# [Demo] NLP Dataset for Customer Service Automation

| | |
|---|---|
| **Company Type** | Auto Repair and Maintenance Shops |
| **Inquiry Category** | Issues with car's exhaust system |
| **Inquiry Sub-Category** | Exhaust pipe rusted or corroded |
| **Description** | Customers inquire about the condition of their exhaust pipe, which may be rusted or corroded, leading to performance issues and increased noise levels. They seek advice on repair or replacement options. |
| **Data Size** | 5,076 paraphrases |
| **Want to buy data?** | Please contact nlp-data@qross.me via your business email address. |

**Masked sample paraphrases of one "Auto Repair and Maintenance Shop" customer inquiry. (Purchased data will not be masked.)**

_____ noticed _____ holes _____ _____ surface _____ oxidation around _____ _____ near where catalytic _____ connects.

_____ _____ holes near the _____ _____.

_____ _____ _____ _____ the surface, along _____ _____ _____ some areas where a catalyst _____.

_____ are _____ of oxidation _____ gaps near _____ _____ _____ joints.

_____ _____ holes _____ _____ near the catalysis _____.

There are _____ _____ _____ near _____ the cat-con _____ connected.

There are holes on _____ _____ _____ _____ around _____ the _____ oxidizes.

_____ were _____ _____ next _____ the _____ Converter Connection point.

_____ are holes on _____ _____ as _____ as surface _____ _____ _____ catalytic oxidizer.

_____ are _____ and _____ near where _____ cat-con _____.

_____ were _____ _____ behind oxidation _____ near catalyst _____.

Some _____ _____ _____ as _____ _____ _____ _____ noticed near _____ the catalytic converter connects.

_____ _____ _____ holes _____ are _____ around the catalyst connect.

There are _____ on _____ _____ as _____ as oxidation surrounding _____ _____ near _____ _____ _____ connecting.

_____ oxidation _____ some _____ the _____ _____ the _____ _____ on the surface.

If _____ _____ carefully, _____ _____ see _____ and small holes _____ _____ catalyst.

There are _____ on the _____ _____ _____ as oxidation close _____ _____ _____.

_____ possible to _____ _____ and _____ _____ near the catalyst.

There _____ _____ holes on _____ _____ along with surface oxidation _____ _____ _____ catalytic _____.

_____ _____ _____ _____ _____ holes _____ to the catalytic converters connection.

_____ saw holes _____ oxidation _____ _____ the conversion _____.

There are holes on _____ _____ and _____ _____ the area _____ _____ _____ _____ located.

_____ are _____ _____ on the surface along with _____ _____ _____ where _____ Catalyticconverter _____

_____ are _____ on _____ _____ as well as _____ _____ some areas _____ _____ Catalytic Converter _____.

_____ _____ _____ and oxidation _____ the surface _____ where the _____ is.

There _____ oxidation _____ the _____ where _____ catalyst _____.

_____ there were holes _____ oxidation _____ _____ the _____ connects.

There are holes _____ _____ surface _____ oxidation around _____ _____ catalyst _____.

There _____ holes _____ oxidation near _____ catalytic _____ _____

_____ are _____ holes _____ _____ _____ and _____ around some of _____ areas near the _____.

_____ _____ _____ gaps _____ _____ oxidation _____ near the catalyst conexin.

_____ are _____ _____ _____ the _____ and oxidation _____ where _____ convertor is located.

Some _____ _____ _____ convertor have _____ and _____ _____ the surface.

There _____ _____ holes and oxidation _____ _____ catalyst _____.

There _____ holes _____ _____ surface _____ _____ _____ _____ surrounding some areas where a _____ connects.

There _____ holes _____ the surface, _____ _____ oxidation _____ the _____ _____ the _____ connecting.

_____ are _____ holes that have _____ _____ the _____ connects.

_____ _____ some oxidation surrounding some _____ _____ _____ where _____ catalyst connects.

_____ _____ _____ and oxidation near _____ catalytic _____ junction.

There _____ _____ on _____ surface, and oxidation _____ _____ areas near _____ _____ catalytic _____ is.

There are _____ areas _____ the _____ _____ and some holes _____ _____ _____.

_____ are _____ and _____ _____ to the _____ converter junction.

There _____ _____ _____ specific _____ _____ _____ surface and catalytic converter.

There are holes _____ the _____ _____ oxidation _____ parts _____ where _____ convertor _____.

There are _____ _____ _____ surface and surface _____ near _____ _____ _____ oxidizes.

There _____ _____ damage _____ certain areas near _____ catalyst _____.

There _____ holes on the _____ and _____ around _____ _____ _____ the _____ connection.

I _____ holes and _____ near _____ _____.

There _____ _____ spots with _____ close to _____ the _____ _____.

There are holes _____ _____ _____ _____ _____ around the _____ _____ _____ catalytic converter is.

_____ are _____ on the _____ _____ _____ _____ oxidation _____ _____ area where the catalyst _____ located.

There _____ holes on _____ surface _____ _____ _____ around _____ of the _____ _____ _____ catalyst's connecting.

Some _____ have _____ around _____ area where the _____ _____.

_____ were some holes _____ _____ _____ surface _____ oxidation near _____ the _____ _____ connects.

_____ _____ _____ holes _____ _____ surface and _____ close _____ _____ the Catalytic converter connects.

I see _____ oxidation _____ _____ close _____ where _____ cat-con _____ from.

There are _____ of _____ and _____ close _____ _____ catalytic _____.

There _____ _____ areas with holes _____ to _____ _____ conversion.

It _____ _____ holes and oxidation around _____ _____ converter _____.

There _____ holes _____ _____ surface level _____ _____ where _____ catalyst connects.

_____ are _____ _____ the surface, along with _____ _____ _____ areas near where _____ catalytic converter _____ _____.

There _____ _____ holes _____ _____ surface along _____ oxidation around _____ _____ the places _____ a catalyst _____.

_____ _____ holes on the surface, as _____ as _____ surrounding some _____ _____ _____ catalytic _____ _____.

_____ are _____ _____ the surface along _____ _____ surrounding _____ places _____ a catalyst _____.

_____ have seen _____ of oxidation and holes close _____ _____ _____ _____.

There _____ holes on _____ surface along _____ surface _____ _____ _____ that are _____ _____ the catalytic _____.

Some of the _____ have oxidation _____ _____ the _____ _____.

_____ _____ holes on _____ _____ _____ _____ around where the catalyst is _____.

_____ _____ _____ holes _____ the converter's junction.

There are _____ on _____ _____ _____ _____ as _____ around the _____ connection.

There are holes _____ oxidation _____ _____ the _____ of _____ _____ converters.

There were oxidation _____ _____ _____ the catalytic _____ _____.

_____ _____ _____ on _____ surface, along with _____ _____ some areas near _____ catalytic _____.

_____ _____ _____ of oxidation and holes _____ where _____ _____ connects.

There _____ signs of _____ _____ _____ my catalytic _____ hooks _____

There are holes on _____ _____ _____ _____ _____ _____ some of the areas _____ the _____ _____.

There are _____ holes _____ the _____ _____ _____ _____ _____ the areas _____ the Catalytic Converter.

There are _____ on the surface along _____ _____ _____ the _____ _____.

There are _____ oxidation and _____ _____ _____ _____ converter joints.

There _____ _____ _____ of _____ near the _____ converter.

_____ are _____ on _____ surface and oxidation _____ _____ _____ near _____ catalyst's connection.

_____ _____ some oxidation _____ holes related _____ _____ catalytic _____ connection.

There _____ some holes _____ _____ level oxidation _____ _____ the catalytic _____ _____.

There are some holes on _____ _____ _____ oxidation _____ some areas _____ _____ _____ _____ _____ is located.

_____ are holes _____ the _____ and _____ around the _____ _____.

There are _____ holes _____ the _____ _____ _____ near the catalyst's _____.

_____ _____ oxidation surrounding _____ _____ the areas _____ the catalyst's _____

_____ _____ oxidizer _____ close _____ where the _____ connects.

_____ _____ _____ and _____ around where _____ connects.

_____ are _____ _____ the surface and _____ _____ to _____ the _____ connects.

_____ were small _____ between _____ oxidation spots _____ _____ conexin.

_____ are oxidation _____ _____ _____ the areas _____ the catalyst's _____.

_____ _____ holes _____ _____ _____ the connection between the _____ converters.

There are _____ holes on the surface and _____ _____ _____ parts _____ _____ area _____ _____ _____.

_____ are _____ holes _____ the surface _____ _____ _____ _____ the _____ _____ the catalytic converter is located.

_____ _____ _____ on the _____ _____ well as oxidation around the _____ _____ the Catalytic _____.

There _____ a _____ _____ on _____ _____ _____ oxidation _____ _____ where the Catalyticconverter connects.

_____ _____ _____ _____ the surface, with oxidation _____ some areas _____ _____ the _____ converter _____ located.

_____ are spots of _____ and a few holes _____ _____ _____ _____.

_____ _____ there _____ oxidation and holes near _____ _____ cat-con _____.

_____ are holes on _____ _____ _____ _____ surface _____ in places _____ _____ _____ the catalytic oxidizes.

_____ _____ _____ holes _____ _____ _____ _____ oxidation around the area _____ the catalyst connects.

_____ _____ holes in the surface _____ _____ surrounding _____ _____ the places where _____ _____ connects.

_____ are _____ _____ oxidation and there _____ holes _____ the _____ converter.

There _____ _____ of oxidation and holes near _____ _____ _____.

_____ _____ oxidation and holes _____ to _____ _____ of the _____.

_____ _____ _____ on _____ surface, along with _____ _____ _____ areas near the _____ connecting.

There were _____ holes _____ _____ _____ level oxidation around _____ the _____ _____ connects.

There are _____ of oxidation _____ _____ holes in _____ _____ _____.

There _____ _____ _____ the _____ along with oxidation _____ _____ catalyst's connection.

_____ _____ _____ and _____ near the catalyst.

_____ _____ _____ mild corrosion _____ catalyst _____ point.

Some _____ have _____ _____ oxidation around _____ _____ connecting.

