

[Demo] NLP Dataset for Customer Service Automation

Company Type	Electricity Suppliers
Inquiry Category	Tariff rates and pricing information
Inquiry Sub-Category	Bill calculations
Description	Customers seeking assistance with understanding how their electricity bills are calculated, including explanations on unit rates, consumption charges, taxes, and any additional fees that may be included in their bill.
Data Size	5,050 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Electricity Supplier" customer inquiry. (Purchased data will not be masked.)

Why _____ cost per unit increase _____ levels _____ what is _____ threshold for _____ to occur?

_____ cost per unit _____ as _____ increases, but _____ for this _____ increase?

_____ a higher _____ cost _____ up when _____ reaches _____ certain threshold?

What is _____ for the _____ as consumption increases?

When _____ cost of a unit increase?

What causes prices _____ up _____ more?

_____ cost per _____ to _____ up _____ goes up?

_____ does _____ increase with _____?

Is there a threshold _____ rise _____ costs _____ increases?

_____ consumed, _____ to the increase of per-unit _____?

_____ unit _____ as _____ increases?

What _____ threshold for pricing _____ consumption levels _____ and what causes _____?

_____ does a _____ unit cost _____ because of _____ consumption _____?

What causes prices _____ even _____ you _____ more?

_____ is the _____ for _____ that consumption levels are _____ up?

_____ perunit _____ to go up _____ a _____ level _____ consumption.

Is there _____ point _____ per unit cost _____ consumption _____?

_____ more is consumed, _____ causes _____ to _____?

How can we _____ at which per unit _____ increases?

Why _____ the _____ unit _____ rising consumption rate?

_____ is consumed, _____ causes the _____ costs _____ jump?

_____ does a _____ per unit _____ up _____ goes up?

When _____ per _____ cost _____ consumption _____ go up?

Is there a _____ for a _____ unit _____ increase _____?

When more is _____ to surge?

Is _____ for the per unit cost _____ up _____ consumption _____?

The threshold for _____ as _____ cost per _____ to increase as _____ price.

The cost per _____ consumption levels rise, _____ threshold for this _____ to _____?

As _____ levels rise, _____ increases, but _____ is the _____ for this price to _____?

_____ a _____ for _____ unit cost when consumption increases?

What _____ the _____ to _____ up when _____ goes up?

What _____ prices _____ up when _____?

What _____ costs _____ a certain _____ of consumption?

_____ the link _____ the increase _____ consumption _____ and the threshold for _____?

_____ is the _____ that makes a _____ unit _____ go above _____ going _____?

_____ the _____ of _____ unit goes up if _____ money?

_____ does _____ higher per _____ cost _____ due to consumption _____ threshold?

Is it _____ per unit costs are _____ consumption _____?

I _____ if there is _____ for _____ in _____ unit _____ when consumption _____.

_____ a threshold for when _____ cost increases as _____ increases?

_____ is _____ for pricing as _____ rise and what _____ to go _____?

_____ is the threshold for _____ to go _____ as _____?

_____ can _____ threshold be _____ when _____ cost increases as _____?

Why does the per _____ up _____ consume _____?

When _____ goes _____ of a _____ go up?

_____ you raise the _____ for _____ unit _____ consume more?

_____ would _____ price increase _____ increases and _____ is _____ minimum threshold _____ a _____ to _____ over?

Why _____ if consumption increases and _____ minimum threshold _____ a price to go _____ that _____

How _____ cost _____ goes up _____ consumption goes up?

_____ cost of a _____ spending goes up?

_____ is _____ the per-unit costs to _____ up when consumption _____?

_____ is the _____ for pricing when _____ levels _____ what _____ cost _____?

_____ with _____ consumptions can _____ increase?

Why is the _____ when usage goes _____?

_____ do we _____ an _____ in _____ unit _____ consumption _____ increase?

Is there a specific threshold _____ elevation and what factors _____ in per unit cost _____?

_____ causes an _____ a certain level of usage?

What is _____ for pricing when _____ levels _____ and _____ goes _____?

_____ with high consumptions _____ possible?

Why _____ the _____ unit _____ is a rise _____ consumption?

_____ does _____ cost _____ unit _____ when _____ levels are _____?

_____ does _____ use bring _____ a _____ in _____ cost?

_____ increases, _____ there a _____ for _____ rise _____ per _____ cost?

_____ people consume _____ why does per _____ up?

When _____ certain amount _____ has _____ what causes an increase in _____?

How _____ per-unit costs _____ is consumed?

Why would _____ rising rate _____ increase _____ the cost per _____?

When does _____ cost _____ up _____ to higher _____ levels?

_____ in the consumption _____ an _____ in the cost per unit?

What causes per _____ to _____ is spent?

When _____ is there _____ for _____ per unit costs?

What causes _____ to _____ after a _____ level of _____?

What is _____ when consumption levels _____ and cost per _____?

Why _____ increase if consumption _____ the minimum threshold?

What _____ in _____ costs _____ a specific _____ of consumption?

Is _____ a _____ for _____ cost to _____ up when _____ goes up?

Is _____ for _____ increase in _____ cost when consumption increases?

When does _____ higher per unit _____ occur _____ higher _____?

What ____ a ____ in perunit ____ when ____ is ____?
 ____ point does ____ unit ____ increase as consumption ____ can we determine ____?
 ____ causes ____ increase ____ perunit costs ____ a ____ of consumption is ____?
 Is there ____ threshold for the per ____ up as ____ goes ____?
 ____ more ____ consumed, ____ causes the ____ costs to ____?
 ____ to ____ per unit cost climbing ____ increases?
 ____ causes ____ perunit costs ____ when more is ____?
 ____ drive the per ____ cost ____ consume more?
 What is the ____ for ____ when consumption levels ____ cost ____ go ____?
 ____ a ____ for the ____ to increase when ____ climbs?
 ____ consumption increases, should ____ a threshold ____ per unit cost ____?
 ____ the cost per ____ going ____ goes up?
 ____ would ____ rising ____ rate ____ cost per ____ go up?
 ____ does cost per unit ____ consumptions ____?
 When ____ is consumed, ____ does the ____?
 What ____ to rise ____ unit when more ____?
 ____ is the threshold ____ costs to ____ due ____ rising ____ levels?
 ____ limit ____ the rise in ____ cost when consumption ____ up?
 What causes the ____ when consumption levels go up?
 How can ____ per-unit ____ consumed?
 ____ with ____ will ____ unit increase?
 Is ____ a ____ threshold for ____ unit ____ to go ____ consumption goes ____?
 A reason for ____ costs ____ consumption ____?
 ____ is ____ pricing as consumption levels ____ and what ____ per ____ to increase ____ price?
 ____ we ____ a ____ per unit cost if consumption ____?
 After a ____ of ____ causes ____ per unit costs?
 ____ the threshold ____ levels ____ and ____ causes cost per unit ____ increase as ____ price?
 ____ to the ____ per unit cost when consumption ____?
 As ____ rise, and ____ cost ____ unit increases, ____ is ____ pricing?
 ____ there ____ a threshold ____ rise in per ____ cost when consumption ____?
 When consumption goes ____ does the ____ item ____?
 ____ increases, why does ____ unit cost ____?
 Why ____ price increase ____ consumption ____ and ____ is ____ threshold that ____ price from escalating?
 ____ costs ____ up when consumption goes up?
 Why ____ unit ____ gone ____ as consumption goes ____?
 What ____ the ____ of pricing ____ a result of rising ____?
 The cost per ____ as consumption increases and what is ____?
 ____ point ____ per ____ cost start ____ rise as ____ levels ____?
 Why ____ we see a rise ____ levels increase?
 ____ per unit ____ increase when more ____ eaten?
 What ____ prices start ____ go up due ____ consumption ____?
 ____ makes ____ as you consume ____?
 ____ does a ____ unit ____ due ____ consumption levels ____ to a ____ level?
 How does ____ increase ____ is used?
 When ____ is consumed, how ____ costs ____?
 ____ the ____ pricing when ____ levels rise and ____ the cause ____ cost ____ unit increasing?
 ____ more is ____ what ____ the ____ in per-unit ____?
 ____ to ____ the ____ per unit cost increases ____ consumption ____?
 ____ rising ____ about a rise in ____ per unit?
 What makes prices ____ consumers ____?

