keeping _____ constant or altering _____ _____ _____ improve heating _____ _____ effectiveness.

Should _____ _____ be _____ or changed _____ for effective _____?

_____ it _____ _____ play around throughout _____ day for efficient heating/cooling _____ _____ _____ _____ one _____?

_____ _____ _____ it's wise to stick _____ one _____ _____ _____ modify it during the day _____ adequate _____?

_____ _____ _____ good _____ _____ maintain _____ steady temperature or _____ change it throughout _____ day?

Which _____ is more efficient: _____ _____ or _____ adjustments of _____ _____?

Either _____ a constant temp or change _____ _____ _____ _____ _____ efficiency?

_____ I _____ temperature control or _____ _____ to achieve economical _____ _____?

What is more _____ _____ a _____ _____ _____ adjusting it?

_____ adjusting throughout _____ day _____ be _____ efficient for _____ and _____ than _____ _____ _____ temperature?

_____ you _____ _____ a _____ temperature or adjusting throughout _____ day _____ more _____?

Which option _____ result _____ higher _____ _____ _____ _____ _____ temperature or adjusting it?

Do _____ _____ _____ temperatures or _____ adjustments _____ _____ for efficiency?

_____ keeping _____ constant or adjusting _____ _____ the _____ _____ more efficient.

Is it _____ to _____ _____ _____ temperature _____ the day or _____ _____?

Do _____ prefer _____ _____ _____ _____ temp or change things _____ for better _____?

_____ maintaining _____ consistent temperature be _____ _____ _____ than adjusting?

Do _____ _____ it _____ _____ _____ _____ keep a steady _____ point or change it _____?

Is _____ _____ _____ temperature helpful _____ cooling and _____?

_____ it make _____ sense to _____ _____ _____ temperature or _____ make _____ throughout the _____?

_____ you prefer maintaining a constant _____ _____ _____ throughout _____ _____?

_____ it _____ to have _____ _____ _____ or _____ _____ more efficient to change _____ throughout the _____?

Is keeping _____ constant _____ or _____ _____ better _____ heating/cooling _____?

_____ option increases energy efficiency the _____ keeping a _____ _____ _____ _____ _____ throughout the _____?

_____ you want _____ keep _____ _____ _____ or do _____ want to vary the _____ _____ _____ day?

_____ we _____ with one _____ _____ _____ _____ throughout the day for efficient _____ and _____?

Is _____ better to just _____ _____ one _____ or play _____ throughout _____ _____?

Do _____ want to have uniform _____ temperatures all _____ _____ or do _____ _____ to _____ in _____ to _____ _____ _____?

_____ I maintain _____ _____ temperature _____ adjust _____ throughout _____ day _____ conserve energy?

_____ _____ _____ to maintain _____ constant _____ or change it regularly _____ energy _____?

Is _____ better _____ maintain _____ constant _____ or to _____ _____ needed?

_____ a constant _____ _____ _____ throughout the day _____ _____ _____ efficient heating/cooling.

Which _____ _____ efficient- _____ the temperature steady or _____ _____?

_____ it _____ _____ _____ _____ steady temperature or adjust it _____ efficiency?

Is _____ appropriate to aim for a _____ _____ _____ adjust _____ regularly for optimal _____ _____ _____ _____?

Should _____ be better _____ _____ _____ one _____ temperature _____ modify _____ _____ the day _____ adequate heating/cooling?

_____ _____ constant temperature or _____ _____ _____ day for more efficient _____ _____ better.

_____ it _____ to _____ _____ _____ set _____ _____ _____ it during _____ day for adequate heating/cooling?

_____ _____ beneficial to _____ _____ _____ single temperature for optimal _____ _____ heat and _____ resources?

Do _____ _____ to _____ better _____ by keeping one _____ _____ _____ changing it _____?

_____ is better: keeping a constant _____ _____ adjusting it _____ _____ _____?

_____ you _____ better results by _____ _____ _____ _____ or changing _____ intermittently?

_____ it _____ to adjust the _____ throughout the _____ or _____ _____ _____ consistent _____?

Is _____ better _____ _____ to _____ consistent _____ or _____ _____ throughout the day?

_____ better to _____ constant _____ _____ adjust _____ regularly.

_____ _____ _____ to _____ _____ one set temperature _____ the _____ _____ or to _____ it occasionally?

_____ approach _____ _____ _____ efficiency, consistency in _____ _____ adapting _____ the day?

Is _____ better to _____ _____ indoor _____ all _____ _____ or _____ _____ _____ necessary _____ order _____ heat and cool efficiently?

_____ a consistent temperature _____ more effective _____ adjusting _____ the _____ _____ _____ heating/cooling.

Is _____ _____ to stick with a single _____ _____ optimal _____ _____ heat and _____ _____?

_____ yields efficient _____ when you stick _____ _____ _____ _____ or adjust it _____ the _____?

_____ _____ constant _____ _____ adjusting throughout the day _____ _____ for heating/cooling.

What is the more energy-efficient: _____ _____ _____ _____ _____ _____ it?

Would it _____ better to stick with a _____ _____ _____ _____ _____ _____ during the day _____ adequate _____ _____ cooling?

_____ _____ _____ efficient _____ _____ a consistent temperature or _____ throughout _____ day?

_____ it _____ to have _____ temperature _____ _____ _____ adjustments to _____ _____ cooling/ heating?

_____ _____ better to _____ with _____ _____ or _____ around _____ _____ for efficient heating/cooling?

_____ _____ more _____ _____ the temperature _____ the _____ _____ keeping it constant?

Keeping a consistent temperature _____ _____ it _____ _____ _____ is a _____ _____ _____ option.

_____ option _____ lead to higher _____ efficiency, _____ a _____ temperature or _____ _____ throughout _____ _____?

_____ _____ the _____ constant is advisable _____ effective _____?

_____ _____ prefer _____ _____ constant temperature or _____ throughout the _____ for _____ heating/cooling?

_____ _____ with a single _____ _____ for _____ _____ of heat _____ cooling resources?

For _____ heating and cooling _____ _____ one aim _____ a _____ temperature _____ adjust _____ _____?

Do _____ think _____ consistent _____ is better _____ _____ frequently _____ _____ and cooling?

Would it _____ _____ _____ maintain a _____ temperature _____ _____ _____ for efficient _____ and cooling?

_____ a constant temp cause _____ _____ _____?

Would _____ _____ better to keep _____ constant temperature _____ _____ frequently _____ efficient _____ and _____?

Which one will _____ _____ higher energy _____ _____ a consistent _____ _____ _____ it _____ the _____?

Is _____ _____ to _____ _____ _____ consistent _____ throughout _____ day or change _____ throughout the _____?

Do _____ think _____ _____ consistent temperature is _____ _____ than _____ throughout the _____?

Which _____ is _____ _____ _____ _____ temperatures or periodic adjustments.

_____ it make _____ _____ to stick _____ _____ set temperature or modify it _____ the day _____ _____ _____?

_____ _____ a better _____ _____ stick _____ _____ _____ or play around _____ the day?

Is it _____ to _____ with _____ single _____ _____ _____ change it during the day _____ adequate _____ _____ _____?

Will it be _____ to _____ _____ temperature _____ or _____ change _____ _____?

_____ efficient heating/cooling, _____ _____ better _____ _____ with one _____ or _____ around _____ day?

How about _____ _____ consistent temperature or _____ it _____ _____?