_____ are areas _____ surface damage _____ _____ catalyst _____.

_____ are some holes _____ _____ _____ and oxidation _____ _____ _____ near where the catalytic _____ is _____

_____ are holes _____ oxidation _____ to _____ catalytic _____.

_____ are _____ oxidation around _____ _____ the _____ where a _____ connects.

_____ saw _____ _____ near _____ catalyst.

_____ were _____ holes _____ surface _____ _____ around the areas _____ the _____ _____ connects.

_____ _____ _____ on the surface _____ _____ _____ oxidation _____ the _____ where _____ catalytic converter is located.

_____ see oxidation _____ _____ _____ to _____ this cat-con is.

_____ _____ holes on the surface _____ _____ in areas _____ the _____.

_____ were _____ and oxidation _____ _____ the _____ connects.

There _____ _____ holes and oxidation _____ the _____ converter _____.

There _____ some holes on _____ surface, along _____ _____ _____ _____ _____ _____ the catalytic _____ is located.

_____ _____ _____ _____ _____ surface, as well _____ oxidation, near where the _____ is.

There _____ _____ _____ the areas near the _____ _____.

_____ are holes in _____ surface along _____ _____ _____ _____ catalyst's connection.

There _____ _____ on _____ _____ _____ with surface oxidation, near where _____ catalytic _____.

There are holes _____ _____ surface _____ _____ oxidation _____ where _____ _____ connects.

_____ are _____ holes _____ _____ _____ and oxidation around where the catalytic _____ _____.

_____ see _____ lot _____ oxidation and holes _____ _____ the cat-con _____.

_____ are holes on _____ surface, _____ with oxidation _____ _____ _____ near the _____ _____ connects.

There has been _____ _____ _____ the _____ _____.

There _____ _____ in the surface _____ _____ _____ _____ the catalyst's connection.

There _____ _____ on _____ _____ and oxidation _____ _____ _____ near _____ Catalytic Converter connects.

There are _____ _____ _____ _____ as well _____ _____ close _____ _____ the Catalyticconverter connects

There _____ _____ on _____ surface along with _____ _____ the catalysts _____.

I _____ oxidation and _____ _____ _____ _____ this cat-con comes _____.

There _____ some oxidation _____ holes _____ the _____ _____ some _____ _____ the convertor.

_____ _____ holes _____ _____ surface, along with _____ _____ _____ _____ that are _____ to the catalytic oxidizer.

There are holes _____ _____ surface, _____ _____ close to _____ the _____ _____.

_____ _____ _____ and _____ around where _____ converter connects.

_____ are _____ in _____ _____ along with oxidation around the areas near _____ _____ _____ _____.

_____ _____ gaps and spotted oxidation _____ the _____ _____ joints.

There are _____ on _____ surface _____ well as _____ _____ the _____ _____ _____ _____ converter is.

_____ _____ holes on _____ _____ as well as oxidation _____ the places _____ _____ _____ connects.

There are _____ _____ _____ in _____ connection _____ the catalysts.

There are oxidation _____ holes _____ _____ _____ _____ junction.

There may be _____ or oxidation _____ _____ _____ _____.

_____ are _____ _____ the _____ along _____ surface oxidation _____ to where _____ _____ connects.

_____ _____ _____ holes near _____ catalyst that _____ oxidation.

_____ is _____ and _____ near _____ _____ _____ connects, any thoughts?

There are spotted _____ and _____ _____ _____ the connection _____ _____ catalyst.

There are holes _____ _____ _____ _____ well _____ _____ near where _____ catalytic _____ located.

_____ are spots of oxidation _____ _____ _____ _____ near the catalytic _____.

There _____ holes _____ _____ surface along _____ oxidation surrounding the _____ _____ _____ catalyst's _____.

_____ _____ spots _____ _____ _____ holes close to the _____ calculator.

There _____ oxidation surrounding _____ areas _____ where a _____ connects _____ _____ _____ _____ surface.

_____ _____ spotted _____ and _____ _____ a catalyst

_____ _____ _____ holes on the surface, along _____ oxidation surrounding _____ areas _____ _____ the Catalyst _____ _____.

There are holes _____ the _____ _____ well as oxidation _____ _____ _____ _____.

_____ _____ _____ on _____ _____ _____ _____ in some parts of the catalytic area.

There are _____ and _____ holes _____ _____ _____.

There _____ some holes _____ the surface and _____ _____ _____ _____.

_____ openings _____ mild _____ _____ a catalyst join _____.

_____ were _____ _____ oxidation spots _____ catalyst _____.

_____ the _____ _____ connection there _____ _____ and oxidation.

_____ are _____ and surface oxidation _____ the _____ converter _____.

_____ _____ some holes that have oxidation _____ _____ area where _____ _____ _____.

_____ are a _____ holes that have _____ around the _____ _____ _____ catalyst _____.

_____ are _____ of _____ near where my catalytic _____ _____ _____.

There are some _____ _____ with _____ _____ _____ around _____ the catalytic converter _____.

There _____ holes and oxidation nearby _____ _____ _____ _____.

There _____ some _____ on _____ _____ and oxidation _____ to _____ _____ Catalyticconverter connects

_____ _____ openings _____ _____ corrosion by the catalyst join _____.

_____ _____ spotted holes _____ surface oxidation _____ the _____ converters.

_____ are gaps and oxidation _____ _____ _____ converter _____.

There _____ _____ _____ _____ _____ _____ _____ oxidation surrounding some of the _____ _____ the Catalytic Converter connects.

_____ _____ oxidation and holes _____ to _____ _____ cat-con _____ any thoughts?

There are holes on the _____ _____ _____ _____ _____ close to _____ _____ _____ oxidizes.

There _____ spotted _____ _____ surface _____ _____ the catalytic converter.

There _____ holes on _____ _____ and _____ _____ parts _____ where the _____ is.

There are _____ _____ holes where _____ catalyst _____ _____ have surface _____ _____.

There are _____ _____ the _____ along _____ _____ _____ _____ areas _____ a catalyst connecting.

There _____ spots of _____ and _____ _____ the catalytic _____

_____ _____ _____ _____ on _____ _____ and oxidation surrounding some _____ the areas _____ _____ Catalytic Converter connects.

_____ _____ holes _____ _____ near _____ converter connections.

_____ are _____ _____ _____ _____ surface and _____ surrounding _____ areas near the _____ connecting.

There _____ _____ surrounding _____ _____ the areas _____ the _____ connection

There _____ spots _____ oxidation _____ some _____ next to _____ _____.

I _____ holes and oxidation around _____ _____ _____ _____.

_____ are _____ on _____ _____ as well _____ _____ surrounding some of _____ areas near _____ catalyst's _____.

There are _____ surrounding some areas near the _____ connection _____ _____ _____ _____ _____.

_____ _____ _____ on the surface _____ with _____ around _____ areas _____ _____ Catalytic Converter connects.

There are holes _____ _____ _____ the _____ _____.

_____ _____ _____ _____ the surface, along with _____ _____ where _____ convertor is.

There are holes and _____ _____ _____ to _____ _____ converter.

The surface _____ holes and _____ near _____ _____ catalyst _____.

_____ are some _____ in the area _____ the catalytic _____ _____ _____ have _____ _____ oxidation.

_____ _____ some _____ with oxidation _____ the _____.

oxidation _____ _____ of the _____ _____ the _____ connection _____ there are _____ on the _____.

I saw _____ andcorrosion _____ _____ catalytic _____.

_____ are _____ holes and _____ rust _____ catalytic _____.

_____ _____ some _____ and surface _____ oxidation around the area _____ _____ catalytic _____ _____.

_____ _____ _____ on the _____ and oxidation in places _____ _____ _____ the catalytic _____.

_____ are _____ and _____ _____ _____ Catalytic converter joints.

There _____ observed openings _____ _____ corrosion by the _____ _____ _____.

There _____ _____ _____ _____ Catalyst's junction.

_____ the _____ connection, _____ _____ _____ and oxidation present.

There are _____ oxidation _____ the _____ near the _____ _____.

_____ are oxidation around _____ _____ near _____ catalyst's connection _____ _____ on the _____.

_____ are holes _____ the surface, along _____ surface oxidation _____ _____ _____ _____ _____ oxidize.

_____ _____ _____ _____ near the catalytic converter.

There _____ _____ in _____ surface _____ _____ in parts _____ the _____ _____ the catalytic.

There are some _____ on the _____ _____ _____ _____ oxidation surrounding _____ _____ _____ _____ catalyst location.

_____ are holes _____ the surface _____ _____ as _____ _____ _____ _____ the _____ near the catalyst's connection.

_____ _____ holes _____ the surface, along with _____ _____ _____ of _____ areas near _____ catalyst.

_____ _____ _____ holes on _____ _____ _____ well as oxidation _____ the area _____ _____ Catalytic Converter connects.

_____ seen spots of _____ and _____ near _____ _____.

There _____ holes on the surface _____ well _____ _____ around _____ _____ connecting _____.

There _____ holes on _____ _____ as _____ _____ oxidation around some of _____ areas near _____ _____ _____.

_____ are _____ _____ holes _____ the _____ _____ some areas near _____ convertor.

There are _____ _____ the _____ _____ _____ oxidation around _____ _____ where a _____ connects.

There are _____ along _____ surface _____ oxidation around the _____ _____ _____ _____ connects.

_____ _____ there _____ holes _____ the _____ converters.

If _____ _____ closely _____ can _____ _____ oxidation _____ small holes near the _____.

_____ _____ _____ and gaps _____ _____ catalytic converters.

_____ _____ holes and oxidation _____ _____ catalytic _____ junction.

I _____ a lot of _____ _____ holes _____ where _____ _____ connect.

_____ are oxidation _____ spotted _____ near _____ _____ junction.

There _____ _____ and oxidation _____ the _____ _____

Well, _____ spotted _____ _____ _____ catalytic converters.

The _____ _____ spotted _____ are near _____ _____ junction.

There are some _____ _____ the surface, _____ _____ surrounding _____ _____ the areas near _____ Catalytic _____ _____.

_____ holes are on the surface _____ _____ _____ _____ where the _____ _____.

_____ _____ surface damage near _____ _____ Connection.

_____ are holes that _____ surface _____ _____ _____ the catalyst.

There are _____ and _____ in the _____ to _____ _____ _____.

There _____ holes _____ _____ _____ _____ level oxidation around the _____ where _____ _____ converter connects.

_____ _____ obvious oxidation and gaps by _____ _____ _____.

There _____ a _____ _____ _____ _____ surface level _____ _____ where the _____ converters connect.

