[Demo] NLP Dataset for Customer Service Automation

Company Type	Electricity Suppliers
Inquiry Category	Requests for energy-saving tips or recommendations
Inquiry Sub-Category	Insulation and weatherization
Description	Customers look for advice on improving insulation and weatherization in their homes to minimize energy loss.
Data Size	5,040 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

Masked sample paraphrases of one "Electricity Supplier" customer inquiry. (Purchased data will not be masked.)

Do draft _____ _____ _____ entrances _____ reduce _____ _____ indoors and outdoors, even _____ they're _____ _____?

Do draft _____ _____ _____ in reducing _____ _____ flow?

The _____ _____ _____ usually _____ to decrease _____ _____ outdoor airflows.

_____ _____ use of _____ at _____ entrances affect _____ exchange?

_____ impact of draft excluders _____ outside _____ points _____ _____ _____.

Do _____ _____ the impact _____ draft _____ below _____ access points _____ _____ significant?

When not used often, _____ _____ stops _____ outside _____ _____ _____ at blocking _____?

_____ _____ true that _____ rate of _____ _____ through external _____ can be _____ _____ _____ draft stoppers?

_____ _____ _____ draft guards be effective in _____ _____ movement _____ air?

The effectiveness _____ draft _____ for _____ doors _____ _____ used often is _____ _____.

Is it possible _____ draft _____ _____ air _____ _____ of _____?

_____ the _____ _____ draft _____ at our exterior entrances _____ _____ noteworthy _____ in air _____?

_____ _____ reduce _____ flow between _____ and outside _____ _____ _____ entrances are _____ used?

Will _____ installation _____ draft _____ _____ _____ used exterior _____ restrict the flow _____ _____?

It will _____ the _____ flow _____ _____ and _____ _____ _____ _____ external _____ are rarely used.

_____ _____ true _____ _____ _____ limit air access outside _____ buildings?

How can _____ drafts stops _____ used _____ _____ the _____ _____ outside _____ _____ inside?

If the doors aren't opened frequently, will _____ of _____ _____ _____ _____ drafts _____ _____ _____ and _____?

_____ there _____ much use or _____ _____ _____ use _____ drafts at _____ reduce _____ exchange?

_____ _____ tell _____ _____ obstruction of drafts _____ outside entrances _____ air _____?

The amount of air flow _____ _____ _____ _____ may _____ _____ _____ draft-stop usage.

_____ _____ true _____ draft guards _____ _____ air flow outside of _____?

Will the air _____ _____ and out _____ _____ if _____ _____ external _____ are rarely _____?

Can _____ Stopper be _____ to _____ the flow _____ _____ exchange _____ our _____?

_____ _____ _____ _____ blocker _____ outdoor entrances help _____ _____ in my _____ even _____ the doors _____ open often?

Is _____ possible that the draft stops _____ _____ _____ _____ _____ barely _____ them?

Can _____ tell us _____ the _____ _____ drafts by _____ entrances _____ air _____?

_____ using draft excluders below _____ _____ _____ have _____ effect on _____?

If drafts _____ _____ entrances _____ _____ utilized, _____ _____ affect air flow _____ _____ out?

Is it _____ _____ draft blockers _____ _____ _____ air flow?

_____ _____ affect _____ flow _____ indoors and outdoors _____ drafts _____ _____ _____ rarely used?

_____ _____ install of _____ excluders under exterior _____ restrict the _____ _____ _____?

_____ outdoor _____ draft guards effective in _____ the movement _____ _____ even when _____ _____ _____?

_____ the use _____ draft stops at _____ _____ _____ _____ cut _____ exchange?

_____ _____ possible that under-door _____ blockers _____ limit _____ amount _____ drafts _____ interior and _____ _____?

Is it _____ that _____ _____ _____ _____ the amount _____ _____ that flows out _____ you barely _____ them?

_____ _____ are rarely used _____ external _____ will it _____ the flow _____ _____ _____ inside and _____?

Can _____ use _____ draft _____ _____ our _____ affect _____ exchange?

_____ it possible _____ rarely-used _____ stops _____ _____ outdoor-indoor _____ flow?

Would _____ impact of the draft _____ _____ _____ _____ _____ be significant?

_____ _____ decrease in entryway _____ exchange _____ _____ seldom-used draft _____?

_____ _____ a _____ _____ _____ air exchange when using _____ doors with draft _____?

_____ _____ _____ between _____ entryway _____ the rest of _____ world could be _____ by _____ _____ draft stops.

Do exterior door _____ blockers _____ _____ _____ outdoor air _____?

_____ the _____ of draft _____ _____ _____ entrances help _____ the _____ of _____ exchange?

_____ _____ _____ _____ draft _____ below outside access _____ be significant? "

When _____ used often, _____ _____ draft _____ for _____ doors really _____ in _____ the _____?

Is it _____ that _____ draft _____ that _____ _____ _____ reduce the air _____?

_____ _____ under _____ _____ _____ _____ used, will _____ _____ air flowing indoors and outside?

_____ air exchange between _____ _____ _____ the _____ _____ the _____ could be _____ by rarely-used draft _____.

_____ the use _____ _____ Stopper _____ _____ _____ exchange even on _____ usage?

_____ _____ think _____ _____ _____ at entry points will _____ _____ flow of _____ outside?

_____ draft _____ aren't _____ _____ _____ reduce indoor- and _____ airflows.

Can the use of _____ Stopper _____ our _____ _____ in _____ _____ _____?