_____ is more _____ _____ keeping a _____ temperature _____ adjusting _____ _____ the day?

_____ _____ better _____ _____ _____ temperature constant than to _____ it frequently?

_____ you tell me _____ it is better _____ maintain _____ _____ temperature or _____ it _____ efficient _____ _____ _____?

Does keeping _____ _____ _____ give _____ _____ efficiency?

_____ it possible _____ _____ better _____ by having _____ _____ _____ _____ changing it intermittently?

Is it better _____ _____ temperature _____ _____ to _____ _____ _____ the day?

_____ a _____ temperature _____ _____ it _____ the day will _____ energy _____.

Maintaining _____ constant temperature _____ _____ _____ energy efficient _____ _____ during the _____.

_____ _____ keep _____ steady _____ or adjust it during the day _____ _____ _____?

_____ it better _____ _____ _____ _____ temperature or to make _____ _____ the day?

_____ it better to stick _____ _____ _____ temperature _____ _____ it _____ the day?

Is _____ unchanging _____ better _____ _____ _____ _____ adjusting it occasionally?

Should we _____ with _____ temp or _____ around _____ day _____ efficient _____ _____ _____?

_____ maintaining _____ _____ temperature _____ more efficient than _____ _____ frequently throughout the _____?

Is _____ _____ to _____ _____ steady _____ _____ adjust _____ throughout the day to save _____?

_____ _____ _____ better to maintain _____ constant _____ or _____ adjust it _____?

How _____ keeping _____ _____ _____ altering them _____?

_____ it better _____ have a _____ _____ _____ to _____ the settings throughout _____ day _____ heat/cool a _____?

_____ keep _____ heat/cool _____ _____ time or adjust _____?

_____ it _____ _____ keep a _____ _____ or _____ vary it throughout _____ _____ to _____ heat/cool a space?

_____ effective heating/cooling, _____ _____ advisable _____ keep the _____ constant or _____ _____ periodically?

Keeping _____ _____ _____ _____ adjusting _____ throughout the day can yield _____ heating _____ _____.

Does _____ _____ consistent temperature _____ _____ it _____ to cooling _____ heating?

Keeping a _____ _____ or adjusting _____ throughout _____ day _____ _____ in _____ energy _____.

Which _____ would _____ better for efficiency: _____ _____ _____ periodic _____?

Is it better to stick with one set _____ _____ _____ _____ _____ during the day _____ _____ _____ _____?

_____ _____ _____ constant or changing _____ _____ heating?

Is _____ _____ effective _____ adjust _____ temperature throughout _____ day or maintain _____ _____ _____?

_____ it more effective _____ maintain a _____ temperature _____ _____ _____?

Do I have to _____ _____ _____ _____ or _____ _____ throughout _____ day to _____ energy?

Would _____ _____ better results by _____ _____ constant setting _____ _____ _____ intermittently?

_____ _____ _____ constant _____ more effective than making _____ throughout _____ day?

_____ it _____ to have _____ _____ temperature _____ _____ to _____ it periodically?

Should _____ _____ steady _____ all the _____ or _____ _____ needed?

_____ maintaining a _____ _____ _____ energy efficiency?

_____ efficient _____ it _____ keep _____ _____ _____ _____ adjust it during the day?

_____ a consistent temperature superior to _____ _____ _____ _____ heating _____ cooling?

Is _____ more efficient _____ keep _____ _____ temperature _____ _____ changes _____ the day?

Is it _____ _____ stay _____ _____ consistent _____ or to adjust _____ throughout _____ _____?

_____ it better to have constant _____ control _____ _____ _____?

Is _____ better to keep a _____ _____ _____ _____ _____ periodically for efficient heating _____ _____?

Is _____ _____ to stick _____ one temp _____ play _____ _____ day _____ efficient _____?

How efficient _____ _____ to maintain _____ consistent temperature _____ _____ _____ _____ required?

_____ it _____ to _____ a consistent _____ _____ adjust throughout the day _____ more _____ heating _____ _____?

_____ _____ better to _____ _____ _____ temperature _____ modify it _____ the day _____ adequate heating/ _____?

Keeping temperatures constant or _____ _____ _____ _____ yield better _____ and _____.

_____ _____ better, _____ _____ constant temperature _____ adjusting throughout _____ day for efficient _____?

_____ _____ _____ efficient _____ keep _____ temperature steady or to adjust _____?

Which approach _____ better energy _____ _____ _____ _____ temperature _____ adapting _____ needed throughout _____ day?

_____ _____ make _____ _____ maintain _____ steady temperature _____ to _____ adjust it?

_____ consistency _____ _____ and cooling _____ be _____ than adjusting the _____ _____.

_____ _____ temperature remain _____ _____ _____ changed frequently for _____ heating and _____?

Is _____ better to _____ a consistent temperature _____ the _____ or _____ _____ _____ _____ day?

_____ it better to keep _____ set _____ all _____ _____ _____ _____ it _____ _____ optimal heating?

_____ _____ energy-efficient: _____ a _____ temperature _____ adjusting it?

Is it _____ _____ stick with a single _____ _____ _____ day _____ _____ _____ occasionally?

_____ is more efficient: _____ _____ _____ _____ or adjusting it?

_____ _____ constant _____ good _____ heating _____ cooling?

Should I strive _____ have _____ indoor temperatures all _____ long _____ _____ when _____ _____ heat _____ _____ efficiently?

Is _____ a steady _____ point more _____ than _____ _____ _____?

_____ a _____ temperature _____ more efficient than _____ _____ throughout the _____.

_____ it beneficial _____ _____ a single temperature _____ optimum _____ of _____ _____ cooling _____?

Should it stick _____ _____ _____ _____ _____ _____ _____ _____ the day for adequate heating/cooling?

_____ adjusting the temperature _____ _____ day _____ _____ than maintaining a _____ _____?

Which is more efficient, keeping _____ _____ _____ _____ adjusting _____ _____ _____ day?

Which _____ _____ greater _____ _____ _____ _____ temperature or adapting _____ the day?

_____ there a _____ strategy _____ energy efficiency: _____ _____ or consistent _____?

_____ a consistent temperature _____ _____ for energy efficiency _____ adjusting it _____ _____ _____.

Is it better to have uniform indoor temperatures _____ _____ _____ _____ to _____ _____ _____ _____ heat _____ cool?

Maintaining a consistent temperature _____ _____ it throughout _____ day _____ result _____ _____ _____ _____.

Is it _____ to _____ with _____ temperature _____ _____ around throughout _____ _____?

Is it _____ to _____ with _____ set temperature _____ to _____ _____ during _____ day for _____ _____?

_____ _____ _____ throughout _____ day more efficient?

Do you _____ to keep _____ same temperature _____ change _____ _____ _____?

Maintaining _____ _____ _____ _____ adjusting _____ _____ the _____ is said to _____ _____ higher energy efficiency.

Is it _____ to have _____ steady temperature _____ _____ vary _____ settings _____ the day _____ _____ _____ _____ space?

Whose approach is _____ _____ _____ steady _____ _____ periodic adjustments?

Keeping _____ constant or changing _____ regularly can _____ _____ _____ heating _____ _____.

_____ _____ wise to keep one set _____ or _____ it _____ _____ _____ _____ adequate heating/cooling?

Is a _____ temperature _____ _____ _____ than adjusting as _____?

_____ _____ _____ greater _____ _____ maintaining consistency in _____ _____ adjusting throughout the day?

_____ it best to keep the temperature _____ _____ _____ _____ it _____?

Maintaining _____ _____ temperature or adjusting _____ _____ _____ _____ efficient heating and _____ _____ a better _____.

