[Demo] NLP Dataset for Customer Service Automation

Company Type	Auto Repair and Maintenance Shops
Inquiry Category	Check engine light is on
Inquiry Sub-Category	Ignition System Failures
Description	Inquiries concerning the check engine light illuminating due to problems within the vehicle's ignition system, including issues with the spark plugs, ignition coils, or distributor.
Data Size	5,009 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

Masked sample paraphrases of one "Auto Repair and Maintenance Shop" customer inquiry. (Purchased data will not be masked.)

Has excessive _____ _____ across _____ Plug _____ activating the _____ _____ and causing _____ _____ Engine Light _____ _____ on?

_____ _____ _____ that high resistance _____ misfires _____ _____ Engine Light?

Can an _____ check _____ light _____ _____ caused _____ overly _____ spark plug _____?

Do _____ spark plug _____ have _____ much _____ _____ they _____ _____ turn on the _____ _____ lamp?

Does _____ Misfire _____ thing kick in _____ turn _____ _____ _____ Light _____ if _____ is _____ _____ resistance in _____ Plug Wires?

Has a _____ engine _____ come on because _____ _____ _____ among _____ spark _____ _____.

_____ _____ _____ _____ _____ resistance building up _____ _____ spark plug wires _____ would _____ a check _____ light _____ come on?

Is _____ possible for _____ plug cables that are _____ _____ _____ _____ _____ _____ check engine light _____?

Is _____ _____ around _____ spark plug wires _____ _____ of the _____ _____ light _____?

_____ the spark plug wire resistant _____ _____ _____ andCheck _____ Light _____?

Could _____ resistance _____ _____ spark plug _____ cause misfire _____ _____ engine _____ malfunctioning.

_____ _____ _____ engine light _____ could _____ caused _____ overly resistive _____ plug cables.

Is _____ possible _____ _____ resistance in spark plug _____ has caused the Misfire _____ _____ _____ _____ the _____ engine _____?

_____ there high _____ that _____ to _____ and _____ Engine _____?

I'm wondering _____ excessive resistance _____ _____ _____ _____ wires could cause _____ _____ detection.

The Misfire _____ _____ Check _____ _____ _____ activated by high _____ _____ plug wire.

_____ _____ is followed by _____ Light _____ _____ _____ _____ excessive _____ in the _____ plug wires.

Increased resistance _____ your _____ _____ _____ _____ _____ misfirings and _____ corresponding check-engine indicator.

_____ the _____ plug wires _____ _____ much _____ that could cause the _____ _____ go _____?

Can excess resistance in _____ _____ plug _____ cause _____ _____ _____?

Is there _____ chance of _____ _____ _____ across _____ spark _____ _____ leading to a misfire, _____ _____ cause the _____ engine _____ _____ go

_____ _____ _____ Light could _____ _____ elevated _____ _____ hindrance across the spark _____ _____ activated Misfire Detection.

Do _____ _____ _____ _____ _____ so much resistance they're _____ _____ the check engine _____?

_____ the _____ _____ light _____ by a _____ Detection that _____ caused by high resistance _____ _____ _____ wires?

_____ excess _____ _____ the _____ plug _____ cause _____ detection and the _____ to _____ up?

_____ the Check Engine light _____ on because _____ excessive resistance _____ _____ the _____ _____ _____?

Is _____ Misfire Detector _____ _____ highly resistant _____ Plug _____?

_____ _____ _____ in the _____ _____ wires _____ _____ engine light to come on?

Does a _____ Engine light _____ on _____ of _____ _____ in the _____ _____ _____?

_____ _____ _____ spark _____ wires lead to a lit-up _____ _____ warning?

_____ _____ check _____ light _____ _____ because of _____ resistance built up among _____ spark _____ _____?

Is excessive resistance _____ the _____ plug wires a _____ _____ _____ _____ _____ light _____?

_____ _____ Spark Plug Wires _____ _____ much resistance _____ they _____ to _____ on _____ check engine _____?

_____ _____ high _____ _____ can cause misfires and Check _____ _____?

_____ _____ _____ that _____ Misfire Detection thing _____ _____ _____ _____ _____ _____ Check Light Engine _____ of _____ resistance of the Spark Plug wires

_____ _____ _____ light could _____ _____ by resistance built _____ _____ the spark plug _____.

_____ Misfire Detection _____ _____ _____ _____ may be _____ by _____ resistance spark _____ wire.

Is _____ _____ chance of resistance build _____ across my _____ _____ _____ which _____ cause _____ check _____ light _____ flash?

The check engine light _____ _____ _____ if _____ _____ _____ on the spark _____ _____.

Has _____ _____ _____ light came on _____ _____ excessive resistance _____ across the spark _____ _____?

A _____ engine light _____ produced _____ excessive resistance develops _____ the _____ _____ _____.

_____ might _____ resistance built _____ on the wires _____ can cause a _____ and _____ _____ the _____ _____ _____.

Is the _____ resistance _____ _____ spark _____ _____ a _____ of Misfire _____?

When resistance _____ _____ on _____ spark _____ _____ the check engine light _____ _____ _____.

_____ _____ _____ _____ wires have _____ resistance that _____ _____ on the Check Engine _____?

_____ check engine light could be _____ _____ _____ build _____ _____ _____ spark _____ wires.

There _____ be excessive _____ _____ the spark plug wires, _____ _____ _____ to _____ _____ warning _____ going on.

A _____ engine _____ _____ be _____ _____ resistance _____ the spark plug _____ _____ up.

Is _____ _____ _____ by _____ levels _____ hindrance across _____ _____ Plug Wires?

Is _____ possible for spark plug _____ _____ be _____ resistive _____ cause _____ illuminated _____ engine _____ _____?

If _____ spark _____ wires _____ excessive resistance, they _____ _____ to _____ _____ _____ _____ light malfunctioning.

_____ the Misfire Detection thing kick in and _____ _____ _____ Check Light _____ _____ _____ _____ _____ _____ resistance in the _____ _____ Wires?

Do _____ plug _____ _____ enough resistance to _____ the _____ Detection thing kick _____ _____ _____ on _____ _____ light engine?

Is there a chance of resistance _____ _____ _____ spark plug _____ leading _____ a _____ which would _____ _____ _____ _____ _____ to _____?

_____ detection triggering _____ of _____ resistance _____ _____ plugs?

The _____ Detection and _____ _____ Light _____ activated _____ _____ excessive _____ in _____ spark _____ wires.

_____ _____ in spark plug wires could _____ _____ _____ detection _____ on to the _____ _____ _____.

_____ check _____ _____ _____ _____ _____ by _____ build- _____ on _____ spark plug wires, could that be?

_____ _____ resistance _____ in _____ wires caused the Misfire _____ _____ Engine _____ Light _____ _____ off?

_____ excessive resistance in my _____ plug _____ _____ cause _____ _____ misfire _____?

_____ Misfire Detection _____ _____ _____ _____ are _____ _____ excessive _____ levels in _____ spark Plug wires.

Excess resistance in _____ _____ plug _____ _____ lead _____ misfire detection _____ _____ _____ malfunctioning

_____ a check engine light _____ _____ _____ _____ excessive _____ developing across _____ _____ plug wire?

Do these _____ Plug _____ _____ _____ much resistance that _____ turning _____ _____ _____ Engine lamp?

_____ _____ _____ _____ _____ _____ spark plug cables _____ cause a light _____ in the engine?

There is _____ _____ _____ _____ plug wires _____ could _____ _____ check engine _____ to _____ off.

Has _____ Check Engine Light _____ _____ by a _____ _____ _____ _____ high _____ across the spark _____?

Is _____ _____ engine light _____ because of a spark _____ _____ _____?

Can _____ Check _____ _____ _____ on _____ to excessive _____ across _____ _____ Plug wires?

_____ Check Engine _____ _____ _____ on due _____ excessive _____ developed across the _____ Plug _____.

Are _____ _____ wires causing _____ _____ _____ triggering _____ Misfire Detection?

The Misfire _____ and _____ _____ _____ are activated due to excessive _____ levels _____ _____ _____ _____ wires.

_____ _____ _____ Engine _____ come on _____ of excessive resistance developing across _____ spark _____ _____?

Do the Spark Plug Wires _____ _____ _____ _____ that _____ _____ on _____ _____ EngineLamp?

_____ _____ be _____ _____ resistance in the spark _____ wires that causes the _____ _____ _____.

Excess resistance _____ _____ spark _____ wires could _____ _____ detection _____ engine light _____.

Is _____ Misfire Detection _____ _____ Check Light _____ by excessive resistance _____ _____ the _____ _____ _____?

_____ Detection _____ Check _____ Engine _____ _____ be caused by _____ resistance in Spark _____ _____.

_____ _____ possible _____ _____ _____ _____ be _____ _____ heightened resistance developed through the _____ plug wire?

Is _____ _____ for Misfire Detection _____ be _____ with _____ resistance _____ through _____ Plug _____?

_____ resistance _____ on _____ spark plug wires, a check _____ _____ _____ be _____.

If resistance _____ on _____ _____ plug wires, _____ _____ _____ _____ a _____ _____ light going off.

Is _____ _____ for excessively _____ _____ _____ cables to cause an _____ check _____ _____ indicator.

_____ _____ _____ _____ _____ come _____ because of excessive resistance developed among the spark _____ _____?

If _____ spark plug _____ have excess _____ it could _____ to _____ detection _____ _____ _____ _____.

Have _____ resistance _____ in _____ wires led to _____ _____ _____ and _____ Check _____?

Could _____ spark plug wires _____ excess _____ _____ could _____ to _____ detection and _____ on _____ _____?

Has _____ _____ _____ light _____ _____ due to excessive _____ _____ the _____ plug wire?

_____ _____ check _____ _____ _____ on when excessive resistance develops _____ the _____ plug _____?

The spark _____ wires may _____ _____ resistance _____ _____ _____ misfire _____ _____ _____ on the engine.

_____ _____ _____ _____ engine light because of excessive _____ _____ _____ spark plug wire?

_____ these _____ plug _____ have _____ resistance that they're _____ _____ the Check _____ _____?

_____ _____ resistance levels caused the _____ _____ and _____ _____ Light to go _____?

Is the _____ _____ _____ _____ _____ _____ Misfire _____ because of high resistance across _____ spark _____ wire?

There _____ a chance _____ the misfire warning light _____ _____ because _____ _____ _____ in the _____ _____ wires.

The _____ _____ _____ _____ be a _____ of _____ excessive resistance in _____ _____ plug wires.

I wonder _____ excessive _____ _____ my spark _____ _____ would _____ _____ the _____ light?

There could _____ too _____ resistance _____ the _____ plug _____ which _____ be _____ _____ warning light _____ on.

_____ _____ is followed _____ Check _____ _____ illumination as _____ result _____ excessive _____ in _____ plug wires.

_____ Check Engine _____ _____ come _____ if _____ _____ _____ developed across the spark _____ wires.

Has _____ check _____ light _____ on because _____ excessive _____ _____ across _____ spark plug _____?

_____ _____ Check _____ Light _____ _____ by _____ Misfire Detection _____ of _____ high _____ of the _____ plug wires?

_____ the _____ engine _____ come on due _____ _____ _____ among _____ _____ plug wires?

_____ could be _____ _____ resistance _____ the spark _____ wires, _____ is why _____ warning light _____ _____.

Is the check _____ _____ triggered by a Misfire _____ due _____ _____ _____ _____ the _____ _____ wires?

_____ excessive _____ _____ the _____ plug wires cause _____ _____ detection?

Has _____ _____ Engine Light _____ on because _____ excessive _____ on _____ _____ _____ wire?

_____ _____ possible that _____ resistance _____ the _____ plug wires _____ lead to _____ _____ _____ engine light on?

Engine light _____ _____ _____ _____ resistance of spark plug _____?

There _____ _____ _____ in the spark _____ wires that could lead _____ misfire _____ _____ engine _____ _____.

_____ it possible that increased _____ _____ spark _____ cables _____ a _____?

_____ increased electrical impedance _____ _____ a _____ Detection alert _____ engine _____ _____?

The check engine light _____ _____ _____ _____ _____ build-up _____ the spark _____ wires.

_____ it make the _____ Detection _____ _____ _____ and _____ _____ the _____ _____ _____ if there's too much resistance in _____ Spark _____

There _____ _____ too _____ _____ _____ the spark plug _____ _____ could _____ the misfire warning light _____ go _____.

Is there _____ _____ of resistance _____ _____ on _____ spark _____ wires, _____ would _____ the _____ engine _____ to flash?

_____ Check _____ Light _____ have been triggered _____ _____ _____ Detection caused _____ high _____ _____ the _____ Plug wires.

_____ build up on _____ spark _____ wires can cause _____ _____ _____ _____ to light _____.

_____ resistance in _____ _____ _____ _____ be to _____ for _____ detection _____ engine light on.

Is _____ engine _____ turned _____ _____ excessive _____ across spark plug _____?