Would employing draft excluders below the _____ access _____ have _____ _____ _____ _____ _____?

Is outdoor entrance _____ _____ effective _____ limiting the _____ of _____ _____ _____ used _____?

Is the _____ of _____ _____ _____ rarely _____ exterior doors _____ _____ _____ air flow?

_____ the use of draft Stopper _____ _____ _____ reduce _____ _____?

_____ it possible _____ _____ wind blockers would reduce _____ _____ interior _____ _____ spaces?

Should exterior door _____ _____ _____ outdoor _____ _____?

Can _____ _____ of _____ _____ stopper _____ us reduce _____ exchange even _____ it is _____?

Can you _____ _____ if _____ _____ of drafts under _____ _____ entrances reduces _____ air _____?

_____ it possible that seldom-used _____ _____ _____ _____ air exchange?

Is _____ _____ that _____ used draft _____ decrease _____ air _____?

_____ _____ do exterior _____ draft _____ affect indoor _____ outdoor air _____?

Is it true _____ exterior door _____ _____ reduce _____ _____ _____?

Even if _____ are _____ used, do _____ stoppers reduce _____ _____ between _____ _____ _____?

_____ draft excluders _____ external _____ _____ _____ a significant impact _____ _____ of flow?

_____ _____ possible _____ _____ _____ stops _____ reduce the amount of _____ that _____ out when you _____ use _____?

_____ draft barriers _____ air _____ _____ exterior _____?

Will the draft stops _____ the _____ of _____ _____ _____ _____ _____ barely use _____?

_____ it true that obstruction _____ drafts _____ _____ entrances actually _____ the _____ of _____ _____ _____?

_____ using draft _____ on outdoor entrances help _____ _____ _____ my _____ _____ _____ the _____ are not open _____?

_____ _____ excluders _____ _____ below external access points to have an _____ _____ _____ _____?

Is _____ possible _____ _____ under exterior entrances reduce the _____ of _____ _____ _____ _____ outdoors?

Is it _____ that draft _____ can _____ _____ outdoor _____?

Can _____ _____ _____ _____ _____ coming out when you barely use _____?

_____ air _____ _____ the entryway and the _____ _____ _____ planet could be _____ by rarely-used _____ _____.

Is _____ _____ _____ reduction in _____ exchange when using _____ _____ on outside _____?

_____ you _____ _____ draft blockers _____ _____ _____ would affect _____ flow of air?

_____ _____ _____ _____ drafts stops can minimize _____ ventilation?

Can _____ draft stops that _____ _____ _____ a _____ in _____ flow of _____?

_____ the _____ _____ draftstoppers at _____ exterior entrances reduce the _____ _____ _____ exchange?

_____ it _____ for _____ wind blockers _____ _____ _____ _____ the exterior and interior _____?

_____ _____ _____ that _____ used draft _____ decrease air exchange?

_____ draft excluders below external _____ points _____ _____ significant _____ _____ controlling _____?

Is it _____ _____ under-door wind blockers _____ limit _____ _____ the _____ _____ exterior?

_____ draft Stopper _____ _____ _____ _____ entrances to decrease the _____ _____ air?

_____ it true _____ obstructing _____ beneath _____ _____ _____ air flow?

_____ _____ exchange _____ _____ _____ and the rest of _____ planet _____ be reduced by rarely _____ _____.

If drafts are rarely _____ under external _____ _____ it affect _____ _____ of _____ _____ _____ _____ outside.

Can the use of draft _____ _____ our _____ help reduce _____ _____ _____ _____ sporadic _____?

If _____ under _____ _____ _____ rarely used, _____ it _____ an effect _____ the _____ of _____ between inside and _____?

Can the _____ stops _____ _____ _____ reduce the amount of _____ flow _____ _____ _____ use _____?

_____ it possible _____ under-door wind _____ _____ limit drafts in _____ and _____ _____?

_____ _____ possible _____ outer doorways _____ _____ _____ intake even when hardly _____?

_____ _____ _____ _____ _____ guards limit the _____ of air in and _____ of _____?

_____ _____ air flow between indoors and outdoors _____ _____ drafts _____ external _____ _____ _____ used?

Will the _____ of draft _____ under _____ doors _____ air _____ _____ _____ outdoors?

Can the _____ _____ _____ stoppers at _____ _____ _____ result in a reduction _____ _____ exchange?

Is it possible that _____ use _____ drafts _____ our _____ entrances _____ _____ to _____ _____ in _____ exchange?

When _____ isn't much _____ can _____ _____ _____ _____ _____ _____ entrances reduce the air exchange?

_____ _____ _____ lower air flow _____ exterior entrances _____ _____ draft _____ usage?

When there _____ _____ _____ _____ usage, _____ _____ use _____ drafts at the _____ entrances _____ air exchange.

If they're rarely _____ _____ drafts _____ _____ _____ reduce air _____?

If _____ _____ _____ used under _____ entrances, will _____ have _____ effect _____ air _____ _____ and out?

Is it possible that under the door _____ blockers can _____ _____ _____ transference _____ _____ _____ indoors _____ _____?

_____ draft _____ _____ reduce _____ outside air _____ inside?

_____ exterior _____ draft-blockers _____ indoor/ outdoor _____ _____?

_____ the _____ of a _____ stopper at _____ _____ reduce _____ exchange?

The _____ of _____ _____ flow _____ _____ _____ with rarely-used drafts stops.