It is _____ _____ _____ a constant temperature _____ _____ adjust _____ regularly.

Is it helpful _____ stick _____ _____ _____ temperature _____ _____ use of _____ _____ cooling resources?

_____ you know _____ _____ is _____ to keep a steady _____ or _____ _____ _____?

_____ the _____ steady or adjusting _____ during the _____ is _____ _____

_____ _____ a constant _____ better _____ _____ efficiency?

Which approach _____ greater energy efficiency, _____ _____ _____ _____ or adjusting _____ _____ day?

Is _____ _____ cooling _____ be _____ for _____?

Consistency or _____ _____ _____ be needed _____ efficient _____ _____ cooling.

_____ it better _____ _____ it _____ or to adjust _____ _____?

_____ _____ temperature stable _____ changed _____ for optimal _____?

_____ _____ better to _____ one constant setting _____ modify it intermittently _____ _____ best _____ and _____ _____?

Should _____ _____ to have _____ indoor temperatures _____ _____ long or _____ _____ _____ in _____ to heat/cool efficiently?

Which option yields more heating/cooling _____ regular _____ _____ _____ _____?

_____ I try _____ have _____ _____ _____ _____ day long, _____ adapt _____ necessary to heat and cool _____?

Which is better _____ _____ _____ steady _____ _____ periodic adjustments?

_____ _____ _____ better for _____ _____ _____ _____ temperature to be constant or adjusted _____?

_____ it _____ _____ _____ with one _____ or _____ _____ _____ during the day for adequate _____?

_____ _____ stick _____ one _____ or _____ it up all day long _____ _____ money _____ _____ costs?

Should _____ temperature remain _____ _____ _____ _____ heating/cooling?

Which _____ is _____ for efficiency: _____ _____ or periodic _____?

_____ _____ _____ needed throughout the _____ more _____ _____ than maintaining a consistent _____?

Should I _____ _____ consistent temperatures or _____ I _____ _____ _____ _____ _____ cooling _____ during the day?

Is _____ preferable _____ _____ the temperature _____ or _____ change it _____?

Is it _____ to _____ with _____ _____ temperature _____ change _____ during the day _____ _____ _____?

Do you _____ _____ a _____ temperature or _____ _____ _____ needed?

Is _____ _____ _____ aim for _____ steady _____ _____ _____ adjust it regularly?

Maintaining a consistent _____ _____ _____ _____ heating _____ cooling levels

_____ _____ with a singular _____ beneficial for optimal _____ _____ heat _____ cooling _____?

Is it _____ good _____ to _____ _____ _____ _____ all day _____ or _____ it occasionally?

_____ it _____ to _____ _____ _____ temperature or _____ adjusting throughout the _____ more _____?

_____ _____ _____ efficient: _____ the _____ constant or _____ it during the _____?

Would _____ temp throughout _____ day _____ _____ _____?

_____ it better to _____ for a _____ _____ _____ _____ it daily?

_____ it be _____ to keep one _____ _____ or _____ _____ _____ the _____ _____ adequate heating/cooling?

Do _____ think keeping a consistent _____ _____ adjusting throughout the _____ _____ _____ _____ for efficient _____ _____ cooling?

_____ you think it _____ be _____ _____ _____ _____ constant temperature _____ to constantly adjust _____?

_____ _____ throughout the _____ more energy efficient than maintaining _____ _____ _____?

_____ having _____ constant _____ lead to more _____ _____?

_____ a consistent _____ _____ _____ it _____ the day _____ energy efficiency.

Is it _____ to _____ _____ constant temp or _____ _____ _____ for _____ heating?

_____ I _____ the _____ _____ same throughout the day _____ _____ it?

_____ _____ or periodic adjustments in the _____ _____ _____ better _____ efficiency.

Is _____ better _____ stay _____ _____ _____ temperature or adjust it _____ _____ day?

_____ _____ energy efficient: _____ _____ _____ temperature or adjusting it?

Is it more efficient to _____ _____ _____ _____ _____ change _____ frequently?

Which _____ the _____ _____ to maintain a _____ _____ _____ _____ heating/a/c efficiency?

Which gives better _____ _____ regular adjustments _____ _____ _____?

Is it possible _____ achieve better _____ _____ _____ _____ _____ setting _____ by _____ it intermittently?

Does maintaining _____ consistent temperature _____ _____ _____ cooling _____ heating?

_____ you think _____ is better _____ _____ a _____ temperature _____ _____ _____ adjust it?

_____ _____ temperature _____ _____ efficient _____ adjusting it?

Is keeping _____ consistent temperature _____ effective than adjusting _____ _____ _____ _____ efficient _____?

Do adjusting or _____ _____ _____ temp _____ _____ efficiency?

Which _____ offers _____ energy efficiency, _____ consistency in temperature _____ adapting as _____ _____ _____ _____?

_____ _____ want _____ aim for a _____ temperature _____ _____ it _____ for _____ heating _____ cooling efficiency?

Steady _____ _____ periodic _____ in _____ systems _____ _____ for efficiency.

_____ it _____ to keep a _____ temperature _____ to _____ settings throughout _____ _____ to _____ _____ _____ a space?

Constant _____ _____ adjusting it regularly _____ _____ _____.

_____ _____ _____ make my heating/cooling _____ more _____?

Which is better: _____ the _____ _____ _____ _____ it as _____?

Does _____ _____ steady temp _____ heating/cooling _____?

_____ _____ a consistent _____ better for efficient heating _____ _____?

Is it more efficient to _____ _____ _____ temperature _____ _____ _____.

Does _____ make _____ _____ keep a steady temperature or _____ _____ it _____ _____ _____ and _____?

_____ _____ _____ me _____ it _____ be _____ to _____ a steady temperature or _____ it for _____?

_____ _____ _____ sense _____ _____ for optimal heating _____ cooling capacities during daytime _____?

_____ _____ _____ temperature be more energy _____ _____ adjusting _____ the day?

_____ temperature _____ _____ adjusting it during _____ day is _____ _____.

_____ it better to _____ around _____ _____ day _____ efficient heating or _____ _____ _____ one _____?

_____ _____ a _____ temperature _____ _____ _____ throughout _____ day more energy efficient?

_____ or _____ _____ would be required _____ efficient _____?

_____ is the best way _____ _____ _____ _____ _____ and _____ _____ during daytime hours?

Is _____ better _____ stick _____ one _____ temperature _____ change _____ during _____ _____ for _____ heating and cooling?

_____ you _____ _____ _____ _____ temperature beats _____ it throughout the day for _____?

Keeping _____ _____ temperature or _____ _____ necessary?

_____ it right _____ _____ the _____ _____ or to adjust as _____?

_____ _____ _____ it's more efficient to _____ a steady _____ or _____ _____ frequently?

_____ is _____ - _____ warm/cold always on/off _____ modifying _____ _____?

_____ _____ be _____ to _____ one _____ _____ or change it intermittently _____ _____ cooling/heating effects?

Is keeping _____ _____ constant a good _____ _____ _____ heating?

_____ it _____ _____ keep the temperature constant _____ _____ _____ occasionally?

_____ _____ to efficiency, _____ _____ _____ better to stick _____ one _____ _____ _____ modify it during the day?

_____ _____ the more efficient _____ _____ _____ or periodic adjustments?

Which gives _____ heating/cooling _____ _____ _____ _____ _____ consistent temperature or adjust _____ _____ the day?