What ____ does rising use bring about ____?

What ____ the unit when ____ is going up?

Does the ____ unit ____ when the consumer ____ more?

____ per unit cost start to ____ as ____ levels ____?

____ can ____ go up when ____ is consumed?

____ would like to know ____ of ____ to ____ per unit.

____ would a ____ be ____ high consumptions?

When consumption goes ____ why ____ item ____?

Does the ____ unit ____ when ____ consumer ____ more money?

____ the threshold that causes ____ per unit ____ to go ____ the gurd ____ levels ____?

____ more is consumed, ____ does it ____ costs?

____ higher per ____ cost ____ happen ____ consumption ____ rise?

Why ____ we see ____ per unit cost when ____ are ____?

Why do we see ____ per unit ____ consumption ____?

____ growing, why is ____ cost per item ____?

____ the ____ which per ____ will increase as consumption ____?

____ is there ____ threshold ____ an increase ____ unit cost?

____ standard threshold to see a ____ in ____ unit ____ consumption ____?

____ factors drive the per ____ cost up ____?

____ there a ____ a ____ unit cost ____ when consumption increases?

Why ____ the ____ unit ____ when the ____ goes up?

How can the per unit ____ consumed?

What ____ increase ____ per units costs ____ a ____ consumption?

Why ____ increase ____ high ____?

____ the cost ____ unit ____ more ____ if you ____ more?

What ____ for pricing ____ go ____ what causes ____ to go up?

When more ____ consumed, ____ the per-unit cost ____?

____ the ____ for pricing as ____ levels ____ and what causes ____ to ____?

What ____ threshold for ____ unit ____ goes up?

____ a certain level of ____ reached, ____ causes ____ costs to ____?

____ of ____ go up when ____ spend more money?

Is ____ of ____ unit cost when consumption increases?

____ higher per unit ____ if consumption levels get ____ a ____?

Why ____ if ____ increases and ____ the threshold that ____ the ____ from increasing?

What's ____ threshold ____ when ____ and what causes cost ____ to increase?

What ____ the threshold ____ pricing ____ what causes ____ cost to increase?

What factors drive ____ per unit cost ____ increases and is ____ a ____ elevation?

When ____ the threshold ____ causes per-unit ____ go up ____ rising?

Why would ____ if ____ what is the minimum ____ to go above ____?

____ is consumed, what ____ upward surge ____ per-unit ____?

____ to ____ up after you consume ____?

What ____ drive ____ per unit ____ consumption rises?

____ is the ____ unit increasing when the ____ up?

When consumption is ____ per item increasing?

____ a threshold for pricing the ____ to ____ consumption ____?

____ you raise the cost ____ each ____ you ____ more?

____ causes ____ increase in perunit costs ____ a certain ____?

Is there a ____ the ____ in ____ cost ____ increases?

____ per unit cost ____ consumption ____ to a certain threshold?

What causes ____ rise in ____ costs after ____ of ____?

What _____ unit _____ to go _____ when _____ is _____?

_____ prices to go up _____?

The cost per _____ as consumption _____ increase, _____ for _____ price to go up?

When _____ increases, is _____ a per _____ cost rise?

What _____ go _____ as you are _____ more?

What causes prices to _____ when _____?

_____ does _____ rising consumption rate mean _____ cost _____?

Is there a threshold _____ the _____ per unit _____ rises _____ consumption _____?

Why do we _____ in the per unit _____?

What _____ pricing as consumption _____ rise and what _____ increase?

_____ cost of _____ unit _____ when _____ spend more money?

As _____ levels _____ why is _____ unit _____ up?

Why _____ rising _____ result _____ an _____ in cost per _____?

When _____ is _____ how does the increase _____?

_____ does a higher per _____ occur _____ consumption _____?

_____ see cost-per-unit increases with _____?

As _____ levels _____ what _____ does per _____ cost _____ to _____?

_____ the cost _____ with a rising consumption _____?

What _____ of _____ brings about _____ increase in _____ unit?

_____ would a rising _____ lead _____ cost per unit _____?

Why _____ a _____ increase _____ consumption increases? _____ for _____ price to go above?

Why is _____ rising consumption _____ unit?

I wonder if _____ precise threshold for _____ in per _____ increases.

_____ of a unit going _____ when _____ more money?

What _____ cost up as the _____ increases?

_____ more is _____ how does _____ unit _____ up?

As _____ per unit costs going _____?

What _____ use bring _____ higher cost _____ unit?

When consumption _____ why is the _____ per _____?

_____ would _____ increase in cost per _____ caused _____ consumption rate?

What level _____ use bring about a surge _____?

_____ is used, _____ the per-unit costs _____ go _____?

What is _____ pricing when _____ levels _____ cost per unit to increase?

The cost per unit _____ and _____ is the _____ for this _____?

What _____ increase in _____ costs _____ of consumption?

_____ is _____ threshold for _____ price to increase _____ go _____?

_____ consumption rises, _____ factors drive _____ per _____ up?

The _____ as consumption _____ rise _____ what _____ cost per _____ increase are _____.

Does the price of the _____ go _____ consumption _____?

What _____ the threshold for pricing _____ levels _____ and _____ causes _____ per _____ to _____

_____ to _____ why we _____ a _____ in _____ unit cost _____ increases.

Is _____ for what factors drive _____ per _____ as _____ increases?

What is the _____ pricing when _____ levels _____ and what _____ unit _____?

_____ to _____ up after a specific level of _____?

Do _____ a unit _____ up when _____ more?

Why do _____ see _____ when consumption goes up?

_____ do _____ a _____ in _____ unit cost when _____ increases?

How can _____ the threshold _____ unit cost _____ as consumption _____?

_____ causes an _____ perunit _____ after a _____ consumption is reached?

When do _____ higher per _____ if _____ rise?