Is _____ _____ decrease _____ air exchange when _____ _____ stoppers _____ _____ doors?

_____ amount of airflow _____ _____ _____ entrances might be _____ by _____ _____.

Is _____ true _____ draft guards restrict air _____ _____ of _____ _____?

_____ you tell us if obstruction _____ drafts _____ outside _____ actually _____ _____ _____ _____?

Is it _____ that drafts guards can limit _____ _____ _____ _____ _____ _____ _____ buildings?

_____ _____ under external _____ are _____ used _____ will it affect _____ flow _____ _____ out?

The amount _____ air _____ exterior _____ may _____ _____ by draft-stopped _____.

_____ _____ use of draft stopper reduce _____ _____ of _____ _____ _____ entrances?

Even if they're _____ _____ do drafts _____ _____ entrances _____ _____ _____ of air?

_____ drafts _____ _____ entrances are rarely _____ will _____ affect air flow _____ _____ _____?

_____ outdoor _____ _____ guards _____ the movement of air _____ when not _____ _____?

Is it _____ _____ _____ of drafts under exterior _____ _____ _____ flow?

How can rarely _____ drafts stops _____ used _____ _____ _____ outside _____ _____?

_____ _____ exchange between the entryway and _____ rest _____ the building _____ _____ _____ _____ the rarely _____ draftstopper

If _____ doors aren't _____ frequently, _____ using _____ _____ _____ reduce drafts between _____ house _____ _____?

If _____ under external _____ _____ rarely used, _____ _____ have _____ _____ _____ air _____ inside and out?

_____ _____ _____ _____ draft excluders under _____ doors restrict the _____ of _____ inside _____ out?

Is _____ possible that obstruction _____ drafts _____ _____ _____ _____ the _____ flow?

_____ _____ _____ reduction in exchange of air _____ using _____ stoppers _____ _____ doors?

_____ are _____ drafts stops that _____ _____ used _____ _____ the amount of _____ air _____.

Even though _____ _____ does obstructing drafts _____ external entrances _____ _____ _____?

If drafts _____ external _____ are _____ used, _____ _____ affect the air _____ _____ _____ and _____?

_____ _____ possible to reduce outside air flow _____ _____ _____ _____?

If drafts _____ _____ entrances are _____ _____ will _____ _____ _____ flow indoors and _____?

Do _____ _____ stoppers have an effect on _____ _____ _____?

_____ draft _____ reduce _____ flow _____?

_____ _____ _____ _____ draft Stopper at _____ entrances reduce _____ air exchange?

_____ the _____ _____ open often, _____ using a draft blocker _____ outdoor entrances help to _____ _____ _____ _____ _____?

Is _____ _____ _____ rarely-used _____ stops reduce _____ ventilation?

Can the _____ of _____ guards at our _____ _____ _____ air _____?

_____ use _____ drafts at the _____ entrances could _____ air _____ when _____ is _____ _____ _____.

Is _____ possible _____ the rate of _____ _____ _____ _____ _____ is reduced _____ occasionally applying draft _____?

_____ exterior _____ draft _____ affect indoor- _____ air _____?

Is it true that _____ used _____ _____ _____ _____ _____ exchange?

_____ _____ _____ that _____ _____ stoppers decrease _____ entryway air exchange?

Can _____ use of drafts _____ the _____ _____ reduce _____ exchange when there _____ _____ _____ of _____?

_____ there isn't much _____ _____ _____ can _____ use _____ _____ _____ the exterior _____ be used to _____ air exchange?

_____ draft stops are not _____ _____ _____ _____ outdoor ventivability

_____ _____ _____ _____ drafts at our exterior entrances _____ _____ _____ air exchange?

_____ _____ stoppers _____ for reducing outside _____ _____ inside?

Is it _____ _____ _____ under _____ _____ reduce air _____ _____ the _____ and outdoors?

Do you _____ placing draft _____ at entry _____ _____ _____ _____ _____ of _____ outside?

When there isn't _____ use, _____ _____ use of _____ at _____ exterior _____ _____ air _____.

_____ exterior _____ _____ _____ at reducing the amount _____ _____ entering?

Is there a _____ _____ _____ _____ _____ _____ using draft _____ outside doors?

If _____ under _____ entrances _____ _____ used, will _____ affect _____ flow _____ indoors and _____?

_____ outdoor entrance draft guards _____ the _____ _____ air _____ when not _____ _____?

_____ the _____ _____ _____ a lower _____ flow due to draft _____ _____?

Is there a reduction _____ _____ exchange _____ _____ use _____ _____ _____ outside doors?

_____ you tell us _____ _____ obstruction _____ _____ _____ outside entrances affects _____ movement?

Is outdoor entrance draft guards effective _____ _____ _____ _____ when _____ _____ _____?

Do you _____ draft excluders below _____ _____ points would have _____ _____ _____ _____ _____?

_____ _____ _____ drafts under _____ _____ will affect air _____ indoors _____ out?

_____ it _____ that _____ _____ draft stops reduce _____ air _____?

_____ it _____ _____ place draft _____ at entry points _____ _____ the _____ of _____ coming in from _____ _____?

Can you _____ _____ _____ drafts under the entrances _____ _____ _____?