_____ resistance _____ the _____ plug wires _____ lead _____ misfire _____ _____ _____ the _____ to fail.

_____ _____ resistance in _____ _____ _____ wires _____ reason _____ the engine light turning _____?

Is there _____ chance _____ resistance building up _____ my _____ _____ wires, which _____ _____ _____ check engine _____ _____ _____ on?

_____ _____ possible for _____ resistive spark Plug cables _____ _____ _____ illuminated _____ engine light _____?

_____ excess _____ _____ the _____ _____ _____ a cause _____ misfire detection and on _____ the _____ light?

_____ check engine _____ may _____ _____ _____ the _____ _____ wires show high resistance.

_____ it possible for _____ Detection _____ _____ _____ with _____ resistance _____ _____ the spark _____ wires?

Is there _____ resistance _____ the _____ _____ wires that could _____ _____ _____ light _____ _____ on?

_____ the _____ Detection _____ _____ _____ _____ activated due to excessive resistance levels in _____ _____ plug _____?

Has _____ _____ _____ _____ _____ on _____ of _____ resistance near the _____ plug wire?

_____ the _____ _____ light illuminated _____ to excessive _____ in _____ spark _____ wire?

Is there an _____ _____ _____ resistance _____ the spark _____ _____ _____ causes misfiring _____?

_____ it possible that excess _____ in _____ spark plug _____ _____ _____ _____ detection and lights on _____ _____?

Does _____ Check _____ light _____ _____ _____ to excessive _____ _____ _____ the spark plug wires?

The Check Engine _____ could _____ caused _____ _____ _____ around _____ spark Plug _____.

Could excess resistance _____ the _____ plug wires _____ _____ _____ _____ _____ _____ light on?

Is it _____ that _____ _____ _____ my _____ plug wires _____ turn _____ the _____ light?

_____ a _____ _____ _____ on _____ _____ is _____ resistance developing across the _____ plug wires?

There might be resistance built _____ on _____ _____ _____ _____ _____ a misfire and _____ _____ _____ check engine _____.

_____ Check _____ _____ can _____ _____ on due to _____ resistance _____ _____ spark plug wires.

Can the _____ _____ Light _____ _____ on _____ _____ resistance across the spark _____ _____?

Has _____ _____ Engine light _____ _____ _____ _____ excessive _____ in the spark plug _____?

_____ _____ resistant spark _____ wire have _____ ability to _____ a _____ Engine _____?

Is _____ _____ _____ overly-resistive spark plug _____ to _____ an _____ check _____ _____ indicator?

Is _____ check engine light _____ _____ _____ _____ Detection because _____ _____ _____ across _____ spark plugs?

Could _____ resistance _____ _____ plug wires be _____ _____ for _____ _____ _____ lights on _____ engine?

_____ _____ Spark Plug Wires _____ so much _____ they're _____ _____ _____ Check Engine _____?

_____ check engine _____ could _____ triggered _____ resistance builds _____ the _____ _____ wires.

Could the spark _____ _____ have _____ resistance _____ could lead _____ _____ detection _____ _____ _____ the check engine _____?

Is there _____ _____ that causes misfires _____ _____ _____ light?

Is there _____ chance _____ resistance build _____ _____ my spark _____ _____ _____ _____ cause _____ _____ engine light _____ go off?

Has _____ _____ engine _____ come on _____ of excessive resistance _____ _____ _____ spark plug _____?

_____ _____ _____ plug wires have _____ resistance _____ could _____ misfire detection and engine _____ _____.

Is the current _____ indicating that excessive _____ _____ _____ _____ Wires _____ _____ the _____ _____ and turned on _____ Check Engine _____?

_____ it _____ _____ excessive _____ in spark _____ wires has _____ _____ _____ _____ _____ and turned on the check _____ light?

Is the _____ Detection and _____ _____ Light caused _____ _____ resistance levels _____ the _____ _____ _____?

_____ it _____ for Misfire _____ _____ _____ _____ with _____ _____ developing through the _____ plug wires?

Can _____ expect _____ resistance developed through _____ _____ plug wires _____ prompt _____ _____ _____ light?

_____ _____ plug wires _____ _____ _____ _____ _____ lead to misfire detection and engine _____ on?

_____ _____ expect _____ Check _____ Light indication when Misfire Detection _____ activated with _____ resistance _____ _____ spark _____ _____?

Has the _____ Engine _____ _____ _____ _____ _____ excessive resistance developing _____ the spark _____ wires?

Are there excessive resistance levels in the _____ _____ wires that _____ _____ _____ Misfire _____ and _____ _____ _____?

There could be _____ _____ engine light if _____ _____ on _____ _____ plug _____.

Do highly _____ spark _____ wires cause a lit _____ _____ _____ _____?

Is _____ _____ for the _____ Detection thing _____ kick _____ _____ _____ on the Check Light Engine because _____ _____ resistance _____ the _____ _____

_____ _____ possible that a _____ Engine _____ _____ on because of _____ _____ on the spark _____ _____?

_____ Misfire Detection _____ _____ _____ Light _____ activated _____ high resistance spark _____ wires.

Is there a _____ _____ resistance building _____ _____ _____ _____ _____ wires, which _____ cause a check _____ light?

_____ _____ in _____ _____ plug wires could cause _____ detection _____ Engine light _____.

_____ there _____ _____ for _____ _____ spark plug cables to _____ an _____ _____ engine _____ indicator.

Excess _____ in the _____ plug wires _____ lead _____ misfire _____ and _____ _____ _____

Is excessive _____ _____ the _____ _____ _____ a cause _____ the _____ Detection _____ Engine _____ Light?

Is a _____ _____ _____ _____ _____ of excessive resistance _____ spark plug _____?

_____ _____ Detection _____ Check Engine _____ _____ be _____ by excessive resistance levels in _____ _____ Plug _____.

_____ _____ possible for _____ _____ across _____ plug wires _____ turn on the _____ _____?

_____ resistance _____ _____ _____ plug wires could cause _____ _____ to _____ _____ as a result of misfire _____.

Has the check _____ light _____ triggered _____ a _____ _____ that is _____ _____ _____ resistance _____ the spark plug _____?

_____ is _____ _____ of resistance building up _____ my _____ plug wires, _____ would _____ a _____ _____ light.

_____ _____ _____ _____ for overly _____ _____ _____ cables _____ cause an _____ check engine light indicator?

Is there too _____ _____ in my _____ _____ _____ that could _____ on _____ engine _____?

_____ _____ _____ _____ wires have excess resistance, _____ could _____ _____ detection _____ engine light malfunctioning.

_____ misfiring _____ _____ _____ _____ from wire resistance?

There _____ be _____ resistance in the spark plug _____ _____ _____ _____ reason for _____ _____ _____ light.

_____ _____ Misfire Detection _____ kick _____ _____ turn _____ _____ _____ Light Engine _____ of _____ resistance _____ the spark plug wires?

Could _____ _____ in the _____ plug wires _____ _____ _____ and engine _____ on.

There _____ be excessive resistance _____ the _____ plug _____ that _____ cause _____ _____ _____ light to go _____.

_____ much _____ in the spark plug wires _____ _____ _____ detection _____ _____ _____ malfunctioning.

If _____ _____ _____ the spark _____ wires it _____ _____ _____ check _____ light to _____ triggered.

Do _____ Check Engine Light _____ _____ _____ _____ _____ resistance _____ _____ the Spark Plug Wires?

_____ _____ on due _____ spark _____ _____ being too _____ resistance?

A _____ engine _____ _____ _____ triggered _____ _____ build-up on the _____ plug wires.

Excess _____ _____ _____ spark plug wires _____ cause the _____ detection _____ _____ engine light _____ turn _____.

resistance _____ the _____ _____ _____ can lead to _____ check _____ _____ being triggered.

Is the _____ _____ _____ Check _____ Light triggered by _____ _____ spark _____ wire?

_____ the _____ Engine light on because _____ _____ _____ among the _____ plug _____?

_____ _____ _____ _____ _____ resistance in my spark plug wires to _____ the _____ _____?

_____ _____ resistant spark _____ _____ lead to a _____ engine _____ up?

The Check Engine _____ _____ _____ _____ _____ by _____ Misfire Detection due _____ high resistance across _____ _____ Plug _____.

_____ _____ engine _____ _____ light up due to _____ amount _____ resistance in the _____ _____ _____.

Is _____ _____ _____ _____ _____ engine light illumination caused by increased _____ impedance on the _____ _____ _____?

The Check _____ _____ could _____ on _____ to excessive _____ developed across _____ Spark _____ _____.

Resistance _____ _____ _____ _____ wires can lead _____ the check _____ _____ being triggered.

_____ _____ _____ _____ light _____ on because _____ _____ resistance developed among the Spark Plug _____?

Is there a chance _____ resistance _____ up across my _____ plug _____ _____ to _____ _____ _____ would _____ _____ _____ engine _____ to come _____

Can excess _____ in _____ _____ _____ wires cause _____ _____ light _____ turn on?

_____ _____ check _____ _____ to light up _____ of _____ resistance _____ the spark plug _____?

_____ _____ resistance in _____ _____ plug wires cause _____ _____ engine _____ to light _____?

If resistance builds _____ the _____ _____ _____ _____ check _____ _____ can be triggered.

_____ Detection _____ _____ Light Engine _____ _____ be _____ to excessive resistance in _____ _____ wires.

_____ the _____ _____ and Engine _____ _____ _____ activated due _____ excessive resistance levels in _____ _____ Plug Wires?

Check Engine _____ illuminated _____ _____ _____ _____ _____ on misfire detection.

Is _____ resistance around the Spark Plug _____ _____ them to _____ and _____ _____ _____ _____ _____?

_____ could _____ _____ _____ in _____ _____ plug wires, which _____ cause _____ misfire to _____ on.

_____ _____ _____ light _____ be triggered by _____ build-up _____ the spark plug _____.

_____ _____ _____ excessive resistance in the _____ plug wires _____ _____ _____ _____ why the warning light goes _____.

Is _____ _____ that _____ _____ up across _____ _____ _____ _____ _____ cause a check engine light?

Has the _____ _____ light come on because _____ _____ _____ _____ the _____ _____ wires?

_____ _____ possible _____ Misfire Detection to _____ activated _____ heightened resistance developed _____ _____ _____ wires?

_____ the _____ Engine Light triggered _____ a _____ Detection caused _____ _____ resistance _____ _____ _____ Plug Wires?

_____ _____ resistance in the spark _____ _____ cause the _____ _____ _____ turn on?

If _____ _____ _____ _____ spark plug _____ _____ can lead to _____ _____ _____ light being triggered.

How much _____ the _____ _____ _____ have _____ cause _____ check _____ light to go _____?

_____ _____ check _____ _____ come on because of _____ resistance _____ _____ spark _____ wires.

There _____ _____ excessive resistance in the _____ _____ wires _____ causes the _____ _____ _____.

Has _____ _____ engine _____ come _____ _____ of excessive _____ on _____ _____ plug wire?

The check engine _____ can _____ _____ _____ _____ build-up on the _____ _____ wires.

_____ a Check Engine _____ come on _____ _____ _____ _____ on the _____ _____ wires?

_____ _____ a Check Engine _____ due to _____ _____ _____ across _____ spark _____ wire?

The _____ engine light can _____ _____ _____ _____ builds _____ the spark _____ wires.

_____ elevated _____ of hindrance across the Spark _____ _____ _____ Misfire _____ _____?

_____ highly _____ Spark _____ Wires turn on the _____ _____?

Has the _____ Engine Light _____ on because _____ excessive _____ _____ _____ the _____ plug _____?

_____ _____ _____ wire causing _____ resistance and triggering Misfire _____?

_____ _____ builds on _____ spark _____ _____ a _____ engine _____ could be lit.

Is excess resistance in the spark _____ _____ cause _____ _____ _____ _____ lights on _____ _____?

The _____ Engine Light may be illuminated by an _____ _____ _____ due _____ excessive _____ _____ _____ _____ _____ wires.

Are _____ Misfire Detection _____ _____ engine light illumination _____ by _____ _____ impedance on _____ spark _____ _____?

Excess _____ _____ the spark _____ _____ could lead _____ misfire _____ _____ on to _____ engine _____.

_____ _____ _____ _____ in the _____ plug _____ _____ causes _____ engine light to turn on?

_____ _____ _____ Detection thing kick in _____ turn _____ the Check Light _____ _____ _____ _____ much _____ _____ the spark Plug Wires

Did _____ _____ _____ _____ _____ and engine light?

The _____ warning _____ could _____ off _____ to _____ _____ _____ in the _____ plug wires.

_____ _____ resistance _____ around the _____ _____ wires, _____ them to malfunction and _____ the _____ engine _____?

_____ a _____ _____ _____ come _____ when _____ spark plug wire _____ resistance?

Has _____ resistance developed across _____ _____ plug wires and _____ the _____ _____ _____ to _____ _____?

Do _____ _____ _____ _____ _____ _____ much resistance, that they're _____ on the Check _____ Lamp?

