[Demo] NLP Dataset for Customer Service Automation

Company Type	Home Appliance Manufacturers
Inquiry Category	Product performance and efficiency questions
Inquiry Sub-Category	Temperature Control
Description	Customers want to know how well our appliances regulate temperature, especially for refrigerators, ovens, and air conditioners.
Data Size	6,237 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

Masked sample paraphrases of one "Home Appliance Manufacturer" customer inquiry. (Purchased data will not be masked.)

What _____ mechanisms prevent _____ _____ _____ _____ _____ limits during operation?

_____ safety features cause _____ to stay _____ _____ _____?

_____ _____ protect _____ appliances _____ overheating?

Do _____ _____ _____ prevents _____ operation _____ heat limits?

I am _____ _____ _____ safety features _____ prevent appliance _____.

_____ it _____ to stop appliances from going _____ _____ _____ _____?

_____ _____ you prevent _____ appliances from _____ _____ hot?

_____ you _____ _____ the _____ features keep _____ _____ within the temperature _____?

_____ safety _____ protect us _____ _____ appliance _____?

Which methods _____ _____ under _____ _____?

_____ _____ _____ way to _____ appliance temperatures from _____ beyond _____ is _____?

_____ do _____ _____ _____ from overheating?

_____ mechanisms can stop _____ _____ _____.

_____ can _____ do _____ _____ machines from getting _____?

Is the devices _____ _____ _____ _____ temperatures?

_____ _____ appliances _____ _____ _____ the _____ of exceeding temperature levels?

_____ it _____ to _____ appliances _____ exceeding preset _____ thresholds?

_____ do safety features limit _____ _____ _____ your _____?

_____ _____ _____ _____ regulate temperatures in appliances?

_____ prevents _____ devices _____ going _____ their heat _____?

Do _____ _____ _____ the temperature _____ appliances?

_____ do you make sure _____ appliances _____ _____ _____?

_____ can _____ do _____ prevent _____ _____ overheating?

Does _____ _____ _____ appliances from _____ preset warmth _____?

What _____ appliance operation _____ _____ _____ the _____ limits?

_____ do _____ features _____ _____ from _____ temperature limits?

_____ _____ _____ prevent _____ temperatures from going beyond _____ limits?

How _____ _____ _____ sure that _____ don't _____ _____ the temperature limits?

_____ _____ _____ measures that _____ taken _____ _____ appliances _____ exceeding set temperatures?

Is _____ possible that protective _____ prevent _____ from _____ preset _____ _____?

_____ do protective _____ limit the _____ of _____ _____ appliances?

_____ there any _____ to _____ appliances _____ exceeding their _____ _____?

Should appliances _____ _____ _____ _____ avoid _____ thermal _____ during regular functioning?

_____ there a way _____ _____ appliances _____ _____ excessive temperature _____.

_____ there safety _____ _____ _____ prevent appliance _____?

What keeps _____ appliance _____ operating _____ the _____ _____?

_____ there safety _____ that _____ _____ _____ exceeding temperature limits?

Is there _____ way to _____ _____ _____ from going _____ _____ _____ limits?

What can be _____ _____ _____ a device _____ _____ its _____ range?

_____ _____ have safety features to ensure _____ _____ _____ hot?

_____ _____ possible that safety measures control _____ _____ _____?

Is there _____ _____ to prevent _____ from _____ _____ temps?

What mechanisms _____ _____ place _____ prevent _____ _____ from _____ its _____ range?

Do appliances use precautionary _____ _____ _____ _____ _____ thermal boundaries?

_____ appliances _____ from _____ set _____?

_____ _____ _____ measures _____ control appliance temperatures?

_____ _____ _____ way _____ _____ _____ appliances from reaching excessive temperature thresholds?

_____ _____ _____ to stop appliances from _____ over _____ prescribed temperature _____?

What _____ appliance _____ do _____ _____ _____ from _____ beyond _____ operating temperatures?

_____ _____ machines _____ getting hot?

Is _____ _____ _____ appliances _____ _____ their preset warmth thresholds?

Can you tell _____ _____ to _____ _____ _____ exceeding temperature _____?

Do protective mechanisms _____ _____ _____ _____ their preset _____ thresholds?

How _____ _____ built to _____ _____ _____ exceeding temperature levels?

_____ features _____ the appliance _____ the _____ _____?

Is it _____ _____ prevent potential _____ of _____ _____ levels _____ appliances?

What _____ _____ done _____ _____ appliance temperatures from _____ up?

What _____ the safety _____ _____ _____ control _____ appliances?

How are _____ _____ to _____ _____?

_____ can be _____ _____ stop the _____ from exceeding _____ _____ temperature?

_____ appliances have _____ features _____ make _____ _____ _____ _____ over the temperature limit?

_____ can _____ make sure _____ _____ _____ exceed temperature limits?

What _____ appliances do to _____ _____ _____ _____?

Do safety mechanisms _____ _____ _____ of _____ _____?

Which _____ _____ _____ overheating?

_____ some appliances have _____ _____ to _____ _____ they _____ get too _____?

_____ that can _____ _____ to prevent _____ _____ temperatures?

_____ protective _____ prevent _____ from _____ up?

There are _____ _____ that prevent _____ appliance _____ _____.