Will maintaining a _____ _____ _____ _____ than _____ as needed?

Which is _____ better _____ _____ _____ _____ periodic adjustments?

_____ _____ throughout _____ _____ is _____ efficient _____ heating and cooling?

Is it _____ _____ _____ a _____ climate or to _____ as _____?

_____ a constant temp _____ to _____ heating _____ _____ efficiency?

_____ it _____ to _____ a constant _____ _____ change things _____ for _____ efficiency?

_____ _____ _____ or altering them _____ _____ yield _____ heating and cooling.

_____ _____ a good idea to maintain _____ _____ temperature all day _____ _____ _____ _____ occasionally?

What _____ the _____ way _____ _____ a constant temp _____ _____ _____ efficiency?

Do _____ think _____ _____ be _____ to keep a constant temperature _____ _____ _____ _____?

_____ adjusting throughout _____ _____ more _____ for _____ _____ cooling _____ trying to _____ _____ constant temperature?

_____ _____ better _____ maintain a constant _____ or _____ _____ regularly?

Does _____ _____ temp lead _____ better _____ _____?

_____ it beneficial _____ _____ with a _____ _____ for _____ use of heat _____ _____?

Do I need to strive _____ _____ temperatures _____ do I need to _____ _____ _____ _____ _____ _____ during daytime _____?

Do you think _____ _____ _____ _____ _____ than adjusting _____ the day?

_____ _____ a constant _____ _____ the energy _____?

_____ keeping a _____ _____ _____ than changing the settings _____ the day _____ efficiently heat and _____ _____ _____?

Does it make _____ to strive for _____ _____ or _____ _____ for optimal _____ and _____ _____ _____ the _____?

What is the best _____ for increasing _____ _____ _____ _____ _____ consistent _____?

_____ _____ on which option _____ _____ _____ energy efficiency: _____ _____ consistent temperature or adjusting _____ throughout the _____.

_____ it better _____ _____ a constant _____ or to _____ _____ regularly?

_____ efficiency, _____ heating _____ _____ be adjusted?

Should _____ change the _____ _____ _____ day to save _____ _____ heating/cooling?

Is it _____ _____ maintain a constant _____ _____ to _____ _____ frequently?

Is _____ better _____ keep _____ _____ climate or to _____ _____ needed?

_____ _____ a _____ idea to _____ _____ temperature _____ same all day _____ or _____?

Is _____ _____ to _____ _____ temperature frequently _____ maintain _____ for adequate heating _____ _____?

Steady _____ or periodic adjustments _____ heating _____ _____ _____ are _____ for _____.

Should _____ _____ _____ adjusted frequently _____ kept _____ _____ adequate heating and _____?

Do _____ _____ _____ consistent temperature is _____ efficient _____ _____ regularly?

_____ _____ _____ unchanging _____ benefit energy efficiency _____ _____ to _____ it occasionally?

_____ _____ has more energy _____ _____ consistency _____ temperature _____ adapting throughout _____ day?

_____ _____ _____ a singular temperature helpful for _____ use of _____ _____ _____ resources?

Which is more _____ efficient: _____ _____ _____ _____ or _____ it?

Is the temperature _____ _____ changed _____ _____ optimal _____?

Is it _____ to have _____ _____ temperatures _____ _____ _____ _____ _____ when necessary _____ order to heat and _____?

_____ _____ _____ constant temp _____ heating/cooling efficiency?

_____ _____ think _____ _____ _____ better _____ maintain a constant _____ or adjust periodically for efficient heating _____ _____?

Should _____ _____ _____ constant temperature or adjust _____ during _____ day to _____ _____?

Is it _____ _____ keep _____ _____ temperature the same _____ _____ or _____ _____ better?

_____ it _____ better to maintain _____ _____ _____ _____ _____ to change it occasionally?

_____ _____ _____ _____ maintain a _____ temp, or change _____ regularly?

_____ _____ temperature _____ or _____ for efficient _____?

Is _____ more efficient to _____ a _____ _____ point _____ to _____ it _____?

Is _____ _____ _____ _____ _____ efficient _____ heating _____ cooling than maintaining a _____ temperature?

Does it _____ _____ _____ _____ for optimal _____ _____ _____ capacities during daytime hours or _____?

Is _____ _____ to _____ as needed _____ _____ day or _____ _____ _____ in temperature?

Which approach can _____ more energy _____ _____ _____ _____ temperature _____ _____ throughout _____ day?

Either _____ temperatures or _____ adjustments are _____ _____ _____.

_____ having constant _____ leads to better _____ _____ _____ efficiency?

Is _____ _____ _____ or changed _____ for optimal _____?

_____ _____ _____ to _____ for efficiency: _____ _____ or periodic adjustments?

Do _____ prefer to _____ a consistent _____ _____ adjust throughout _____ day _____ _____ _____?

Is _____ better to keep _____ _____ _____ or _____ _____ _____ the day for efficient _____?

Do constant temp _____ _____ better _____ _____?

Does _____ an unchanging temperature help in _____ _____ _____ _____ _____ it _____?

_____ approach _____ better for _____ _____ maintaining temperature consistency or _____ throughout _____ _____?

Is it _____ _____ to _____ _____ _____ _____ _____ cooling capacities during the day?

Is a _____ _____ _____ _____ efficient than _____ during _____ day?

_____ _____ _____ steady _____ allow for _____ efficiency?

Is steady _____ _____ _____ _____ better _____ efficiency?

Do _____ _____ it's more efficient _____ keep a _____ _____ _____ _____ day?

_____ having a constant _____ _____ _____ _____ andcooling?

_____ _____ _____ better _____ stick with a _____ temperature _____ modify _____ _____ the _____ for adequate heating/cooling?

_____ _____ _____ constant temp _____ for better _____ efficiency?

For _____ heating _____ _____ efficiency, _____ someone _____ _____ a _____ _____ or adjust it regularly?

Is it a _____ _____ _____ stick _____ _____ _____ temperature _____ modify it _____ _____ day for adequate _____ and cooling?

Does it _____ _____ _____ _____ for optimal _____ and _____ _____ _____ daytime hours or _____ _____ for consistent temperatures?

_____ _____ more efficient _____ keep a constant _____ _____ to _____ _____ the day?

Is _____ a constant temperature _____ _____ than adjusting periodically _____ _____ heating _____ _____?

_____ _____ in _____ or adapting _____ needed throughout the _____ _____ greater _____ efficiency.

_____ it _____ sense _____ _____ for optimal heating _____ cooling _____ _____ daytime _____ or should I strive for _____ _____?

Is _____ _____ _____ _____ adjust for _____ _____ _____ _____ capacities during daytime hours, or should I _____ _____ consistency?

Is _____ better _____ _____ the _____ _____ _____ adjust it regularly?

_____ it _____ economical to _____ constant _____ throughout the _____?

_____ option gives better heating/cooling: _____ _____ _____ consistent _____?

Which _____ _____ efficient- keeping _____ temperature stable _____ _____ _____ during the _____?

_____ it _____ _____ stay with a _____ _____ _____ _____ play around throughout the _____?

_____ the temperature constant or _____ _____ _____ _____?

_____ _____ _____ _____ keep _____ temperature constant _____ change it frequently for _____ heating?

_____ I _____ the temperature _____ or _____ it _____ the _____ _____ save energy?

_____ _____ _____ _____ _____ the temperature constant, or change it _____?

Does _____ a constant _____ _____ _____ efficiency compared _____ adjustments?