____ it ____ cost of a unit goes ____ spend ____ money?
 ____ there ____ for pricing when consumption ____ go up?
 Does ____ Consumption levels ____ higher per ____?
 Why ____ the ____ item ____ up when ____ goes ____?
 When more ____ the per-unit cost ____ rise?
 ____ does a higher ____ unit ____ due ____ consumption ____ reaching ____ certain ____?
 When ____ a higher per ____ up because of ____ levels ____ threshold?
 Can you ____ rise in consumption ____ related ____ unit ____ the ____ threshold?
 Is ____ cost ____ unit ____ up ____ of a higher ____?
 ____ there ____ for the ____ when consumption climbs?
 Does ____ a unit increase ____ the ____ spends ____?
 When ____ the ____ unit go higher ____ usage goes ____?
 Why ____ per item ____ when ____ consuming more?
 What ____ unit cost increase ____ more is ____?
 ____ levels rise, ____ cost ____ unit increases, ____ what is ____ this to ____?
 ____ increases, is there ____ threshold for the ____ cost?
 Why would ____ increase ____ is ____ threshold that will stop it?
 Why increases ____ cost ____ unit ____?
 Why ____ the ____ cost ____ up ____ people ____ more?
 ____ we determine ____ when ____ increases as consumption increases?
 ____ is ____ per ____ up with ____?
 ____ would ____ go up ____ consumption ____ and what is the ____?
 ____ exist a ____ for a ____ in per ____ when consumption ____?
 ____ there ____ when per unit ____ rise as ____ rise?
 What is the reason for the ____ to go ____?
 When consumption ____ and the ____ unit ____ what is ____ price escalation?
 Why does ____ per unit ____ up ____ and ____ is ____ threshold for this ____ to ____ up?
 ____ is ____ when consumption ____ increase and ____ causes cost per ____ increase
 When more is ____ the rise ____ per-unit ____?
 What ____ drives ____ per unit cost ____ climbs?
 ____ there a ____ for ____ elevation when ____ unit ____ climbs?
 ____ the threshold ____ when consumption ____ what causes cost ____ go up?
 ____ of a unit ____ consumers who spend more ____?
 When more is consumed, ____ an ____ of ____?
 When ____ is ____ what causes ____ increase ____ unit ____?
 ____ there ____ threshold ____ rise in cost ____ increases?
 When can a ____ per ____ go up ____ to ____?
 What factors contribute ____ increase ____ when consumption ____ go up?
 ____ causes ____ unit to ____ when ____ levels are increasing?
 ____ levels are ____ does a higher ____ unit cost ____?
 Does ____ costs of ____ unit ____ when ____ spends more?
 ____ there ____ threshold ____ a per unit ____ rising ____ increases?
 ____ a rising ____ about an increase ____ cost per ____?
 ____ drive ____ per unit ____ up ____ consumption ____ there a threshold?
 What ____ for ____ in ____ cost when consumption increases?
 ____ level ____ rising use brings ____ a ____ in ____?
 Why would a rising ____ a ____ cost per ____?
 What ____ threshold ____ pricing ____ unit when consumption ____ go ____?
 ____ the cost ____ a ____ go ____ consumption ____ up?
 When consumption ____ and ____ per unit ____ what is ____ for this price ____?

What ____ per-unit ____ when ____ is consumed?

Is there ____ precise ____ a ____ in ____ cost ____ consumption increases?

As ____ and ____ up, what ____ the threshold for pricing?

____ do ____ per unit cost if consumption ____ up?

Why ____ per ____ costs ____ up ____ consumption gets better?

____ there a ____ for the price elevation ____?

____ consumption ____ rise, what causes the ____ to ____?

What is ____ for pricing when consumption ____ cost per unit to go ____.

What is the threshold ____ pricing ____ the rising ____?

____ is ____ costs ____ up and ____ goes up?

____ a higher per ____ cost occur ____ consumption ____ up to ____ certain ____?

____ see a rise ____ when consumption goes up?

____ a ____ per ____ due to consumption levels rising?

Does ____ of ____ unit go ____ higher consumption?

What is the threshold ____ pricing the unit ____ consumption ____?

Is ____ a precise threshold ____ in per ____ cost ____ increases?

How can ____ per-unit costs ____ when ____?

How ____ per ____ cost ____ people consume more?

Is ____ a threshold for ____ in per ____ consumption ____?

When more is used, ____ per unit costs ____?

If ____ rise ____ per ____ levels get better, then why?

____ does a ____ unit ____ from ____ consumption levels?

____ does ____ use bring about ____ per unit?

As consumption levels ____ is the ____ for ____ unit?

Is ____ a ____ for pricing the unit ____ consumption ____?

____ come my ____ per ____ goes ____ as ____ consumption goes ____?

What is the ____ for pricing when ____ levels ____ what causes ____ per unit ____?

____ does ____ unit cost go up when ____?

____ causes ____ to ____ up when there ____ consumption?

Why ____ consumption ____ lead to increased cost ____?

____ threshold for pricing when consumption ____ goes up?

____ there a ____ a ____ in per unit ____ when ____ increases?

____ see an ____ in per unit ____ consumption increases?

When ____ is consumed, ____ costs ____?

As consumption levels go ____ contributes to the ____ in ____?

____ is the ____ as ____ levels ____ and what causes ____ unit to ____.

____ the cost ____ a ____ up ____ people spend more ____?

Per unit ____ as consumption increases, how ____ threshold?

What ____ the threshold for pricing ____ and ____ up?

____ factors ____ the per ____ to ____ consumption increases?

____ a higher per ____ cost ____ consumption increases?

Why do we ____ a change ____ cost when ____?

Why do ____ rise in ____ per ____ cost ____ consumption ____.

____ do ____ have a ____ unit cost when consumption ____?

As ____ for ____ per unit ____?

Why are you increasing ____ when you ____ consuming ____?

What causes an increase ____ a certain ____ consumption ____ been reached?

____ for pricing as ____ levels ____ and what causes cost ____ as ____ price

What ____ drive the per ____ cost up ____ climbs ____ there ____?

Why does the ____ per ____ up ____ the consumption ____?

_____ makes _____ up _____ more you _____?

_____ consumption goes up, _____ the cost _____ up?

Why _____ cost per _____ goes _____ when consumption _____?

Why does _____ cost _____ consumption _____ up, _____ what is the threshold _____ it to _____?

When _____ unit _____ go up after consumption _____ up?

When _____ per _____ goes _____ due to consumption _____ up?

_____ with _____ will cost-per-unit _____?

_____ is consumed, _____ the _____ per unit costs happen?

_____ the threshold _____ when consumption levels rise and _____ causes _____ shoot up

What _____ perunit costs to _____ up _____ specific _____ consumption?

When is _____ costs to go _____ due _____ consumption levels _____?

Why _____ see a rise in _____ when there _____ consumption?

_____ is _____ threshold _____ consumption levels _____ and _____ the cost _____ unit to increase?

_____ is _____ threshold _____ pricing the _____ due _____ consumption?

_____ do _____ see _____ per _____ cost rise when _____ consume _____?

_____ factors contribute _____ rise _____ per _____ cost _____ increase and is there a _____?

When _____ consumption leads to higher _____ per _____ tell _____ this _____ at?

_____ causes _____ to _____ as usage quantities _____ up?

What are the _____ pricing the _____ when _____ go _____?

What factors contribute _____ the _____ in _____ cost as _____ and _____ there _____ threshold _____ this price _____?

What _____ to go _____ after _____ of consumption have _____ reached?

Does _____ of a unit _____ up _____ consumption?

_____ does a _____ unit cost _____ up if _____ consumption level _____?

_____ level of consumption _____ reached, what causes _____ increase _____ costs?

_____ a _____ for a rising per _____ cost _____ increases?

Why would _____ increase _____ unit _____ related _____ a rising _____ rate?

_____ do _____ see _____ rise in _____ costs if _____ go _____?

_____ why the _____ per item jumps?

What is the _____ for pricing _____ unit _____ rise _____?

_____ to go up _____ a _____ amount of consumption is _____?

_____ would _____ in the cost per _____ a rising _____ rate?

Is _____ price elevation _____ unit cost _____ consumption levels increase?

_____ is used, how _____ costs _____?

_____ does a higher _____ unit cost _____ to _____ consumption _____?

Is _____ a _____ to _____ rise _____ cost when consumption _____?

What causes _____ costs after a _____ level _____ consumption _____ been reached?

Is _____ threshold for _____ cost rising _____ consumption increases?

_____ in per _____ costs _____ certain _____ of consumption is reached?

What is _____ for pricing _____ go up, and _____?

_____ the threshold _____ the _____ go _____ consumption goes up?

_____ consumption _____ rise, why _____ cost per _____ increase?

What _____ the _____ for pricing _____ consumption _____ and cost _____ goes _____?

Why _____ cost _____ when consumption goes up?

_____ a certain _____ consumption, what causes _____ to _____?

_____ does per-unit _____ increase _____ is _____?

_____ do a _____ per _____ occur because _____ consumption levels?

_____ a _____ level of consumption _____ reached, _____ causes _____ increase?

The _____ per _____ increases _____ consumption levels rise, _____ what _____ for the _____ to _____?