_____ the Check _____ light _____ _____ due _____ _____ _____ _____ the spark plug wires?

_____ the _____ _____ _____ come on _____ _____ excessive resistance across _____ spark _____ wire?

_____ could be excessive _____ _____ _____ spark _____ _____ _____ could be why the warning _____ is _____.

The _____ _____ light might _____ _____ by resistance _____ across _____ spark _____ wires.

_____ _____ _____ Engine light _____ on because of excessive resistance developing _____ _____ _____ _____?

_____ there _____ Check _____ light because of _____ _____ developing _____ the _____ plug _____?

There could _____ excessive resistance _____ the spark _____ _____ _____ _____ cause _____ _____ detection.

_____ _____ Engine Light _____ be caused by excessive _____ _____ _____ _____ plug wires.

_____ _____ engine _____ might have _____ triggered by a _____ _____ _____ _____ _____ _____ across the spark plug wires.

Are the Misfire _____ _____ kicking _____ _____ _____ _____ the Check _____ Engine if there _____ _____ much resistance in _____ Spark _____ _____?

The Misfire Detection and _____ _____ _____ _____ _____ _____ by _____ resistance _____ in _____ spark plug wires.

_____ _____ a chance of resistance _____ _____ _____ _____ spark _____ wires, _____ _____ cause a check engine _____ _____ come on?

_____ the _____ _____ Light triggered _____ a Misfire Detection caused _____ high _____ _____ _____ _____ wires?

Is it _____ _____ an _____ _____ engine _____ _____ to be _____ _____ overly resistive spark _____ wires?

_____ the _____ plug wiring _____ to _____ Detection _____ Check _____ Light _____?

Too _____ _____ in _____ _____ plug wires _____ _____ _____ engine light _____ turn on.

Excess _____ in spark plug _____ _____ _____ _____ _____ and lights on the _____.

How _____ _____ in the spark _____ _____ may cause _____ check engine _____ _____ light _____?

_____ _____ _____ plug _____ _____ too much _____ it could cause _____ detection _____ engine light _____.

The _____ _____ Light could _____ on _____ of _____ resistance developed across _____ _____ _____ wires.

Has _____ _____ Engine _____ come on because of _____ resistance _____ _____ across _____ spark _____ _____?

Is _____ a _____ _____ _____ built up across _____ _____ _____ _____ _____ to _____ misfire, which would _____ cause the check engine _____ to

_____ _____ _____ chance _____ resistance _____ up _____ my spark _____ _____ _____ _____ cause a check engine _____ to go off?

_____ check _____ _____ _____ be triggered by _____ resistance _____ my _____ plug wires.

The Check Engine _____ _____ come on _____ _____ resistance _____ _____ _____ spark plug _____.

Has a _____ Engine light _____ _____ because _____ _____ _____ developing _____ _____ spark plug wires?

Misfire _____ _____ _____ Light engine illumination are _____ by _____ _____ in _____ _____ wires.

Has _____ Check _____ _____ come _____ _____ of excessive _____ _____ among the spark _____ wire?

_____ _____ be _____ _____ _____ spark _____ wires that is causing _____ misfire warning light _____ go _____.

_____ check _____ _____ _____ _____ caused by resistance build-up _____ the spark _____ wires.

_____ the _____ Engine Light on _____ of excessive resistance _____ _____ the _____ _____?

_____ Detection _____ check light _____ illumination _____ _____ by excessive resistance _____ _____ plug _____.

Is the high _____ _____ _____ _____ _____ wires _____ the Misfire Detection?

_____ resistance builds _____ the spark _____ _____ _____ will lead _____ _____ check engine _____.

_____ there a _____ _____ _____ _____ and lights on _____ engine because of excess resistance in _____ _____ _____ _____?

Is there _____ _____ of resistance _____ my spark _____ wires leading _____ _____ _____ which _____ _____ _____ check engine light to _____ _____?

Is excessive _____ _____ my spark _____ wires _____ _____ of _____ detection?

Is _____ _____ Detection _____ Check _____ Light triggered _____ the _____ resistance Spark _____ _____?

Did _____ spark plug _____ cause Misfire Detection _____ _____ _____ Light _____?

The spark _____ wires _____ have excessive _____ which may _____ _____ _____ misfire _____ _____ on.

_____ _____ warning _____ might _____ been _____ by _____ _____ in the spark plug _____.

_____ _____ possible that _____ Misfire _____ _____ can kick in _____ _____ on _____ Check Light _____ with too much _____?

Has a check _____ _____ _____ _____ _____ of _____ resistance near the _____ _____ wires?

Has _____ _____ Engine _____ triggered by _____ Misfire _____ because _____ _____ _____ resistance _____ the spark plug wires?

_____ misfire detection _____ engine light _____ on could _____ _____ by _____ resistance in _____ _____ plug _____.

Is there an increased electrical impedance _____ _____ _____ a _____ _____ _____ _____ _____ light illumination?

_____ _____ possible _____ Misfire _____ _____ _____ activated with _____ _____ through Spark Plug wires?

Excess resistance _____ _____ spark _____ _____ could _____ to blame _____ _____ malfunctioning engine _____.

_____ check _____ _____ is produced when _____ resistance _____ around the _____ plug _____.

_____ _____ engine _____ could _____ triggered _____ resistance build _____ the _____ plug wires.

Could _____ _____ _____ and _____ check engine light be turned on _____ _____ _____ in _____ spark _____ wires?

_____ there _____ _____ in _____ spark plug _____ that might lead _____ the _____ _____?

excess _____ _____ _____ spark plug _____ could _____ _____ misfire _____ and on to _____ _____ engine light.

_____ _____ Spark Plug Wires _____ resistant they're turning _____ _____ _____ _____ Lamp?

_____ the _____ and engine _____ _____ by _____ resistance?

_____ _____ _____ _____ Engine Check Light are _____ by excessive _____ levels in _____ Spark _____ _____.

_____ _____ Detection could _____ triggered _____ the high resistance _____ the _____ _____ Wires.

Have _____ _____ _____ Light _____ triggered _____ a Misfire Detection _____ to the _____ _____ _____ the spark plug _____?

The Misfire Detection and _____ _____ Light _____ _____ _____ by _____ _____ spark _____ wires.

The Check _____ _____ might have _____ triggered _____ a _____ Detection caused by high _____ across _____ _____ _____ _____.

_____ Misfire Detection _____ _____ _____ _____ are triggered by high resistance _____ _____ wire.

_____ much resistance _____ the _____ _____ _____ could _____ the check engine _____ to _____?

Have _____ Misfire _____ and _____ _____ Light _____ _____ _____ of excessive _____ in the spark _____ wires?

Excess _____ in _____ spark plug wires _____ cause misfire _____ _____ _____ on _____ _____.

_____ highly resistant spark _____ wires lead to _____ _____ _____ _____ warning?

_____ the Check _____ light come on _____ to _____ excessive _____ _____ _____ the _____ _____ wires?

_____ _____ excess _____ in the spark plug wires that _____ lead _____ _____ _____ _____.

The Misfire Detection _____ _____ Engine _____ _____ be _____ _____ _____ resistance spark Plug _____.

_____ it _____ _____ _____ _____ in my spark plug _____ _____ cause _____ misfire detection?

Has a _____ Engine light come _____ because _____ _____ resistance _____ _____ _____ spark _____ wire?

_____ _____ and Check _____ Engine _____ can be caused by excessive _____ in _____ _____ _____.

Is the Misfire Detection _____ _____ _____ and _____ on _____ Check Light _____ if _____ too _____ _____ _____ the _____ plug wires

Resistance on _____ spark _____ _____ _____ cause the _____ _____ light to go _____.

_____ excess resistance _____ the spark plug _____ _____ misfire detection _____ _____ _____ _____ check _____ light?

_____ the Misfire _____ _____ _____ in _____ _____ on _____ check light engine _____ of _____ resistance of the _____ _____ wires?

The Misfire _____ and _____ Check _____ _____ _____ triggered _____ excessive _____ in _____ spark _____ wires.

Has the Check Engine _____ been triggered by a _____ Detection, _____ to high _____ _____ _____ _____ _____ _____?

Did the _____ engine light _____ on because _____ excessive _____ developed among _____ _____ _____ _____?

_____ resistance builds _____ spark _____ wires, _____ _____ engine _____ may _____ triggered.

If _____ _____ _____ spark _____ _____ _____ check _____ light can be triggered.

resistance _____ up _____ the spark _____ _____ _____ _____ _____ check engine light _____ light up.

Is Misfire Detection _____ _____ _____ _____ of _____ across _____ spark _____ wires?

Has _____ _____ _____ _____ come on _____ of excessive resistance _____ the spark _____ _____?

_____ _____ _____ _____ spark plug _____ _____ cause _____ check engine light _____ go off.

If _____ spark _____ wires _____ _____ _____ _____ _____ lead to misfire detection and _____ light _____.

Is _____ a risk of misfire _____ _____ _____ _____ _____ _____ _____ to excess resistance in the spark _____ _____?

_____ _____ _____ wire causing high _____ and _____ a Misfire _____?

_____ is a _____ _____ resistance build _____ in the spark _____ _____ _____ an engine _____.

Do these _____ Plug Wires _____ so _____ resistance, _____ _____ on _____ _____ Engine _____?

_____ the Check _____ light _____ _____ _____ excessive resistance _____ the spark plug _____?

_____ _____ possible for Misfire _____ _____ _____ activated with _____ _____ prompting Engine _____ Light indication?

_____ the Check _____ Light been triggered _____ _____ _____ Detection caused by _____ _____ _____ spark _____ wire?

Has _____ _____ engine light _____ on _____ of _____ excessive _____ developed among _____ spark _____ _____?

_____ _____ possible that _____ resistance across spark _____ cables can _____ _____ _____?

_____ excess resistance _____ the _____ plugs cause _____ _____ and _____ to the _____ _____?

Is _____ a chance of _____ _____ up across _____ spark _____ wires, _____ _____ cause an _____ _____ _____ go off?

Does _____ resistance near _____ _____ plug wires _____ _____ to malfunction _____ _____ _____ check _____ light?

Is the _____ _____ _____ triggered by _____ _____ Detection _____ by high _____ _____ the spark _____?

Is _____ a chance _____ _____ _____ up across my _____ _____ wires causing a _____ engine _____ _____ go _____?

_____ _____ resistance develop across the spark _____ wires, _____ the check _____ _____ _____ _____ on?

_____ excess _____ in _____ spark _____ _____ be _____ cause of the engine _____ _____ off?

_____ check _____ light _____ _____ _____ _____ _____ resistance _____ up on the spark plug wires.

Has the check engine _____ come on _____ _____ excessive _____ developed _____ the _____ _____ _____?

_____ check engine _____ _____ _____ triggered byresistance build _____ on _____ spark plug _____.

Has the _____ engine _____ come _____ _____ _____ the _____ _____ on the spark _____ wire?

_____ the Misfire _____ thing _____ in and _____ _____ the _____ _____ Engine because of the resistance _____ _____ Spark _____ _____?

_____ _____ check _____ light _____ _____ because of excessive resistance near the _____ _____ _____?

_____ it possible _____ _____ illuminated _____ _____ _____ indicator _____ be caused by _____ _____ sparkplug cables?

_____ _____ _____ _____ _____ the Misfire Detection thing kick in and _____ _____ _____ _____ Light Engine _____ there's too much _____

Misfire _____ _____ and engine light _____ _____ _____ caused _____ increased _____ impedance on _____ spark _____ system.

The _____ engine light can be triggered _____ _____ _____ _____ the spark _____ _____.

_____ build _____ _____ _____ spark plug wires can cause the check _____ _____ _____ _____ off.

There _____ _____ resistance built up on _____ wires, _____ could _____ _____ misfire _____ _____ _____ the check engine _____.

Has the _____ Engine Light _____ _____ _____ _____ excessive _____ _____ _____ the Spark Plug Wires?

_____ may _____ to _____ check engine _____ being _____ if _____ _____ on the _____ plug _____.

_____ _____ in _____ _____ plug wires could lead _____ misfire detection _____ _____ check _____ light.

_____ _____ _____ engine light on _____ _____ _____ _____ on the spark plug wire?

Is spark plug _____ _____ _____ resistance and _____ _____ Misfire _____?

_____ a Check Engine light _____ _____ because of _____ _____ _____ _____ _____ Plug Wires?

_____ Misfire Detection and _____ Check Light were _____ _____ _____ excessive _____ in _____ Spark _____ _____.

Did excessive _____ _____ in _____ spark plug _____ lead to _____ _____ _____ and _____ _____ Light?

_____ there _____ _____ resistance _____ my spark _____ wires that could cause _____ _____?

_____ _____ _____ Detection _____ kick in and turn _____ _____ Check Light _____ if there's too _____ resistance in _____ _____ Plug _____

Excess _____ _____ the _____ plug _____ can _____ to _____ _____ and the check _____ light.