Do _____ _____ _____ _____ that prevent them from _____ their set _____ _____?

What are the _____ _____ _____ _____ appliances within _____ limits?

Is it _____ _____ _____ appliances _____ _____ _____ the temperature limits _____ being used?

_____ are appliances designed so that _____ _____ exceed _____ _____ _____?

_____ there measures _____ _____ excessive appliance _____?

_____ do _____ _____ stop _____ from going _____ temperature limits?

_____ can _____ _____ temperatures be _____?

Is it _____ _____ explain _____ safety features that _____ _____ _____ the _____ limit?

_____ _____ safety features prevent appliances _____ _____ _____ limits?

Is it possible _____ _____ _____ _____ exceed set temperature _____?

Which mechanisms _____ the _____ _____ overheating _____?

How do _____ _____ sure _____ appliances don't _____ too _____?

Which _____ features _____ _____ _____ being too _____?

_____ _____ a way to _____ _____ gadgets from _____ _____ hot?

_____ there _____ _____ to stop appliances _____ _____ their _____ temperatures?

Which mechanisms keep _____ _____ _____ _____ hot?

_____ prevents _____ from _____?

Tell me _____ the _____ features that keep _____ within _____ _____ _____.

Is it _____ for appliances to _____ _____ _____ _____ they don't _____ _____ limits?

Is _____ _____ _____ _____ prevent appliance temperatures from going beyond _____ _____ _____?

_____ there any precautionary _____ appliance _____ _____ avoid exceeding set _____ _____?

What are the _____ taken _____ _____ _____ from _____ _____ the prescribed _____ limits?

_____ _____ to _____ _____ appliances _____ safety _____ for temp control.

What do _____ _____ _____ _____ excessive appliance _____?

_____ do _____ _____ exceed their _____ _____ limits?

What _____ the _____ features that _____ _____ appliance within _____ _____ limit?

_____ are appliances designed to _____ _____ _____ _____ exceeding temperature _____?

_____ there any _____ mechanism that prevents _____ _____ exceeding _____ _____ limits?

_____ are _____ _____ that stop machines _____ _____ too hot?

Is there a _____ _____ stop _____ _____ _____ set temperatures.

Specific _____ prevent _____ in _____?

What can prevent devices _____ _____ _____ _____ _____ temp boundaries?

_____ _____ _____ safety _____ that _____ appliances from overheating?

What _____ we do _____ _____ _____ operation _____ _____ heat limits?

_____ can appliances _____ themselves _____ _____?

Which feature keeps appliances _____ _____ _____ _____?

_____ do I prevent my _____ from _____ _____ operating _____?

_____ are _____ ways _____ _____ appliances avoid exceeding temperature _____ _____?

Should _____ be any _____ _____ appliances _____ their temperature _____?

_____ _____ prevent the _____ from _____ overheated?

I _____ to know _____ _____ _____ _____ that prevent _____ overheating are.

_____ could be _____ _____ _____ appliances _____ exceeding set temperatures?

What _____ _____ _____ mechanisms _____ keep appliances _____ set _____ limits?

_____ are _____ systems _____ _____ _____ to limit temperatures?

What are the mechanisms _____ _____ appliances _____ exceeding _____ _____?

What can _____ _____ to stop appliances _____ getting _____ _____?

What can stop _____ _____ from _____ _____ _____ temperature range?

_____ appliances _____ safety _____ _____ make sure they _____ get _____?

How _____ appliances _____ stopped from going beyond _____ _____ _____?

_____ you tell me more _____ _____ features _____ keep _____ _____ temperature _____?

_____ _____ _____ from going beyond _____ _____ temperatures.

Protection _____ _____ _____ appliances _____ _____ preset warmth thresholds.

How do _____ _____ sure appliances do _____ _____ _____ temperature _____?

What are _____ _____ that are taken _____ _____ appliances from _____ _____ temperature _____?

Can you _____ me _____ safety _____ _____ _____ within temperature _____?

How _____ _____ designed to not endanger people if _____ _____ _____ _____?

Is it _____ to _____ _____ _____ that _____ appliances within the _____ _____?

_____ _____ appliance manufacturers prevent products from going _____ _____ _____ _____?

_____ _____ _____ appliances from exceeding _____ limits

_____ _____ you make sure appliances _____ _____ get too _____?

_____ _____ safety _____ _____ appliances _____ reaching excessive temperature thresholds?

_____ can _____ _____ _____ _____ from exceeding their preset _____ thresholds?

_____ mechanisms _____ _____ appliances _____ overheating?

_____ can we _____ _____ keep machines _____ getting too _____?

_____ safeguards prevent _____ in _____?

What stops _____ device from _____ _____ _____ temperature _____?

What are _____ _____ _____ _____ _____ are mitigated?

In order _____ _____ appliances _____ going beyond _____ _____ _____ _____ measures are taken?

_____ are appliances designed _____ protect _____ _____ risks of _____ _____ levels?

_____ do you make _____ appliances _____ _____ _____?

Is it _____ to _____ _____ dangers _____ exceeding temperature levels _____ _____?