_____ threshold for pricing the _____ a _____ consumption going up?

When _____ a _____ unit cost _____ to rising _____?

Does ____ cost of ____ unit ____ spends more ____?

____ increases, ____ the per unit ____ rise?

How ____ we ____ a rise in ____ cost ____ increases?

____ increase ____ increases, ____ is the ____ for the price to escalate?

What factors do ____ think ____ up as consumption goes up?

____ at which per unit cost ____ as ____ levels increase?

What causes the ____ go ____ a ____ level of ____?

What causes ____ increase ____ when ____ consume more?

Why is the ____ unit going ____ levels go ____?

Is there ____ threshold ____ per unit cost to ____ as ____?

Why would ____ price ____ if consumption ____ is ____ minimum threshold ____ over ____ level?

____ does a ____ per ____ cost ____ when Consumption ____ are ____?

When you're consuming ____ is ____ per item ____?

____ do we ____ in per unit ____ if ____ see consumption ____?

____ causes ____ to shoot ____ consumption levels increase?

____ a higher ____ unit cost ____ if ____ levels get up ____ threshold?

____ the per unit cost up ____ consumption ____ and is there ____?

____ there a ____ threshold for ____ per unit cost ____ up?

What are the reasons ____ the rise in ____ when ____?

If consumption ____ are rising, ____ does a higher ____?

Why ____ perunit costs go ____ when ____?

What causes a ____ cost to ____ after ____?

Why ____ going ____ increase the price for ____ when ____ consume ____?

____ does ____ per unit ____ consumption is increasing?

____ the threshold ____ pricing ____ consumption ____ rise ____ causes cost ____ to rise?

____ causes an ____ in ____ after ____ is reached?

Why ____ rising ____ increase costs ____ the unit?

When ____ a higher per unit ____ go ____ of ____ consumption?

____ the ____ a unit ____ the consumer ____ more?

____ a higher ____ unit ____ up when ____ are high?

What ____ increase ____ if a certain level of ____ reached?

What ____ the threshold for ____ when ____ go ____ and ____?

What is the ____ threshold ____ a ____ in ____ when ____ increases?

____ factors ____ the rise in ____ unit ____ as ____ levels ____ and what is ____ for ____ elevation?

What ____ the ____ unit to increase ____ levels ____?

When ____ the ____ causes the ____ increase ____ to rising ____ levels?

What ____ perunit costs ____ go up after ____ level ____?

When ____ a higher ____ unit ____ because ____ consumption levels?

When more ____ causes an ____ in ____?

When ____ per unit cost ____ up because ____ consumption levels ____ a certain ____?

What causes an increase ____ unit costs ____ certain ____?

What causes the ____ unit to go ____ goes ____?

What causes ____ to ____?

____ drive ____ per unit cost ____ goes up?

Why would ____ increase in the ____ by a ____ consumption ____?

As ____ levels rise ____ per unit increases, ____ is ____ for ____ price to ____?

What ____ costs to ____ a certain level of ____ been ____?

Why ____ increase when ____ what ____ the threshold for the ____ to ____?

When ____ consumed ____ an ____ in perunit costs?

Does the cost ____ the ____ go up ____ consumers ____?

_____ is _____ what causes per _____ to jump?

_____ of _____ unit go up, when consumption _____?

After a certain _____ of _____ is _____ what _____ increase _____ unit _____?

Why _____ the cost _____ when _____ increases?

_____ would _____ if consumption increases _____ what is _____ minimum threshold _____ a _____ to go _____ level

_____ per-unit costs _____ go up when _____ is _____?

_____ the threshold _____ when _____ goes _____ and what causes _____ go up?

When _____ higher unit cost occur _____ of _____?

What _____ threshold _____ per unit to increase when _____ levels _____?

_____ is the threshold _____ pricing _____ consumption _____ and what _____ cost _____ unit to _____ the _____?

_____ rising _____ unit costs as _____?

Why _____ increase _____ is high?

When more is _____ does _____ cost _____ unit _____?

_____ more is consumed, how _____ the _____ up?

_____ the threshold _____ pricing _____ consumption _____ and the _____ goes _____?

_____ certain level of consumption, _____ costs _____ increase?

_____ the threshold for _____ when _____ go _____ and what _____ costs to _____ up?

When more is _____ causes per _____ to _____?

_____ certain level of consumption _____ costs to go up?

_____ costs to _____ up after _____ certain consumption _____?

_____ does a higher per unit _____ occur _____ high _____?

What _____ think drive the per unit cost _____?

_____ the _____ per item going _____ you are consuming _____?

Is there a threshold _____ cost when _____ increases?

_____ we see _____ per _____ costs when _____ is increasing?

_____ would a _____ increase if _____ increases and what is the _____ to _____ that?

When does a higher per unit _____?

_____ you consume _____ why is _____ item _____ up?

What _____ increase _____ perunit costs _____ of consumption has _____ reached?

_____ do you _____ for each unit _____ you consume _____?

_____ causes perunit _____ to _____ when there _____ more _____?

_____ raise the unit _____ you consume more?

Why _____ the per _____ when consumption increases?

Why _____ rate of consumption _____ per unit?

When does _____ unit cost come _____ consumption _____ increasing?

_____ does a _____ per _____ go up _____ go up?

When _____ is _____ does _____ perunit _____ increase?

Why _____ a _____ in per _____ when _____ goes up

_____ to go _____ when used quantity go _____?

When _____ per unit cost occur _____ consumption _____?

Why _____ we see _____ in per unit _____ if _____ are _____?

When does a higher _____ unit cost _____ of _____ levels _____ up _____ certain _____?

_____ the _____ go _____ when the consumption _____ up?

_____ a higher _____ unit cost _____ if _____ higher?

When _____ is _____ a threshold _____ increase in _____ unit _____?

How _____ per-unit _____ increase when more _____ being _____?

_____ a higher perunit cost after _____ of _____?

_____ a certain threshold _____ per _____ cost to increase _____ consumption _____?

_____ higher _____ the unit _____ rise?

Does _____ the unit _____ when you spend _____?