_____ _____ be excessive _____ in the _____ _____ wires, _____ _____ cause the warning _____ to _____ off.

_____ current _____ indicate that excessive resistance in spark plugs _____ _____ the Misfire _____ _____ _____ _____ the check _____ _____.

_____ _____ _____ the _____ plug wires _____ cause the _____ engine _____ to _____ off.

Can excessive resistance _____ around _____ _____ _____ wires _____ them _____ malfunction and _____ _____ _____ engine light?

Is _____ _____ _____ the _____ plug _____ a _____ _____ causes _____ check _____ light to malfunction?

_____ build up _____ _____ _____ _____ _____ _____ _____ the check engine light to go on.

If _____ spark plug _____ have _____ _____ the misfire detection _____ engine _____ _____ _____.

Is _____ possible that _____ _____ in spark _____ _____ activated _____ Misfire Detection _____ turned on _____ check _____ _____?

The Misfire Detection _____ _____ Engine Light are _____ _____ _____ resistance _____ _____ _____ spark plug _____.

Is _____ possible for an illuminated check _____ light _____ _____ _____ _____ resistive _____ plug _____?

_____ the check _____ _____ _____ triggered _____ _____ build up _____ resistance _____ the spark plug _____?

_____ _____ Check _____ light _____ _____ because _____ resistance developing _____ _____ spark plug wires?

Could excess _____ _____ _____ _____ plug _____ cause _____ _____ engine light to _____ off?

_____ _____ in _____ spark plug wires _____ lead to _____ _____ _____ the _____ light turning _____.

_____ _____ that _____ _____ engine light _____ be _____ _____ _____ builds _____ the spark plug wires.

_____ _____ a Check Engine light _____ of excessive _____ _____ _____ _____ _____ plug wires?

_____ highly resistant Spark _____ Wires cause _____ Misfire Detector _____ _____ _____?

_____ _____ Check Engine _____ on _____ _____ the _____ _____ on the spark _____ wires?

_____ _____ builds _____ _____ spark plug wires, _____ check engine light _____ be _____.

_____ _____ _____ _____ Check _____ _____ _____ _____ by excessive resistance levels in the spark _____ wires.

Is _____ resistance _____ the _____ _____ wires _____ to cause _____ detection _____ engine light _____?

Is _____ _____ and engine light due _____ _____ wire _____?

Is it possible that increased _____ _____ _____ _____ _____ results _____ misfiring?

_____ the Spark Plug _____ _____ so _____ resistance _____ they _____ _____ turn on _____ Check Engine _____?

If _____ spark _____ _____ have _____ resistance, _____ can _____ misfire detection and _____ _____ malfunctioning.

Is the _____ Engine _____ on because of _____ _____ developing _____ _____ spark _____ _____?

Could _____ resistance in _____ spark _____ _____ cause misfire _____ _____ _____ _____ engine _____ to come on?

Have _____ Check Engine Light _____ on because _____ _____ resistance _____ _____ _____ Spark _____ Wires?

Has _____ Check _____ light _____ on because of _____ _____ _____ spark _____ wires?

Excess _____ _____ _____ spark _____ _____ _____ result in misfire detection _____ lights on the _____.

Has a Check Engine light been _____ _____ _____ excessive resistance _____ _____ _____ _____ _____?

_____ spark plug wires _____ have too much _____ and _____ _____ be why _____ _____ will _____ _____.

Is the _____ _____ thing _____ in _____ turn _____ the Check _____ Engine _____ _____ _____ much resistance in the _____ Plug _____

_____ _____ Check Engine _____ _____ _____ due to _____ _____ _____ on the spark plug wire?

_____ _____ _____ wires could _____ too _____ _____ and that could _____ _____ the warning light goes _____.

The _____ _____ light could _____ _____ result of _____ _____ in the _____ plug _____.

Can excess resistance in _____ spark _____ _____ lead _____ _____ _____ and on to the _____ _____ _____?

Could excess resistance in _____ spark _____ _____ _____ to _____ _____ in the _____?

_____ excess _____ _____ the spark plug _____ result in _____ detection and on _____ _____ _____ _____ light?

_____ _____ _____ chance of resistance _____ up across my _____ plug wires leading to _____ misfire _____ _____ cause _____ _____ _____ _____ _____ go off

_____ the Misfire _____ _____ _____ _____ and _____ on the Check Light _____ if _____ _____ too much resistance _____ the _____ _____ Wires?

Is a check engine light _____ because of excessive _____ _____ _____ _____ _____ _____?

_____ _____ engine _____ could be _____ by _____ build _____ of resistance on _____ spark _____ _____.

_____ is excess resistance _____ _____ _____ plug _____ _____ _____ cause the misfire detection.

If _____ _____ plug wires _____ excess _____ I _____ _____ a misfire _____ _____ engine light _____.

_____ _____ _____ for _____ _____ check engine _____ indicator to _____ because of _____ resistive spark plug _____?

Have _____ Check Engine Light _____ triggered by a Misfire Detection _____ _____ _____ _____ across _____ _____ _____ wires?

Has _____ Check _____ _____ come on _____ of _____ _____ developed _____ the _____ plug wire?

_____ Misfire _____ activated by elevated _____ _____ hindrance _____ _____ Spark Plug _____?

Is _____ _____ engine _____ _____ because _____ excessive resistance in _____ _____ plug wires?

Is excess _____ _____ the _____ _____ wires a _____ _____ the _____ _____ to turn on?

_____ there _____ much resistance in _____ spark plug wires that _____ _____ on _____ _____ _____ _____?

Is _____ _____ _____ _____ spark _____ _____ a cause of the check engine _____?

_____ _____ _____ _____ may go _____ due to _____ excessive resistance in _____ spark plug _____.

_____ the Check _____ _____ on _____ _____ excessive resistance _____ _____ Spark Plug Wires?

_____ _____ _____ engine light _____ _____ _____ of _____ resistance between the spark _____ wires?

Have _____ Misfire _____ and Engine Check Light _____ activated _____ to _____ resistance _____ _____ _____ _____ wires?

_____ a check _____ light _____ _____ _____ _____ excessive resistance _____ the spark _____ wires?

Has the _____ _____ Light been _____ by _____ _____ _____ caused by _____ resistance across the _____ _____ Wires?

_____ the spark _____ wires _____ _____ _____ _____ and Check _____ Light activation?

Is _____ _____ that excess resistance _____ the _____ _____ wires _____ _____ misfire detection and _____ _____ on?

_____ _____ a _____ of resistance _____ _____ across my _____ plug _____ leading to _____ misfire, which _____ prompt _____ check _____ light?

_____ could _____ _____ _____ in the spark plug wires, _____ _____ make the misfire _____ light _____ _____.

The _____ engine _____ might _____ _____ by resistance build _____ _____ _____ _____ plug wires.

_____ _____ Check _____ light come _____ _____ of excessive resistance _____ developed across _____ _____ _____ wires?

_____ _____ possible _____ _____ Detection to _____ activated with _____ resistance _____ through spark _____?

Is the spark Plug _____ _____ _____ Misfire Detection _____ _____ Engine _____ _____?

Could excess resistance _____ _____ plug wires _____ _____ blame _____ misfire detection _____ _____ _____ on?

The Misfire _____ and _____ _____ _____ are _____ _____ excessive _____ in the spark plug _____.

Has a _____ engine light come on _____ _____ _____ _____ _____ _____ spark plug _____?

Is _____ _____ _____ an illuminated check engine _____ _____ to result _____ _____ resistive _____ plug _____?

Has there been _____ Check Engine _____ _____ because of _____ _____ _____ _____ spark plug _____?

_____ the _____ _____ _____ be _____ by the resistance build _____ on _____ _____ plug wires?

_____ _____ Check Engine _____ come on because _____ excessive _____ _____ _____ sparkplug wires?

_____ _____ _____ _____ wires have _____ resistance it _____ _____ misfire detection _____ engine light malfunctioning.

_____ it _____ _____ Misfire _____ to _____ activated with _____ resistance developed through _____ _____ _____ wires?

If _____ spark plug _____ _____ _____ _____ it _____ lead to _____ detection and engine _____ _____.

_____ there _____ _____ Engine _____ _____ of excessive _____ _____ the spark plug wires?

Is _____ _____ Engine Light on _____ _____ the excessive resistance developed _____ _____ _____ _____ Wires?

_____ there a _____ of misfire _____ and on to the _____ engine _____ due _____ _____ _____ in the _____ _____ _____?

_____ _____ Check Engine Light _____ triggered _____ a Misfire Detection caused _____ high _____ across _____ _____ plug _____?

The check _____ light _____ _____ _____ on by resistance _____ _____ the spark _____ _____.

_____ excess _____ in _____ spark _____ lead _____ misfire _____ and _____ light on?

The check _____ light _____ _____ _____ on by excessive _____ across _____ spark _____ _____.

_____ the _____ Engine light _____ on when _____ _____ _____ _____ the spark plug _____?

Is the _____ Detection _____ _____ the high _____ of _____ _____ Plug _____?

Does _____ _____ engine light _____ _____ _____ of _____ resistance developing _____ the spark _____ wires?

_____ resistance builds _____ _____ plug _____ _____ check engine light _____ _____ triggered.

Is an engine _____ _____ and _____ Detection alert _____ to increased _____ _____ on _____ Spark _____ _____?

_____ _____ _____ _____ _____ on _____ of excessive _____ developing _____ the spark plug wire?

Has _____ Check _____ light come on because _____ _____ resistance developed _____ _____ spark _____ _____?

Is there _____ _____ that _____ _____ spark _____ _____ can cause an _____ check engine _____ _____?

Is _____ Misfire Detection and _____ _____ _____ _____ _____ high resistance sparks?

_____ _____ _____ Engine Light triggered _____ a Misfire _____ _____ by _____ _____ _____ Spark Plug Wires?

_____ Misfire Detection and _____ Check Light _____ have _____ _____ _____ to excessive _____ _____ the Spark Plug _____.

_____ misfire warning _____ _____ _____ off because of excessive _____ _____ _____ spark _____ wires

It _____ lead to _____ _____ _____ light _____ _____ if _____ builds on the _____ plug _____.

Has _____ _____ _____ _____ _____ on because of excessive _____ within _____ _____ plug wires?

There _____ _____ resistance built _____ _____ the wires _____ can _____ a _____ and lead _____ _____ _____ engine light.

_____ highly resistant spark _____ wires _____ a _____ engine _____?

Can the Check _____ _____ turn on because _____ excessive _____ _____ _____ spark _____ _____?

_____ it possible _____ excessive _____ in _____ plug _____ has _____ _____ Detection _____ turned on the check _____ _____?

Is it possible for _____ _____ _____ _____ _____ _____ _____ resistance, prompting _____ Check Engine Light _____?

_____ build- up on _____ spark _____ _____ can cause _____ check engine _____ _____ _____.

Excess _____ _____ the _____ plug wires may _____ misfire _____ and _____ light _____.

Is _____ _____ Detection triggered by high _____ _____ _____ Wires?

Could _____ resistance in the _____ _____ wires _____ _____ _____ detection and lights on _____ _____?

_____ _____ _____ _____ light _____ on _____ _____ the excessive _____ developed among the spark _____ wires?

_____ _____ engine light _____ _____ triggered by _____ build-up _____ spark plug _____

_____ _____ check _____ light come on because of _____ resistance _____ spark _____ _____?

_____ _____ resistance in the _____ plug _____ a _____ _____ engine light _____?

Is _____ _____ _____ of _____ building up _____ my _____ plug wires, _____ would _____ a _____ engine light?

_____ excessive _____ in _____ _____ plug wires cause the _____ _____ _____ to _____ off?

If _____ spark _____ _____ _____ _____ _____ resistance they _____ cause misfire detection and engine _____ _____.

Resistance _____ _____ spark plug _____ _____ _____ to _____ check engine light.

The _____ Detection _____ _____ Check _____ can be triggered _____ _____ _____ in _____ Spark _____ Wires.

The _____ _____ light may have _____ on _____ _____ _____ _____ on the spark plug _____.

_____ a _____ _____ _____ on _____ _____ resistance develops across the _____ plug wire?

Is it possible that _____ spark _____ _____ _____ be _____ enough to _____ _____ _____ _____ engine light?

_____ could be _____ _____ resistance in the spark _____ _____ which _____ _____ _____ the warning light _____ off.

_____ _____ Check Engine _____ come _____ _____ of excessive _____ _____ the _____ plug wires?

_____ the _____ Engine Light turn on _____ to excessive _____ _____ _____ _____ _____ wires?

Has _____ Check Engine _____ come on because _____ the resistance _____ _____ _____ _____ _____ wire?

_____ check _____ light can _____ triggered by resistance _____ _____ _____ the _____ Plug _____.

Can _____ expect _____ Check Engine Light indication when Misfire _____ is activated _____ _____ _____ _____ spark _____ _____?

_____ _____ up on wires _____ cause a _____ _____ _____ _____ a check engine _____.

_____ _____ possible _____ Misfire Detection to _____ activated _____ heightened _____ prompting a _____ _____ _____ indication?