How _____ _____ features _____ appliances _____ exceeding their temperature _____?

What _____ we do _____ _____ appliances _____ _____ temperatures?

What safety _____ make it _____ _____ _____ to _____ _____ limits?

_____ _____ _____ _____ mechanisms stop appliances _____ exceeding their _____ warmth thresholds.

_____ appliances _____ _____ measures to protect themselves against _____ _____ thermal _____?

Can _____ tell _____ _____ _____ _____ _____ that prevent appliance overheating?

How do _____ stop _____ _____ _____?

What _____ _____ from becoming _____ _____?

What _____ _____ done to keep household _____ from _____ _____ heat _____?

Is protective mechanisms _____ _____ stop _____ from _____ _____ warmth _____?

Is _____ a protective _____ _____ _____ _____ temps on devices?

_____ do _____ prevent my _____ _____ _____ _____ its designated operating temperature?

Is there _____ _____ _____ stop appliances from _____ too _____?

How _____ _____ prevent a _____ _____ going _____ _____ temperature range?

_____ do you have in place _____ _____ _____ _____ exceeding set _____?

Is _____ a way _____ stop _____ _____ _____ temperature thresholds?

_____ there a _____ _____ _____ _____ the temperature of _____ appliances?

_____ makes _____ hard _____ _____ to go _____ the _____ boundaries?

Should _____ have _____ _____ in place _____ avoid exceeding _____ _____?

Is _____ _____ protection _____ _____ the _____ limits of _____ appliance?

_____ there _____ _____ _____ stop _____ from reaching excessive temperature _____?

Is there _____ mechanism _____ _____ _____ _____ hitting excessive temperature _____?

How _____ you _____ sure appliances _____ _____ _____ _____ temperature limits?

_____ _____ we stop _____ from going beyond the _____ _____ when _____?

_____ are appliance _____ _____ mitigated through _____?

_____ should _____ _____ be maintained _____ _____ when working?

Is _____ a _____ _____ stop appliances from going _____ _____ _____ limits?

_____ _____ _____ taken to _____ appliances from _____ the _____ temperature?

_____ do _____ devices not _____ over heat _____ when _____ _____?

How _____ _____ keep appliances _____ _____ _____ temperature limits?

What _____ _____ prevent appliances from _____ _____?

Have _____ _____ _____ safeguards that _____ _____ from overheating?

What can _____ makers do to prevent _____ from _____ _____ _____ _____ _____?

How do you make _____ your appliances _____ _____ _____ _____?

_____ _____ _____ stop appliances from _____ up?

How _____ _____ prevent excessive appliance _____ _____ _____?

Is there any _____ _____ _____ appliance _____ _____ _____ past their _____ limits?

How do _____ _____ sure _____ don't go _____ temperature _____?

_____ _____ a _____ I can prevent _____ appliance _____ _____ its _____ range?

How _____ _____ overheating _____ _____ through _____ systems.

Can you tell me _____ _____ _____ features _____ _____ within the _____ _____?

_____ _____ _____ _____ appliances from exceeding set _____ limits _____ operation?

_____ do safety _____ _____ the _____ _____ appliances?

_____ would prevent _____ _____ _____ too hot?

What keeps _____ _____ going _____ their _____ temp _____?

_____ _____ mechanisms halt _____ temperature _____?

_____ _____ _____ _____ _____ appliances _____ not reach excessive temperature thresholds?

_____ do _____ features _____ _____ down _____ appliances?

What _____ make _____ not _____ _____ hot?

Is there _____ way _____ make _____ _____ electrical _____ _____ go past _____ _____ thresholds?

Is _____ a _____ _____ prevent _____ _____ from _____ _____ permissible limits during operation?

How _____ _____ be protected _____ _____ _____ temp?

_____ there a way _____ prevent _____ _____ _____ going _____ permissible limitations?

_____ appliance manufacturers _____ their products _____ _____ _____ _____ operating temperatures?

Is _____ a _____ _____ _____ appliance _____ from _____ beyond allowable limits?

_____ _____ _____ _____ to _____ appliance temperatures from _____ _____ their permissible limits?

What prevents _____ from _____ _____ _____?

_____ appliances have _____ features _____ _____ sure they _____ _____ heat?

_____ _____ it _____ appliance _____ that _____ products from going beyond _____ operating _____?

Does your _____ have _____ _____ _____ overheating?

What steps _____ _____ taken _____ _____ appliances from exceeding _____ _____?

_____ _____ the _____ of appliance overheating _____?

_____ _____ _____ _____ from exceeding temperatures?

_____ _____ device _____ protective _____ _____ exceeding set temp?

_____ _____ _____ _____ restrict _____ from exceeding temperature limits?

Is there _____ way _____ _____ _____ _____ _____ their temperature limit?

Which _____ save appliances _____ _____?

Is there _____ _____ that appliances _____ _____ excessive temperature _____?

_____ _____ prevent _____ operation beyond the _____ _____?

_____ safety _____ are used to _____ appliances _____ temperature _____?

Does _____ _____ _____ appliances from over _____?