_____ can _____ oxidation _____ _____ near the catalyst if _____ _____ closely.

_____ are _____ _____ _____ close to where _____ cat-con connects.

_____ see oxidation _____ _____ _____ to where the _____ is connected, _____ _____?

_____ are _____ and _____ related to the connection _____ the _____ _____.

There are holes on _____ _____ oxidation surrounding _____ _____ _____ _____ catalyst _____.

_____ _____ small _____ along _____ oxidation _____ near the catalyst _____.

_____ are _____ or _____ _____ the _____ converters.

_____ are _____ holes _____ the surface as _____ as oxidation _____ _____ areas _____ a _____.

_____ are _____ _____ _____ _____ and _____ oxidation close to where the _____ connects.

_____ are a _____ holes _____ _____ level _____ around _____ _____ where the catalytic _____ connects.

There _____ a _____ holes and _____ _____ _____ around the area _____ _____ catalyst _____.

There _____ a _____ _____ with _____ _____ _____ around where _____ catalyst connects.

There are _____ holes _____ the _____ _____ _____ oxidation close _____ where the _____ _____.

I _____ oxidation and _____ _____ where the _____ _____.

_____ _____ _____ on _____ surface with _____ _____ _____ of the areas near the catalyst's _____.

There are _____ _____ _____ by _____ _____ connection.

_____ are holes _____ gunk _____ _____ _____ converters.

_____ _____ _____ _____ _____ surface _____ _____ oxidation around the area where _____ catalyst is located

_____ areas near _____ catalyst's _____ _____ oxidation surrounding _____.

Some areas _____ the catalyst's _____ have _____ _____ _____.

There _____ holes and oxidation _____ _____ junction of _____ _____.

You can see _____ _____ _____ holes near _____ catalyst _____ _____ look _____.

There are _____ on the _____ _____ _____ _____ _____ of the _____ near the _____ Converter.

_____ are _____ holes on _____ _____ and _____ _____ some _____ near _____ the catalyst connects.

There are _____ spots next to the _____ _____ _____ _____.

_____ are oxidation and _____ in _____ _____ converter _____.

There _____ holes _____ _____ surface, along with surface oxidation in _____ _____ _____ _____ _____ oxidize.

_____ are some holes on the _____ _____ _____ _____ _____ catalyst.

There _____ some holes that have oxidation around the _____ _____ _____ _____ _____ _____.

_____ _____ holes _____ the surface, as _____ as _____ surrounding _____ _____ _____ catalyst's connecting.

_____ are some _____ on the _____ _____ oxidation around _____ _____ _____ area.

I _____ holes and oxidation _____ _____ _____ _____.

_____ are spots _____ oxidation, _____ there are holes _____ _____ the _____.

_____ _____ conexin, there _____ tiny _____ _____ with oxidation spots.

_____ are _____ _____ the surface _____ _____ _____ some _____ the _____ _____ the Catalytic Converter connects.

There are oxidation and holes _____ _____ _____ _____ _____.

There are _____ on _____ surface and _____ _____ the _____ _____.

_____ _____ holes _____ oxidation _____ with _____ catalyst connection.

_____ _____ holes or oxidation close _____ _____ catalytic _____ connections.

_____ _____ _____ on the _____ along _____ surface _____ in areas _____ _____ the catalytic oxidize.

_____ _____ _____ and gaps by _____ catalytic conversion _____.

_____ _____ holes _____ _____ on the surface near _____ the _____ _____ located.

Some _____ _____ _____ area _____ _____ _____ have oxidation and _____ on the surface.

There _____ _____ on _____ _____ along with oxidation _____ some _____ near _____ _____ _____ is located

There are holes in _____ _____ _____ _____ _____ oxidation _____ the _____ _____ the Catalytic _____ connects.

_____ _____ _____ _____ oxidation around the _____ converters.

_____ are holes on the _____ as well as oxidation _____ _____ _____ _____ the _____ _____.

I _____ see _____ and _____ _____ _____ where this cat-con _____.

_____ are holes on _____ _____ along _____ oxidation surrounding some _____ _____ _____ catalyst.

There are spots _____ _____ and _____ _____ _____ in the catalytic _____.

_____ _____ a few holes along with _____ level _____ near _____ _____ _____ _____ connects.

There were a few holes _____ _____ level oxidation around the _____ _____ _____ _____ _____ _____.

There are _____ _____ _____ that have _____ _____ _____ _____ _____ area where the catalysts connect.

There _____ _____ _____ and surface _____ _____ _____ _____ where the catalyst connects.

There _____ a lot of _____ _____ holes close _____ where _____ _____ _____.

I saw _____ and _____ _____ where _____ _____ connects.

_____ are holes _____ the surface _____ oxidation _____ _____ where _____ Catalyticconverter _____ connected.

There _____ holes _____ _____ _____ _____ oxidation around some _____ the _____ where a _____ connects.

_____ are _____ and spotted _____ _____ a _____.

_____ _____ _____ _____ has holes _____ oxidation surrounding it.

_____ _____ _____ connection there _____ _____ and oxidation

If you _____ closely, _____ oxidation and small _____ near the _____ _____ _____ _____.

There _____ holes on the _____ _____ _____ oxidation nearby _____ _____ connecting.

_____ are some holes _____ _____ _____ _____ with _____ surrounding some _____ near where the _____ _____ is located

_____ have been spotted oxidation _____ holes _____ _____ _____ catalytic _____ connection.

There are _____ _____ _____ catalyst's _____ _____ some holes on _____ surface.

_____ _____ holes _____ the surface, as well _____ oxidation _____ _____ areas _____ _____ catalyst connecting.

There _____ _____ of _____ and _____ _____ near the catalytic _____.

There _____ some oxidation spots _____ _____ _____ catalytic _____ _____ point.

_____ _____ converter _____ has holes _____ oxidation.

_____ are _____ with _____ level oxidation _____ where _____ catalyst _____.

There are _____ _____ of holes _____ surface _____ surrounding _____ _____ connection.

_____ are _____ _____ the surface as _____ _____ _____ _____ the catalyst's connecting.

There are patches of oxidation _____ _____ _____ _____ the _____ between _____ _____ _____ the parts.

There are _____ _____ _____ _____ _____ oxidation _____ some areas _____ where _____ convertor is.

There _____ _____ holes that have _____ _____ _____ catalyst connecting.

There are _____ _____ _____ _____ and _____ that are _____ _____ where _____ catalytic oxidize.

There _____ spotted _____ _____ oxidation _____ _____ catalyst.

_____ are _____ surrounding _____ areas _____ the catalyst's _____ and _____ on _____ surface.

There _____ holes on the surface, _____ _____ _____ _____ near _____ Catalytic Converter _____.

_____ _____ spotted _____ _____ surface oxidation by the _____ converters

_____ _____ oxidation and holes near where _____ _____ _____.

_____ are _____ on _____ _____ _____ with surface oxidation close to _____ _____ Catalyticconverter _____

_____ _____ holes and oxidation _____ _____ the _____ connect.

Some _____ of _____ _____ near the _____ _____ holes _____ oxidation on the _____.

There _____ holes on _____ surface _____ oxidation around where _____ _____ _____

There _____ holes _____ the _____ and _____ close _____ where _____ _____ connects

_____ was noticed _____ the _____ _____ coupling point was showing _____ _____ _____.

_____ _____ holes _____ oxidation _____ the catalytic _____.

There are some _____ on _____ surface, as well as _____ surrounding some areas _____ _____ _____ _____ _____ _____.

I see oxidation and _____ _____ _____ _____ _____ connects.

There are _____ and _____ _____ _____ _____ junction.

_____ are spots of _____ and _____ _____ the _____ converters.

_____ _____ holes _____ the _____ along with _____ oxidation _____ areas _____ are close _____ where the catalytic _____

_____ are some holes on the surface, _____ _____ oxidation _____ _____ _____ the _____ _____.

There _____ some holes _____ _____ surface _____ _____ near _____ the catalytic _____.

I _____ oxidation and holes _____ _____ _____ the _____ _____ any ideas?

_____ _____ _____ of oxidation and _____ in the _____ converter _____.

_____ are some _____ on _____ surface, _____ oxidation surrounding _____ areas _____ _____ the catalytic converter _____ _____.

_____ are some holes and _____ _____ _____ catalyst _____.

There are _____ _____ _____ _____ _____ _____ the area where the catalytic _____ _____ connected.

Some holes _____ with _____ level oxidation _____ _____ _____ me _____ _____ the catalytic _____ connects.

_____ _____ see oxidation and holes _____ where _____ cat-con connects, _____ _____?

_____ are oxidation _____ near _____ the _____ _____ connects.

There _____ some _____ and _____ _____ oxidation near where the _____ _____ _____.

_____ _____ _____ holes _____ the surface _____ well as _____ _____ _____ to where the _____ connects.

_____ are _____ and oxidation _____ _____ _____ _____ locations where a _____ connects.

_____ spotted holes _____ _____ _____ catalytic converter.

There _____ _____ on _____ _____ _____ oxidation surrounding some _____ the _____ _____ a catalyst connects.

There _____ oxidation and _____ holes _____ _____ _____ catalyst.

There _____ some _____ and oxidation around _____ a _____ _____.

There _____ holes _____ _____ surface _____ _____ _____ near _____ a catalyst connects.

_____ _____ holes on the surface _____ with _____ _____ _____ _____ where _____ catalyst connects.

There are _____ _____ the _____ as well as _____ oxidation _____ areas _____ to _____ _____ catalytic _____.

There are holes on _____ _____ _____ _____ _____ near the catalytic _____.

There _____ holes _____ _____ _____ along with oxidation _____ _____ _____ catalyst connects

Near the _____ _____ _____ there are _____ _____ oxidation.

There are some _____ _____ _____ surface and oxidation around _____ of _____ areas _____ _____ _____ _____

There _____ oxidation _____ _____ _____ _____ the catalyst that _____ _____ _____ if you look closely.

_____ _____ places _____ oxidation _____ _____ holes _____ to the catalyst.

_____ are holes on the _____ along with _____ _____ _____ _____ near _____ _____ Converter.

Near the catalyst's junction,Oxidation _____ _____ _____ _____.

There _____ _____ on _____ _____ as well _____ oxidation surrounding _____ area near _____ catalyst's _____.

There _____ _____ _____ _____ near the catalytic _____ connections.

_____ _____ and _____ are close to _____ the cat-con _____.

_____ _____ _____ _____ on the surface and oxidation _____ _____ Catalyticconverter.

Around _____ _____ _____ connects, I _____ a _____ _____ oxidation and holes.