If resistance _____ _____ the spark _____ _____ _____ check engine light _____ be _____.

If my _____ plug _____ _____ _____ _____ misfire detection and engine _____ _____ can _____.

The check _____ light can be _____ _____ resistance build-up _____ _____ spark _____ _____.

_____ the Misfire Detection thing _____ _____ _____ _____ on the _____ _____ Engine _____ the Spark _____ Wires are too _____?

The Misfire _____ alert _____ engine light _____ _____ _____ caused _____ increased electrical _____ _____ the Spark Plug/Wire _____.

_____ check _____ _____ can be _____ by _____ build _____ on _____ spark plugs.

_____ _____ _____ Light _____ have been _____ by a _____ _____ caused by high _____ _____ Spark Plug wires.

Is _____ _____ _____ for _____ _____ _____ plug cables _____ cause _____ illuminated check engine light?

_____ there a _____ of _____ building _____ across _____ _____ _____ _____ leading to _____ misfire, which would cause _____ check engine _____?

Is there _____ _____ _____ _____ build up _____ _____ _____ _____ wires which would _____ a check engine light?

There _____ be _____ _____ in the _____ plug _____ that _____ _____ the misfire warning _____ to _____ on.

Has the _____ engine _____ _____ on _____ _____ excessive resistance developed among the _____ _____ _____?

Could _____ resistance in the spark _____ _____ _____ to _____ _____ on?

Do _____ Misfire _____ _____ _____ in and _____ on _____ check _____ engine _____ _____ is _____ much resistance in the spark _____ _____?

Can _____ Check Engine Light turn _____ _____ to _____ excessive _____ _____ _____ _____ plug wires?

_____ excessive resistance _____ _____ _____ _____ _____ wires _____ cause _____ to malfunction and produce the _____ engine light?

The _____ engine light could _____ _____ _____ _____ resistance build-up on _____ _____ _____ wires.

Resistance build- up _____ the _____ _____ _____ can lead _____ _____ _____ engine light.

_____ _____ _____ _____ light _____ triggered by resistance on _____ spark plug _____?

_____ check engine light _____ be _____ by _____ _____ up _____ _____ spark _____ wires

_____ there a _____ _____ resistance _____ _____ across my spark plug _____ _____ would cause _____ check _____ _____ to flash?

The _____ Detection and Engine Check Light were _____ _____ to _____ _____ levels _____ _____ Spark _____ _____.

_____ resistance _____ spark _____ _____ could lead _____ misfire detection and cause the _____ _____ _____.

If _____ _____ _____ the spark plug wires it could _____ _____ _____ check _____ _____ being _____.

_____ there _____ _____ in the _____ plug wires that _____ to the _____ _____?

Misfire _____ followed _____ Check _____ _____ _____ _____ _____ caused by excessive resistance _____ spark plug _____.

_____ there _____ excess resistance _____ _____ spark plug _____ _____ _____ lead to _____ detection?

_____ _____ be excessive resistance _____ _____ spark plug _____ and _____ could be _____ _____ misfire will turn _____.

_____ _____ _____ and Engine _____ _____ _____ _____ because of excessive resistance levels _____ the wires.

Has _____ Check Engine _____ _____ on due to _____ excessive resistance _____ _____ _____ spark _____ _____?

_____ excessive _____ develop around the spark plug _____ _____ _____ _____ malfunction _____ produce the _____ _____ light?

_____ there a chance _____ resistance _____ built _____ across _____ _____ _____ _____ leading _____ _____ misfire, which would cause the check _____ light _____

The _____ engine _____ can _____ triggered _____ a build-up _____ resistance _____ the _____ _____ wires.

_____ the Misfire _____ and _____ Check Light activated _____ of _____ _____ in the _____ _____ _____?

Could _____ misfire _____ and check engine light _____ turned _____ by _____ resistance in _____ _____ _____ _____?

_____ there a chance of _____ building up across my _____ plug _____ _____ _____ _____ the check _____ light _____ _____?

_____ excess resistance in the _____ plugs cause _____ _____ _____ lights _____ the _____?

Is _____ _____ in the spark plug _____ responsible for the misfire _____ _____ _____ _____ light _____ _____?

_____ _____ possible that the spark _____ wires _____ too much _____ and _____ the engine _____ _____ _____?

Could the check _____ _____ _____ _____ _____ resistance build-up _____ _____ spark plugs?

_____ it _____ _____ Misfire Detection _____ be _____ with heightened _____ _____ through spark _____ wires?

Is _____ _____ engine light on because _____ excessive resistance _____ _____ spark _____ _____?

_____ there a _____ _____ resistance building up _____ _____ spark _____ _____ _____ to a misfire which _____ cause the _____ engine light _____ _____?

_____ _____ excessive _____ in the spark _____ _____ _____ that could _____ why _____ warning light is _____.

There _____ be _____ _____ in _____ spark plug wires, _____ could lead to _____ misfire _____ _____ going _____.

Is _____ _____ in the _____ plug wires _____ _____ misfire _____ on the _____?

_____ _____ Detection _____ _____ Check Light _____ _____ because of _____ resistance levels in _____ spark _____ wires.

Did the _____ _____ _____ come _____ _____ of excessive resistance _____ _____ the spark plug _____?

Is _____ _____ that _____ _____ in the _____ plug wires _____ lead to _____ detection and on _____ _____ _____ light?

Does _____ Check Engine _____ have _____ _____ _____ a Misfire Detection caused by _____ _____ _____ the spark _____ _____?

If _____ spark plug wires _____ excess resistance, _____ _____ lead to _____ _____ _____ _____ _____ malfunction.

The _____ symptoms _____ _____ _____ resistance in spark _____ wires has triggered the _____ Detection and _____ _____ _____ _____ _____ light.

The check engine _____ _____ _____ _____ _____ the _____ plug _____ are resistant.

Is _____ Check Engine _____ _____ because _____ excessive _____ _____ among the _____ _____ wires?

Does a check _____ light come _____ _____ of _____ _____ _____ _____ spark _____ wire?

_____ the spark _____ wires resistant to Misfire Detection _____ _____ _____ _____ _____?

_____ excessive resistance _____ _____ the spark _____ _____ _____ can _____ them to _____ and _____ the _____ engine light?

_____ there excess _____ _____ the spark _____ wires _____ could cause _____ detection _____ the _____?

_____ _____ _____ _____ spark plug wires builds, a _____ engine _____ could be _____.

Has _____ _____ Engine _____ came on _____ _____ excessive resistance among _____ _____ Plug _____?

_____ the check engine light _____ on _____ _____ the excessive _____ _____ _____ _____ plug wires?

_____ _____ engine _____ _____ be triggered _____ _____ build- up on the _____ _____ wires.

Can a check _____ light _____ triggered by _____ _____ _____ _____ my _____ _____ wires?

_____ resistance _____ _____ the _____ plug wires, _____ check _____ light could _____ _____ off.

Is _____ a chance of resistance building up _____ _____ _____ _____ wires, which _____ _____ a check _____ _____?

_____ there a _____ _____ _____ building up on _____ spark _____ wires, which _____ cause the check _____ _____?

_____ there a _____ of _____ build _____ across my spark _____ _____ leading _____ a _____ _____ would cause _____ check _____ light to _____?

_____ it _____ _____ _____ resistance across spark plug _____ _____ it to _____?

Is it _____ for an illuminated _____ engine _____ _____ _____ to _____ _____ spark plug _____.

_____ _____ _____ Engine light on _____ _____ excessive _____ across spark plug _____?

excess resistance _____ the _____ _____ _____ _____ _____ to misfire detection _____ _____ light on.

_____ misfire _____ light could be because of _____ _____ resistance _____ the _____ _____ _____.

Do the _____ plug _____ have _____ _____ resistance that _____ _____ turning _____ _____ Check Engine _____?

Has a _____ Engine light _____ _____ because _____ excessive _____ _____ spark plug _____?

Are the _____ _____ _____ light _____ _____ wire resistance?

_____ resistance in _____ spark plug _____ could _____ _____ _____ _____ engine light on

_____ you _____ _____ Check Engine light came on because of _____ _____ _____ _____ _____ plug _____?

The check engine _____ _____ _____ triggered _____ _____ build up across my _____ _____ _____.

_____ _____ spark _____ _____ have resistance to _____ _____ and _____ Engine Light activation?

_____ excess _____ in the _____ plug _____ causing _____ detection?

Does _____ _____ spark plug _____ lead to _____ lit _____ _____ engine _____?

_____ the Check Engine _____ triggered _____ _____ Misfire Detection caused _____ _____ resistance _____ _____ _____ wire?

_____ there a _____ _____ resistance build up _____ my _____ _____ wires, _____ would _____ _____ check engine light to _____?

_____ Misfire _____ _____ _____ Engine Light can _____ triggered _____ _____ _____ levels in the Spark _____ Wires.

The _____ _____ wires could have _____ that leads to _____ _____ _____ engine _____ _____.

Do _____ _____ spark plug wires turn _____ _____ _____ on?

_____ _____ up _____ the spark _____ _____ _____ _____ the check engine light.

_____ resistance _____ spark _____ causes misfire _____?

_____ could be too much _____ _____ _____ _____ plug _____ and _____ _____ the _____ light goes on.

Is _____ possible that _____ Misfire Detector can _____ activated _____ _____ resistant _____ _____ _____?

_____ it _____ for Misfire Detection _____ _____ _____ with greater _____ _____ through _____ spark plug _____?

_____ _____ lead to a _____ _____ _____ _____ resistance builds _____ the spark _____ wires.

Has _____ _____ Engine _____ come on _____ _____ the excessive _____ _____ _____ spark plug wire?

_____ resistance _____ on the _____ _____ wires, _____ could _____ _____ check _____ light to _____ triggered.

_____ a check _____ _____ _____ on _____ of _____ resistance on _____ plug wires?

The _____ Detection _____ Engine _____ _____ _____ caused by _____ resistance levels _____ the _____ Plug _____.

_____ the _____ _____ _____ Engine _____ Light _____ by _____ resistance _____ in the _____ plug wires?

Is _____ too much _____ _____ _____ Spark Plug Wires that makes the Misfire _____ _____ _____ _____ and _____ _____ _____ Check _____ Engine

_____ a _____ Engine light _____ _____ _____ of excessive _____ developing _____ the spark _____ wires?

resistance _____ on _____ _____ plug _____ _____ cause the check _____ light _____ _____ up.

The Misfire _____ and _____ _____ _____ _____ _____ _____ excessive _____ levels in the Spark _____ wires.

Is it _____ for Misfire _____ _____ _____ activated with _____ _____ caused by _____ plug _____?

Has a _____ _____ light come on _____ _____ _____ resistance _____ spark _____ wires?

_____ check engine light can be _____ _____ there _____ _____ _____ _____ hindrance across _____ spark _____ wires.

_____ excess resistance in _____ spark plug _____ a _____ _____ misfire _____ _____ lights on _____ _____?

A _____ _____ light could be caused by _____ _____ _____ the spark _____ _____.

_____ on the _____ plug _____ _____ _____ the check engine _____ to _____.

Do the Misfire _____ _____ _____ _____ _____ _____ on the Check Light Engine if there's _____ much _____ in _____ _____ _____ Wires

_____ much _____ _____ the spark _____ wires can _____ the check _____ _____ to _____?

_____ it _____ that _____ resistance in the _____ plug wires _____ the _____ _____?

_____ there _____ possibility _____ _____ _____ _____ _____ my spark plug wires, which would cause a check _____ light _____ _____ _____?

Did _____ and _____ light _____ _____ _____ wire resistance?

Is _____ excessive _____ in _____ _____ _____ wires that could _____ _____ _____ check engine light?

_____ check _____ light _____ be _____ by resistance _____ up _____ spark plug _____.

The misfire detection and the _____ _____ _____ _____ _____ be caused by _____ resistance _____ _____ _____ wires.

Is _____ Detection _____ _____ _____ _____ levels _____ hindrance across the spark plug _____?

If my _____ plug _____ _____ excess _____ the misfire _____ _____ engine _____ might _____.

_____ the _____ Detection thing kick in _____ _____ on _____ _____ Light Engine _____ there _____ _____ _____ resistance _____ theSpark Plug Wires?

_____ the check _____ light _____ _____ because _____ a Misfire Detection _____ by high resistance _____ _____ _____ plug _____?

_____ Misfire _____ activated _____ elevated _____ of _____ across _____ Spark _____ Wires?

_____ it _____ for an _____ check engine _____ _____ to be _____ _____ overcomplicating spark _____ _____?

There _____ a chance that _____ _____ _____ the spark plug wires _____ _____ misfire detection _____ _____ _____ malfunctioning.

_____ the Check _____ _____ been _____ by a Misfire Detection _____ _____ high _____ across the _____ _____?

There _____ _____ _____ resistance in _____ spark plug _____ _____ could _____ the misfire _____ light.

Is _____ _____ _____ in _____ spark plug wires _____ misfire _____ and _____ _____ on?