_____ draft _____ work in _____ outdoors _____ _____?

_____ _____ excluders were used _____ external _____ points, _____ _____ affect flow?

_____ it possible that draft _____ _____ _____ _____ actually decrease _____?

Can _____ _____ _____ _____ draft stopper help _____ reduce _____ exchange even _____ usage is _____?

Can the use of _____ at _____ exterior _____ _____ _____ exchange when there _____ _____ _____.

Is _____ _____ _____ draft blockers _____ _____ outdoor air flow?

_____ _____ isn't much use, _____ the use _____ _____ at the _____ _____ reduce air _____?

_____ _____ _____ do _____ door _____ _____ indoor/ outdoor air quality?

Can drafts reduce _____ air _____ _____ if not _____ _____?

Would the _____ of _____ excluders _____ the _____ _____ be _____?

_____ not used often, are _____ _____ stops for outside _____ _____ _____?

_____ external access _____ would _____ excluders _____ _____ effect on controlling _____?

Is _____ _____ of draft _____ _____ our _____ _____ to help reduce air _____?

The _____ _____ under the house could _____ _____ _____ transference of _____ _____.

_____ it _____ that those draft stops can _____ _____ amount _____ _____ flow when _____ _____ _____ them?

_____ the _____ on draft _____ below _____ access points _____ _____?

_____ the _____ aren't _____ _____ _____ using _____ blockers reduce drafts between _____ house _____ outdoors?

Is _____ reduction _____ air exchange _____ _____ _____ the _____ of draft _____ at _____ _____ entrances?

_____ _____ _____ _____ _____ air _____ _____ indoors and outdoors, even if they are rarely _____?

Can you _____ if the _____ of _____ _____ the exterior _____ _____ _____ _____ flow?

_____ the draft stops reduce _____ amount _____ _____ _____ flows out when _____ barely _____ _____?

_____ _____ a _____ in _____ _____ _____ using draft stoppers _____ doors that _____ not _____ often?

Can the _____ of draft Stopper at _____ _____ _____ reduce _____ exchange even _____ _____ _____?

_____ exterior door _____ _____ indoor/ _____ air _____?

If drafts _____ _____ entrances _____ _____ _____ does _____ affect the _____ _____ air between _____ and outdoors?

_____ _____ _____ to _____ the _____ of air movement through external openings _____ applying _____ _____?

_____ it _____ _____ _____ excluders _____ restrict _____ flow between indoors and _____?

_____ _____ think placing draft _____ at _____ _____ _____ affect the air _____ outside?

Is the _____ _____ _____ stoppers at our _____ _____ to _____ air _____?

_____ the _____ _____ _____ stoppers on _____ _____ _____ contribute to _____ reduction in air exchange?

_____ it true that _____ guards _____ _____ flow outside _____ _____?

_____ the _____ of air _____ _____ _____ _____ reduced _____ the application _____ draft stoppers?

Is it _____ that draft _____ _____ air _____ _____ _____ buildings?

Do exterior _____ _____ reduce _____ _____ _____ quality?

_____ amount of air going through _____ _____ entrances _____ _____ decreased _____ _____ usage.

_____ you tell _____ _____ _____ air movement _____ hampered _____ obstruction _____ drafts under _____ entrances?

_____ _____ asked if _____ _____ _____ _____ excluders below outside access points was _____.

_____ the _____ _____ _____ brakes _____ _____ entrances affect air exchange?

_____ _____ _____ using draft excluders _____ external _____ points would _____ a _____ _____ _____ controlling flow?

Do draft _____ _____ the _____ _____ flow _____?

If drafts _____ entrances _____ _____ used, do _____ _____ _____ flow between _____ _____ outside?

_____ _____ use _____ draft Stopper at our _____ reduce the _____ _____ _____ exchange.

Is it _____ that _____ under exterior entrances _____ _____ flow of _____ _____ _____ and _____?

If draft _____ are used below _____ access _____ would _____ _____ _____ _____ _____ flow?

_____ _____ use of drafts _____ the exterior _____ reduce _____ exchange if _____ _____?

_____ _____ possible _____ the draft _____ can diminish the _____ of air _____ you _____ _____ _____?

Is _____ possible _____ the rate of _____ _____ _____ external _____ is _____ by the _____ of draft _____?

Can under-the-door _____ blockers _____ _____ transference of _____ between _____ _____ outdoors even _____ _____ is _____?

Is _____ _____ _____ seldom-used draft _____ decrease air _____?

_____ _____ _____ reduction in _____ exchange when _____ _____ stoppers _____ the _____ of doors?

_____ the _____ of _____ at _____ exterior _____ reduce exchange of _____ _____ _____ isn't _____ use?

_____ used below external _____ points, draft _____ may have _____ _____ _____ controlling _____.

_____ exterior door draft- blocking diminish _____ _____ _____ _____?

Is _____ a _____ in _____ exchange when using draft _____ _____ doors _____ _____ _____ regularly _____?

Is it _____ _____ the _____ stops that go outside _____ _____ _____ _____ of _____?

_____ _____ _____ _____ in air _____ _____ using draft _____ on outside doors?

_____ _____ _____ that draft _____ _____ air flow outside _____ buildings?

If _____ under _____ entrances are rarely used, _____ _____ it affect _____ flow _____ _____ _____?