_____ oxidation _____ small _____ _____ the _____ can be noticed.

Look closely _____ _____ can _____ _____ and small _____ near _____ catalyst.

_____ are spotted _____ and holes related _____ _____ catalyst _____.

I _____ _____ and holes _____ to _____ _____ cat-con links.

Some of _____ _____ have _____ around _____ _____ _____ the catalyst connects.

There _____ holes _____ _____ _____ as well as oxidation _____ _____ areas near _____ catalyst's _____.

There are holes on the _____ _____ well _____ _____ _____ some _____ the _____ _____ the _____ Converter.

_____ are holes _____ oxidation nearby the _____ _____ _____.

_____ are some _____ on _____ _____ as well as oxidation _____ _____ of _____ areas near _____ _____ connection.

_____ oxidation and _____ _____ _____ join point _____ observed.

_____ _____ _____ _____ oxidation close _____ the catalytic converters.

_____ are some _____ _____ _____ surface, along _____ oxidation around the locations _____ _____ catalyst _____.

_____ oxidation and _____ holes near the _____ can _____ _____.

_____ are _____ on _____ _____ and oxidation in _____ areas _____ _____ catalytic.

_____ _____ some holes _____ the _____ and _____ around _____ of _____ _____ near the _____ Converter connects

There are holes _____ _____ _____ and _____ oxidation _____ places _____ are close _____ _____ the catalytic _____.

_____ _____ some holes on the surface _____ oxidation _____ _____ _____ near _____ catalyst.

There are _____ on the _____ as _____ _____ oxidation, _____ _____ catalytic.

You can _____ _____ oxidation _____ small holes near _____ catalyst _____ you _____ _____.

There _____ holes and oxidation _____ the _____ _____ _____.

_____ _____ some _____ _____ _____ surface, along _____ oxidation near the catalyst's _____

_____ _____ _____ holes close to where _____ catalytic _____ connects.

I _____ some holes _____ _____ _____ to where _____ _____ connects.

_____ gaps and _____ close _____ _____ the catalytic _____ _____ attached.

There _____ _____ _____ _____ at the catalyst _____.

_____ _____ _____ _____ and oxidation _____ the surface near the catalytic _____.

There are holes _____ the _____ _____ _____ around _____ catalyst's _____

There _____ _____ holes and _____ _____ the _____ junction.

_____ are holes on _____ _____ along with _____ _____ some places _____ _____ catalytic.

_____ _____ _____ surface _____ _____ were found near _____ the catalyst connects.

There are _____ _____ the _____ and oxidation _____ to _____ a _____ _____.

There are some _____ _____ the _____ _____ with _____ around the _____ _____.

There are patches of _____ _____ _____ holes near the connection _____ _____ _____ _____ _____ _____ parts.

_____ are _____ and oxidation around _____ of the _____ _____ _____ _____ connects.

There _____ spots _____ oxidation and some _____ _____ _____ _____ Converter.

There areOxidation _____ _____ _____ the Catalyst _____.

_____ are _____ holes _____ the _____ _____ oxidation _____ the convertor

_____ _____ oxidation spots next _____ the _____ _____ connection point.

I _____ seen spots of _____ _____ _____ holes _____ _____ the catalyst.

There were _____ _____ _____ surface level _____ _____ the _____ where the catalyst _____.

The oxidation _____ _____ surrounding the _____ _____ _____ _____ be observed.

_____ saw holes _____ _____ around _____ converter.

_____ _____ _____ _____ _____ with surface oxidation close to _____ the Catalyticconverter _____.

_____ _____ _____ and holes in _____ connection _____ the _____ converters.

_____ _____ some holes _____ the catalyst connects _____ _____ surface _____ oxidation.

Gaps around _____ spots by _____ converter are _____ _____ _____ _____.

There are _____ _____ the _____ _____ oxidation _____ some areas near _____ the _____ is _____.

_____ _____ some holes on _____ _____ and _____ _____ some areas _____ the catalyst's _____.

There were _____ openings _____ _____ _____ by the catalyst _____ _____.

There _____ holes on the _____ along _____ _____ _____ _____ a _____ connects.

There _____ _____ on the surface along _____ _____ _____ the _____ where _____ _____ connects.

TheOxidation _____ holes _____ spotted _____ _____ catalyst.

There are _____ _____ oxidation near _____ _____ _____.

There _____ _____ holes _____ _____ _____ where a catalyst connects.

I _____ _____ _____ _____ catalytic conversion.

_____ are spots _____ oxidation _____ there are _____ _____ _____ catalytic converters.

There _____ spots of _____ _____ _____ _____ catalytic converters.

_____ _____ _____ on the _____ along with oxidation _____ some of _____ areas _____ _____ _____ connection.

There were spots of _____ _____ _____ holes _____ to _____ _____.

There _____ _____ surrounding _____ of _____ locations _____ a catalyst connects _____ the _____.

_____ _____ some _____ _____ _____ surface, and oxidation close to where _____ _____ connects.

_____ _____ holes _____ _____ present near _____ catalyst.

_____ _____ holes on the _____ as _____ _____ oxidation surrounding the _____ _____ the _____ is _____.

_____ _____ _____ and oxidation _____ the _____ for the catalytic _____.

_____ _____ and holes are _____ _____ catalyst _____.

_____ _____ holes and oxidation _____ the _____ _____ Connection.

There are oxidation and holes _____ _____ _____ _____ some areas _____ _____ _____ area.

There were _____ _____ _____ with _____ _____ _____ _____ the areas where the _____ connects.

I _____ _____ _____ holes _____ _____ where _____ cat-con connects, any thoughts?

_____ _____ holes _____ the surface _____ _____ oxidation surrounding some _____ _____ areas _____ the catalyst.

There _____ _____ holes on the _____ _____ oxidation _____ to where _____ _____ connects.

There _____ holes _____ _____ _____ _____ _____ surrounding some areas near _____ a _____ connects.

There _____ some holes _____ _____ surface, _____ _____ oxidation, in _____ _____ of the area near _____ _____.

There _____ _____ _____ on _____ surface and _____ surrounding _____ areas near the _____.

There _____ holes on the surface, along _____ _____ surrounding _____ areas _____ _____ _____ catalytic _____ _____ located.

There _____ _____ and holes _____ _____ _____ connection of the catalytic _____.

Near the catalyst _____ there _____ _____ holes _____ _____.

_____ _____ spotted holes _____ oxidation _____ _____ catalyst.

_____ _____ look _____ there _____ oxidation and small holes _____ _____ catalyst.

_____ are _____ _____ on the surface and oxidation _____ _____ _____ _____ the Catalytic Converter _____.

_____ are _____ _____ _____ _____ and oxidation surrounding parts of _____ _____ connecting.

_____ _____ _____ holes on the _____ and oxidation surrounding _____ areas _____ _____ _____ connecting

_____ _____ some _____ _____ have surface level _____ near _____ catalyst.

_____ _____ _____ holes _____ _____ _____ along with _____ near the catalytic area.

_____ catalyst _____ I _____ small _____ between oxidation _____.

_____ this cat-con connects, _____ see _____ _____ _____ and holes.

_____ are _____ _____ _____ oxidation around the area _____ the catalyst _____.

There _____ _____ _____ _____ the surface _____ some _____ near where the convertor _____.

There _____ _____ _____ _____ _____ the locations _____ _____ catalyst _____ and there _____ holes on the surface.

There _____ _____ holes that _____ _____ _____ where the catalyst _____

_____ are _____ on _____ surface and oxidation _____ _____ places _____ where a _____ _____.

_____ are some _____ where _____ _____ around _____ catalyst connecting.

_____ _____ oxidation _____ holes _____ _____ catalytic convertor.

_____ are _____ on _____ _____ _____ oxidation _____ some places where _____ catalyst connects.

There are a _____ of _____ _____ have oxidation _____ _____ _____ _____ _____ catalyst connects.

There are _____ _____ oxidation _____ some holes _____ _____ _____ conversion.

There were holes _____ _____ around _____ _____ _____ happened.

_____ are _____ holes on the _____ along _____ oxidation _____ some _____ _____ _____ catalyst.

_____ are _____ _____ the catalyst _____ that have _____ level _____.

_____ _____ some _____ that have _____ _____ the _____ of _____ catalytic converters.

There _____ some _____ on the _____ _____ _____ oxidation near the _____ _____.

_____ oxidation _____ holes I _____ _____ close _____ _____ the cat-con connects.

There _____ _____ holes and _____ _____ oxidation _____ the areas where _____ _____ _____ connects.

There _____ holes on _____ _____ as well _____ _____ surrounding some _____ _____ a _____ connects.

There _____ some holes on the surface and _____ _____ _____ locations _____ _____ _____ _____.

There are _____ holes _____ surface _____ near _____ converter _____.

There _____ holes and oxidation _____ _____ _____ converter _____.

_____ are _____ on the _____ _____ oxidation close _____ _____ Catalyticconverter.

Is it true that _____ _____ spotted holes _____ _____ _____ by the _____ _____?

_____ _____ and mild corrosion _____ catalyst join point _____ _____.

There are oxidation _____ _____ to _____ _____ _____ for the _____ converters.

_____ are holes and oxidation _____ areas _____ _____ _____ connection.

_____ _____ _____ small holes around the _____ _____ be _____ if you _____ closely.

There _____ spotted holes _____ _____ near _____ catalytic _____.

There _____ _____ on the _____ and _____ oxidation close to _____ _____ _____ _____ connects.

There _____ _____ that have _____ oxidation _____ the _____.

_____ are _____ spots _____ to a catalytic _____ connection _____.

_____ are holes _____ _____ surface, _____ _____ _____ some areas near _____ a catalyst _____.

There are some _____ on the _____ _____ oxidation close to _____ _____ _____ _____

There are _____ and _____ _____ the _____ _____.

There are _____ on the _____ _____ oxidation _____ _____ _____ _____ the catalytic.

There are _____ on _____ surface, along with _____ near _____ _____ _____ _____.

There are some holes on _____ surface _____ _____ oxidation _____ to _____ _____ _____ _____ connects.

There are _____ _____ _____ some areas near the _____ _____.

_____ _____ some _____ surrounding some _____ near the catalyst's _____.

There _____ _____ _____ _____ _____ _____ places where a catalyst connects.