_____ _____ _____ _____ light _____ to wire resistance?

The check _____ light might _____ triggered _____ _____ _____ Detection caused by _____ _____ across the spark _____ _____.

_____ _____ in _____ spark plug wires _____ _____ _____ detection _____ the engine.

Could _____ _____ in the _____ plug wires _____ _____ blame for misfire detection _____ _____ _____ _____?

Does _____ resistance develop around _____ _____ _____ _____ and cause it _____ malfunction and _____ the _____ _____ light?

_____ _____ _____ that _____ Spark _____ _____ have _____ much _____ _____ they're turning on the Check Engine Lamp?

Is there a chance of _____ _____ _____ across _____ _____ _____ wires leading to _____ _____ _____ would prompt the check _____ _____?

Is there excess _____ in the _____ plug wires _____ _____ lead _____ misfire _____ and the _____ _____ _____?

_____ _____ _____ that _____ resistance _____ spark plug cables _____ misfiring?

Is _____ _____ chance _____ _____ build up across my _____ _____ _____ leading _____ _____ _____ and _____ the check engine light?

Is the Misfire Detection _____ _____ _____ _____ _____ because _____ _____ _____ levels _____ the spark plug wires?

Could _____ _____ _____ _____ _____ plug wires be _____ blame for the _____?

The Check Engine _____ _____ have _____ _____ by _____ Misfire _____ due to high _____ across Spark _____ _____.

Is there a chance of _____ build up _____ _____ _____ plug _____ which _____ cause _____ _____ _____ light _____ come _____?

_____ the _____ engine light caused _____ _____ _____ around the _____ plug _____?

_____ the Check Engine Light _____ on _____ _____ excessive _____ developed _____ _____ _____ Plug Wires?

_____ _____ _____ plug wires have too _____ _____ they _____ _____ misfire detection _____ engine _____ malfunctioning.

Is there _____ chance _____ resistance across _____ spark _____ wires _____ to _____ _____ _____ _____ _____ the check engine light to _____ _____?

Excess _____ _____ _____ spark plug wires _____ _____ _____ misfire detection _____ _____ check engine light.

_____ a Check Engine _____ on because _____ _____ _____ _____ across spark plug _____?

Could _____ resistance in _____ spark plug _____ _____ the _____ engine _____ _____ _____ up?

Is _____ _____ that increased electrical _____ resulted _____ a Misfire _____ _____ and _____ _____ illumination?

_____ _____ _____ _____ _____ spark _____ wires, it may _____ _____ a _____ engine light being triggered.

_____ check engine _____ can _____ _____ _____ resistance on _____ _____ plug wires builds.

The misfire warning _____ _____ _____ due _____ excessive _____ _____ the spark _____ wires

Is _____ electrical impedance _____ _____ Spark _____ system the _____ of _____ Misfire _____ _____ and _____ light illumination?

Is _____ possible _____ increased _____ _____ spark _____ cables _____ them to _____?

The check _____ _____ _____ light _____ _____ of the resistance in _____ spark _____ _____.

Is it possible _____ _____ _____ spark _____ _____ activated the _____ Detector?

Has the _____ engine light came on _____ _____ excessive _____ in _____ _____ _____ _____?

_____ my _____ _____ _____ have excess resistance, _____ _____ and _____ light _____ may happen.

_____ _____ Check Engine light _____ _____ because of a spark _____ _____ _____?

"Could excess resistance _____ the _____ plug wires _____ _____ misfire detection _____ _____ _____ malfunctioning _____

_____ _____ Check _____ light _____ because of excessive _____ _____ among _____ Spark Plug _____?

Is the _____ Engine _____ triggered by a _____ Detection due _____ _____ _____ _____ _____ spark plug _____?

The spark _____ wires _____ _____ _____ resistance, _____ _____ _____ the _____ will turn on.

_____ _____ on _____ plug wires can cause the _____ _____ _____ _____ go off.

_____ _____ if excessive _____ in my _____ _____ wires _____ turn on _____ _____ engine light.

_____ _____ resistance in _____ spark plug _____ a cause _____ _____ detection _____ _____ light on?

_____ my _____ plug _____ are too strong, _____ detection _____ _____ light malfunctioning _____ _____.

_____ there a _____ of resistance build _____ across my _____ _____ wires _____ to a _____ and _____ check _____ _____?

Has _____ check _____ _____ _____ _____ by _____ _____ Detection due to the high resistance across _____ spark _____ _____?

_____ _____ Check _____ Light triggered _____ _____ _____ _____ caused by high resistance across Spark _____ _____?

_____ much resistance in _____ spark _____ _____ could cause a _____ _____ _____ to _____?

_____ _____ engine _____ can _____ triggered _____ resistance build _____ in the _____ plug _____.

The _____ symptoms indicate _____ _____ resistance _____ spark plug wires _____ turned on _____ Misfire _____ and _____ on _____ check _____ _____.

The _____ warning _____ could _____ because _____ could _____ _____ resistance _____ the spark _____ wires.

_____ it _____ that _____ Check Engine _____ comes on due to _____ resistance _____ _____ _____ _____ plug wires?

_____ is _____ that _____ _____ in _____ _____ _____ _____ could cause the misfire detection.

_____ _____ _____ _____ wires have excess _____ it could cause misfire detection _____ engine _____ _____.

Has _____ Check _____ light _____ _____ because _____ excessive resistance _____ the spark _____ _____?

_____ _____ in the spark plug wires can _____ misfire detection _____ _____ _____ _____.

Is there excess _____ _____ the spark _____ wires that _____ _____ _____ _____ and lights on _____ _____?

Can the _____ _____ light _____ _____ on _____ excessive _____ _____ spark plug wires?

_____ the _____ Engine Light be _____ by a _____ _____ caused by _____ _____ across the _____ plug _____?

Has the Check Engine _____ been triggered _____ _____ _____ Detection _____ to high resistance _____ the _____ _____ _____?

_____ _____ excessive _____ around the _____ plug _____ that can cause them _____ _____ and _____ the _____ _____ light.

_____ a Check Engine light come on _____ of _____ _____ across _____ _____ _____ _____?

_____ the Check Engine _____ _____ on _____ of _____ _____ _____ the _____ plug wire?

_____ it possible for _____ aggressive spark plug cables to _____ _____ _____ _____ engine _____ _____?

If resistance _____ _____ the _____ _____ wires it will lead to _____ _____ engine _____ _____ _____.

Has the Check _____ light _____ on _____ _____ _____ _____ developing _____ the spark plug _____?

Excess resistance _____ the _____ _____ _____ could cause malfunctioning engine light _____ _____ _____.

The misfire warning _____ _____ _____ a consequence of _____ _____ in _____ _____ plug _____.

_____ could _____ to a _____ engine light _____ _____ _____ resistance _____ _____ spark plug wires.

Is the Check Engine light _____ _____ _____ _____ _____ _____ the Spark Plug _____?

_____ _____ engine _____ can _____ triggered _____ resistance build _____ _____ _____ spark plug wires

The misfire _____ _____ might go off _____ _____ _____ resistance in _____ _____ plug _____.

_____ _____ _____ chance _____ misfire detection _____ _____ _____ the _____ due _____ excess resistance _____ the spark plug wires?

Could _____ resistance in _____ _____ wires _____ _____ misfire detection?

Excess resistance _____ _____ _____ _____ wires _____ cause misfire _____ _____ engine light malfunctioning.

_____ _____ resistance _____ the spark _____ _____ cause the misfire _____ _____ the _____ light to turn _____?

Could _____ resistance _____ _____ spark plugs _____ to misfire _____ _____ _____ to the engine _____?

Is the Misfire _____ _____ _____ _____ _____ activated by high _____ spark _____ wires?

Is _____ _____ _____ _____ resistance build up _____ my _____ _____ wires, which would cause a _____ _____ light?

The check engine _____ _____ light _____ _____ _____ was a lot _____ _____ _____ the spark _____ wires.

_____ _____ _____ light can be triggered by _____ _____ of _____ on _____ _____ plug wires.

_____ a _____ _____ light _____ on due _____ excessive resistance _____ across _____ _____ plug wires?

A _____ Detection _____ _____ _____ _____ illumination _____ be caused by _____ electrical _____ on the _____ Plug/Wire system.

Do the _____ Detection _____ kick in _____ _____ _____ the Check Light Engine _____ _____ _____ resistance of _____ spark _____ _____?

_____ _____ _____ the _____ _____ _____ _____ in _____ turn _____ _____ Check Light Engine if there _____ _____ much resistance _____ the spark plug wires

Could _____ _____ _____ the spark _____ wires cause the misfire _____ _____ engine _____ _____ _____ on?

Do highly _____ _____ plug wires _____ a light-up _____ _____ _____?

_____ _____ _____ chance of _____ build-up across _____ spark _____ wires _____ to _____ misfire and _____ the check _____ light?

_____ engine light is _____ _____ _____ _____ _____ the spark plug wires.

_____ a _____ _____ light come _____ because _____ resistance _____ the spark plug _____?

The Check Engine Light may have _____ _____ _____ _____ _____ Detection _____ _____ the _____ resistance of _____ spark _____ wires.

_____ there a _____ of _____ build-up across _____ _____ _____ _____ leading to a _____ which would then _____ the check _____ _____

Problematic spark _____ wires could lead to _____ _____ and _____ _____ _____.

_____ _____ check _____ light _____ _____ of excessive resistance across _____ _____ plug wire?

_____ detection can _____ triggered _____ _____ resistance _____ spark plugs

Is _____ a _____ of _____ building _____ on my _____ _____ wires leading to _____ misfire _____ _____ check _____ light?

_____ _____ resistance levels _____ _____ _____ plug wires led to the _____ _____ _____ Engine _____ light?

Do the _____ _____ _____ kick _____ and _____ on the Check _____ _____ because of the _____ resistance of the _____ _____ _____?

The check engine light _____ be _____ by excessive _____ _____ _____ _____ plug _____.

_____ it _____ _____ Misfire Detection to _____ activated with _____ _____ _____ through _____ Plugwires?

Excess _____ _____ _____ spark plug wires could cause misfire _____ _____ _____ _____ _____ _____ to flash.

_____ Check Engine light may _____ _____ on _____ _____ excessive _____ developing _____ _____ spark plug _____.

_____ _____ high resistance _____ _____ _____ _____ wires causing the Misfire Detection?

The _____ _____ _____ light _____ may be _____ by _____ _____ _____ plug cables triggering misfires.

Could excess resistance _____ the _____ plug wires be _____ _____ _____ _____ misfire _____?

_____ resistance on _____ spark _____ wires builds, _____ check _____ light can _____ _____.

_____ excessive resistance _____ in the spark _____ _____ led to _____ Misfire _____ and _____ _____ _____?

_____ a _____ Engine _____ _____ on _____ of _____ resistance within _____ _____ plug wires?

The check engine _____ can _____ _____ by the _____ _____ on _____ spark _____ _____.

The Check Engine Light _____ come _____ _____ _____ excessive _____ developed _____ _____ Spark _____ wires.

_____ much resistance in _____ _____ plug wires _____ cause the _____ _____ _____ _____ light up?

_____ it possible _____ excess resistance _____ _____ spark plug _____ _____ cause misfire _____ and lights _____ _____ engine?

Is _____ _____ chance of _____ _____ my _____ plug wires leading _____ a _____ which would cause _____ _____ engine _____ _____ flash?

If resistance builds _____ _____ _____ plug _____ _____ _____ engine light could go _____.

_____ there a _____ _____ resistance building up _____ my _____ plug _____ _____ _____ _____ the check engine light _____ _____ off?

There _____ _____ excess resistance in the spark plug _____ _____ could _____ _____ _____ _____.

_____ the _____ _____ light _____ because _____ excessive resistance _____ the spark plug _____?

Is a _____ Engine _____ on _____ _____ excessive resistance on the _____ _____ _____?

_____ the _____ _____ and Engine Check Light activated _____ excessive _____ _____ _____ the Spark _____ _____?

A _____ engine light _____ be triggered _____ _____ _____ up _____ _____ on _____ spark plug _____.

Is _____ check _____ _____ illuminated _____ Misfire Detection due to _____ _____ _____ _____ plug wires?

Has the _____ _____ _____ been _____ _____ _____ _____ Detection due _____ the _____ resistance of the spark plug _____?

_____ there _____ chance _____ resistance built up across my _____ _____ _____ will cause the _____ _____ _____ to _____?

The _____ Detection and _____ Check Light _____ _____ _____ of excessive _____ levels _____ _____ Spark _____ wires.

Misfiring _____ _____ caused _____ high-resistance _____ _____ wires?

The Check _____ _____ _____ _____ illuminating if _____ levels _____ hindrance across the _____ Plug Wires _____ _____ Detection.

_____ highly _____ spark plug _____ _____ to a _____ _____ warning?

Do _____ _____ Plug Wires have _____ _____ _____ that _____ turning _____ the Check Engine _____?

The Misfire _____ _____ Check _____ _____ _____ be triggered _____ high resistance _____.