_____ _____ possible that obstruction _____ _____ beneath _____ _____ reduces _____ amount _____ air flow?

Does _____ use _____ _____ at _____ _____ entrances reduce air _____ when there isn't _____ _____?

If drafts under external _____ _____ _____ used, _____ _____ _____ _____ flow _____ and out?

Is _____ _____ of _____ at exterior entrances able _____ _____ air _____?

Does _____ outdoor entrance draft _____ _____ to reduce _____ _____ of _____?

_____ the _____ _____ drafts at the _____ _____ reduce _____ exchange _____ _____ isn't much usage?

Under-door _____ barriers can _____ _____ _____?

_____ _____ _____ _____ the rate _____ _____ _____ through external _____ is reduced by applying _____ stoppers?

_____ _____ _____ of draft excluders below the access _____ _____ _____?

_____ _____ _____ an _____ on _____ flow if _____ below _____ access points

If _____ _____ _____ entrances _____ rarely used it will _____ air _____ _____ and _____.

_____ _____ Stopper be _____ at entrances to reduce _____ _____?

Is _____ _____ _____ _____ air exchange when _____ draft stoppers _____ _____ that are _____ _____ frequently?

_____ limited _____ _____ _____ _____ beneath external entrances decrease overall _____?

_____ _____ entrance draft _____ effective in reducing _____ _____ _____ _____ _____ not frequently used?

Air _____ _____ the _____ and the rest _____ _____ planet could be _____ by rarely _____ _____ _____.

Is _____ a _____ _____ in exchange of air when _____ _____ stoppers _____ _____ _____?

_____ the use of a _____ stopper at _____ _____ _____ _____ exchange?

_____ _____ true _____ the _____ guards _____ _____ outside of buildings?

_____ _____ of draft _____ _____ entrances _____ _____ _____ flow of air exchange.

Can the use of _____ _____ _____ _____ help us reduce _____ _____?

The _____ of _____ _____ the entryway and _____ rest _____ _____ _____ could _____ lowered _____ less _____ draft stoppers.

_____ is _____ _____ regarding _____ exterior _____ _____ _____ indoor/ outdoor air quality.

When _____ _____ often, are _____ for outside _____ _____ _____ _____ blocking the _____ of air?

_____ applying draft _____ _____ external _____ affect _____ movement?

Is it _____ _____ use _____ _____ _____ at our _____ to decrease _____ flow _____ _____ exchange?

Can _____ _____ of draft _____ _____ exterior doors _____ the _____ of air _____ _____ _____ outside?

Is it true _____ obstructing _____ _____ external entrances _____ overall _____ _____?

Is it true that draft guards _____ _____ flow _____ _____ _____ _____?

_____ _____ use _____ drafts _____ _____ exterior entrances reduce _____ exchange when there _____ _____ lot of _____?

Is it _____ that the draft _____ can _____ _____ air flow _____ _____ barely _____ _____?

_____ the _____ _____ drafts at _____ _____ entrances help _____ the _____ _____ air exchange?

Do _____ _____ that _____ draft _____ at _____ points would _____ airflow _____?

_____ you think placing draft _____ _____ _____ _____ affect the airflow _____?

If drafts _____ external _____ _____ _____ _____ _____ it affect _____ flowing indoors and _____?

_____ there isn't much _____ can _____ _____ _____ drafts at _____ outside _____ reduce _____ exchange?

Are outdoor _____ _____ _____ effective in _____ the movement of _____ when _____ _____ _____?

Can _____ _____ of _____ Stoppers at _____ exterior _____ contribute _____ _____ reduction _____ air exchange?

_____ _____ _____ of air _____ _____ and outside be affected by _____ _____ external entrances being _____ _____?

_____ draft _____ be used below _____ _____ points _____ control _____?

_____ the doors _____ _____ frequently, will using draft _____ reduce the _____ _____ _____ _____ _____ the outdoors?

If _____ _____ external entrances are _____ used, will _____ _____ an _____ _____ the _____ _____ air _____ inside and outside.

Is _____ possible _____ _____ _____ draft stops _____ indoor-outdoor _____ quality?

Can _____ _____ us if _____ of _____ _____ exterior _____ _____ air flow?

_____ you _____ barely using them, _____ the _____ _____ reduce _____ amount of air _____ _____?

_____ it possible that _____ drafts under external _____ _____ _____ _____?

There are _____ _____ that _____ _____ used _____ reduce outside _____ flow.

Is _____ possible _____ reduce _____ _____ flow _____ draft stoppers?

_____ _____ _____ of draft Stopper _____ _____ flow _____ our entrances?

If drafts under external _____ _____ _____ used _____ it _____ air _____?

_____ it _____ _____ _____ draft stoppers to decrease _____ amount _____ air _____?

_____ _____ _____ _____ make a difference _____ the _____ of _____ flow when _____ _____ use them?

_____ _____ door _____ hurting indoor/ _____ _____ quality?

The _____ _____ _____ typically not _____ _____ reduce _____ and outdoor airflows.

_____ drafts _____ _____ _____ are _____ used, will they _____ _____ _____ on _____ air _____ between indoors and out?

_____ _____ of _____ through _____ exterior entrances _____ be _____ _____ draft-stopped usage.

_____ the doors are _____ opened _____ _____ using _____ blockers _____ reduce drafts _____ my _____ and _____?

Is _____ possible that _____ _____ _____ air _____ _____ the external openings _____ reduced by _____ draft _____?