_____ you _____ _____ _____ _____ _____ to maintain a constant temperature _____ to continually adjust _____?

Is it better _____ stick _____ _____ set _____ _____ _____ change _____ _____ the day for _____ heating andcooling?

_____ _____ more efficient: a constant _____ or _____ _____ _____ the day?

Does _____ _____ _____ _____ help in energy _____?

_____ _____ possible to _____ _____ _____ temp and improve _____ efficiency?

_____ it _____ better _____ keep a consistent _____ or adjust _____ _____ _____?

_____ _____ be better to _____ with one _____ or _____ it during _____ _____ _____ adequate heating and _____?

_____ it make sense _____ _____ _____ _____ temp or play around throughout _____ _____?

_____ _____ better to _____ the temperature _____ _____ day _____ _____ keep a consistent _____?

Is keeping _____ _____ temperature beneficial _____ _____ _____ _____ heat _____ cooling resources?

Keep temperatures constant _____ _____ them regularly for _____ _____ and _____ _____.

_____ consistency for _____ heating _____ cooling, is it _____ to _____ _____ temperature _____?

Is maintaining _____ constant _____ _____ _____ _____ efficiency?

Is _____ better _____ _____ _____ temperature control _____ periodic _____ for _____ heating?

Is _____ more _____ to adjust for _____ heating and _____ _____ during _____ hours _____ _____ strive _____ _____ temperatures?

Will adjusting _____ throughout _____ _____ _____ _____ economical?

_____ it _____ to _____ the temp regularly _____ keep _____ _____?

Would it _____ _____ _____ maintain a _____ _____ _____ or _____ _____ frequently _____ efficient heating and cooling?

Is it _____ to keep _____ _____ _____ all _____ long or _____ change _____ _____?

_____ _____ prefer to adjust _____ _____ frequently or _____ consistency for _____ _____ _____ cooling?

Is it a good idea _____ _____ _____ temperature throughout _____ _____ _____ _____ energy?

Which _____ has _____ _____ _____ efficiency, _____ consistency _____ temperature _____ _____ throughout the day?

Should _____ use _____ _____ _____ or _____ adjustments for cooling and _____?

In terms of _____ would _____ _____ better to _____ _____ _____ set temperature or change _____ _____ the _____?

Which _____ _____ more energy _____ _____ _____ in temperature or _____?

Which _____ offers _____ _____ _____ _____ consistency in temperature _____ _____ throughout the day?

_____ it best to _____ the _____ _____ _____ day or to _____ _____?

Is _____ _____ _____ stick with _____ _____ or to play _____ throughout _____ day?

Would _____ be _____ to keep _____ _____ temperature or to change the settings _____ _____ day to _____ _____ _____ _____ _____?

Can _____ _____ me which is _____ keeping a _____ _____ _____ adjusting throughout _____ _____?

_____ _____ a consistent temperature better _____ _____ it throughout _____ day _____ _____ heating/cooling?

_____ it more efficient _____ keep a _____ _____ _____ or _____ _____ constantly?

Which approach _____ _____ efficient _____ steady temperatures or _____ _____?

_____ _____ _____ keeping a _____ temperature _____ adjusting throughout the _____?

_____ one _____ setting _____ _____ _____ intermittently for ideal cooling _____ heating effects _____ _____ better _____.

Is it _____ _____ _____ _____ _____ temperatures all day long, or adapt _____ necessary to _____ _____ _____?

It _____ a good question if _____ _____ aim for _____ _____ _____ or _____ it _____.

_____ _____ _____ good idea to keep _____ _____ temp, or _____ it _____?

Keeping _____ _____ or changing them regularly _____ to _____ _____ _____ cooling _____.

Should _____ stick _____ _____ temp or _____ _____ throughout the day _____ _____ efficient _____?

Is _____ _____ to keep _____ _____ temperature _____ continually _____ _____ for efficient heating and _____?

Is _____ best _____ keep _____ temperature _____ or _____ periodically?

Does _____ throughout the _____ _____ efficient for _____ and _____ _____ maintain _____ constant _____?

Is _____ _____ _____ have the same _____ _____ _____ day or _____ better?

_____ _____ _____ steady temperature more _____ _____ changing it?

Is _____ _____ _____ _____ to keep _____ _____ steady or adjust?

Should I stick _____ one temperature _____ _____ _____ _____ _____ _____ _____ save money _____ heating and cooling costs?

Should the temperature _____ stable _____ changed periodically _____ _____ _____?

Do _____ think constant _____ _____ adjusting _____ _____ is more _____?

Does a _____ _____ _____ _____ better heating or _____?

_____ _____ be better to keep a _____ _____ _____ _____ _____ the _____ throughout the day?

constant temperature _____ _____ _____ regularly?

Which approach works _____ - steadiness _____ _____ _____ _____ _____ adjustments during _____ day?

_____ it _____ _____ _____ stick with one set temperature or _____ _____ _____ during _____ day?

Is _____ the temperature _____ _____ day _____ _____ efficient heating/cooling?

_____ it be _____ _____ stick with _____ set _____ _____ _____ it during the day _____ _____ heating/cooling?

Is it _____ to have a _____ _____ or _____ _____ _____ settings _____ the _____?

_____ it make _____ _____ stick with one temp or _____ around _____ day _____ _____ _____?

_____ _____ _____ _____ constant temperature control _____ periodic adjustments to _____ _____ _____ and heating?

_____ _____ _____ to have _____ indoor temperatures _____ day _____ or adapt when necessary _____ heat _____ _____?

_____ adjusting _____ _____ _____ _____ temp _____ _____ better heating and cooling efficiency?

_____ it better to stick _____ _____ temp _____ play _____ temp throughout _____ _____?

_____ _____ better to keep the _____ _____ _____ _____ change it?

Do you _____ maintaining _____ _____ temperature _____ _____ more efficient _____ adjusting?

_____ _____ _____ _____ _____ heating and cooling: regular adjustments _____ consistency?

_____ _____ be _____ to stick with _____ _____ temperature _____ _____ _____ it during the _____ for adequate _____ andcooling?

_____ _____ consistent temperature or _____ it during the _____ _____ _____ in higher _____ _____.

_____ a _____ _____ _____ a better heating/cooling _____?

_____ approach _____ _____ energy efficiency: _____ _____ in _____ or adapting throughout _____ day?

_____ it _____ _____ _____ to have constant _____ control or _____ adjustments?

Should I _____ _____ set _____ for the _____ day _____ _____ it occasionally _____ optimal _____ _____ AC performance?

Is _____ _____ _____ stick with a _____ temperature all _____ _____ _____ to _____ it occasionally?

Should I have _____ constant _____ _____ adjust _____ throughout the _____ _____ _____ energy?

_____ _____ a _____ _____ better for _____ efficiency than adjusting _____?

Is _____ steady _____ _____ efficient _____ changing it throughout _____ _____?

_____ _____ better _____ have a _____ temperature _____ to change _____ _____ the day?

Do _____ _____ _____ a _____ temp _____ a _____ in heating/cooling efficiency?

_____ it best _____ _____ _____ same temperature all _____ long _____ _____ it?

_____ keeping _____ _____ temperature more _____ efficient than _____ _____ the day?

_____ it _____ _____ _____ _____ steady temperature or vary _____ settings _____ _____ _____ to _____ and cool a space?

_____ _____ has greater _____ _____ maintaining consistency in _____ _____ adjusting _____ the day?

_____ is best: _____ warm/cold always _____ or _____ by _____?

Is it _____ _____ _____ _____ _____ _____ or to vary _____ settings _____ the day to heat/cool _____ space?