_____ the threshold for _____ the _____ when _____ levels _____?
 _____ the cost _____ a unit _____ consumer spend _____ money?
 When _____ what causes _____ increase in _____ costs?
 _____ perunit costs _____ go up _____ a _____ consumption is _____?
 When _____ higher per unit _____ when consumption _____ up to _____?
 _____ is _____ threshold _____ pricing as _____ causes cost per unit to _____ up?
 _____ the threshold for pricing _____ to _____ consumption levels
 What _____ the threshold to pricing the _____ levels _____?
 _____ causes perunit costs _____ after _____ level of _____?
 _____ we _____ rise in per _____ when consumption increases, and _____ there be _____?
 When is the _____ that _____ a per _____ to go _____ thegurd _____ levels _____?
 When _____ the per _____ cost go _____ consumption _____ reach a _____?
 _____ causes an increase _____ after a _____ is reached?
 _____ come my cost _____ unit _____ every _____ consumption _____ up?
 What _____ for _____ price to _____ consumption increases?
 _____ is the threshold for pricing when _____ increases and _____?
 _____ higher _____ cost go _____ of consumption levels _____ up?
 _____ levels rise _____ the cost _____ what is _____ threshold _____ price to _____?
 At _____ does _____ start to _____ consumption levels increase?
 _____ unit cost to increase _____ consumption increases?
 How can _____ the _____ when _____ unit _____ if _____ increases?
 _____ perunit _____ go _____ after _____ level of consumption has _____ reached?
 _____ prices _____ increase as _____ consume _____?
 When consumption increases, _____ cost _____ a unit _____?
 _____ does _____ cost rise _____ consumption increases?
 _____ up as consumption goes _____ is there a threshold?
 When _____ spent, _____ can per-unit costs _____?
 _____ do we _____ the per _____ go up _____ up?
 Why _____ the _____ per item _____ consume more?
 _____ the cost per _____ increase _____ levels increase?
 _____ of _____ unit go _____ when the _____ is _____ more?
 When does _____ higher _____ when consumption goes to _____ certain _____?
 _____ threshold for _____ in per units cost when _____?
 Why _____ the _____ unit _____ as _____ goes up?
 _____ is the _____ unit _____ increasing as _____?
 Does _____ per unit cost _____ consumption levels go _____?
 _____ factors that _____ to _____ rise in _____ cost _____ consumption levels increase?
 _____ threshold for _____ the _____ when consumption levels go _____?
 What is _____ threshold _____ pricing _____ levels are _____ costs _____ up?
 _____ is _____ for _____ the unit, when _____ up?
 When more is _____ causes an _____ in _____?
 _____ more is _____ how can _____ per _____ go _____?
 _____ cost of _____ if _____ consumption goes up?
 What causes perunit costs _____ after a _____ amount _____?
 _____ prices to increase _____?
 _____ consumed, what causes the jump _____ per-unit _____?
 Is there _____ the _____ cost _____ when consumption goes up?
 When _____ how _____ per unit _____ go up?
 _____ causes _____ per unit _____ as _____ price _____ when consumption levels _____?
 _____ factors drive the _____ unit cost up _____ goes _____ there a _____?

_____ is the threshold for _____ rise, and _____ unit to increase?
 _____ indication of when _____ consumption leads _____ higher _____ per _____ could _____ tell _____ at _____ level?
 _____ the _____ that _____ the rise _____ per unit _____ consumption levels go _____?
 _____ point _____ go _____ due to higher _____ consumption?
 What is the threshold _____ pricing _____ levels _____ the _____ up?
 _____ cost of a unit _____ up when _____?
 _____ the threshold for _____ as _____ levels _____ causes cost _____ unit _____ increase
 When _____ a _____ cost _____ because of high consumption _____?
 _____ more _____ eaten, what causes the _____ costs?
 Why would _____ rising _____ a rise _____ cost _____ unit?
 _____ the cost _____ when the _____ expenditures more?
 Why would a price _____ consumption _____ and what _____ threshold to _____ level
 _____ more _____ consumed, what _____ the _____ in per-unit _____?
 When _____ up, _____ price _____ unit go up?
 _____ more is consumed, what _____ perunit _____?
 When _____ consumed, _____ does the increase of per _____?
 Why would _____ increase if _____ increases and _____ minimum _____ price to go above _____?
 _____ there _____ precise _____ the rise in per _____ cost _____ increases?
 _____ with _____ consumptions, costs-per-unit _____?
 _____ for pricing as consumption levels _____ and _____ causes cost _____ unit _____ go _____?
 _____ would a rising _____ necessitate _____ increase in cost _____?
 When more _____ what causes the _____ unit costs _____?
 _____ increases, is there a _____ in _____ unit cost.
 Why _____ we _____ a _____ per unit _____ when consumption _____ go _____?
 Is there _____ precise _____ for such a rise _____ when _____?
 As consumption levels _____ is _____ for _____ increase?
 _____ can _____ determine _____ threshold for per unit cost to _____?
 Does _____ cost _____ the unit go _____ spend _____?
 When is the _____ that _____ per-unit _____ rise _____ consumption?
 Why _____ high _____ increases?
 What causes the cost _____ as _____ levels go _____?
 _____ does a _____ unit cost _____ due to _____ levels _____?
 What _____ the threshold _____ escalate as consumption _____ rise?
 Why does _____ cost go up _____ goes _____ what _____ the threshold _____ it _____ go _____?
 Is _____ a threshold _____ per unit cost _____ up?
 _____ is the _____ the _____ to _____ as consumption levels _____?
 _____ a cost _____ to _____ when consumption _____ go up?
 _____ does the _____ unit _____ up _____ people consume?
 As consumption _____ rise, why does _____ unit _____?
 _____ more is consumed, what _____ to increase?
 _____ does _____ per _____ when consumption levels are _____ up?
 _____ higher per _____ cost _____ up _____ to consumption levels?
 _____ what point _____ unit cost _____ as _____ increases?
 When _____ a higher _____ unit _____ if consumption _____?
 What causes perunit _____ to _____ more _____?
 When _____ higher per unit cost happen _____ of _____?
 _____ drive _____ consumption _____ and is there a threshold for this _____?
 _____ causes _____ per unit _____ shoot up _____ increases?
 Why _____ price increase _____ consumption increases and _____ the _____ threshold _____ go _____?
 Can you tell _____ level _____ leads to higher _____?

_____ does the per unit _____ go _____ levels getting up to _____?

What _____ to _____ up as consumption levels _____?

What causes an _____ a certain _____ of consumption is _____?

_____ is _____ threshold for _____ because _____ increased consumption?

The cost per _____ consumption _____ what is the _____ this price _____ escalate?

When more _____ what _____ an increase in _____?

When does a _____ unit _____ if _____ levels are _____?

How _____ increase when more _____ eaten?

_____ do we _____ a rise _____ costs when our _____?

How _____ we determine _____ threshold at _____ per _____ cost _____ increase _____?

_____ more is _____ how _____ increase of _____ unit _____ happen?

_____ threshold _____ the cost _____ unit _____ go up when _____ up?

What's _____ at _____ unit _____ increases as consumption _____?

_____ an _____ in unit costs _____ consume more?

_____ more _____ consumed, _____ causes an _____ in _____ unit _____?

_____ level _____ consumption _____ been reached _____ an increase in per _____ costs?

What _____ go _____ due to increased _____?

_____ does _____ higher unit cost _____ because _____ rising consumption _____?

Why would _____ per _____ go up _____ rate went _____?

_____ do rising use _____ about _____ spike _____ unit?

As consumption _____ why _____ unit _____?

_____ a rising _____ to an increase _____ cost per _____?

As consumption soars, _____ is _____ rising?

_____ is _____ threshold for _____ cost to increase _____ increases?

_____ causes cost per unit to _____ consumption levels _____

When more _____ how _____ the per-unit _____?

_____ certain _____ of _____ been reached what causes an _____ costs?

_____ for _____ increase in _____ unit _____ when consumption increases.

When a _____ per _____ cost _____ occur _____ consumption _____?

_____ the _____ of a _____ once consumption goes _____?

What _____ the _____ cost _____ unit to increase _____ consumption _____ increase?

What _____ per unit cost _____ increase _____ certain level _____?

When does a _____ cost occur _____ is _____?

_____ for _____ indication of _____ escalating _____ to higher costs _____ unit, _____ you _____ at _____ this occurs?

What _____ increase in _____ costs when _____ is _____?

_____ the _____ up as _____ and what is the threshold for this _____ happen?

_____ more is _____ how _____ increase in unit _____?

_____ higher per unit _____ occur when consumption _____?

_____ a _____ per unit _____ go up _____ to _____ consumption?

_____ perunit _____ go _____ after a point _____ consumption?

Is _____ because of _____ per _____ costs _____ goes _____?

What factors contribute to the rise _____ if _____?

When a _____ cost _____ if consumption levels _____?

_____ a rise _____ unit cost _____ when _____ increases?

Is _____ specific _____ per unit _____ as consumption levels increase?

_____ does the _____ costs _____ when _____ is spent?

_____ factors go _____ the _____ unit _____ going up _____ consumption _____?

_____ certain _____ consumption _____ what causes an _____ in per unit costs?

After a level of _____ perunit _____ increase?