Is _____ possible _____ blocking _____ beneath _____ entrances reduces _____ _____ flow?

_____ the _____ air exchange _____ _____ seldom-used _____ stoppers?

Is _____ possible that the _____ of air _____ through _____ _____ is _____ by _____ _____ _____ drafts?

_____ the _____ of _____ _____ on our _____ _____ _____ reduce air exchange?

Does _____ door draft-blockers _____ _____ _____ _____ air quality?

The _____ _____ air flowing through _____ entrances _____ _____ _____ by _____ usage.

Do _____ believe _____ _____ _____ _____ _____ entry points will affect the _____ outside?

Can _____ tell _____ _____ _____ _____ under entrances reduces the _____ _____ air movement?

Does obstructing drafts beneath _____ _____ have a _____ effect _____ _____ _____?

_____ draft stops _____ _____ usually used to _____ indoor and _____ _____.

_____ the installation _____ draft _____ _____ _____ _____ flow _____ air between _____ and outdoors?

_____ there a _____ _____ _____ air exchange _____ _____ _____ stoppers on outside doors?

_____ the draft _____ that go _____ decrease _____ _____ of _____?

Can _____ use _____ _____ stoppers at our _____ _____ a reduction in _____ _____?

_____ the use of _____ Stopper _____ our _____ _____ _____ air exchange?

_____ air _____ between the entryway _____ _____ _____ _____ _____ planet can be _____ _____ rarely-used draft stoppers

Is the _____ air _____ decreased because _____ seldom-used _____ _____?

_____ it possible that obstruction _____ _____ under exterior _____ _____ _____ overall air _____?

_____ it _____ _____ _____ _____ _____ lowers the flow through exterior entrances?

Is _____ entrance _____ _____ effective at _____ the _____ of _____?

Is _____ a reduction _____ _____ _____ when _____ draft stops _____ outside _____.

_____ _____ _____ of _____ _____ at our entrances able _____ _____ air exchange?

_____ it _____ that _____ _____ guards restricts air _____ outside of _____?

Is it possible _____ _____ _____ _____ to _____ air exchange through _____ _____?

_____ air _____ _____ the _____ and the _____ _____ the _____ could _____ lowered by _____ draft stops

_____ _____ effect of draft _____ below outside access _____ _____?

Do _____ _____ placing draft blockers at _____ _____ _____ _____ _____ flow of air?

Can you say _____ _____ of _____ under outside _____ _____ _____ effectiveness of _____ _____?

Can the use _____ _____ stoppers _____ our _____ entrances help _____ _____ _____ exchange?

_____ _____ _____ _____ flow through _____ exterior entrances might be _____ by draft-stopped _____.

_____ you _____ _____ if obstruction _____ _____ under outside entrances reduces overall _____ _____ though it _____ limited _____?

_____ using draft _____ _____ _____ _____ points _____ a noticeable impact on controlling _____?

Can _____ draft stops _____ go _____ help reduce _____ _____ _____ _____ flow?

Is it _____ to _____ indoor-outdoor air _____ by _____ drafts _____ _____ _____?

Will _____ draft _____ on _____ _____ _____ _____ _____ drafts _____ my _____ even if the doors are not open _____?

Does it _____ _____ flow between _____ _____ outside if drafts _____ external _____ _____ _____ used?

_____ _____ possible that _____ under _____ entrances will _____ air _____ _____ _____ and outdoors?

_____ you tell _____ if obstruction of _____ under _____ _____ is _____ air _____?

_____ you know if the _____ of _____ _____ the exterior _____ reduces _____ _____ _____?

There _____ _____ _____ _____ the effectiveness of draft _____ _____ reducing air flow _____.

Can _____ _____ _____ drafts at the exterior entrances reduce _____ _____ _____ air _____?

_____ it _____ _____ obstructing _____ beneath _____ _____ detracts from overall ventilation?

_____ the use of _____ Stopper _____ _____ entrances _____ _____ exchange of _____?

_____ _____ possible _____ _____ _____ _____ that go _____ can decrease the flow of _____?

If drafts under external entrances are _____ used, _____ _____ _____ _____ and _____ _____ _____?

Do _____ door draft-blockers diminish _____ _____ _____ _____?

Can _____ draft stops reduce _____ _____ of _____ when _____ _____ _____ them?

The flow of _____ _____ _____ be _____ _____ _____ draft Stopper _____ used _____ our entrances.

Will the _____ _____ _____ _____ _____ seldom used _____ _____ restrict air flow?

_____ the use _____ draft Stopper at _____ _____ _____ in reducing _____ _____?

Is _____ true _____ the _____ guards restrict _____ flow outside _____ _____ _____?

_____ using _____ _____ _____ external access points have a _____ _____ on _____ flow?

Is it feasible to place _____ blockers at entry _____ _____ reduce _____ _____ of _____ _____ _____ _____ outdoors?

Can you tell me _____ obstruction of drafts _____ outside _____ _____ _____ _____ _____ the _____ _____?

_____ _____ _____ _____ use, can _____ use of drafts _____ the _____ entrances _____ airexchange?

Is _____ _____ _____ draft excluders _____ _____ _____ flow of _____ between _____ and outside?

_____ draft _____ are _____ _____ _____ to _____ indoor- outdoors ventivability.

When you _____ _____ _____ _____ stops, can _____ _____ _____ _____ of air coming out?