Is _____ _____ _____ to keep _____ constant temperature or adjust _____ _____ _____?

Keeping temperatures constant or _____ _____ _____ can improve _____ _____ _____ effectiveness.

Do _____ _____ _____ _____ temp or _____ _____ steady yields better heating/cooling _____?

_____ the _____ stable or _____ _____ for _____ heating/cooling?

_____ _____ keep _____ _____ temp or change _____ frequently for _____ _____ efficiency?

_____ it possible _____ _____ a constant temp leads _____ _____ heating/cooling _____?

Should one _____ _____ a _____ _____ _____ adjust it frequently _____ heating _____ _____ efficiency?

Which _____ _____ a _____ warm/cold always _____ or _____ by _____?

Which _____ maximizes energy _____ consistency _____ _____ _____ _____ throughout the day?

_____ it more efficient _____ keep _____ _____ _____ point _____ to _____ it regularly?

_____ _____ make sense _____ maintain a consistent _____ _____ _____ savings _____ _____ it regularly?

_____ approach _____ _____ energy efficient, _____ consistency _____ temperature or _____ as _____ throughout the _____?

_____ it better to stick _____ a singular _____ _____ optimal _____ of _____ and _____ _____?

Do _____ _____ maintaining a _____ temperature _____ adjusting it _____ _____ _____ efficient?

Is it _____ to _____ _____ steady temperature point _____ _____ _____ daily?

Which _____ more efficient: _____ _____ _____ temperature or adjusting _____?

Would _____ be _____ to _____ _____ _____ temperature or to change _____ _____ for _____ heating _____ cooling?

Is _____ _____ _____ _____ adjust _____ _____ heating and cooling capacities during daytime hours if _____ _____ for _____ _____?

Would it _____ _____ to _____ with _____ temperature or _____ it during the _____ _____ _____ _____?

_____ _____ _____ a singular _____ beneficial for _____ _____ of _____ and cooling _____ _____ _____ to changing them frequently?

Is _____ throughout _____ _____ more efficient _____ _____ _____ cooling as _____ to maintaining a _____ _____?

Is it _____ _____ _____ a constant temperature or _____ _____ the _____ throughout the day _____ _____ heat _____ _____ _____ space?

_____ _____ know if _____ _____ _____ maintain a _____ temperature or to _____ adjust _____?

_____ _____ _____ more efficient _____ stick with one set _____ _____ modify _____ _____ the day for adequate _____?

_____ temperatures constant _____ _____ them _____ will _____ heating _____ cooling more _____.

_____ _____ better _____ use steady temperatures or _____ _____ _____ heating/cooling systems?

Should _____ _____ be maintained _____ _____ _____ _____ day to save energy?

_____ _____ _____ for _____ _____ _____ or adjust it frequently for _____ heating and _____?

_____ _____ _____ to keep _____ _____ constant or to _____ it regularly?

Is it _____ _____ _____ a _____ _____ or change it?

_____ a question _____ whether to _____ for _____ _____ temperature _____ _____ it regularly.

Which approach _____ _____ efficiency _____ maintaining consistency _____ _____ _____ adapting as _____ throughout _____ day?

_____ it a good _____ _____ _____ the temperature constant _____ _____ _____ _____ efficient heating/cooling?

_____ _____ is more _____ efficient, _____ consistency in temperature _____ _____ throughout _____ day?

Which _____ _____ _____ _____ it _____ or adjusting it _____ the day?

_____ you talking _____ sticking to a consistent _____ or adjusting _____ _____ _____ _____?

Is it _____ to keep _____ _____ _____ or to _____ it _____?

Do _____ or keeping _____ _____ temp _____ to _____ heating _____ _____ efficiency?

_____ _____ think _____ _____ steady temp _____ yield better heating/cooling _____?

_____ it _____ _____ to stick _____ one _____ _____ or modify _____ during the _____ for adequate _____?

_____ _____ be better to _____ _____ _____ _____ or to _____ _____ _____ the day for adequate _____ and cooling?

_____ _____ temperature _____ be more energy _____ than adjusting _____ the _____.

_____ a consistent temperature _____ _____ _____ _____ heating?

I _____ _____ _____ _____ temperature is _____ _____ _____ regularly for heating and cooling.

Is _____ _____ temperature _____ _____ than adjusting _____ for heating _____ cooling?

_____ _____ a steady _____ _____ _____ than changing it all _____ time?

Is it better to _____ with _____ _____ _____ _____ modify _____ during the _____ in order to _____ _____ _____?

_____ _____ prefer _____ a constant _____ or adjusting it _____ _____?

_____ it better to _____ a constant temp _____ _____ _____ _____?

Would _____ _____ _____ to _____ _____ constant temperature or _____ _____ periodically _____ efficient heating _____ cooling?

Does _____ _____ _____ day help _____ a constant _____ or _____ it _____ _____ _____ heating and cooling?

_____ it better to _____ _____ _____ temp or _____ _____ day _____ efficient heating and _____?

Which option _____ greater _____ _____ consistent temperatures or _____ _____?

The question _____ should one _____ _____ _____ _____ temperature or _____ _____ frequently?

Does having _____ _____ temp _____ to _____ heat/cooling _____?

Do _____ think keeping _____ consistent _____ is _____ effective _____ _____ throughout _____ day?

_____ maintaining _____ constant temperature help, or _____ _____ more _____ _____ adjust throughout _____ _____?

_____ it _____ _____ maintain a _____ _____ or change _____ when necessary?

_____ you think it's wise to stick _____ _____ _____ _____ play around _____ _____?

_____ _____ prefer _____ maintain a consistent temperature _____ adjust _____ _____ needed?

_____ _____ _____ the day _____ efficient _____ _____ _____ cooling than _____ a constant temperature?

_____ it _____ _____ _____ _____ with one _____ temperature or change _____ during the day _____ _____ heating _____ cooling?

_____ _____ constant _____ _____ be more _____ efficient than adjusting _____ the _____.

Does having a _____ _____ correlate _____ _____ _____ efficiency?

_____ _____ make sense to _____ a consistent _____ _____ _____ change it _____ _____ day?

Is _____ _____ temp yields _____ heating/cooling _____?

_____ it _____ to _____ _____ constant temp _____ _____ _____ things frequently for _____ efficiency?

_____ _____ _____ maintaining a consistent _____ _____ more energy _____ than adjusting?

Sticking _____ _____ _____ temperature or adjusting _____ _____ _____ _____ may yield efficient heating/cooling.

_____ it make _____ to keep the _____ _____ _____ _____ it _____ for _____ _____ and cooling?

_____ you _____ _____ it's better _____ keep _____ _____ temperature or _____ constantly adjust _____?

_____ _____ or _____ a _____ temp result in _____ _____ efficiency?

Is it better _____ keep _____ _____ _____ or _____ _____ things _____ _____ better heating?

_____ a _____ _____ or adjusting throughout the day _____ efficient _____ is _____ _____ _____.

Which is _____ keeping _____ same _____ _____ adjusting when _____?

Is _____ _____ constant temperature _____ _____ than _____ throughout the _____?

_____ we keep _____ _____ _____ or _____ it as needed?

Is it _____ to _____ constant temperature _____ to _____ _____ _____?

_____ it better _____ keep a _____ _____ _____ to _____ the settings _____ _____ day _____ efficiently _____ _____ cool a space?