_____ _____ _____ light might go _____ because _____ excessive _____ _____ the spark _____ wires.

There _____ a _____ _____ the misfire _____ _____ goes off because _____ _____ resistance _____ the spark plug _____.

A _____ engine light could _____ _____ _____ _____ resistance _____ on the _____ plug _____.

There _____ _____ excessive resistance in the _____ plug _____ _____ _____ the warning _____ _____ _____ on.

Is _____ excessive _____ _____ the spark plug wires _____ _____ _____ on the _____ _____?

Could excess _____ _____ the spark _____ wires cause the check _____ _____ _____ _____?

Could excess _____ _____ the _____ plug wires _____ to _____ _____ _____ detection on _____ engine?

_____ _____ check _____ _____ come _____ because of _____ spark _____ wire resistance?

Has _____ check engine light come on _____ _____ _____ resistance developed _____ _____ _____ plug _____?

Does _____ _____ Engine _____ come on _____ _____ _____ resistance _____ across the spark plug _____?

Is _____ a chance that _____ could _____ up across my _____ _____ wires, _____ would cause _____ _____ _____ light _____ _____ off?

_____ is _____ _____ that the _____ engine _____ could be _____ _____ _____ build up on _____ _____ plug wires.

_____ Detection and check light _____ _____ _____ be caused _____ _____ resistance in _____ plug _____.

_____ the spark plug _____ _____ so much _____ that _____ _____ on the _____ _____ lamp?

_____ Check _____ Light _____ _____ on due to excessive resistance _____ _____ _____ _____ Wires.

_____ there high _____ _____ misfires _____ check _____ light?

Do highly _____ spark plug _____ cause _____ lit up _____ _____ _____?

excess resistance _____ the spark plug _____ could _____ to misfire _____ and _____ _____ the _____ _____ _____

Did the Spark Plug _____ _____ _____ _____ _____ _____ _____ turning on the _____ Engine Lamp?

There _____ _____ excessive _____ in the spark _____ wires _____ _____ _____ _____ _____ the misfire warning _____ goes on.

Could _____ resistance in the spark plug _____ _____ misfire detection _____ _____ _____ _____ _____ _____ on?

Is _____ misfire _____ activated by _____ resistance in my _____ _____ _____?

A check _____ light could _____ triggered if _____ _____ on _____ _____ _____ wires

_____ _____ be excessive _____ _____ the _____ plug _____ that _____ be why the warning light _____ _____.

_____ _____ _____ Plug _____ have _____ much _____ that _____ _____ on the Check Enginelamp?

_____ the _____ Detection _____ _____ Check Light been _____ because _____ excessive resistance levels in the _____ _____ _____?

Misfire _____ _____ _____ Light Engine illumination occur _____ _____ _____ _____ in spark _____ wires.

There could be _____ _____ in _____ _____ plug wires _____ _____ to _____ misfire _____ light

Has a Check _____ _____ come _____ _____ _____ too _____ _____ on the spark plug _____?

Is _____ possible for _____ resistance _____ _____ _____ _____ wires to turn on the _____ _____?

_____ Check Engine _____ _____ _____ produced _____ excessive resistance develops _____ _____ spark plug _____.

Excess _____ _____ the _____ plug _____ _____ _____ lead to _____ _____ _____ lights on the engine.

_____ could be excessive _____ in _____ _____ plug wires, that could cause _____ _____ _____ _____ to go _____.

Is _____ _____ that excess resistance in _____ spark plug _____ could _____ misfire _____ and on _____ the _____ _____ _____?

_____ the _____ _____ _____ triggered by a Misfire _____ that is caused by _____ resistance _____ _____ spark _____ _____?

Are _____ Spark Plug _____ so _____ that _____ turning _____ _____ Check Engine _____?

_____ there excess resistance _____ the _____ plug _____ _____ _____ cause the _____ detection?

The _____ warning light could _____ _____ by excessive _____ _____ _____ spark _____ wires.

Does _____ _____ _____ the spark _____ _____ cause misfire _____ _____ engine light on?

_____ _____ _____ Engine Light come _____ due _____ excessive _____ developed _____ _____ spark plug wires?

_____ _____ be excessive _____ in the spark _____ _____ _____ _____ could explain _____ misfire _____ light.

_____ build _____ _____ the _____ plug wires _____ _____ the _____ engine light _____ come on.

_____ a Check Engine _____ _____ _____ to _____ resistance on _____ spark _____ wires?

_____ _____ _____ Engine light _____ _____ because _____ the resistance _____ _____ spark plug wires?

_____ my spark plug _____ have _____ resistance, _____ could cause misfire _____ _____ _____ _____ malfunctioning

Is it possible that the _____ Detection _____ _____ in _____ _____ _____ the Check _____ Engine because of _____ _____ _____ the Spark _____ _____

_____ _____ Detection _____ _____ Check Light _____ be _____ by excessive resistance _____ in the _____ plug _____.

Is _____ _____ Engine _____ on if _____ resistance develops _____ the spark _____ _____?

_____ _____ check _____ light come _____ because of excessive _____ _____ across _____ spark plug _____?

Is _____ _____ Detection _____ by the _____ resistance _____ _____ sparks _____ wires?

excess resistance in _____ _____ plug _____ _____ lead _____ misfire _____ _____ _____ the _____ to go off.

_____ _____ _____ Detection thing kicking _____ and _____ on _____ _____ Light _____ _____ there is too _____ resistance in the _____ plug _____?

_____ highly _____ _____ plug _____ turn on _____ Misfire _____ _____ cause a _____ Engine Warning?

It is possible _____ excess resistance in _____ _____ plug _____ _____ _____ to _____ _____ detection.

If resistance _____ _____ _____ the spark _____ wires, _____ _____ engine light may _____ _____.

The current symptoms _____ that excessive resistance _____ _____ plug _____ has _____ the _____ _____ _____ turned _____ the _____ engine _____.

_____ Detection _____ and _____ light _____ may be caused _____ _____ _____ _____ on the _____ Plug/Wire system.

_____ the Misfire _____ and _____ _____ _____ activated by the _____ _____ wires?

Does a _____ _____ _____ come on _____ of _____ _____ _____ the spark plug _____?

_____ Misfire _____ and Engine Check Light _____ _____ activated _____ there are _____ resistance _____ in _____ _____ plug _____.

If _____ builds on _____ _____ _____ wires, _____ _____ light could be _____.

_____ excessive resistance _____ _____ _____ Wires _____ them to malfunction and _____ _____ _____ engine light?

_____ _____ warning light could _____ linked _____ excessive resistance _____ _____ spark _____ wires.

Has _____ _____ Engine light come _____ _____ of excessive resistance _____ across _____ _____ _____?

_____ could _____ excessive resistance in the spark _____ wires _____ that's why _____ _____ warning _____ _____ _____.

Does excess _____ _____ the _____ _____ wires cause _____ detection _____ _____ on _____ engine?

_____ _____ Check Engine light come _____ because _____ excessive resistance _____ _____ the spark _____ _____?

The _____ engine _____ can be _____ by resistance build-up on _____ _____ _____ _____.

Too _____ _____ _____ the spark _____ wires can cause them to _____ _____ produce the _____ _____ _____.

_____ _____ Detection and Engine Check Light _____ _____ _____ _____ by _____ resistance _____ in the Spark _____ Wires.

_____ _____ _____ _____ Engine Check Light can be _____ by excessive _____ _____ _____ _____ Spark Plug Wires.

_____ _____ _____ spark plug wires can lead _____ _____ check engine _____.

The _____ engine _____ _____ be triggered from _____ build _____ on _____ _____ plug _____.

Are _____ high _____ triggering misfires _____ check _____ _____?

_____ _____ _____ _____ built up on _____ wires _____ can _____ _____ misfire and lead _____ the check _____ light.

If my _____ plug wires have _____ resistance, _____ _____ _____ _____ misfire _____ _____ _____ light malfunctioning.

Is _____ Misfire Detection _____ kicking _____ and turning on _____ Check Light _____ if _____ too _____ _____ _____ the _____ plug _____ _____ _____ _____ Engine light come on because _____ excessive resistance _____ _____ plug _____?

Could _____ _____ Engine Light come on _____ _____ excessive resistance _____ _____ the _____ _____ Wires?

Is _____ possible that _____ Misfire Detection thing kick in and turn on _____ Check _____ _____ _____ _____ _____ _____ of _____ _____ plug _____

Do _____ _____ spark plug _____ have the potential to _____ _____ _____ _____ Warning?

I wonder if _____ _____ in _____ _____ _____ _____ can turn on the check _____ _____.

_____ _____ Engine Light might have been _____ _____ a Misfire Detection _____ by high _____ across _____ _____ _____.

There is _____ chance _____ _____ detection _____ _____ _____ malfunctioning _____ my _____ plug wires _____ excess resistance.

_____ _____ resistance in _____ _____ plug _____ responsible _____ misfire detection and lights on _____ _____?

_____ _____ Misfire Detection thing kick _____ _____ turn _____ _____ _____ _____ _____ if the Spark Plug _____ have _____ much resistance?

Is _____ _____ that _____ _____ _____ _____ could cause an illuminated _____ _____ light indicator?

_____ _____ _____ excessive resistance in the _____ plug _____ which could _____ to _____ _____ warning _____.

_____ _____ and _____ light engine illumination are a result _____ excessive _____ in _____ _____ _____.

Do these _____ Plug Wires _____ _____ much resistance that they _____ _____ _____ the _____ _____?

The check _____ _____ may have come _____ because _____ _____ _____ _____ _____ the spark plug _____.

Is _____ _____ _____ _____ _____ by significant wire resistance?

Has _____ _____ _____ _____ come on _____ of _____ spark _____ wire resistance?

Resistance _____ _____ wires _____ _____ a misfire _____ cause the _____ engine light _____ go _____.

_____ it _____ for _____ _____ across spark _____ _____ to _____ _____ check engine light?

Resistance _____ up _____ the wires _____ _____ a _____ _____ _____ the check engine _____.

_____ _____ engine _____ _____ be triggered _____ resistance _____ up on _____ _____ plug wires.

The Misfire Detection _____ _____ _____ _____ may _____ triggered _____ _____ resistance levels in the _____ plug _____.

If the spark _____ _____ have excess _____ misfire _____ _____ _____ light _____ could _____.

There might _____ resistance built up _____ _____ wires _____ could _____ a _____ and lead _____ _____ check _____ _____.

_____ a check _____ light came on _____ of _____ _____ _____ the spark _____ _____?

Excess resistance in the _____ _____ _____ could _____ _____ _____ _____ light to _____ off.

Is a _____ _____ alert and _____ light _____ due to _____ electrical impedance _____ _____ spark _____ _____?

Has _____ Check _____ _____ come _____ because _____ excessive resistance developed _____ the _____ _____ wires?

_____ excess _____ _____ _____ _____ plug wires result in _____ detection?

_____ resistance _____ _____ spark plug wires _____ cause misfire _____.

_____ it possible for _____ illuminated _____ _____ light indicator _____ by overly _____ _____ _____ cables?

Is it possible that excess _____ _____ the _____ _____ _____ _____ to _____ _____ and engine light _____?

_____ _____ _____ _____ _____ _____ building _____ across my _____ plug _____ which would cause _____ _____ engine light to come on?

_____ Misfire _____ and Check _____ Light are _____ _____ high resistance _____ _____ wires.

_____ excessive _____ around the Spark _____ wires _____ them _____ malfunction _____ _____ _____ Check _____ Light?

Is _____ _____ that _____ _____ in _____ _____ plug _____ could lead to _____ detection on the _____?

If my spark _____ _____ have _____ much _____ it _____ _____ misfire detection _____ _____ light _____.

The Misfire _____ _____ _____ Engine Light might be _____ _____ excessive resistance levels _____ _____ spark _____ _____.

_____ the _____ Detection alert _____ _____ light _____ caused by increased electrical _____ on _____ _____ _____ system?

_____ the Check _____ _____ _____ _____ a Misfire _____ caused _____ _____ resistance across the spark _____ wires?

_____ _____ _____ Engine _____ triggered by a _____ Detection _____ by high resistance _____ the _____ plug _____?

_____ the check engine light _____ on _____ _____ _____ Misfire Detection caused _____ _____ _____ _____ the spark _____ wires?

The _____ _____ _____ could go on because _____ _____ _____ in the _____ plug _____.

_____ _____ Spark Plug Wires _____ resistant _____ turning _____ _____ Check EngineLamp?

Can _____ _____ in the _____ plug _____ _____ misfire detection and _____ _____ the check _____ _____?

_____ the _____ _____ Light _____ on due to excessive _____ _____ across the _____ Plug _____?

_____ misfire _____ _____ be triggered by _____ _____ _____ _____ spark plug wires.

Is excess _____ in the spark plug _____ _____ to _____ _____ _____ _____ on _____ engine?

Do these spark plug _____ _____ _____ _____ resistance that _____ are _____ _____ _____ Check _____ lamp?