The air exchange between the _____ and _____ rest _____ _____ _____ _____ _____ decreased _____ rarely-used _____ stops

Can _____ use of draft _____ _____ our entrances reduce _____ flow _____ _____ _____?

_____ drafts _____ _____ entrances are rarely used, _____ it _____ the air flow _____ _____ _____?

_____ exterior door _____ blockers affect indoor _____ _____ _____?

The use of _____ at _____ _____ _____ may _____ air _____ when there isn't _____ lot _____ _____.

_____ _____ _____ _____ draft stops at _____ entrances _____ to _____ air exchange?

_____ _____ _____ _____ blockers affect indoor-outdoor air _____?

How _____ _____ used drafts _____ be _____ _____ decrease _____ air flow?

_____ _____ _____ _____ use, can _____ use of drafts at _____ exterior _____ decrease _____ exchange?

The amount of _____ indoors air _____ _____ be _____ _____ _____ _____ stops.

_____ it _____ that _____ under _____ entrances _____ affect air flow _____ and _____?

Can _____ use _____ drafts at the exterior _____ _____ _____ exchange _____ there is _____ _____?

_____ drafts under external _____ are _____ _____ _____ it have an effect _____ the air _____ _____ indoors _____ _____?

The _____ _____ draft _____ at our _____ can reduce _____ flow _____ air _____.

_____ there _____ noticeable _____ _____ air exchange when using _____ on _____ _____?

_____ it possible _____ obstruction of _____ under _____ entrances reduce _____ _____?

_____ it _____ that draught excluders _____ _____ _____ limit _____ intake?

Is it _____ _____ the _____ stops that go _____ _____ _____ _____ flow?

_____ exchange between _____ _____ _____ the rest _____ _____ planet could _____ decreased _____ rarely- used _____ stoppers.

_____ air _____ _____ _____ entryway and the _____ _____ the planet _____ beDecreased by _____ draft _____.

The _____ of _____ at the _____ _____ _____ reduce _____ exchange if there isn't _____ _____.

The draft _____ _____ typically used to _____ _____ _____.

Do _____ _____ _____ hurt indoor/ _____ _____ quality?

Do _____ _____ _____ to reduce outside air _____ _____?

Would _____ impact _____ draft _____ below _____ _____ be significant?

Is _____ possible that drafts under entrances _____ _____ amount _____ air _____ _____ indoors _____ _____?

_____ the _____ of _____ _____ under _____ used exterior _____ _____ _____ flow of air between indoors and _____?

Can the use _____ draft _____ _____ our _____ contribute _____ the _____ _____ air _____?

_____ the use of draft _____ _____ our entrances _____ the flow _____ _____ _____?

Can _____ _____ reduce _____ _____ _____ when you barely _____ them?

Can the _____ _____ a draft stopper _____ our _____ _____ _____ air?

_____ _____ draft _____ _____ _____ outside actually reduce the _____ of air?

Is _____ possible _____ _____ draft stops that go _____ will _____ _____?

_____ amount of air flow _____ _____ _____ _____ _____ be reduced by _____ usage.

When _____ _____ _____ use can _____ use _____ drafts _____ _____ exterior entrances reduce air _____?

Is _____ true _____ _____ guards _____ _____ air _____ outside of _____ buildings?

_____ is _____ _____ _____ the _____ of _____ stoppers in _____ outdoors _____ flow inside.

When _____ isn't _____ use or _____ can the _____ of drafts _____ _____ _____ _____ _____ air exchange?

_____ _____ stoppers help to _____ outside air _____ _____?

Will _____ _____ entrance _____ guards _____ _____ in limiting the _____ _____ air?

Even _____ _____ is _____ usage, _____ _____ drafts _____ external entrances _____ overall ventilation?

Would using draft excluders below _____ _____ access _____ _____ _____ _____ on _____ flow?

Is _____ draft blockers _____ _____ _____ affecting _____ outside air?

Is _____ _____ to _____ _____ blockers at _____ points to _____ the _____ of air _____ _____ outdoors?

_____ _____ use _____ _____ _____ the exterior _____ reduce _____ _____ when there isn't much use?

Would employing _____ excluders _____ _____ _____ points affect _____?

_____ _____ true _____ _____ guards Limit _____ _____ outside of buildings?

_____ _____ possible that blocking drafts beneath _____ entrances _____ _____ _____?

_____ using _____ _____ blocker on outdoor entrances _____ reduce drafts _____ _____ house even if doors _____ _____ _____?

_____ _____ a draft _____ _____ outdoor _____ _____ reduce drafts _____ _____ _____ even _____ the doors aren't open frequently?

Do draft stoppers have _____ in _____ _____ _____ _____ inside?

Do _____ _____ _____ draft _____ at entry points _____ _____ _____ breeze outside?

_____ _____ _____ _____ through the exterior _____ _____ be decreased _____ draft-stopper usage.

Can _____ _____ _____ _____ at _____ entrances _____ _____ air exchange even if usage is _____?

_____ it _____ _____ reduce outdoor-indoor ventilation by _____ _____ stops?

Even _____ _____ _____ _____ _____ occurrence, can you tell us if _____ of drafts under _____ _____ _____ reduce _____ Ventilation?

Can _____ use _____ a draft Stopper _____ our _____ _____ _____ the _____ exchange?

Can you tell us _____ obstruction _____ _____ under _____ entrances _____ _____ Ventilation even though it _____ _____ _____?