There were some _____ and surface _____ _____ _____ the area _____ _____ _____ catalyst _____.

_____ are holes on the _____ _____ well _____ oxidation _____ the _____ _____.

There are holes on the _____ along _____ _____ around _____ _____ the locations _____ _____ _____ _____

There were _____ and _____ related _____ the connection _____ _____ _____.

There _____ _____ on _____ _____ with oxidation surrounding _____ of the places _____ _____ _____ connects.

_____ are seen _____ _____ oxidation near a _____ _____.

_____ _____ _____ and oxidation _____ _____ surface and near _____ catalyst's connection.

There's _____ _____ holes _____ _____ the cat-con _____.

_____ saw some _____ _____ near _____ catalyst _____.

There _____ spotted holes _____ _____ near _____ catalytic _____ junction.

_____ are _____ _____ _____ surface along with oxidation near _____ the _____ _____.

_____ are gaps _____ _____ by _____ _____ joints.

_____ _____ some _____ on the surface and oxidation _____ _____ _____ _____ where the _____ oxidizes.

There were _____ _____ _____ surface level _____ _____ _____ area _____ where the catalyst _____.

_____ _____ some _____ and holes related _____ _____ catalyst connection.

The _____ and _____ _____ _____ the catalyst _____ point were _____.

There _____ holes _____ _____ around _____ the converters _____.

There are some _____ _____ the surface _____ _____ around _____ _____ connection.

_____ _____ catalyst _____ _____ are holes and _____.

There _____ spots of _____ and _____ holes that are close _____ _____ _____ _____.

There _____ holes _____ _____ surface _____ _____ as _____ _____ some areas near a _____.

There _____ holes _____ _____ near _____ catalytic _____.

_____ _____ some oxidation surrounding some _____ where a _____ _____.

_____ you _____ closely, you _____ _____ _____ and _____ holes near _____ catalysts.

There are holes on the surface, _____ with _____ _____ _____ _____ _____ where _____ _____ connects.

_____ few holes _____ with _____ _____ oxidation _____ _____ _____ _____ the catalytic converter connects.

_____ are _____ surrounding some areas _____ _____ catalyst's _____ _____ _____ holes on _____ surface.

There _____ _____ _____ the _____ and oxidation _____ _____ locations where a catalyst _____.

_____ _____ holes _____ surface Rust around the _____ _____.

_____ are _____ _____ the oxidation areas close _____ where _____ catalytic _____ _____.

_____ _____ holes on _____ surface as _____ as oxidation _____ _____ catalytic.

_____ are _____ and _____ _____ the Catalyst _____.

I saw _____ _____ holes _____ _____ _____ converter.

There are _____ _____ oxidation _____ _____ _____ junction.

_____ is surface damage _____ _____ _____ connection.

_____ were a _____ holes and surface level _____ around the _____ _____ the _____ _____ _____.

_____ _____ holes on the _____ and oxidation _____ some _____ _____ where _____ catalyst _____.

_____ _____ _____ _____ the surface, _____ with _____ surrounding some _____ near the _____ connecting

_____ are _____ _____ and oxidation _____ the catalyst _____.

There are spotted _____ _____ gaps by _____ _____ _____

_____ _____ holes on _____ surface _____ oxidation _____ some _____ _____ places where a _____ connects.

There are _____ on the _____ _____ with _____ _____ _____ _____ _____ the catalytic converter.

_____ _____ oxidation _____ _____ holes near _____ catalytic junction.

_____ are some _____ on the surface, _____ _____ as oxidation _____ the _____ _____ _____ _____ converter is located.

There _____ holes _____ the surface and _____ _____ the _____ _____.

There are _____ holes and _____ _____ oxidation around _____ _____ _____ _____ connects.

There _____ holes along _____ _____ level oxidation _____ the _____ _____ _____ _____ converters connect.

_____ are _____ of _____ and _____ _____ the converters.

There _____ _____ on the _____ _____ with oxidation around the _____ where _____ _____ _____.

There are holes and _____ _____ _____ _____ catalyst _____.

There were _____ areas _____ _____ damage _____ _____ catalyst connection.

There are _____ on the _____ and oxidation _____ _____ area _____ a _____ _____.

There are holes on _____ _____ along with _____ around some _____ _____ _____ _____.

There _____ holes _____ _____ _____ _____ surface oxidation in places _____ _____ close to _____ _____ catalytic oxidizes.

There _____ holes and _____ related _____ the _____ _____ connection.

There are _____ _____ on the _____ _____ surface _____ _____ _____ where the catalytic _____.

I've seen spots of oxidation and _____ _____ _____ _____ _____.

There _____ _____ holes on _____ _____ as _____ _____ _____ _____ some _____ where a catalyst connects.

_____ are holes _____ the _____ _____ well as _____ surrounding _____ areas near a _____ _____.

There are some holes _____ have surface _____ _____ _____ the _____ _____.

There are _____ _____ _____ and oxidation near the _____ _____.

There are _____ on the _____ as _____ as _____ _____ some of the locations _____ _____ _____ _____.

The openings _____ the mild _____ _____ _____ catalyst join _____ were _____.

There _____ _____ holes along _____ surface level oxidation _____ _____ the catalytic _____ _____.

There _____ _____ _____ the surface, as well _____ _____ _____ the convertor.

_____ _____ _____ _____ oxidation and _____ holes near the _____ converter

There are some _____ _____ the surface, _____ with _____ around _____ _____ _____ _____ Converter connects.

There _____ _____ on the _____ as well _____ oxidation _____ _____ _____ nearby a _____ _____ connecting.

There _____ _____ _____ surface _____ oxidation near _____ the _____ connects.

_____ _____ are spotted holes and _____ _____ _____ _____ catalytic converter.

_____ _____ oxidation _____ _____ holes _____ to the catalytic exchanger.

_____ are some _____ that _____ surface _____ around _____ _____ where _____ _____ converters connects.

The _____ and small _____ _____ to the _____ _____ _____ seen _____ _____ look closely.

_____ _____ have _____ _____ oxidation near the _____ where the _____ converters _____.

_____ are _____ in _____ surface along _____ _____ near the _____.

_____ _____ holes on the surface and oxidation _____ some of _____ _____ _____ _____ _____

_____ _____ holes in _____ oxidized _____ near where the _____ _____ connects.

_____ holes along with surface _____ _____ were _____ _____ where _____ catalyst _____.

There are _____ _____ _____ on _____ surface near where _____ _____ is.

_____ are _____ on _____ _____ and _____ _____ the area near _____ catalyst's connecting.

_____ are some _____ with _____ oxidation around the area _____ _____ catalytic _____ _____.

There are a few holes that _____ _____ _____ _____ _____.

There _____ _____ _____ _____ the _____ converter connection point.

_____ _____ _____ on _____ surface _____ well as surface _____ _____ _____ close to where the _____ oxidizes.

There _____ visible oxidation _____ gaps _____ the _____ _____.

_____ are holes on _____ _____ and oxidation _____ _____ _____ Catalyticconverter.

There are _____ holes _____ the surface, _____ _____ _____ oxidation _____ to where the _____ _____.

_____ are _____ holes _____ the surface and _____ in _____ _____ near _____ convertor

There _____ _____ _____ on the _____ along _____ oxidation near where _____ catalyst _____.

The _____ _____ holes around _____ cat _____ joint _____ _____ observed.

There are _____ holes on the surface _____ _____ _____ around _____ areas near _____ _____ _____.

_____ _____ _____ on the surface along _____ oxidation around _____ _____ _____ the Catalytic _____.

There _____ _____ gaps with oxidation spots _____ _____ _____.

There are _____ _____ the surface _____ _____ _____ oxidation surrounding _____ _____ the _____ Converter connects.

_____ are oxidation _____ _____ _____ to _____ catalyst connection.

_____ are _____ on the _____ along with _____ surrounding _____ _____ near the _____ _____ connects.

There _____ holes on _____ surface, as well _____ _____ surrounding _____ _____ _____ _____ _____ Converter connects.

There are holes _____ _____ surface, as _____ _____ _____ _____ _____ catalytic area.

_____ _____ a _____ _____ _____ andcorrosion near the catalyst.

_____ _____ _____ _____ _____ close to where the catalytic _____ is.

There are oxidation _____ _____ _____ _____ catalyst's _____ _____ holes on _____ surface.

_____ are some _____ on _____ _____ as well _____ _____ _____ _____ areas near the catalytic _____.

I saw some holes _____ _____ _____ oxidation _____ _____ _____ where the _____ _____ connects.

There _____ gaps _____ _____ _____ by the catalytic _____.

I see _____ oxidation _____ holes _____ where _____ _____ connects.

There are _____ holes _____ oxidation around _____ _____ _____.

There _____ some oxidation spots _____ to _____ catalyst _____ _____.

_____ are _____ _____ _____ near a _____ junction.

The oxidation _____ _____ _____ near _____ catalyst _____ _____ if you look _____.

Some _____ _____ areas _____ the convertor _____ _____ _____ the surface _____ oxidation.

There _____ _____ on the _____ as well _____ oxidation surrounding _____ _____ _____ a _____ connecting.

There are _____ _____ _____ _____ surface, as well _____ oxidation _____ the _____ Converter _____.

There _____ holes _____ _____ surface as well _____ oxidation _____ the area _____ the _____ _____ _____ located.

I _____ a lot of oxidation and _____ _____ _____ _____.

_____ are a _____ holes along _____ surface level oxidation near _____ _____ _____ _____.

There are _____ _____ the surface, and oxidation _____ _____ areas _____ the _____ _____.

There _____ some _____ _____ _____ _____ along _____ oxidation, in some _____ _____ the catalytic

_____ oxidation _____ _____ next to the _____ converter connection _____.

_____ are _____ on the surface _____ some oxidation _____ the _____ _____.

There are _____ or _____ _____ _____ _____ _____ the catalytic converters.

There are holes on _____ _____ and _____ _____ around the _____ _____.

There _____ _____ oxidation _____ gaps _____ the catalytic _____ joints.

I _____ holes _____ oxidation around _____ _____ conversion _____.

There were _____ _____ _____ oxidation and holes _____ _____ _____ cat-con connects.

There are _____ _____ _____ surface, _____ with oxidation around _____ catalyst's _____.

There _____ _____ _____ _____ around _____ the conversion occurred.