_____ makes it _____ for _____ to _____ past _____ boundaries?

_____ _____ a way for appliances _____ ensure _____ don't _____ temperature _____?

_____ stop machines _____ _____ hot?

Should _____ _____ be _____ _____ exceeding preset _____ limits?

_____ _____ anything that will _____ appliances _____ exceeding _____ _____ limits?

I _____ to _____ _____ _____ safety features prevent _____ overheating.

What steps _____ taken _____ prevent appliances _____ _____ above _____ temperature _____?

What can _____ _____ to _____ household _____ _____ exceeding _____ limitations?

_____ _____ a way to stop machines _____ _____ _____ hot?

Do _____ _____ _____ any safety _____ to prevent _____?

Is there a way _____ _____ _____ _____ _____ exceed _____ limits?

Do appliances _____ _____ features _____ make _____ _____ don't _____ _____ too quickly?

_____ do you make sure _____ _____ _____ _____ _____ over the temperature _____?

_____ _____ _____ measures that prevent _____ devices from exceeding _____ _____?

_____ the appliance industry _____ _____ _____ to avoid _____ set thermal _____?

What can _____ done _____ _____ excessive _____ _____?

_____ _____ if protective mechanisms _____ _____ _____ exceeding _____ warmth thresholds.

_____ _____ mechanisms stop appliance _____ _____?

_____ _____ what safety _____ prevent _____ from _____ _____ temperature limits?

_____ _____ _____ _____ that goes beyond the heat _____?

Do _____ _____ _____ appliances from exceeding their preset _____ _____?

Is it possible _____ ensure _____ _____ exceed _____ _____?

How _____ _____ systems and modules protect _____ _____ _____?

How _____ appliance operation _____ prevented _____ _____ _____ limits?

How _____ appliance _____ _____ _____ _____ safety systems?

How do the _____ limits of appliances _____ _____ _____ _____?

_____ _____ keep _____ under set _____?

How are the _____ _____ that keep _____ _____ _____ limits?

Measures _____ _____ _____ appliance temperatures _____ operation?

What _____ you _____ to prevent machines _____ _____ _____ hot?

How _____ _____ _____ sure _____ don't _____ hot?

What are _____ safety _____ that keep appliances _____ _____ _____ _____?

Is it _____ _____ _____ mechanisms _____ appliances _____ _____ excessive temperatures?

How are appliances _____ _____ _____ _____ _____ exceeding temperature levels?

_____ _____ _____ steps to _____ excessive appliance _____?

_____ _____ be mechanisms in place _____ prevent _____ _____ from _____ _____ permissible limits.

How do _____ _____ _____ the _____ _____ safety limits?

_____ _____ some _____ _____ appliances exceeding their temperature _____.

Do _____ have safety _____ _____ make _____ they _____ exceed _____ _____ temperature limits?

_____ household _____ have safeguards _____ prevent _____ temperature _____?

How _____ _____ stop _____ _____ overheating?

_____ question _____ what safety _____ _____ _____ temperatures.

How do _____ prevent appliances _____ _____ _____ _____?

How _____ appliances _____ to prevent _____ _____ of _____ _____ levels?

_____ there _____ _____ to prevent _____ _____ from going over permissible _____?

_____ _____ you make _____ your appliances _____ _____ go over _____ limits?

_____ there any _____ to _____ appliance temperatures from _____ _____ _____ limits.

What _____ _____ do _____ _____ household devices _____ exceeding _____ temperature limits?

_____ _____ we prevent appliances _____ going _____ _____ prescribed _____ limits?

How _____ you _____ sure your _____ will not _____ _____ _____?

_____ _____ mechanisms _____ _____ place to prevent appliance _____ from _____ beyond _____ limits?

What _____ _____ a _____ from _____ _____ its temperature range?

_____ _____ _____ _____ dangers mitigated through safety _____?

_____ _____ appliance overheating risks _____ _____ through _____ systems?

_____ _____ safety features that _____ _____ within _____ limits?

Is there a _____ that my _____ will _____ _____ _____ temperature _____?

_____ there _____ way to prevent appliance _____ _____ go _____ _____ limits?

Which methods help prevent _____ _____ _____ _____ _____?

_____ do appliance manufacturers _____ products from _____ _____ _____ _____ temperatures?

How _____ _____ _____ safe _____ for the _____?

Appliances _____ _____ temperature _____ can be _____ by _____ features.

_____ _____ a _____ to prevent _____ temperatures _____ rising beyond _____ limits?

_____ _____ possible to ensure that _____ don't _____ the _____ _____ limits?

_____ can _____ appliances from _____ _____ set _____?

What _____ _____ _____ _____ _____ themselves from overheating?

_____ there any way to make _____ appliances _____ _____ beyond _____ _____ _____?

Is _____ a way _____ _____ _____ temperatures from _____ beyond _____ limits.

_____ you _____ _____ an explanation of _____ _____ features _____ keep _____ _____ temperature limits?

Does an appliance have _____ _____ to _____ sure _____ _____ _____ the _____ limits?

_____ appliances _____ _____ features _____ temp control?

_____ _____ _____ designed to protect _____ from the _____ of exceeding _____ _____?

What _____ be _____ _____ _____ _____ from heating up?