Do _____ prefer to _____ _____ consistent temperature _____ adjust _____ the _____?

For optimal heating _____ _____ efficiency, should _____ _____ aim _____ _____ steady _____ _____ adjust it _____?

For _____ heating and cooling _____ the _____ _____ _____ or _____?

Should _____ _____ _____ _____ frequently _____ maintained for adequate heating and _____?

Keeping _____ _____ or altering _____ regularly _____ heating and _____ more _____.

Is _____ better _____ keep _____ temperature constant or _____ _____ _____ occasionally?

Is it _____ to _____ _____ results by _____ _____ constant setting or by _____ _____ _____?

Should _____ _____ be _____ or changed _____ for optimal _____ _____?

_____ you think _____ a steady _____ _____ adjusting it _____ give _____ heating/cooling _____?

Do _____ know _____ it's _____ to keep a _____ _____ or _____ it _____ _____?

_____ maintaining _____ constant temperature _____ more efficient _____ _____ it _____?

Would it _____ better _____ stick _____ _____ _____ _____ change _____ during the _____ for adequate _____?

Is it better to _____ with one _____ _____ _____ _____ _____ during _____ day _____ _____ heating and cooling?

_____ _____ _____ to maintain a consistent _____ or _____ it _____?

Is adjusting _____ _____ _____ _____ _____ for heating _____ _____ than maintaining _____ stable temperature?

_____ _____ _____ with one set temperature _____ _____ it during the _____ _____ adequate _____?

Which _____ better, _____ a constant _____ _____ _____ it as _____?

Is it better _____ _____ uniform _____ temperatures _____ day long _____ _____ adapt in _____ _____ heat _____ _____ efficiently?

Either keeping _____ _____ constant _____ _____ it during the _____ _____ _____ efficient.

_____ _____ _____ to _____ a _____ _____ or to vary _____ settings _____ _____ day to heat or cool _____ space?

_____ _____ a _____ _____ increase heating _____ efficiency?

Should _____ temperature _____ stable or _____ _____ _____ for optimal _____ _____ cooling?

_____ the same _____ always _____ adjusting it _____ _____?

_____ _____ _____ _____ a _____ temp give you _____ heating/cooling efficiency?

Is it better to _____ _____ _____ temperature _____ adapt _____ _____ during the _____?

When compared _____ _____ it _____ is _____ an _____ temperature _____ efficient?

Does _____ _____ _____ _____ _____ or _____ _____ throughout the day _____ _____ for heating and cooling?

_____ _____ more efficient _____ _____ _____ optimal heating _____ cooling _____ _____ daytime _____ _____ I want to _____ for consistent temperatures.

Is it _____ _____ to _____ _____ steady temperature point _____ _____ change _____ frequently?

Is it _____ to _____ _____ temperatures _____ regular _____?

Should I strive _____ _____ uniform indoor _____ _____ day, or _____ _____ _____ in _____ to heat and _____ more _____?

_____ _____ better to stay with _____ _____ _____ or _____ _____ during _____ day _____ adequate heating/cooling?

_____ _____ consistent _____ _____ _____ more _____ efficient _____ adjusting all day long.

Which is _____ _____ warm/cold always on or _____ _____ _____?

Is _____ _____ good _____ _____ _____ _____ _____ _____ temperature all day long or change _____ occasionally?

Which _____ is more _____ _____ _____ _____ _____ or adapting throughout _____ day?

Is _____ _____ the day more _____ _____ _____ _____ _____ or is _____ a constant _____ more important?

_____ it more _____ to _____ for optimal heating _____ _____ _____ during _____ _____ _____ to strive _____ a consistent temperature?

Is it _____ _____ keep the _____ _____ or _____ it _____?

Keeping _____ consistent _____ _____ adjusting _____ _____ the day _____ the _____ option for _____ efficiency.

_____ _____ better _____ maintain a constant temperature or _____ _____ for efficient _____ _____ _____?

_____ it _____ _____ to _____ _____ _____ _____ temperature or change _____ _____ the day for _____ heating and cooling?

Is keeping _____ steady _____ _____ _____ heating or _____?

When _____ comes _____ heating and _____ _____ should one _____ _____ _____ _____ _____ or adjust it frequently?

_____ Same _____ _____ _____ day, or _____ better?

Does _____ constant _____ _____ to _____ _____ efficiency?

Is it _____ _____ _____ for optimal heating and cooling _____ _____ hours or _____ _____ _____ for consistent _____?

_____ it better _____ stick _____ one _____ or _____ it _____ _____ day long?

Is _____ possible to have _____ _____ temperatures _____ _____ _____ _____ adapt _____ necessary to _____ and cool?

Are constant temp _____ well _____ _____ _____ _____ day okay?

Is _____ wise to maintain _____ constant temperature _____ _____ _____ _____ it _____?

Maintaining a _____ temperature _____ adjusting it _____ _____ day _____ in _____ _____ efficiency

_____ _____ _____ better - steadiness in _____ _____ _____ _____ adjustments in the day?

_____ having _____ constant _____ leads _____ _____ efficiency?

Maintaining _____ _____ _____ for adequate _____ _____ _____ than adjusting the _____ frequently.

Which approach is better _____ _____ periodic adjustments _____ _____ _____?

Is it more efficient _____ _____ _____ _____ _____ _____ cooling capacities during _____ _____ if I strive for a _____ _____?

_____ _____ better, _____ _____ _____ temp or changing it?

Maintaining _____ _____ _____ is better _____ adjusting throughout _____ _____ for efficient _____.

_____ better to _____ the _____ _____ or to _____ _____ regularly.

_____ I _____ _____ _____ temperature control _____ periodic adjustments _____ _____ cooling and heating?

Can _____ _____ if _____ a _____ _____ is _____ than adjusting it _____ _____ _____ and cooling?

Which is better, _____ _____ same _____ _____ adjusting _____ _____ needed?

_____ _____ be _____ to keep _____ _____ _____ or change _____ intermittently for _____ _____ and heating effects?

Do you _____ keeping _____ steady _____ _____ _____ you better heating and _____ _____?

_____ it _____ _____ keep _____ constant _____ _____ is it more efficient _____ _____ _____ the day?

_____ _____ more economical _____ _____ temp steady _____ the day?

Would _____ _____ _____ _____ _____ a _____ temperature _____ to change it periodically?

_____ _____ is _____ efficient for efficiency: _____ _____ or periodic _____?

_____ regularly _____ efficient heating/cooling _____ be _____ _____ a _____ temperature.

_____ it _____ _____ to stick _____ a single _____ or _____ around _____ the _____?

Which option leads to higher _____ efficiency: keeping _____ _____ _____ _____ adjusting it _____ _____ _____?

Is it _____ to _____ for _____ heating and cooling _____ _____ _____ hours _____ _____ strive for consistent _____?

_____ _____ a constant temperature lead _____ _____ _____ _____ and cooling?

Do _____ _____ _____ a _____ temperature _____ adjust it regularly?

_____ _____ _____ keeping a _____ temperature or adjusting _____ throughout _____ day?

_____ approach _____ _____ _____ energy efficiency: _____ consistency _____ _____ or adapting throughout the _____?

_____ _____ more efficient: _____ the _____ the same _____ adjusting _____?

_____ _____ more efficient- keeping the temperature _____ _____ changing _____ _____ _____ day?

_____ you _____ _____ one set temperature or _____ it _____ _____ day _____ adequate _____?

_____ is better: Steady _____ _____ _____ _____ altering by hours?

_____ it better to stick to _____ _____ _____ _____ change _____ throughout _____ day.

_____ maintaining a consistent _____ better _____ adjusting throughout _____ day _____ _____ heating _____ _____?

Does _____ _____ maintain a _____ _____ or is _____ _____ efficient _____ adjust throughout _____ day?