_____ are holes _____ _____ _____ as _____ as oxidation surrounding _____ _____ the locations where _____ catalyst _____

_____ _____ holes _____ _____ near a _____ junction.

_____ oxidation _____ holes present _____ the _____ _____.

I _____ oxidation _____ _____ close to _____ the _____ connects.

Look at _____ holes and oxidation _____ the _____ _____ _____.

There _____ _____ _____ _____ along _____ _____ _____ oxidation near where the catalytic _____ connects.

There are some _____ on _____ _____ as _____ _____ _____ oxidation _____ to the _____.

_____ are _____ of _____ _____ _____ holes close to a _____ converter.

There are holes on _____ _____ _____ well _____ oxidation surrounding some _____ _____ _____ _____.

_____ are _____ holes _____ the _____ as _____ _____ oxidation _____ some areas _____ the catalyst.

_____ are _____ _____ _____ _____ with the catalytic converters connection.

There _____ holes on the _____ _____ oxidation _____ _____ convertor.

There _____ small _____ and _____ spots _____ catalyst _____.

There _____ spots _____ oxidation and holes _____ to _____ _____.

_____ _____ catalyst's junction _____ _____ and _____ spotted.

There _____ _____ _____ the _____ along with _____ surrounding _____ area _____ _____ Catalytic Converter.

There _____ _____ and oxidation near _____ _____ conversion _____.

_____ _____ _____ holes on the surface, along with _____ _____ some areas _____ the _____ _____.

There are holes _____ _____ surface, _____ _____ surface oxidation in places _____ _____ close _____ _____ _____ oxidizer.

_____ are _____ _____ rust close _____ _____ the _____ converters attach.

There _____ _____ on the surface _____ oxidation near _____ _____ Catalyticconverter _____.

_____ _____ some _____ _____ _____ surface _____ oxidation in some of the _____ near _____ catalytic.

_____ are holes and _____ near _____ _____

_____ _____ _____ _____ _____ gaps near oxidation spots.

_____ were _____ _____ _____ with surface level oxidation _____ where _____ _____ conversion connects.

There _____ _____ where _____ _____ connects that _____ oxidation.

Near _____ _____ junction, there are spotted _____ _____ _____.

I _____ _____ and holes close to _____ the _____ _____.

_____ are _____ _____ oxidation _____ some holes near _____ _____ converters

There are _____ on the _____ along _____ oxidation _____ some areas _____ _____ _____.

There _____ _____ _____ on the surface and surface oxidation that _____ _____ _____ _____ _____ _____ oxidizes.

_____ _____ _____ on the surface as well _____ _____ _____ _____ _____ near the catalytic.

_____ found _____ and corrosion near _____ _____ _____.

The _____ of _____ _____ the _____ are close _____ _____ catalytic converters.

_____ _____ holes on _____ _____ along with _____ in parts of _____ _____ near _____ catalytic.

_____ _____ _____ on the _____ and oxidation _____ _____ near the catalyst.

_____ are seen _____ and _____ by the _____ _____ joints.

There are _____ _____ _____ _____ near the catalyst's _____.

_____ are holes on _____ _____ along _____ _____ _____ the _____ _____ the catalytic converter is.

_____ are _____ spots next to the _____ _____ _____ point

There are some holes on _____ surface _____ _____ _____ _____ _____.

_____ _____ oxidation and holes _____ near where _____ cat-con _____.

There _____ a _____ _____ with surface level _____ _____ _____ area _____ the catalytic converters _____.

_____ are _____ _____ have _____ oxidation _____ the area where _____ catalytic _____ connects.

_____ are some holes on the _____ and oxidation _____ _____ areas _____ where _____ _____ _____.

_____ could _____ _____ _____ oxidation near _____ catalytic converters connections.

There are some _____ _____ the _____ _____ some oxidation _____ _____ catalyst's _____.

_____ _____ holes _____ _____ _____ _____ with surface oxidation close _____ the Catalyticconverter.

_____ are holes _____ _____ _____ along _____ oxidation around _____ _____ the _____ where a _____ connects

There are _____ _____ the _____ and _____ near _____ _____ catalytic _____ located.

There are _____ holes on _____ surface and _____ around _____ _____ the _____ _____ _____ _____ connects.

_____ _____ a _____ _____ oxidation and holes near _____ the cat-con _____.

There _____ _____ _____ holes _____ have _____ around the area _____ the _____ _____ connect.

_____ are _____ spots _____ to _____ connection _____ of the catalytic _____.

_____ _____ _____ oxidation _____ _____ holes near the _____ _____ you watch closely.

There _____ some holes _____ oxidation around _____ area _____ _____ _____ _____ connects.

_____ _____ the _____ near _____ catalytic have _____ _____ _____ on the surface.

_____ are patches of _____ _____ small _____ near the connection _____ the _____ _____.

There _____ some _____ on the _____ _____ with _____ around some locations _____ _____ catalyst _____.

_____ are _____ that _____ _____ level oxidation _____ the area where the _____ _____.

_____ _____ of _____ _____ near _____ convertor have holes _____ _____ surface _____ with oxidation.

_____ _____ spots of _____ _____ some _____ near the converter.

_____ are holes on the surface _____ _____ _____ are _____ to _____ _____ catalytic _____.

There _____ _____ on the _____ along _____ surface _____ _____ to _____ _____ catalytic oxidizes

There _____ some _____ that _____ surface level oxidation _____ _____ area _____ _____ _____ connects

_____ _____ spots of _____ and _____ _____ _____ near the catalyst.

_____ _____ _____ _____ the _____ caused by oxidation near _____ catalyst's connection.

There are holes _____ the _____ _____ _____ nearby _____ the Catalyticconverter _____.

There _____ _____ and _____ _____ _____ connection for the catalytic _____.

There _____ oxidation and _____ _____ _____ catalytic converter _____.

There are holes on the _____ _____ _____ as oxidation around _____ areas _____ _____ _____ _____ _____.

There _____ holes _____ _____ by the _____ _____ connection.

There are holes _____ _____ surface, _____ _____ _____ near the _____ connection.

_____ are some _____ on the _____ _____ oxidation close to where _____ _____ _____.

I see oxidation _____ holes _____ _____ from _____ _____ cat-con _____.

There _____ holes _____ _____ surface and oxidation surrounding _____ locations _____ _____ _____ connects.

There is _____ _____ some _____ the _____ _____ a _____ connects.

There are _____ on _____ surface _____ _____ _____ _____ some parts of the _____ _____ _____ convertor.

_____ _____ _____ areas near the _____ connection _____ _____ surrounding them.

_____ are some holes _____ _____ _____ _____ with surface _____ _____ is close _____ where the catalytic _____.

_____ surface _____ some _____ _____ oxidation near _____ catalyst's connection.

There _____ _____ _____ oxidation _____ small _____ near the link between the _____ _____ _____ surrounding _____.

If _____ _____ closely, _____ and small holes _____ _____ catalyst _____ be _____.

_____ _____ _____ _____ level oxidation were _____ _____ the area where the catalytic _____ _____.

There are _____ holes _____ surface oxidation _____ the _____ _____.

_____ are holes and _____ _____ _____ catalytic _____.

There are _____ _____ _____ the _____ _____ _____ _____ around the areas near _____ _____ Converter connects.

I see oxidation and _____ _____ _____ where the _____ _____ _____.

There are _____ _____ _____ _____ _____ _____ _____ around the areas _____ a catalyst connects.

_____ were some _____ _____ _____ surface level oxidation near _____ _____ where _____ _____ connects.

_____ _____ _____ _____ oxidation near the _____ connections.

_____ _____ some holes _____ _____ surface _____ oxidation _____ the area where _____ catalyst _____ located

_____ true that there _____ spotted holes _____ oxidation by _____ _____ _____.

There _____ holes _____ _____ near the _____ _____.

_____ are some oxidation _____ gaps by _____ catalytic _____ _____.

There are _____ spots of _____ _____ some _____ _____ _____ catalytic converter.

_____ are holes on the surface, _____ well _____ oxidation surrounding _____ _____ _____ _____ _____ Converter.

There _____ _____ few _____ _____ with surface level oxidation around _____ _____ _____ connects.

_____ are some _____ _____ _____ _____ _____ the area where the _____ converters connect.

_____ are holes _____ the surface _____ surface _____ _____ _____ Catalyticconverter.

There _____ _____ and _____ _____ where _____ cat-con connects.

I _____ _____ _____ and _____ near where the _____ is.

_____ _____ see _____ of oxidation _____ holes _____ _____ the catalyst.

_____ _____ holes in the _____ along _____ oxidation near _____ _____ connection.

I've seen spots _____ _____ _____ _____ close to _____ catalyst.

There are holes _____ _____ _____ _____ around the _____ connecting.

_____ are _____ spots next _____ the _____ _____ connect point.

_____ _____ _____ and holes in _____ _____ _____ the catalytic converters.

The _____ _____ small holes _____ _____ catalyst _____ visible _____ you _____ closely.

If _____ _____ closely _____ _____ _____ the _____ _____ holes near the catalyst.

There are _____ _____ _____ by the _____ converters _____.

_____ are _____ _____ that _____ surface _____ _____ the _____ _____ the catalytic converters connect.

Yeah, saw holes _____ oxidation around where _____ _____ _____ _____.

_____ are _____ holes on _____ surface along _____ _____ _____ some _____ the _____ near the _____ connecting.

There are some spotted _____ _____ _____ _____ _____ catalyst.

There _____ _____ and _____ associated _____ the cat _____ joint.

There _____ holes _____ _____ surface _____ oxidation surrounding _____ near _____ a catalyst _____.

If you look closely, _____ _____ _____ _____ _____ near the _____.

_____ are holes on the surface, along with _____ around _____ _____ the _____ _____ _____ _____ _____ connect.

Some holes _____ _____ _____ be _____ _____ the _____ near the catalytic.

_____ were _____ _____ along with surface level _____ around _____ _____ _____ _____ Catalyst connects.

There _____ _____ in the surface and _____ near _____ _____ convertor _____.

Near the _____ exchanger _____ _____ _____ _____ oxidation.

There _____ some holes _____ _____ _____ _____ with _____ near where the catalyst _____.

_____ are holes on the surface, along _____ oxidation around _____ _____ _____ _____ _____ _____.

_____ _____ holes on the _____ as _____ as _____ _____ _____ near the Catalytic Converter _____.

There are some _____ _____ the surface, _____ with _____ _____ close _____ _____ the Catalyticconverter _____.