_____ can there _____ measures _____ prevent _____ appliance _____?

What _____ _____ steps _____ _____ taken to _____ _____ from going beyond the _____ _____?

How _____ we _____ appliances _____ going _____ the _____ limits?

_____ do I _____ _____ appliance from _____ its set _____ _____?

_____ _____ have features that make _____ they _____ exceed _____ _____ limits?

_____ do safety _____ _____ _____ _____ going over temperature limits?

_____ you _____ _____ that prevent _____ _____ overheating?

What _____ prevent _____ _____?

Which mechanisms _____ _____ _____?

How do _____ _____ _____ dangers _____ _____ preset temperature levels?

_____ _____ appliances' temperature limits _____ _____?

_____ _____ _____ _____ appliance _____ from going too high?

Do appliances _____ _____ _____ to ensure _____ _____ _____ temperature limits?

_____ _____ _____ way to _____ _____ that appliances don't exceed _____ limits?

What _____ _____ _____ to prevent _____ temperatures _____ getting _____ high?

_____ safety features _____ prevent _____ _____?

_____ _____ to know _____ the safety _____ that _____ appliances _____ temperature _____.

_____ there a mechanism that _____ appliances _____ _____ _____ _____ thresholds?

_____ are protective mechanisms _____ stop _____ _____ _____ their _____ warmth thresholds.

Which mechanisms _____ the _____ _____?

What _____ we _____ _____ stop appliances _____ _____ the _____ temperatures?

How _____ appliances _____ _____ prevent _____ occurrence of _____?

Is there a way _____ _____ appliances _____ _____ too _____ a _____?

_____ _____ mechanisms stop appliances _____ _____ their _____ limits?

Which _____ _____ _____ _____ to prevent _____ from _____ set temperatures?

_____ _____ _____ understand the _____ features _____ keep appliances _____ temperature limits.

Which _____ _____ prevent _____ from _____ _____ temps?

What _____ keep _____ from _____ _____ hot?

Do _____ _____ have _____ features to _____ _____?

_____ there _____ _____ to _____ appliances from _____ their temperature _____?

_____ safety _____ keep _____ _____ the right _____?

Can _____ tell _____ _____ _____ safety features that _____ appliances within _____ _____ _____ range?

_____ do you do to _____ _____ _____ being too _____?

_____ there _____ _____ to stop _____ _____ _____ too high of a _____?

_____ _____ safeguards that prevent _____ _____ machines?

What makes _____ _____ get _____ _____?

_____ _____ appliances be _____ from _____ _____ temperature thresholds?

_____ are strategies _____ keeping _____ _____ _____ appliances?

What safety mechanisms _____ _____ to _____ appliances _____ _____ set _____ limits?

_____ there a mechanism in place _____ _____ _____ _____ from going beyond _____ _____?

_____ it _____ _____ _____ measures to control excessive appliance _____.

Can _____ measures _____ _____ _____ heating secure?

_____ _____ you stop _____ appliances _____ getting too _____?

What can _____ done _____ _____ machines from _____ _____?

Is _____ any way to _____ _____ from reaching _____ _____ _____?

_____ _____ _____ be taken _____ prevent _____ appliance temperatures?

Can _____ _____ any safeguards against _____ _____ _____ temperature limits?

_____ you _____ _____ how _____ products avoid _____ temperature _____ safely?

_____ _____ machines _____ _____ too hot.

_____ _____ safety _____ _____ make _____ they don't _____ set temperature limits?

How _____ _____ features _____ appliances from breaking _____ _____?

_____ there a way _____ make sure _____ _____ _____ temperature _____?

How _____ safety _____ restrict appliances _____ getting _____ _____?

Is there _____ way _____ _____ _____ _____ from going _____ permissible limits?

_____ protective _____ prevent _____ from _____ their _____ thresholds?

What can _____ done to _____ household devices _____ _____ _____ _____?

Can _____ _____ protect against _____ _____?

Do protective _____ stop appliances from _____ _____ _____ _____?

_____ do _____ _____ sure appliances _____ go _____ the temperature _____?

_____ _____ features keep _____ _____ _____ temperature limits?

_____ _____ measures _____ _____ _____ from excessive heating?

Are _____ _____ _____ to stop appliances _____ _____ warm?

How _____ you explain _____ _____ _____ that _____ _____ _____ the temperature limits?

_____ there _____ that can _____ done to _____ _____ exceeding _____ temperature _____?

_____ _____ appliances _____ exceeding _____ safety limits?

There _____ safeguards _____ _____ exceeding _____ _____ limits while operating.

_____ _____ I _____ _____ _____ from going _____ the set temperature?

_____ strategies are used to _____ _____ _____ _____ appliances?

_____ safety _____ _____ _____ appliance heating?

Can you _____ _____ how the _____ features _____ _____ within _____ temperature _____?

I need to _____ the safety _____ _____ _____ _____ within _____ limits.

_____ mechanisms might _____ _____ _____ exceeding _____ warmth thresholds.

Does _____ _____ _____ in place to prevent _____ _____ from _____ its _____ range?

Did _____ _____ _____ safeguards preventing _____ in _____?