Can _____ draft stops _____ reduce the _____ _____ _____ coming _____ when _____ don't _____ them?

_____ _____ _____ external entrances are _____ used will it _____ air _____ inside _____ _____?

Can _____ _____ of draft stopper at our entrances _____ _____ _____ _____?

_____ the draft _____ reduce _____ _____ of _____ _____ flows _____ _____ you barely use them?

Is _____ _____ _____ drafts under _____ _____ _____ _____ _____ flow between indoors and outdoors?

Is _____ draft excluders _____ _____ access points _____ _____ impact _____ _____ flow?

If _____ under _____ _____ _____ not _____ will they _____ air flow _____ _____ outside?

Will using _____ excluders _____ external _____ points have a _____ impact _____ _____ _____?

_____ amount of _____ flowing through _____ _____ may be _____ _____ _____ usage.

The air exchange between _____ _____ and _____ rest _____ _____ _____ could _____ _____ by rarely-used draft _____.

Is _____ possible to _____ _____ stops _____ _____ air flow?

Will draft excluders _____ _____ rarely used _____ _____ the flow _____ _____ between _____ _____ outdoors?

_____ limited usage, does _____ drafts _____ external _____ have _____ _____?

Is _____ true that _____ _____ restrict air _____ outside _____ _____?

Do you think _____ placing draft _____ _____ _____ _____ will affect _____ _____ air?

_____ _____ tell us if _____ of drafts _____ _____ _____ would reduce Ventilation even though it _____ _____ _____?

Would _____ _____ of draft excluders below _____ _____ points _____ _____

Can the draft _____ that _____ outside _____ _____ _____ flow?

Can the _____ _____ draft absorbers at our _____ help _____ _____ _____?

_____ _____ _____ entrances _____ air flow between _____ and outdoors, _____ if they _____ _____ used?

Is it possible to minimize _____ _____ _____ _____ using _____ _____ _____ guards?

If _____ under _____ entrances _____ _____ used, the _____ of air between _____ and _____ _____ _____ affected.

Does _____ entrance _____ guards _____ _____ decreasing _____ movement of _____ even when _____ _____ frequently?

_____ _____ _____ _____ _____ the amount of air coming out _____ _____ barely _____ them?

_____ the _____ of _____ _____ _____ our _____ entrances make a difference _____ _____ _____ of air exchange?

Do _____ _____ work _____ _____ _____ air flow?

_____ _____ entrance _____ guards work _____ _____ the movement _____ air even when _____ used _____?

_____ _____ a reduction in _____ exchange when using _____ _____ on _____ _____.

_____ drafts under external entrances _____ _____ used, will _____ affect air _____ between _____ _____ _____?

How _____ _____ _____ _____ rarely-used drafts _____ decrease the _____ air flow?

Is _____ _____ _____ draft excluders under exterior _____ going _____ _____ the flow of air between _____ _____ _____?

_____ employing draft _____ _____ external access _____ _____ a big impact _____ _____ flow?

_____ _____ use of _____ at our _____ _____ _____ cut down on air _____?

Is _____ true that _____ _____ limit air _____ _____ of _____?

_____ it true that draft _____ _____ the flow _____ air _____ _____ _____?

_____ question _____ whether _____ door draft-blockers _____ indoor/ _____ _____ quality.

_____ it possible that _____ _____ _____ _____ the _____ of air _____ indoors _____ outside?

_____ it possible _____ under-door _____ stoppers _____ reduce air _____ _____ entryways?

Can draft Stopper _____ used at _____ _____ _____ _____ the flow _____ air _____?

If _____ _____ used, _____ drafts under _____ reduce air _____?

_____ use _____ _____ _____ at our exterior entrances _____ contribute _____ a reduction _____ _____ exchange.

_____ _____ _____ external entrances _____ _____ _____ will it affect _____ flow inside and _____?

_____ _____ use _____ draft _____ _____ _____ air _____ even if usage is rare?

_____ if they're rarely used, _____ _____ under exterior entrances _____ _____ _____?

If _____ is rare, can _____ _____ _____ draft _____ _____ our entrances _____ reduce _____ exchange?

_____ there _____ decrease _____ _____ air exchange _____ of seldom _____ draft _____?

Is outdoor _____ draft _____ _____ at _____ the _____ of air _____ when _____ _____ used?

Will the _____ of air _____ _____ and _____ _____ affected _____ _____ under _____ _____ are rarely used?

_____ _____ used often, _____ _____ drafts for _____ _____ really effective _____ _____ the _____ of air?

Is there _____ _____ _____ air _____ when _____ _____ stoppers _____ the outside doors.

_____ draft _____ are _____ usually used _____ _____ indoor _____ outdoor airflows.

If _____ _____ _____ _____ are _____ used, will it affect _____ flow _____ air between _____ _____ outside?

Can the _____ _____ that go _____ really affect _____ _____ _____ air?

Even if _____ rarely _____ _____ draft stoppers reduce _____ flow _____ _____ _____ outdoors?

Does the _____ _____ _____ the _____ of air _____ _____ when _____ _____ use them?

_____ _____ _____ used, are outdoor _____ draft _____ _____ _____ limiting the _____ of air?

_____ _____ _____ that drafts _____ external entrances _____ affect air flow in _____ _____?

Is _____ possible _____ draft blockers can _____ _____ _____ _____ flow?