_____ _____ _____ spotted holes and surface _____ by the _____ _____.

There are some _____ _____ _____ _____ _____ with oxidation _____ _____ of the areas near _____ catalyst's _____.

There are _____ or _____ _____ the _____ _____.

_____ _____ _____ _____ the _____ along with _____ around the catalyst's connecting

_____ _____ oxidation _____ _____ near the catalysts.

_____ are holes _____ _____ surface and _____ _____ _____ where _____ catalyst connects

_____ are patches of oxidation and holes near _____ _____ between _____ _____ _____ _____ the _____ _____.

There are _____ _____ _____ the _____ _____ _____ _____ _____ parts _____ the area near the catalytic

_____ are some holes _____ have _____ _____ the area where the _____ _____ _____.

_____ _____ _____ lot of _____ _____ oxidation near where _____ cat-con connects.

_____ are holes on the surface _____ oxidation _____ _____ _____ convertor _____ _____.

There _____ holes _____ _____ _____ _____ areas near the _____ connecting.

_____ are _____ on _____ _____ with _____ _____ _____ of the areas _____ the Catalytic Converter _____.

_____ _____ _____ _____ _____ and surface oxidation by the catalytic _____.

_____ are _____ _____ _____ _____ surface along with oxidation near _____ the _____ is.

_____ _____ some _____ and _____ level oxidation _____ the area where _____ _____ converter _____.

There are holes on _____ surface, _____ with _____ _____ _____ _____ _____ the catalytic _____.

There are _____ holes that _____ _____ _____ oxidation _____ the _____ _____ _____ catalytic converters connect.

There _____ _____ _____ holes _____ with surface _____ _____ _____ where the _____ converters connects.

There _____ holes _____ the _____ and _____ _____ some _____ near _____ catalytic.

_____ _____ surrounds _____ of the areas _____ _____ catalyst's connecting.

There _____ _____ on the _____ and _____ surrounding _____ areas _____ _____ Catalytic _____ connects.

_____ are some holes on the _____ and _____ _____ _____ _____ near _____ the catalytic _____ _____ located

_____ _____ some _____ _____ _____ surface, along _____ _____ surrounding some _____ nearby a catalyst connecting

_____ are _____ _____ the surface _____ with _____ around the area near the _____ _____ _____.

There _____ _____ on _____ surface, _____ _____ oxidation around some _____ _____ a _____ connects.

There are _____ _____ _____ _____ _____ catalytic converters

There _____ some holes _____ the surface _____ _____ _____ to where _____ _____ connects.

There were _____ gaps _____ _____ spots near _____ _____ conexin.

_____ are _____ _____ _____ and some holes close _____ the _____.

_____ I _____ holes _____ _____ the _____ converter.

_____ are some holes _____ _____ is _____ around _____ area _____ _____ catalytic _____ connect.

There are _____ oxidation _____ holes _____ _____ _____ _____ converter connection.

_____ is some oxidation surrounding _____ _____ the _____ _____ _____ catalyst's connecting.

_____ are _____ of _____ as well as _____ _____ close to _____ _____.

_____ _____ _____ _____ the surface, and _____ around the catalyst's _____.

I _____ oxidation _____ _____ _____ to where the _____ is.

There _____ _____ of oxidation and some holes close _____ _____ _____ _____

_____ _____ some holes _____ the surface, _____ _____ _____ surrounding some _____ near _____ catalyst.

_____ are _____ _____ and oxidation by the catalytic _____ _____.

_____ are _____ on the _____ _____ with oxidation _____ _____ a _____ connects.

_____ _____ _____ holes _____ the _____ and _____ oxidation close to _____ the _____ connects.

There are some _____ _____ _____ oxidation _____ _____ catalyst junction.

_____ _____ oxidation surrounding some of _____ _____ near _____ catalyst's _____.

There _____ some holes _____ the surface and _____ near _____ _____ _____.

_____ _____ holes on the surface as well _____ oxidation _____ some _____ _____ _____ _____ connecting.

_____ are signs _____ _____ near _____ _____ catalytic converter hooks _____

_____ _____ holes on _____ surface _____ oxidation around some of _____ locations where _____ _____ _____.

_____ _____ _____ on the _____ _____ _____ as _____ surrounding some _____ the areas near the Catalytic _____

_____ are _____ on the surface _____ with _____ _____ _____ _____ close to _____ catalytic oxidizer.

_____ _____ some holes and _____ _____ the _____ connection.

_____ _____ _____ holes are near _____ _____ converters.

_____ are _____ along with _____ _____ near catalyst _____.

_____ _____ _____ holes _____ _____ surface level _____ in _____ areas near where the _____ connects.

_____ are some _____ on the _____ and oxidation surrounding _____ _____ near a _____ _____ _____.

_____ are _____ and oxidation _____ the _____ _____ the _____ connection.

There are spots _____ _____ _____ some _____ _____ _____ the converter.

_____ are holes _____ _____ _____ and _____ _____ the areas where a _____ connects.

There may _____ _____ _____ _____ _____ the catalytic converters connections.

There are holes on _____ _____ and oxidation _____ some _____ the _____ _____ the _____ _____.

There are oxidation _____ _____ on _____ surface _____ where _____ _____ _____ located.

There _____ _____ _____ _____ _____ and oxidation around the area _____ _____ convertor is.

_____ are gaps and _____ oxidation by _____ _____ _____ joints.

There _____ _____ _____ _____ to the _____ converter connecting point.

_____ are _____ or oxidation _____ _____ _____ connections

There are _____ of oxidation and _____ _____ are _____ _____ _____ catalytic _____.

There _____ holes on _____ surface _____ _____ near _____ _____ catalytic oxidize.

I _____ some _____ and _____ _____ oxidation near where _____ catalyst _____.

_____ _____ _____ that there are _____ holes and _____ _____ the _____ converter.

There are holes _____ _____ _____ _____ _____ area where the _____ connect.

There are some _____ on _____ _____ _____ _____ as oxidation, near _____ _____ area.

There are _____ _____ _____ surface level _____ around the _____ where the _____ _____.

_____ _____ _____ of oxidation and _____ holes close _____ the _____ converter.

_____ _____ some holes _____ _____ _____ _____ around the area _____ the catalyst connects.

_____ _____ some _____ _____ _____ the catalyst connection.

There _____ oxidation spots _____ to _____ _____ converter Connection _____.

_____ _____ some holes _____ _____ surface, along with _____ near _____ _____ catalytic is.

_____ are holes or _____ near _____ _____ converters _____

There _____ _____ andcorrosion _____ _____ catalyst.

_____ _____ holes and _____ _____ _____ the catalytic connection.

There _____ some _____ _____ _____ _____ _____ with oxidation, _____ where the convertor is _____.

There are holes _____ oxidation on _____ _____ _____ where _____ _____ connects.

_____ _____ holes and _____ level _____ near where the _____ _____ connects.

There _____ some _____ _____ _____ near _____ area where _____ catalytic _____ connect.

_____ are some holes that oxidize _____ _____ _____ catalyst _____.

There _____ small gaps alongside the _____ _____ _____ _____ conexin.

There are _____ _____ oxidation and some _____ in _____ _____ _____

_____ _____ catalyst's _____ there areOxidation and _____.

There _____ oxidation _____ _____ to the _____ _____ point.

_____ _____ _____ on the surface and oxidation surrounding _____ _____ _____ _____ the _____ connects.

_____ oxidation and _____ are close _____ _____ _____ junction.

There _____ _____ holes near _____ _____.

There _____ some holes on the surface _____ _____ _____ to _____ _____.

The _____ _____ small _____ _____ the catalyst can be seen _____ you _____ _____

There are _____ _____ _____ _____ some _____ near the _____ converters.

_____ are visible _____ and _____ _____ the catalytic _____

There are holes on _____ _____ along _____ _____ _____ some _____ near _____ convertor.

_____ _____ _____ oxidation near _____ catalyst junction?

_____ are holes _____ _____ surface _____ oxidation _____ to _____ the Catalyticconverter _____.

There _____ _____ on _____ surface along with oxidation _____ _____ catalyst's _____.

There _____ areas of _____ damage _____ _____ catalyst _____.

There _____ holes on _____ _____ _____ well _____ surface oxidation in _____ that _____ close to _____ _____ _____ oxidize.

There are oxidation and _____ related _____ _____ _____ converters _____.

_____ are holes _____ the _____ _____ oxidation _____ areas near _____ catalyst's _____.

There _____ holes and oxidation _____ the _____ _____ _____.

_____ were _____ gaps alongside oxidation _____ near the _____ _____.

_____ are some _____ and _____ level _____ near _____ _____ catalyst connects.

There are holes on the _____ and oxidation _____ _____ _____ _____ _____ _____ where _____ catalytic _____.

_____ are _____ _____ _____ oxidation _____ _____ around the _____ where the catalytic _____ connect.

There _____ _____ _____ alongside oxidation _____ _____ catalyst conexin.

There were gaps alongside oxidation _____ _____ _____ _____ _____.

There _____ some holes _____ have surface _____ _____ _____ the _____ that _____ catalyst _____ to.

There _____ _____ spots _____ _____ the catalytic connection _____.

_____ of _____ holes have _____ _____ the _____ connection.

_____ were oxidation _____ _____ to _____ _____ conversion connection point.

_____ spotted some _____ and corrosion _____ _____ catalytic _____.

There _____ holes _____ the _____ _____ well as oxidation _____ _____ _____ the areas _____ the _____ connecting.

There are _____ _____ _____ surface and _____ around where _____ _____ _____ is located.

There _____ some holes _____ _____ _____ _____ the _____ _____ the catalyst connects to.

_____ _____ a few holes _____ _____ _____ and oxidation _____ to _____ Catalyticconverter.

There are holes _____ the _____ _____ oxidation _____ some areas _____ the _____ _____.

There _____ _____ _____ on _____ _____ as _____ as _____ surrounding _____ areas near the _____ converter.

_____ _____ holes on the surface as _____ as _____ _____ _____ the _____ _____ located.

_____ _____ some holes on the surface and _____ oxidation _____ _____ where _____ _____ _____.

_____ _____ holes _____ the _____ as well as oxidation _____ _____ areas near where _____ _____ is _____

There are some _____ with surface level _____ _____ _____ _____ _____ the catalyst _____.

There are some _____ _____ _____ surface, _____ well as oxidation _____ _____ _____ _____ the Catalytic _____ connects.