_____ can appliances _____ _____ stop themselves from _____ _____ hot?

How _____ _____ _____ regulate _____ temperatures?

_____ _____ _____ _____ features _____ make sure they don't _____ over the temperature _____?

_____ _____ _____ way to prevent my _____ from _____ _____ its _____ range?

What _____ you do _____ _____ appliance _____ _____ going up?

While _____ _____ what _____ prevent _____ devices _____ exceeding temperature _____?

Is _____ any _____ in place _____ prevent _____ temperatures _____ _____ past _____ limits?

_____ it _____ _____ prevent appliances from _____ _____ the _____ limits?

_____ _____ _____ _____ _____ _____ ensure they don't get too warm?

What _____ stop _____ _____ from _____ over the _____ range?

_____ _____ you _____ _____ stop appliances from exceeding set _____?

Should _____ _____ stop _____ _____ reaching _____ temperature thresholds?

There may _____ _____ _____ _____ my _____ from exceeding its _____ range.

_____ _____ _____ _____ precautionary measures to _____ exceeding _____ thermal boundaries?

_____ stops _____ device _____ overheating?

What _____ mechanisms _____ _____ to protect _____ from _____ temperature _____?

Is _____ any _____ to _____ appliances _____ going _____ _____ temperature limits?

There are _____ mechanisms _____ _____ appliances from _____ _____ limits

Measures that _____ _____ _____ temperatures during _____.

How _____ _____ features _____ the _____ from exceeding temperature _____?

_____ _____ _____ keep safe _____ for appliances _____ working?

How _____ safety _____ _____ _____ _____ overheating risks?

What safety _____ _____ used _____ _____ _____ within temperature bounds?

_____ _____ mechanisms _____ _____ halt appliance temperature?

What _____ it _____ for devices to go _____ _____ _____ _____?

_____ it possible _____ _____ mechanisms _____ _____ appliances from reaching excessive _____ _____?

_____ does preventing products _____ _____ beyond _____ _____ temperatures involve?

What _____ the _____ that _____ safe _____ for _____ appliances?

_____ you know of _____ _____ _____ prevent overheating in _____?

Are _____ _____ able to _____ _____ temperature _____?

Is there a _____ _____ keep _____ _____ _____ excessive temperature _____?

I would _____ to know how _____ _____ avoid _____ _____ temperature _____ _____.

_____ _____ Measures _____ _____ appliance heating?

_____ _____ _____ not exceed _____ temperatures?

Do appliances have _____ _____ _____ _____ they _____ exceed set _____ limits?

What _____ _____ _____ my appliance cannot _____ _____ its set _____?

How can appliances _____ _____ _____ _____?

Is _____ _____ that _____ _____ stop _____ _____ exceeding the _____ warmth thresholds?

_____ _____ a _____ to prevent _____ from going _____ _____ thresholds?

_____ makes it difficult for _____ _____ _____ _____ the _____ boundaries?

_____ methods _____ _____ _____ protect _____ appliances exceeding set temperatures?

What do _____ _____ _____ stop _____ appliance _____?

_____ do _____ _____ _____ too warm?

_____ are appliances _____ _____ avoid _____ of _____ temperature levels?

What safety _____ are used _____ _____ _____ of _____?

Have you considered the _____ _____ _____ machines _____ _____?

Is _____ any safety _____ _____ prevent appliances _____ _____ temperature _____?

Is there _____ way to _____ _____ _____ reaching _____ _____ a temperature?

_____ _____ stop machines _____ getting too _____.

How _____ _____ _____ excessive _____ temperatures?

How _____ appliance _____ risks _____ _____ safety _____?

Is _____ a _____ to _____ appliance temperatures _____ _____ beyond _____ limits?

How do I _____ my appliance _____ exceeding _____ _____ _____?

_____ _____ protective systems limit the _____ _____ the _____?

How _____ you _____ _____ appliances won't warm _____ _____ much?

_____ _____ you do to _____ appliance _____ from _____ _____ hot?

_____ are things that stop _____ from _____ _____ _____.

Is _____ mechanisms able _____ _____ appliances from _____ too _____?

How _____ _____ designed to _____ the _____ of _____ _____ temperature levels?

Does _____ appliance _____ safety features _____ make sure it doesn't _____ _____ _____ _____?

Should there _____ safeguards against appliances _____ _____ _____ limits _____ _____?

_____ safety mechanisms _____ the appliance _____ _____?

Do _____ know the _____ _____ preventing _____ _____ machines?

Do _____ use _____ _____ to _____ exceeding _____ boundaries?

_____ _____ appliances _____ safety features to _____ _____ disasters?

How _____ you make _____ _____ _____ get _____?

_____ _____ you able to _____ appliances _____ _____ too hot?

_____ _____ a way to protect _____ _____ reaching _____ temperature _____?

Is _____ _____ way _____ stopping _____ _____ their temperature limits?

_____ are the safety _____ _____ _____ the temperature _____ _____ appliance?

Do appliance _____ prevent _____ from _____ _____ safe _____ temperatures?

Do _____ _____ safeguards _____ _____ overheating?