Is _____ when _____ unit _____ rises when consumption increases?

What _____ increases in _____ costs _____ consumed?

_____ are the _____ per item increasing _____ consumption _____?

Is there a threshold _____ the _____ per unit _____ consumption _____?

_____ would a rising _____ mean _____ increase in _____ cost?

_____ can _____ costs _____ more _____ used?

_____ do _____ per _____ cost _____ up due to increased _____?

How _____ per unit cost go _____ when _____?

_____ level do _____ use bring _____ spike _____ unit _____?

What is _____ unit cost _____ as _____ goes up?

_____ there _____ for a rise _____ cost _____ consumption grows?

_____ the cost _____ up _____ consumption goes up, _____ what is the threshold _____ to _____?

What _____ per unit cost up _____ consumption _____?

Why _____ cost _____ with increased _____?

When _____ does _____ up _____ usage goes up and _____?

_____ causes cost _____ unit _____ up _____ levels rise

_____ level _____ use bring _____ spike in _____ per _____?

What _____ threshold _____ unit as a _____ of rising _____ consumption?

_____ is _____ threshold _____ pricing the _____ in a _____ go up?

Why _____ per-unit _____ surge when more _____?

_____ come when my consumption goes _____ my cost _____?

_____ is _____ for pricing _____ consumption _____ rise, and what _____ per _____ to _____?

What _____ threshold for _____ and _____ causes _____ per unit to increase?

_____ eaten, _____ can per-unit costs go _____?

As consumption _____ why _____ unit costs _____ rising?

_____ higher per unit cost go _____ consumption _____ rising?

Why is _____ per item _____ consumption _____?

_____ threshold for _____ be when _____ levels _____ up?

_____ do _____ rise in _____ cost _____ consumption increases?

Can _____ tell _____ at what _____ per unit _____ starts to go _____ up?

What _____ cause the per _____ to go _____ as _____?

When _____ higher per unit _____ because _____ rising _____ levels?

_____ we determine the threshold _____ which per unit _____ increases _____?

Why _____ a rising consumption _____ raise the _____?

What is the threshold _____ pricing _____ consumption _____ what causes cost _____?

_____ there a _____ for the per _____ cost _____ consumption _____?

_____ is consumed, what causes _____ per _____ costs?

Looking _____ indication _____ consumption leads to higher costs per _____ tell me _____ level _____ occurs _____?

How _____ when _____ I _____ to pay more _____ unit?

Why would _____ rising _____ lead to _____ in _____ cost?

_____ there _____ for what _____ per unit cost _____ consumption increases?

What _____ per unit _____ to _____ up after _____ of consumption?

What _____ the _____ cost _____ increase as _____ increases?

Why would the _____ increase if _____ a _____ consumption _____?

When consumption increases, is _____ threshold for _____ unit cost?

What factors _____ the per _____ consumption _____ up?

_____ the threshold for _____ consumption levels rise _____ what _____ the cost _____ to _____?

_____ levels increase, what _____ to the rise in _____ is there _____ specific threshold?

When _____ higher _____ cost go _____ a certain _____ of consumption?

Can _____ tell _____ the _____ unit cost up _____ consumption goes _____?

Can you _____ factors _____ the per unit _____ up _____ increases?

As _____ and _____ per unit _____ is the _____ for _____ price to escalate?
 _____ drive _____ up when _____ climbs _____ is _____ a threshold?

What _____ the _____ cost up as _____ climbs and is there _____?
 _____ would a rising rate _____ a _____ cost _____ unit?
 _____ a _____ for the rise _____ per _____ cost when consumption _____?
 _____ the cost per item _____ is going _____?

Why _____ the cost per _____ jumping when _____?
 Why _____ Cost-per-unit _____ consumptions?
 _____ rate result in _____ increase in the cost per _____?

When does a _____ per _____ go _____ consumption _____ get close _____ a _____?
 _____ there _____ threshold _____ per _____ cost _____ go _____ as consumption levels go _____?
 _____ we determine the threshold for _____ increase _____ consumption increases?

What factors cause the cost of _____ as _____ goes _____?
 What _____ the _____ per _____ to _____ when usage _____ go _____?
 What level _____ use _____ about _____ in unit _____?

_____ factors cause the per _____ rise as consumption _____?
 _____ does _____ higher per _____ cost go _____ if _____ reach _____ threshold?
 _____ the threshold _____ pricing when _____ go _____ and _____ causes _____ per unit _____ go up?

Does the _____ unit _____ up _____ consumer spends _____?
 What causes _____ unit to go _____ rise?
 _____ causes _____ increase _____ a certain level of consumption?
 _____ go _____ during increased consumption?

What factors _____ the _____ go _____ as _____ goes up?
 _____ is consumed, why _____ cost go _____?

Is _____ threshold that _____ per unit _____ above _____ consumption levels?
 _____ does rising _____ a _____ in unit costs?

When does a _____ per unit cost go up _____ point?
 When do a _____ per _____ cost occur if _____?

_____ there a _____ per _____ cost _____ when consumption increases?
 Is _____ rise _____ unit _____ when consumption goes up?
 _____ levels rise, _____ cost per unit _____ is _____ for pricing?
 _____ costs to increase _____ a _____ level of _____ has been _____?
 _____ factors cause the _____ cost to _____ up if _____?
 _____ makes prices _____ up _____ more?

When _____ consuming more, _____ is the _____ item _____?
 What _____ costs _____ after a certain level _____ is _____?

Can you _____ rising consumption _____ to _____ costs per unit?
 _____ the threshold _____ causes per-unit costs _____ go up _____ consumption _____?

When more is _____ what _____ in per-unit _____?
 When _____ per _____ increase due _____ consumption levels reaching _____ certain _____?
 Is _____ a threshold for _____ elevation as _____ unit _____?

What _____ to _____ up when _____ quantities are _____?
 _____ is _____ per _____ going up _____ consume more?
 _____ can the _____ go _____ when more _____ used?
 _____ there a precise _____ a _____ in _____ unit _____ when consumption _____?

What is the threshold _____ consumption levels rise, _____ what _____ cost _____ unit _____?

When more is _____ causes the _____ up?
 Is there a _____ a per _____ go _____ thegurd of consumption _____?
 _____ is _____ threshold for pricing _____ consumption levels _____ and _____ per _____?
 _____ causes _____ per unit cost _____ after a _____ of consumption?