There are _____ _____ _____ _____ and oxidation _____ the areas near _____ Catalytic _____ _____.

_____ _____ _____ holes along with _____ level _____ near _____ the catalyst _____ connected.

Some areas _____ _____ catalytic _____ holes _____ the surface along _____ _____.

_____ are _____ holes _____ oxidation _____ the _____ where the _____ connects.

There _____ _____ on the surface and _____ _____ surrounding _____ _____ near where _____ catalyst _____.

The _____ _____ small holes near _____ _____ are _____.

There _____ holes on _____ _____ _____ oxidation in some _____ _____ _____ catalyst.

There _____ observed openings _____ mild _____ _____ by _____ catalyst join _____.

_____ _____ _____ _____ on the surface _____ with oxidation _____ _____ _____ near the Catalytic Converter _____.

_____ _____ _____ spotted holes _____ _____ to the catalytic junction.

_____ _____ oxidation and _____ on _____ surface near where _____ _____ occurs.

There _____ some _____ on the surface along _____ _____ _____ _____ _____ near _____ catalytic.

_____ _____ _____ on _____ surface, _____ with oxidation _____ some of _____ _____ near the _____ Converter connects.

There _____ some _____ on the surface as _____ _____ _____ surrounding _____ _____ the places where _____ _____ connects.

There _____ _____ holes or _____ on _____ _____ around _____ catalyst connection.

_____ _____ _____ spots of _____ and holes close _____ the _____ converter.

_____ _____ holes _____ _____ the catalytic converters.

_____ can _____ _____ _____ _____ by the Converter.

_____ _____ small gaps _____ oxidation _____ catalyst _____.

_____ are spots of _____ and some holes _____ _____ _____ _____.

_____ _____ some holes _____ oxidation _____ to where _____ Catalyticconverter _____.

There are _____ on the surface _____ oxidation _____ _____ _____ where _____ catalyst _____

_____ _____ _____ small holes _____ _____ catalyst can _____ _____ if you look carefully.

There _____ _____ holes on _____ _____ along _____ oxidation _____ some _____ _____ the Catalytic Converter.

_____ _____ oxidation and _____ close _____ where _____ Catalyticconverter connects.

_____ are some holes on the _____ _____ _____ around _____ area _____ the Catalytic _____ _____.

There _____ oxidation spots next _____ _____ _____ _____ point.

_____ are _____ _____ _____ surface _____ with oxidation near where _____ catalyst _____.

_____ see _____ lot _____ _____ and holes by where _____ _____ connects.

_____ are _____ on the surface, along with _____ _____ _____ areas _____ _____ the _____ _____ is located.

_____ are holes _____ the _____ along _____ surface oxidation _____ _____ _____ _____ Catalyticconverter connects.

There _____ oxidation _____ next _____ _____ converters _____ point.

_____ are some _____ _____ oxidation _____ some holes _____ _____ the catalytic _____.

_____ were repercussions of _____ corroded surface _____ punctures _____ a _____ _____.

_____ are _____ _____ _____ _____ _____ the catalyst's connection _____ _____ holes on the surface.

_____ _____ _____ holes on the _____ along _____ oxidation near the _____ _____

_____ are _____ holes _____ the _____ along _____ _____ _____ some _____ near a catalyst connecting.

_____ were gaps _____ _____ oxidation spots _____ _____ conexin.

There are some _____ on the _____ _____ with _____ _____ _____ _____ the areas near _____ _____ Converter.

There were _____ to _____ _____ around _____ _____ connection.

_____ are holes _____ _____ _____ and _____ around _____ areas near _____ catalyst's connecting

_____ are a _____ _____ with _____ level oxidation around _____ area _____ the catalytic _____ _____.

Some of _____ _____ _____ oxidation _____ _____ area where the _____ connects

There _____ some holes on _____ _____ along with _____ _____ some _____ the areas near _____ _____ _____ connects

Yeah, saw _____ and _____ _____ _____ the _____ happens.

There _____ holes _____ _____ near the _____ conversion _____.

_____ are holes _____ _____ surface, _____ oxidation _____ _____ catalyst's connection.

_____ are oxidation spots _____ holes close _____ _____ _____ converter.

_____ are some holes with _____ _____ _____ _____ the _____ connects.

_____ are holes on the _____ _____ _____ surrounding some areas _____ the _____ _____.

There _____ holes on _____ surface, _____ _____ around some _____ _____ areas _____ the catalyst's _____.

There _____ spots of _____ _____ _____ around the _____.

_____ _____ some holes _____ _____ surface, along with _____ near _____ catalyst's _____

There are _____ _____ the _____ _____ oxidation _____ _____ to where the _____ connects.

_____ are _____ spots of _____ _____ _____ holes close _____ the catalysts.

_____ saw some _____ andcorrosion _____ _____ _____ converters.

_____ _____ spots _____ oxidation and _____ by _____ _____ conversion joints.

There _____ _____ on the _____ _____ _____ _____ oxidation close _____ the Catalyticconverter.

_____ you watch _____ _____ _____ oxidation and _____ holes _____ the catalyst.

There _____ some _____ with _____ around where the _____ _____.

_____ are holes in the _____ _____ _____ _____ _____ where a catalyst _____.

_____ _____ _____ holes _____ the surface _____ surface oxidation _____ _____ _____ _____ close to where the catalytic oxidizes.

There _____ _____ on the _____ along with _____ around areas _____ _____ _____ _____ connects.

_____ _____ repercussions _____ a corroded surface _____ punctures _____ to a _____ _____.

_____ _____ holes _____ oxidation around _____ _____ joint.

_____ _____ holes near _____ _____ junction.

There are some _____ _____ _____ _____ the _____ near _____ the _____ is located.

There _____ holes _____ the surface, _____ _____ as oxidation _____ _____ _____ near _____ the _____ connects.

_____ are _____ _____ the areas _____ _____ _____ connection _____ holes on the surface.

_____ _____ holes on _____ surface _____ _____ _____ certain _____ where a catalyst connects.

There _____ _____ _____ oxidation _____ the _____ of the catalytic _____.

_____ were _____ spots _____ to the _____ _____ point.

_____ _____ _____ spots of oxidation _____ _____ holes _____ to the _____ converter

There are _____ _____ _____ _____ and oxidation _____ some _____ the areas near _____ Catalytic _____ _____

There are _____ and _____ _____ the catalytic _____ _____.

_____ _____ _____ _____ oxidation near the connections _____ the catalyst.

_____ and holes were _____ _____ the _____ _____.

_____ are some holes _____ _____ _____ along _____ _____ _____ some areas near the _____ Converter.

_____ _____ holes _____ _____ surface, along with surface _____ _____ close to _____ the catalytic _____.

_____ are _____ in the _____ and _____ _____ _____ to where _____ Catalyticconverter connects.

There are _____ holes _____ surface _____ by _____ Catalytic _____.

There are _____ holes _____ _____ _____ along with _____ _____ some _____ near the _____ connecting

There are _____ _____ _____ _____ _____ where the catalytic _____ affix.

_____ are _____ on _____ surface, along with _____ _____ _____ _____ near the _____ connection.

There _____ oxidation spots _____ the _____ converters _____ _____.

There are _____ _____ oxidation _____ _____ catalytic converters _____.

I _____ _____ and _____ near _____ catalytic _____.

_____ are _____ and _____ on _____ _____ _____ where the Catalyticconverter connects.

_____ _____ _____ were found close _____ _____ the _____ converters attach.

_____ are some holes on the _____ _____ oxidation _____ _____ _____ near _____ _____ _____ is located

There _____ some _____ _____ the _____ _____ well as oxidation surrounding _____ _____ near _____ catalytic _____.

There _____ _____ on the surface _____ oxidation surrounding some _____ _____ _____ near the _____ _____.

There _____ _____ oxidation _____ around where the _____ _____ connect.

There _____ _____ _____ _____ _____ the catalyst connection.

There are holes on _____ _____ with _____ _____ some _____ the _____ near _____ Catalytic _____ _____.

I _____ _____ and _____ around where _____ catalyst _____.

There are _____ _____ _____ surface, along with _____ surrounding _____ _____ where _____ _____ connects.

_____ are holes _____ the _____ _____ oxidation where _____ convertor _____ located.

There _____ _____ _____ _____ _____ along with oxidation surrounding _____ _____ the areas _____ the catalyst's _____

There _____ _____ _____ have _____ around _____ catalyst connection.

_____ are some holes _____ _____ surface, as well as _____ _____ _____ _____.

The oxidation _____ small holes _____ the catalyst _____ _____ _____ _____ you _____ closely.

_____ are _____ holes _____ _____ surface level oxidation near _____ the _____ converters _____.

_____ _____ _____ _____ that have _____ _____ around the catalyst connecting.

_____ _____ a few _____ of oxidation and _____ _____ _____ the catalyst.

There are _____ of oxidation _____ where the _____ _____ _____ _____.

Near catalyst _____ saw small _____ _____ _____ oxidation _____.

There _____ holes _____ oxidation _____ _____ catalyst _____.

_____ _____ some _____ with _____ _____ oxidation around the catalyst.

_____ _____ oxidation and holes _____ _____ where _____ _____ connection is.

There are _____ _____ _____ the surface, _____ oxidation around _____ areas _____ where _____ catalytic _____ _____ located.

_____ areas near the _____ connection have _____ _____ _____.

_____ are _____ surrounding _____ locations _____ a _____ connects.

_____ _____ patches _____ _____ _____ small _____ near the connection between the _____ converters.

There are holes _____ _____ _____ near _____ the _____ oxidizes.

There _____ _____ _____ _____ by the catalytic converter _____.

_____ are holes _____ the _____ along _____ _____ surrounding _____ catalyst's connection.

_____ are spots of _____ _____ holes in the _____ _____.

I _____ see oxidation, _____ _____ the _____.

_____ _____ holes _____ _____ _____ _____ well as oxidation surrounding some _____ near _____ a _____ connects.

There _____ some _____ _____ the _____ _____ well as oxidation around _____ area where _____ _____ converters is _____.

There _____ _____ on the _____ _____ oxidation _____ to _____ the _____ connects

I saw _____ _____ problems _____ the _____ _____.

There _____ holes _____ the _____ _____ with _____ around some areas near _____ _____ _____ connects.

I _____ oxidation and holes _____ _____ where this _____ connects, _____ _____ _____?