_____ _____ _____ prevent themselves _____ overheating?

_____ do _____ keep _____ _____ getting _____ hot?

_____ do _____ _____ _____ temperatures for appliances in working _____?

I _____ like to _____ _____ safety features _____ _____ overheating.

_____ do you make _____ _____ appliances don't _____ _____ hot?

Does _____ _____ _____ _____ _____ measures to avoid _____ thermal boundaries?

What _____ _____ done to stop _____ from reaching _____ _____?

_____ _____ any _____ to make sure _____ appliances don't _____ _____ temperature _____?

_____ _____ possible that _____ _____ stop _____ _____ violating their preset warmth _____?

_____ stops appliance _____ past _____ _____ limits?

_____ there _____ mechanism that will _____ appliances _____ _____ excessive temperature _____?

_____ _____ the safety features _____ _____ appliances _____ specified temperature _____?

How _____ appliances _____ to _____ off _____ _____ _____ temperature levels?

Is _____ possible _____ specific safeguards _____ _____ _____ machines?

Is there a way to _____ _____ _____ _____ that _____ _____ within _____ temperature _____?

_____ _____ can you take to prevent _____ _____ _____?

What can _____ done to prevent _____ _____ past _____ _____ _____?

Which methods _____ _____ appliances _____ _____ _____ temperatures?

_____ appliances _____ with _____ _____ to _____ they _____ get too hot?

Are _____ overheating _____ mitigated _____ _____ systems?

How _____ the _____ measures control _____ _____?

_____ are the measures that are _____ _____ limit _____ _____ _____ appliances?

How _____ _____ _____ excessive appliance _____ _____ operation?

Is it _____ to ensure _____ won't _____ _____ _____?

Does _____ _____ _____ measures to avoid exceeding _____ thermal _____?

How _____ _____ _____ your appliances _____ _____ too hot?

What can be _____ _____ stop _____ _____ exceeding _____ temperatures

How do you _____ _____ temperature _____ _____?

_____ are _____ _____ risks _____ through _____ systems?

Is _____ mechanisms in place _____ _____ _____ _____ _____ going beyond _____ limitations?

_____ are the _____ _____ used _____ _____ _____ from exceeding temperature limits?

What do _____ _____ do to limit the _____ _____ _____?

_____ with protective _____ _____ exceeding set _____?

Are _____ manufacturers _____ products from _____ above safe _____ _____?

_____ _____ _____ be stopped _____ going beyond the prescribed _____ _____?

How _____ _____ systems limit _____ _____ appliances?

Is it possible _____ _____ appliances from _____ excessive _____ _____?

How can _____ stop _____ from _____ beyond _____ _____ limits?

How _____ I _____ my _____ from _____ _____ its set _____?

Do appliances _____ any _____ _____ in place _____ _____ exceeding _____ thermal _____?

How _____ safety _____ _____ _____ minimize appliance overheating _____?

_____ do appliance _____ do to _____ _____ products _____ going _____ _____ operating temperatures?

What _____ _____ _____ _____ _____ going over the temperature range?

Is there any _____ to prevent _____ appliance from _____ _____ _____ _____?

What _____ _____ _____ taken to _____ sure _____ _____ go _____ the temperature limits?

What _____ measures _____ _____ appliance _____?

Which _____ prevent _____ _____ _____ temp?

Devices _____ _____ systems against _____ set _____?

Is it _____ _____ _____ _____ _____ going beyond temperature limits?

Which _____ protect against appliance _____ _____ _____?

How _____ _____ make sure that _____ _____ exceed their _____ _____?

_____ _____ _____ stop _____ _____ from exceeding set temperatures?

Is there _____ _____ _____ _____ exceed set _____?

_____ _____ are taken _____ _____ appliances _____ exceeding their _____ limits?

How _____ _____ not _____ temperatures?

_____ _____ be _____ to stop _____ from _____ over set _____?

Is _____ _____ _____ to prevent appliance temperatures from _____ _____ _____ permissible _____?

_____ _____ _____ from being too _____?

Are _____ ways _____ prevent appliance temperatures _____ _____ _____ _____ limits?

_____ _____ my appliance from _____ too _____ a _____?

_____ _____ _____ keep _____ heating low?

Is there a _____ system _____ _____ set temps _____ _____ _____?

_____ _____ mechanisms are used to _____ appliances _____ _____ limits?

_____ _____ are taken to make sure _____ _____ _____ _____ _____ temperature limits?

How _____ _____ _____ _____ from overheating?

_____ _____ controls _____ temperatures?

Is there _____ _____ mechanisms _____ place to _____ _____ _____ from _____ _____ permissible limits?

_____ are safety mechanisms _____ prevent _____ _____ exceeding _____ _____ limits.

Do _____ have safety features to _____ _____ they _____ _____ the _____ _____?

_____ do you _____ _____ appliances _____ _____ too warm during _____?

Is _____ a _____ to prevent _____ temperature from _____ _____ permissible _____?

_____ there _____ _____ to protect appliances _____ _____ their temperature _____?

_____ _____ prevent appliance _____ _____ exceeds the _____ limits?

Is there a system _____ protecting devices _____ _____ _____ _____?

What _____ you _____ _____ _____ safe temperatures for _____?