____ is it ____ the cost ____ goes up?
 ____ consumption ____ why ____ the per ____ costs ____?
 ____ is the cost per ____ increasing ____ consumption rate ____?
 ____ increases, ____ there ____ a threshold that would stop the ____ from ____?
 Why ____ if consumption increases and what ____ that ____ it?
 ____ the ____ item increase when consumption ____?
 ____ there ____ standard ____ to reach ____ per unit cost ____ consumption ____?
 When does ____ rise in consumption ____ unit cost?
 What causes a ____ per ____ when ____ rise?
 ____ the ____ cost goes up when consumption ____?
 ____ causes the price ____ consumption ____?
 When ____ unit cost ____ up ____ reaches ____ certain threshold?
 What factors ____ the per ____ higher ____ consumption ____?
 What ____ pricing a unit in relation to ____?
 As ____ the cost ____ and what is the ____ for this ____ to ____?
 ____ factors ____ to ____ rise ____ unit cost ____ levels increase?
 When ____ threshold that leads ____ cost going over ____ of ____ going up?
 ____ can we ____ the ____ if per ____ consumption increases?
 ____ high ____ why ____ cost-per-unit ____?
 Why would the cost ____ the ____ increases?
 ____ do ____ increase ____ cost for ____ you consume more?
 ____ causes ____ to ____ up ____ goes ____?
 ____ is the ____ a ____ when consumption levels go ____?
 What ____ an increase ____ perunit ____ when ____ is ____?
 ____ consumption ____ does per ____ costs ____?
 When people ____ more, why does the ____?
 How ____ per-unit ____ increase ____ more ____ consuming?
 ____ can ____ costs go ____ more ____ eaten?
 What ____ the ____ unit cost increases if consumption ____?
 Are ____ rise ____ unit cost when consumption increases?
 What ____ to ____ increase in ____ after ____ level ____ consumption?
 ____ threshold ____ pricing the unit ____ consumption goes ____?
 ____ a ____ level ____ has ____ reached what causes ____ increase ____ perunit ____?
 When consumption increases, ____ the ____?
 ____ a rise in consumption rate lead ____ in ____ unit?
 Does the price ____ a unit ____ when ____ more ____?
 Why ____ per unit ____ when use goes ____?
 When consumption increases ____ unit cost ____ up, ____ a ____?
 What ____ the threshold for ____ cost ____ go ____ goes ____?
 ____ a threshold for the price elevation when the ____ unit ____?
 When there ____ more consumed, ____ causes an ____?
 What's the ____ for pricing ____ when ____ levels ____?
 How ____ the per-unit costs go ____ more ____?
 What factors ____ the ____ cost to ____ up ____ climbs?
 Why ____ the ____ unit ____ up when ____ consume ____?
 When ____ the per ____ cost goes ____ is ____ threshold?
 why would a price ____ consumption increases and ____ is the minimum ____ to go ____
 ____ makes ____ go up after ____ level ____ consumption?
 Does ____ cost ____ a ____ go up for ____ who ____?
 ____ cost go upwards with a ____?

_____ a higher _____ unit _____ occur _____ consumption levels _____?

When _____ higher _____ unit cost _____ to consumption levels reaching _____?

_____ consumptions is cost-per-unit _____?

_____ cost _____ unit _____ up _____ people spend more?

_____ consumption _____ there be _____ threshold _____ the per unit cost _____?

What factors _____ per unit _____ you _____ more?

What factors _____ the _____ unit _____ consumption _____ up and _____ there _____ threshold?

Why does _____ cost _____ consumption _____ up, _____ what _____ threshold for this _____ happen?

_____ do we see _____ per _____ cost _____ increases?

What causes _____ unit _____ go _____ when use goes _____?

Why do _____ in _____ if we see better _____ levels?

Why do we _____ a rise _____ unit _____ when _____?

What _____ does _____ bring _____ costs per unit?

What is _____ for _____ because _____ increased consumption?

After a _____ of _____ an increase in perunit costs?

_____ prices _____ higher _____ consume more?

_____ is _____ per-unit costs to go _____ due _____ consumption going up?

What _____ drive _____ cost up when _____?

What _____ costs _____ go up _____ certain _____ of consumption _____ reached?

What _____ perunit _____ to increase _____ consumption _____?

When does _____ higher per unit _____ because _____ levels reaching _____ point?

_____ makes _____ costs go _____ when _____ consumed?

If _____ levels rise, _____ a _____ unit _____ occur?

_____ a higher per _____ cost _____ because of rising _____?

When does a _____ per unit _____ occur, _____ levels?

When does a higher _____ unit cost _____ over _____ threshold?

_____ cost per unit _____ as _____ and _____ threshold _____ the price to _____?

Why is _____ per _____ going up _____ there is _____ rising _____?

_____ we _____ per unit _____ when consumption _____ there be a threshold?

What factors _____ unit cost _____ as _____ and _____ a specific _____ for this price _____?

_____ factors drive _____ per _____ when consumption climbs _____ is _____ a _____ threshold?

_____ we determine the threshold for per _____ cost _____?

_____ consume more, why _____ the unit _____ up?

_____ increases and _____ rise in per unit cost, is _____ a standard _____?

_____ a higher _____ unit cost _____ because _____ higher consumption _____?

What _____ costs to rise after _____ of _____?

_____ a price _____ increases, _____ what _____ the minimum threshold to shoot _____?

_____ do we _____ a _____ in _____ cost when _____ increases?

Does _____ a unit go up after _____ spends _____?

When more is consumed, how _____ per _____?

_____ a rising consumption _____ the _____ cost?

What _____ does per _____ up as _____ up?

Why _____ higher consumption _____ lead _____ in cost _____ unit?

_____ a rising consumption rate cause _____ per _____?

Is there _____ elevation _____ the _____ unit cost goes up?

_____ what factors _____ per unit _____ up as _____ climbs?

Why _____ costs per _____ increase _____ the _____ rate _____?

What causes prices _____ go _____ you _____?

Why is _____ cost per _____ up _____ up?

_____ threshold for pricing as _____ levels _____ and _____ per unit _____ shoot up.

Does _____ the cost of _____ unit _____ up?

What is _____ for _____ the _____ due to _____ levels?

_____ can per-unit costs _____ up _____ consuming?

What is the _____ pricing _____ rise and what causes _____ increase?

_____ threshold _____ pricing the unit in _____ rising consumption?

Why is _____ per _____ consumption goes up?

_____ is _____ threshold _____ pricing a _____ consumption goes _____?

_____ causes a rise in perunit costs _____?

_____ do the _____ per _____ when consumption goes _____?

What is _____ threshold for _____ consumption _____ and _____ the cost per _____ increase?

_____ we _____ a rise _____ per _____ costs if consumption _____?

Does _____ unit go _____ if consumption _____?

Can _____ tell _____ increase _____ consumption _____ to unit costs and the _____?

_____ a threshold for _____ unit _____ consumption levels _____?

_____ does a higher unit _____ because of _____?

_____ there a threshold _____ a _____ in the _____ when _____?

What _____ costs to _____ after a _____ of _____ is reached?

_____ would _____ rising consumption _____ an increase _____ the cost per _____?

_____ the cost _____ when consumer spending _____ money?

_____ factors drive _____ unit _____ when consumption _____ up

_____ an _____ when rising _____ leads to _____ per unit?

_____ do we _____ a rise in _____ consumption increases?

How come _____ my cost per _____ when _____ consumption _____?

How _____ per unit cost increase _____ consumed?

_____ a _____ per _____ if _____ levels go up?

When more _____ causes _____ unit _____ to increase?

_____ is the _____ increasing as consumption _____ increasing?

_____ cost of the unit _____ up _____ of _____ consumption?

_____ a higher _____ unit cost _____ if _____ levels _____?

Why would a _____ consumption _____ mean an _____ in _____ cost _____?

As consumption increases, what _____ the _____ for _____?

_____ factors drive _____ per unit _____ up _____ climbs?

_____ is the threshold _____ pricing the _____ increased _____ levels?

What causes cost _____ unit when more _____?

_____ do we _____ the threshold _____ unit cost _____ consumption increases?

_____ can the price _____ unit _____ when usage _____?

What is _____ threshold _____ pricing the _____ goes up?

_____ does _____ unit _____ rise when _____ goes up?

With _____ consumption levels, _____ the threshold _____ unit?

_____ does _____ cost per _____ when consumption goes _____?

Why is _____ cost _____ going up with _____ consumption _____?

_____ there _____ threshold for an increase _____ the _____ unit _____ when _____?

When does _____ higher _____ unit _____ up due _____ climbing?

_____ there _____ for increases in _____ cost when consumption _____?

_____ per _____ cost up as consumption _____ up?

What _____ cause _____ of a _____ go up _____ consumption goes _____?

_____ per unit _____ go _____ after _____ certain amount _____ consumption _____ reached?

What _____ the _____ for _____ escalation to _____ the cost per _____ increases _____ consumption _____?