_____ _____ up _____ the spark _____ _____ _____ cause _____ check _____ light to illuminate.

Misfire _____ is _____ _____ _____ _____ Engine _____ _____ excessive resistance in spark plug _____.

If resistance _____ on _____ spark plug _____ _____ _____ prompt _____ check _____ light.

A _____ _____ light _____ be triggered if resistance builds _____ _____ _____ _____.

There _____ be _____ _____ in _____ spark _____ _____ that could be why _____ _____ light is _____.

Is _____ Misfire Detection and _____ _____ _____ triggered _____ high _____ wire?

_____ build- up _____ the _____ _____ wires _____ lead to the check _____ _____.

Will _____ Check Engine _____ _____ on if _____ _____ _____ _____ the spark plug _____?

Is excessive _____ _____ _____ the _____ plug _____ causing the _____ engine _____ to _____ on?

Excess _____ in _____ _____ wires could _____ to _____ detection _____ lights _____ the _____

_____ _____ _____ _____ light come on because of _____ resistance _____ the _____ plug _____.

Engine light _____ due _____ too _____ _____ caused _____ _____ plug wires?

_____ Misfire _____ and _____ Engine _____ can _____ activated by _____ resistance _____ the _____ Plug _____.

_____ the _____ resistance _____ misfires and check _____ _____?

_____ _____ resistance _____ _____ _____ spark _____ _____ cause the check engine light _____ come on?

_____ _____ expect a Check _____ Light indication when _____ Detection _____ activated through _____ _____ _____ _____?

_____ is _____ chance of _____ building up across _____ _____ _____ _____ _____ would cause _____ check engine light to _____ _____.

The Check Engine _____ _____ _____ on if excessive resistance _____ around _____ _____ _____ _____.

Could excessive _____ _____ the _____ _____ wires _____ misfire detection and engine _____ _____?

Has a Check _____ _____ _____ on because _____ _____ resistance across the _____ _____ _____?

_____ _____ resistance _____ the spark plug _____ _____ _____ to _____ _____ _____ lights on the engine.

_____ resistance in _____ _____ _____ wires _____ possibly lead _____ misfire _____ _____ engine light on.

Is _____ excess _____ _____ _____ spark _____ that _____ cause _____ _____ and lights on _____ engine?

The check _____ _____ _____ _____ up if there _____ too much resistance _____ the _____ _____ _____.

Is _____ Misfire Detection _____ and engine _____ _____ _____ by _____ _____ electrical impedance _____ _____ Spark Plug/Wire system?

_____ a _____ _____ _____ come on due to _____ resistance _____ _____ spark _____ wire?

_____ the _____ Detection and _____ Engine _____ triggered by _____ _____ wires?

_____ _____ Light illuminated _____ resistant-spark plug _____ effect _____ _____ detection

_____ _____ _____ and engine light _____ by wire _____?

Is _____ _____ engine light _____ by resistance _____ _____ _____ the _____ plug wires?

_____ _____ builds _____ _____ spark _____ wires, it _____ _____ a _____ engine light to be _____.

I _____ if excessive _____ _____ my _____ _____ wires _____ _____ the misfire detection?

_____ excess resistance _____ _____ spark plug _____ be _____ blame _____ the misfire detection _____ engine _____ _____ on?

Has _____ Check _____ light come on _____ _____ excessive _____ being _____ across _____ spark _____ _____?

_____ excessive resistance developed _____ _____ spark _____ _____ causing the _____ engine light _____ _____ on?

resistance build- _____ _____ the _____ plug wires _____ _____ the check engine light _____ _____ _____.

How much _____ _____ the _____ _____ _____ could cause _____ check _____ _____ to be on?

_____ there _____ chance _____ resistance _____ up across my spark _____ _____ which _____ cause _____ engine _____ go _____?

If _____ _____ plug wires have excess _____ there is a possibility _____ misfire _____ _____ _____ _____ _____.

_____ a _____ _____ light on _____ _____ excessive _____ among the _____ plug wires?

Has the _____ _____ light _____ on _____ of excessive _____ among _____ _____ _____ wires?

Has _____ Check _____ _____ came _____ _____ _____ excessive _____ _____ across the spark plug wires?

_____ _____ possible _____ _____ _____ in _____ _____ plug wires could cause _____ misfire detection.

_____ a _____ _____ _____ on _____ excessive resistance develops across the spark _____ _____?

The Check Engine Light _____ be _____ _____ _____ activated Misfire _____ due to _____ _____ _____ _____ plug wires.

_____ could be _____ resistance _____ _____ spark _____ wires _____ _____ could be why the _____ light is _____.

The check _____ light _____ _____ _____ by _____ _____ _____ across the spark plug _____.

There _____ _____ _____ _____ in _____ spark plug _____ which _____ _____ why the warning light _____ on.

The _____ engine light _____ _____ if _____ resistance develops around the _____ _____ _____.

Is _____ electrical impedance causing a _____ _____ _____ _____ engine light _____?

_____ check engine _____ _____ _____ triggered by resistance builds up _____ _____ spark _____ _____.

Is _____ _____ _____ _____ _____ _____ and turn on the _____ Light Engine if the _____ _____ _____ _____ too much resistance?

Can _____ check engine _____ _____ caused by _____ spark plug _____ _____?

_____ _____ resistance developed _____ the _____ _____ wires causing _____ check _____ light _____ flash?

How _____ resistance _____ spark plug _____ _____ _____ a check engine _____ _____ _____ off?

Have the _____ _____ _____ been _____ _____ _____ Misfire Detection _____ to the high resistance _____ _____ _____ plug wires?

Is _____ _____ Detection and Check Engine Light activated _____ high _____ _____ _____ _____?

The misfire _____ and _____ engine _____ _____ be _____ _____ by excessive _____ in my _____ _____ wires.

_____ _____ _____ Engine light _____ because _____ excessive resistance being _____ across _____ spark _____ wire?

The _____ Detection and _____ Check _____ are _____ due to _____ _____ levels in _____ _____ _____ Wires.

_____ it _____ _____ an _____ check engine light indicator _____ _____ _____ _____ resistive spark plug _____?

Do _____ Spark Plug _____ have so much _____ _____ they _____ _____ _____ _____ _____ Check Engine lamp?

Is _____ a _____ _____ _____ building _____ across _____ wires leading _____ a _____ which _____ cause the check engine _____ to _____?

Has _____ check _____ _____ come on _____ of _____ resistance on spark _____ _____?

Excess _____ _____ _____ spark plug wires _____ _____ to misfire _____ and _____ _____ the check engine _____.

_____ _____ _____ and engine light caused _____ _____ wire resistance?

_____ the Misfire Detection thing kick _____ _____ turn on _____ _____ Light Engine if there _____ _____ _____ resistance _____ _____ _____ _____ Wires

The check _____ light _____ be triggered _____ resistance _____ _____ on _____ spark _____ _____.

Could the _____ detection and check engine _____ _____ activated _____ _____ _____ _____ my _____ plugs?

Does excessive resistance _____ the _____ _____ _____ cause them _____ _____ _____ _____ the Check Engine _____?

Does _____ resistance _____ _____ spark plug wires _____ to misfire _____ and _____ on _____ _____?

_____ build- up on the _____ _____ wires can _____ _____ _____ engine _____ _____ go on.

_____ resistance in _____ spark _____ _____ _____ result in _____ _____ and engine light _____.

Has _____ _____ engine _____ came on _____ _____ excessive resistance _____ among _____ _____ plug wires?

_____ _____ resistance in _____ plug _____ could _____ the _____ _____ light _____ go off?

_____ the _____ engine light _____ _____ _____ _____ build up on _____ spark _____ wires?

Has the _____ engine light _____ triggered _____ a _____ Detection _____ _____ _____ resistance across _____ spark _____ wires?

_____ _____ _____ that excessive _____ in Spark _____ Wires has activated _____ Misfire _____ and turned on the _____ _____ _____?

It _____ _____ a _____ engine light to _____ _____ _____ resistance builds _____ the _____ _____ wires.

Do the Misfire Detection thing _____ _____ _____ turn _____ the Check Light _____ if there's too much _____ _____ _____ _____ _____ _____?

Is it _____ _____ my _____ _____ wires could _____ _____ enough to _____ on _____ _____ engine light?

Is _____ a _____ _____ _____ because _____ _____ resistance _____ the spark plug wires?

The _____ _____ Light might come _____ because _____ _____ resistance developed _____ the _____ _____ wires.

_____ check _____ _____ _____ be _____ by resistance build up on _____ spark _____ _____ ,

Do the Misfire Detection thing _____ in and turn _____ _____ _____ Light Engine if _____ _____ _____ much _____ _____ _____ Spark _____ _____?

Has _____ _____ Engine _____ _____ on due to excessive _____ _____ _____ the spark plug _____?

_____ _____ _____ light could _____ triggered _____ _____ _____ resistance on _____ spark plug wires.

_____ there _____ chance of resistance _____ _____ across my _____ _____ _____ leading to a _____ which would _____ the check _____ _____ _____

_____ excess resistance _____ the _____ _____ wires _____ cause of misfire _____ _____ lights on _____ _____?

_____ _____ _____ engine light come on due to excessive _____ _____ across _____ _____ plug _____?

_____ spark plug wires _____ _____ excess _____ that _____ _____ to misfire _____ and _____ _____ on.

_____ _____ _____ _____ light _____ _____ because of excessive resistance on _____ spark _____ wire?

Could _____ resistance _____ the spark _____ _____ _____ misfire detection and _____ to the _____ _____ _____?

If my _____ _____ _____ have too much _____ _____ can lead _____ misfire detection _____ _____ _____ malfunctioning.

Do highly _____ _____ _____ _____ _____ the Misfire _____ to work?

Excess resistance in the _____ plug _____ can lead _____ misfire _____ and cause _____ _____ _____ _____ _____.

_____ _____ up _____ spark plug wires can cause the _____ _____ light _____ _____ _____.

_____ the Misfire _____ _____ kick in and _____ _____ the _____ Light _____ _____ _____ the resistance _____ the Spark _____ Wires?

_____ _____ if excessive resistance in _____ spark _____ _____ can cause _____ _____ detection.

_____ _____ in _____ spark _____ wires could _____ to a _____ and _____ engine _____ _____ on.

_____ Misfire _____ and Engine _____ Light _____ activated _____ of _____ resistance levels in the _____ _____ _____.

Do highly _____ spark plug _____ cause _____ _____ Check _____ _____?

_____ excess resistance _____ the _____ _____ wires _____ _____ misfire detection _____ cause _____ engine to go off _____ _____ event?

_____ excess resistance in _____ _____ plug wires the _____ for _____ _____ light _____ turn _____?

_____ _____ _____ Engine Light turn _____ due _____ excessive _____ across Spark _____ wires?

_____ _____ in the spark _____ wires _____ _____ to _____ _____ and engine light _____.

Is _____ _____ that _____ _____ Detection thing _____ in _____ _____ on _____ _____ Light Engine _____ of the excessive _____ _____ the Spark Plug

Is _____ possible _____ _____ _____ in the spark plug _____ could cause _____ _____ _____ _____ turn on?

Is _____ _____ _____ engine _____ because of _____ resistance developing _____ _____ _____ plug wire?

_____ _____ Check _____ light _____ on due _____ the excessive resistance developed _____ _____ Spark _____ _____?

Is it _____ that _____ _____ across _____ plug _____ causes _____?

Could _____ resistance _____ my _____ _____ wires _____ the misfire detection _____ my _____?

_____ _____ check _____ _____ _____ on _____ of resistance _____ across spark plug wires?

_____ excess _____ _____ _____ spark plug _____ _____ to _____ detection and engine light _____ "

Is the Check _____ _____ _____ by a _____ Detection due to _____ _____ _____ _____ _____ spark plugs?

There _____ _____ excessive resistance _____ the spark plug _____ that _____ _____ _____ warning _____ to come _____.

_____ _____ high _____ that causes _____ and _____ Engine light?

_____ excessive resistance _____ around _____ _____ plug wires and _____ them _____ _____ and produce a _____ engine _____?

Does _____ _____ _____ around _____ sparks plug wires and cause them _____ malfunction _____ produce the _____ _____ _____?

_____ much resistance _____ the _____ plug _____ can cause _____ _____ _____ light to light _____?

_____ wonder _____ excessive resistance _____ my _____ plug _____ _____ cause _____ misfire detection?

Is _____ resistance _____ _____ _____ plug wires _____ cause of the _____ _____?

The _____ Detection and check engine _____ _____ _____ _____ by _____ resistance _____ plug _____.

The _____ engine light may _____ triggered _____ _____ build up _____ spark _____ _____.

_____ _____ resistance _____ by _____ plug wire _____ a _____ Detection?

_____ _____ up _____ the _____ _____ wires can lead _____ _____ check engine light.

_____ it possible _____ excessive resistance _____ _____ _____ _____ wires _____ cause the misfire _____?

Is _____ _____ _____ and Check Engine Light activated by _____ _____ _____ Plug _____?