_____ _____ _____ designed to resist the risk _____ _____ temperature _____?

_____ _____ a way that my _____ _____ exceed _____ _____ range?

Do _____ mechanisms _____ appliances from _____ _____ _____ warmth thresholds?

_____ _____ _____ for _____ _____ to control the _____ appliance heating?

_____ _____ are taken to prevent appliances from going _____ _____ _____ _____?

_____ _____ mechanisms stop _____ over _____?

_____ can stop _____ _____ from going past _____ _____ range?

There _____ _____ _____ _____ stop _____ _____ reaching excessive temperature thresholds.

_____ there _____ way _____ _____ excessive _____ heating?

_____ do you _____ sure _____ _____ appliance _____ _____ temperature limits?

_____ _____ appliance _____ beyond the _____ limits?

Is it _____ that _____ mechanisms stop appliances _____ _____ _____ _____ thresholds?

_____ safety _____ restrict _____ heating?

_____ safety _____ _____ _____ use to _____ the _____ of appliances?

How _____ appliance _____ risks _____ _____?

_____ _____ _____ _____ _____ safety features that keep appliances within temperature _____.

_____ appliances _____ _____ safety features to make sure _____ don't _____ _____ _____?

How _____ safety _____ _____ modules _____ against _____ overheating?

_____ you tell _____ _____ _____ features prevent _____?

_____ the _____ of _____ overheating _____ through _____ systems?

What safety _____ keep appliances within _____ _____ _____ _____?

_____ do _____ _____ to _____ appliances from exceeding _____?

Can you explain _____ _____ that _____ the _____ within the _____ _____?

_____ _____ _____ prevent appliances _____ getting hotter?

_____ _____ safety features _____ the _____ of _____ appliance?

Do _____ have safety _____ to _____ sure _____ do not _____ _____ temperature _____?

_____ _____ any way _____ prevent appliance _____ from _____ _____ allowable limitations?

_____ do _____ make _____ appliances don't get _____ _____?

How _____ you _____ _____ _____ your appliances _____ exceed their temperature _____?

_____ can be done _____ _____ _____ from being _____ warm?

_____ _____ _____ _____ _____ features to make sure _____ _____ exceed their temperature limits?

Do _____ _____ have _____ _____ _____ against overheating?

Is it possible _____ _____ have safety features _____ _____ them _____ exceeding _____ _____ _____?

_____ can _____ do about household devices _____ _____ _____ limits?

_____ _____ prevent overheated _____?

Does _____ appliance _____ _____ features _____ _____ sure _____ don't exceed their _____ _____ limits?

_____ stops _____ _____ getting _____ hot?

How _____ _____ make sure appliances _____ _____ their _____ limits?

_____ _____ prevent appliances _____ exceeding _____ limits.

_____ exceeding temperature _____ _____ _____ restricted _____ safety features.

_____ protective _____ stop _____ from heating _____ too _____?

Is _____ _____ _____ that my _____ can't _____ its temperature _____?

_____ you tell me _____ _____ _____ features that _____ _____ appliances cool?

I _____ like _____ know how your _____ _____ crossing temperatures _____ _____ _____.

How _____ you maintain safe temperatures _____ _____ _____ working _____?

_____ safety mechanisms protect _____ _____ _____?

Does there any way to _____ _____ from _____ _____ _____ _____?

_____ do _____ _____ prevent _____ appliances?

Is _____ _____ _____ to _____ sure that _____ aren't exceeding their _____ _____?

Is _____ a way _____ prevent _____ temperatures _____ _____ beyond _____ limits?

_____ _____ _____ to be _____ against appliances exceeding their _____ _____?

What _____ be done to _____ appliances _____ _____ set _____?

How _____ you make sure the appliance _____ _____ _____ _____?

_____ _____ _____ sure appliances don't _____ set _____?

Do _____ appliances _____ safety features _____ _____ overheating _____?

What _____ _____ machines _____ getting _____ hot?

_____ there a _____ _____ stop appliances _____ _____ _____ temperature thresholds.

What safety precautions _____ _____ to _____ _____ _____?

What can you do _____ _____ _____ _____ _____ exceeding temperature _____?

Which _____ block _____ _____ appliances?

_____ mechanisms can _____ _____ _____ of appliances?

_____ _____ be done _____ _____ appliances from going past _____ _____?

_____ prevents the _____ _____ an _____ _____ is too hot?

Is _____ _____ way to stop _____ _____ from _____ past _____ limitations?

How _____ _____ _____ surpass temperature _____ limits?

measures _____ _____ excessive _____ temperatures

_____ _____ _____ _____ _____ from exceeding preset warmth thresholds?

_____ there _____ way _____ stop appliances _____ _____ excessive _____ _____ in use?

_____ _____ _____ measures that help prevent _____ _____ temperatures?

Which _____ make _____ _____ _____ go _____ set temps?

_____ mechanisms _____ _____ from overheating?

_____ _____ _____ keep _____ temperatures for appliances _____ working conditions?

How _____ appliances _____ stopped from _____ _____ _____?

Are protective _____ capable of _____ _____ _____ exceeding _____ _____ thresholds?

Do protective _____ help _____ appliances _____ _____ preset warmth _____?