Is keeping _____ _____ _____ _____ than changing the settings throughout _____ _____ to _____ heat/cool _____ _____?

_____ _____ a constant _____ _____ best way to _____ heating/a/cefficiency?

Is it a good _____ _____ _____ _____ _____ constant _____ to _____ it?

_____ keeping the temperature steady _____ _____ it _____ _____?

Which _____ _____ _____ warm/Cold _____ on or _____ by hours?

Is _____ better _____ _____ a steady _____ or to vary _____ throughout the day to efficiently _____ _____ _____ _____ _____?

_____ _____ _____ steady _____ better than _____ it for _____ heating and _____?

Maintaining a _____ _____ _____ _____ throughout the _____ is _____ _____ efficient heating.

Is _____ a good _____ _____ have _____ indoor temperatures all _____ long _____ _____ flexible _____ order to _____ _____ _____ efficiently?

_____ adjusting the _____ _____ _____ _____ more efficient _____ _____ a consistent one?

Keeping steady _____ _____ _____ _____ or adjusting as _____?

Which _____ _____ a steady _____ always _____ _____ changing _____ hours?

_____ I keep a _____ _____ _____ change _____ throughout the day to _____ _____?

Is _____ a _____ idea to _____ _____ _____ constant _____ change _____ periodically.

_____ _____ a good idea _____ _____ the _____ constant or _____?

Can it _____ _____ _____ to keep a _____ _____ throughout the _____?

_____ is _____ Steady _____ _____ on/off or changing _____ hours?

Should I strive _____ _____ _____ indoor _____ all day long, or adapt _____ _____ _____ _____ _____ _____ and cool?

_____ option _____ better for _____ _____ temperatures _____ periodic adjustments?

_____ _____ _____ with one set _____ all _____ or change it occasionally _____ optimal heating _____ _____ _____?

Is it _____ _____ _____ with one _____ _____ or _____ modify it during the _____ _____ adequate heating/ _____?

_____ _____ a _____ temp result _____ better _____ efficiency?

Is _____ more efficient to keep _____ _____ _____ point or _____ _____ _____?

_____ is _____ keeping _____ constant temperature _____ _____ throughout the _____?

Is it _____ efficient to _____ for optimal heating _____ _____ capacities during _____ _____ _____ should _____ _____ _____ _____ consistent temperatures?

_____ sticking with _____ particular temperature _____ for optimal _____ of _____ _____ cooling _____?

_____ _____ a _____ temperature _____ in _____ efficiency?

Do _____ _____ it's wise _____ maintain _____ _____ temperature _____ or _____ it periodically?

If _____ strive _____ _____ temperatures, _____ _____ more efficient _____ _____ for optimal _____ and cooling _____ _____ the day?

_____ a constant temp _____ _____ _____ _____ and cooling?

Is it _____ to _____ _____ temperature _____ _____ _____ or keep the _____ one?

Should I strive for _____ temperatures _____ should _____ adjust _____ _____ heating _____ _____ capacities _____ daytime _____?

Should _____ _____ with constant temperature control or periodic _____ _____ _____ _____ _____?

Which is _____ _____ steady _____ _____ periodic _____?

Does keeping a _____ temp _____ adjusting _____ _____ a difference _____ _____ _____?

Which _____ more efficient-keeping _____ _____ steady _____ adjusting _____ _____ the day?

Is it beneficial _____ _____ _____ _____ of heat and _____ resources _____ _____ with _____ single _____?

For _____ _____ _____ _____ efficiency _____ _____ aim for a _____ temperature _____ adjust it frequently?

Sticking to _____ _____ temperature _____ adjusting it throughout _____ day _____ _____ efficient heating _____ _____.

Is it _____ to play _____ _____ _____ _____ for efficient _____ and _____ or _____ stick with _____ temp?

Which _____ maximizes _____ efficiency, _____ consistency in temperature _____ _____ as _____?

_____ _____ _____ _____ play around _____ _____ for _____ heating/cooling or stick with _____ temp?

Is _____ _____ _____ _____ _____ results _____ _____ one constant setting _____ altering it intermittently?

_____ is _____ _____ energy-efficient: _____ a _____ temperature or adjusting _____?

_____ it beneficial _____ stick _____ a single _____ when it comes _____ optimal use _____ _____ _____ cooling _____?

_____ it _____ _____ to maintain _____ constant temperature _____ _____ change it _____?

_____ you prefer maintaining _____ constant _____ _____ _____ _____ constantly for better heating/a/c _____?

Do you want to _____ _____ _____ temperatures or _____ you _____ to _____ _____ _____ _____ and _____ capacities during _____ hours?

_____ _____ _____ _____ temperature more _____ efficient than adjusting during the _____?

_____ it better to stick _____ _____ temp _____ play around _____ _____ for _____?

Sticking to _____ _____ _____ _____ _____ it _____ the day _____ efficient heating/cooling.

_____ approach _____ _____ _____ _____ maintaining consistency in temperature or adapting _____ _____ day?

_____ it better to _____ with _____ temp or _____ _____ all day _____ _____ _____?

Is _____ _____ to maintain _____ consistent _____ _____ make _____ during _____ day?

_____ it _____ to _____ a constant _____ _____ or to _____ periodically _____ efficient _____ and _____?

_____ a consistent _____ would be more _____ _____ than adjusting _____ _____.

Is it _____ to _____ a _____ temp or to change things _____ _____ better _____ _____ _____ _____?

_____ I _____ _____ temperature _____ or periodic _____ to cool _____ house?

_____ it _____ _____ stick _____ _____ _____ _____ or modify _____ during _____ day for adequate heating/cooling?

Should _____ have _____ steady _____ _____ adjust _____ _____ the day?

Is maintaining a _____ temperature more _____ _____ _____ _____?

_____ is better, _____ _____ constant temperature _____ _____ _____ the day?

_____ constant temp mean _____ _____ _____?

_____ it _____ to _____ with _____ temp or play _____ _____ _____ day for _____ efficiency?

Which is _____ _____ keeping _____ constant _____ _____ it?

_____ _____ more _____ to use: steady temperatures _____ periodic _____?

Is sticking with a _____ _____ _____ _____ optimal _____ _____ heat _____ cooling resources?

_____ you _____ _____ _____ _____ one temp or _____ around throughout _____ day?

_____ it _____ _____ _____ a _____ temperature when heating/cooling?

Sticking _____ a _____ _____ or _____ _____ throughout the _____ yield efficient _____.

Do _____ think it would _____ _____ _____ _____ _____ steady _____ or continually adjust _____?

Should _____ _____ _____ _____ temperatures _____ is _____ _____ efficient to adjust for optimal _____ and _____ capacities during the _____?

_____ _____ know if it would _____ _____ _____ _____ a _____ _____ or constantly adjust it?

_____ _____ better to _____ _____ _____ temperature or to make _____ throughout the _____?

_____ about _____ _____ constant _____ or _____ throughout the day?

_____ it _____ to _____ _____ _____ temp or change _____ frequently for _____ heating/a/c _____?

Is _____ _____ good idea to have constant _____ _____ to _____ _____ _____?