_____ a certain _____ of _____ is _____ an increase in unit _____?

_____ do _____ see _____ rise in _____ unit _____ when consumption _____.

_____ a rising _____ rate _____ the cost _____ unit _____?

_____ cost _____ unit to _____ consumption levels increase?

_____ a rise _____ consumption rate lead to _____ in cost _____?

What _____ the _____ to _____ up when usage _____?

As _____ levels rise and the cost _____ the _____ price _____ escalate?

_____ consumption levels increase, what _____ does _____ cost _____ go _____?

_____ is _____ pricing when consumption _____ rise _____ causes _____ cost _____ go up?

Is there a _____ threshold for _____ unit cost _____ when _____?

When more _____ what _____ increase in per _____?

When _____ increases, _____ there a threshold _____ the _____ cost to _____?

_____ causes _____ per _____ to increase as the _____ increases as _____?

Is there _____ for _____ unit cost to _____ when _____ goes _____?

_____ cost _____ unit _____ as consumption levels _____ and what is the _____ this _____ increase?

What factors contribute _____ rise in _____ unit _____ as _____ and is _____ threshold for _____ price _____?

_____ the threshold for pricing _____ unit _____ consumption _____?

_____ the cost _____ the _____ going _____ if _____ consumption _____ up?

How _____ factors drive _____ per unit _____ increases?

Why would a _____ goes _____ certain threshold?

_____ consumption increases, what factors drive _____ unit _____?

_____ a higher _____ unit _____ of consumption levels?

_____ threshold _____ the _____ per unit cost as consumption _____ increase?

_____ consumption levels _____ and _____ unit _____ what _____ contribute to this price _____?

_____ the cost _____ up when the consumer makes _____?

What causes perunit _____ up _____ there is _____ certain _____ consumption?

_____ does the _____ unit cost go up _____ up _____ threshold?

_____ do we see _____ cost when consumption _____?

What factors drives _____ up when consumption _____?

When more _____ how _____ the _____ costs _____?

_____ is _____ threshold _____ pricing as _____ levels rise and _____ cost _____ unit _____?

What causes _____ to go _____ certain _____ consumption?

_____ levels _____ why does cost per _____ up?

What _____ to go _____ after some _____?

_____ a perunit costs to increase _____ certain amount _____?

What factors lead _____ unit _____ consumption increases?

Is _____ a _____ per unit _____ to _____ consumption levels increase?

_____ is _____ why does the _____ rise _____ unit?

_____ be _____ threshold for a rise in _____ unit cost _____?

_____ the _____ of a _____ as consumption _____ up?

What is the threshold _____ levels _____ what _____ unit _____ to _____ up?

_____ does _____ rising _____ rate increase _____ per unit?

Does _____ cost of _____ unit _____ up _____ a consumer _____ more _____?

_____ unit costs _____ more is consumed?

_____ factors that lead _____ per unit cost _____ as consumption _____?

_____ is _____ rising per-unit costs?

When does a higher per unit cost _____ a _____?

_____ can _____ per-unit _____ go _____ when _____ is eaten?

_____ a _____ in _____ unit costs _____ consumption goes up?

When _____ consumed, _____ causes the _____ in _____ unit _____?

What is _____ threshold for _____ levels increase _____ per unit _____ increase

Is there _____ the _____ in _____ unit _____ when consumption goes _____?

Why are _____ raising the _____ for _____ unit _____ consume _____?

_____ do _____ in _____ unit cost when we consume _____?

Does _____ of _____ unit go _____ if _____ spend more _____?

_____ would a _____ if _____ and what _____ would _____ it?

Why _____ increases _____ high _____?

_____ the threshold _____ when _____ and cost goes up?

_____ is the reason for _____ in _____ unit _____ increases?

_____ the _____ a _____ go up when _____ goes _____?

Why _____ rising use cause _____ to _____ unit?

Why _____ rise in consumption rate _____ costs _____?

_____ causes cost per unit to _____ rise?

_____ a per unit _____ when _____ levels go _____?

_____ cost per _____ increase when consumption _____?

_____ a _____ rate require _____ increase in _____ cost _____ unit?

What is the _____ consumption goes up?

_____ we _____ a _____ in per unit _____ consumption increases?

What _____ pricing a unit after _____ go up?

Does _____ of _____ up _____ consumer _____ more?

_____ tell me _____ the threshold is for _____ unit _____ to rise _____?

_____ per _____ to go _____ when consumption _____ rise?

_____ are _____ factors that lead to _____ rise in _____ cost _____ increase?

_____ does _____ increase of _____ costs _____ more _____ eaten?

Is there _____ threshold _____ the _____ unit _____ when consumption goes _____?

What factors drive _____ unit _____ when _____ increases?

Is _____ threshold _____ causes _____ per unit cost to _____ above _____?

_____ the _____ to go up _____ volumes go _____?

What causes the _____ up after _____ certain level _____ consumption?

Why _____ consumption rate _____ a hike _____ the _____ unit?

Why does the _____ go up _____ more?

Why _____ item go up when _____ consume _____?

How _____ the _____ up when usage _____ up?

What _____ does _____ bring _____ a _____ in _____ cost?

_____ does _____ cost _____ when consumption _____ what is _____ threshold for _____ to _____?

_____ a _____ in the _____ unit cost when consumption goes _____?

Is _____ to _____ the _____ at _____ per unit cost _____ consumption _____?

_____ does _____ go up when consumption gets _____ certain level?

Why _____ a price increase if consumption _____ and _____ the minimum price _____?

_____ does a higher _____ cost go up _____ to _____ level _____?

When does a _____ unit _____ go _____ a higher _____?

When does _____ higher _____ unit _____ go _____ of consumption _____?

When _____ increases and _____ goes up, _____ there _____ threshold?

When _____ is being consumed, _____ costs _____ increase?

_____ bring about _____ spike in unit costs?

_____ rising consumption rate _____ costs per unit go _____?

_____ we _____ a threshold when the per unit cost _____?

Does the _____ of _____ go _____ the _____ purchases more?

_____ with _____ consumptions is _____?

What _____ threshold for pricing _____ consumption levels go _____ what causes _____ to _____?

_____ do we see _____ rise _____ per _____ consumption increases?

When _____ is _____ a _____ for a _____ cost increase?

What is the _____ for _____ consumption _____ going up?
 _____ causes the perunit costs _____ go up _____ of _____?

What _____ the _____ for pricing the unit _____ levels _____ go _____?

When _____ there _____ the rise in per unit _____?
 _____ consumption levels rise, _____ does _____ per _____ go _____?

What _____ the _____ pricing as consumption levels _____ and _____ the _____ to _____?

What _____ to _____ unit _____ up as _____ goes up?

Why _____ see a _____ unit cost _____ consumption _____ up?

When does _____ per unit _____ go _____ if _____ to _____ certain threshold?

When _____ a higher _____ unit _____ about due _____ going up?
 _____ drive the per _____ as consumption climbs and is _____ a _____ threshold _____?

When _____ threshold that causes _____ cost _____ over thegurd _____ levels going up?
 _____ the cost of _____ go up when _____ consumption _____?

_____ we see _____ unit costs _____ up _____ consumption goes _____?

When is the _____ that causes per-unit costs _____ up _____?

What factors contribute to _____ in _____ unit _____ consumption _____?

What _____ the _____ for _____ levels rise, and what _____ cost per _____ up
 _____ the _____ pricing a unit in light _____ rising _____?

_____ consumption _____ be _____ threshold _____ would _____ a _____ in per unit cost?

_____ me _____ factors drive _____ per _____ cost up _____ consumption goes _____?

As a _____ going up, _____ the threshold for _____ the _____?

_____ levels increase, the cost per unit increases, _____ what _____ for _____ to _____?
