

[Demo] NLP Dataset for Customer Service Automation

Company Type	Internet Service Providers
Inquiry Category	DNS and IP address configuration help
Inquiry Sub-Category	DNS Resolution Issues
Description	Assistance with troubleshooting and resolving DNS resolution problems, including issues related to DNS server configuration, caching, and domain name registration.
Data Size	5,062 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Internet Service Provider" customer inquiry. (Purchased data will not be masked.)

Why are some _____ their _____ addresses directly, while _____ corresponding _____ name?
_____ you shed some _____ the _____ between _____ websites using an _____ and a domain _____?
_____ possible for certain _____ be _____ via their internet _____ while _____ need an associated _____?
Some _____ be accessed _____ their Internet _____ addresses _____ others need associated _____.
It can be _____ for _____ to _____ directly via their _____ Protocol addresses, while _____ associated _____.
_____ the reason why _____ use _____ addresses _____ while others require _____ corresponding _____?
How is it that _____ websites have direct _____ their _____ domain _____?
_____ use _____ addresses _____ others _____ the corresponding domain name _____ accessible.
_____ websites use IP's while requiring a proper domain _____?
_____ have _____ their addresses while _____ a certain domain name.
Is it _____ certain _____ using their _____ addresses, or is _____ a _____ domain?
Is it possible for certain _____ to be _____ via _____ internet _____ addresses, _____ necessitate _____?
_____ understand why _____ websites use internet _____ addresses while others use _____?
_____ there _____ difference _____ websites that can be _____ via _____ addresses _____ need to use a _____.
_____ the _____ why _____ web pages allow connecting _____ numerical IPs _____ of _____ domains?
_____ it _____ to understand why some websites allow _____ an _____ address while others _____ a _____?
Is it _____ for _____ be accessed _____ their _____ Protocol _____ while others _____ an _____ URL?
What _____ the _____ some websites _____ simple _____ to _____ protocols and others _____ domain _____?
_____ do _____ websites have _____ access to _____ addresses _____ others _____ to provide a _____?
_____ certain websites can be accessed _____ their IP addresses _____ while others need _____?
Why do _____ web _____ allow connecting directly _____ IPs, _____ through _____?
_____ websites _____ access _____ their addresses while _____ websites _____ provide _____ domain name
Why do some sites _____ through _____ internet _____ while others _____ domain?
_____ websites have direct access _____ their _____ and other websites _____ to _____.
Why do specific _____ their _____ domain name instead of _____ address?
_____ websites use their _____ others use _____ name.
Is _____ a reason _____ some _____ use _____ instead _____ a domain _____?
Why do some sites allow _____ access _____ IP _____ others _____ allow _____?

_____ their addresses directly, whereas _____ domain names.
 Is it _____ certain _____ to be accessed directly _____ their _____ addresses, while others _____ associated _____?
 Why _____ websites accessible _____ IP addresses, _____ need the _____ name?
 Is _____ possible _____ why some _____ use internet protocol address _____ only _____?
 Can you discuss _____ use _____ a _____ domain?
 _____ sites _____ direct _____ addresses while others _____ use domain names?
 _____ some websites have direct _____ to _____ addresses _____ others need _____ certain domain name?
 _____ do _____ websites _____ access to their _____ addresses _____ others need _____ domain names?
 _____ want to know _____ some sites _____ direct access through _____ addresses, _____ use _____.
 _____ it possible _____ websites to be _____ through _____ Protocol addresses, _____ others need associated _____?
 _____ does some _____ have direct access to their _____ corresponding domain _____?
 Is it possible that _____ can _____ accessed via their address _____ while _____ need _____?
 Is _____ reason _____ can _____ accessed via _____ IP _____ directly, while _____ require associated _____ names?
 Is _____ access certain _____ their Internet Protocol addresses, while others _____?
 Is _____ possible that _____ via their IP _____ need to have associated domain _____?
 _____ you _____ websites use _____ while requiring _____ domain name?
 It is _____ for certain websites to be accessed directly _____ others _____ domain.
 Is _____ to be _____ via their _____ directly, _____ others need to _____ associated _____ names?
 It _____ not clear why certain _____ direct access through _____ and others only _____.

 Is _____ that _____ websites _____ accessed _____ their IP addresses directly, _____ others _____ domain names?
 Why _____ websites use _____ instead of _____ a _____ domain _____?
 How _____ some sites can access directly through _____ internet while _____ depend _____?
 _____ those who _____ directly with their internet _____ addresses from those _____ specific domain _____?
 _____ is possible for certain websites _____ accessed _____ via their Internet _____ other websites _____ associated _____.
 _____ possible _____ certain websites to _____ accessed directly _____ Protocol addresses, _____ others require _____ domain _____?
 Can _____ why some _____ IP's while _____ a proper domain _____?
 Is _____ for certain _____ to _____ directly via their Internet _____ others need _____ domain.
 Some _____ to access _____ by typing in their Internet _____ address but _____ a _____.
 _____ access to _____ Protocol addresses, _____ need the corresponding _____ names.
 Why _____ pages possible to connect using _____ IP's, _____ through _____ domain?
 _____ it _____ that _____ sites _____ access _____ IP addresses, _____ others _____ on domains?
 _____ causes some websites to use _____ rather _____ domain _____?
 Can you _____ websites that _____ their domain name and those _____ direct internet _____?
 _____ you explain the _____ between websites that use _____ those _____ direct internet address?
 Some websites _____ directly via _____ internet _____ addresses, _____ need _____ domain names.
 Some websites _____ direct access to their addresses _____ others have _____ certain _____ order _____ do _____.
 What _____ some _____ direct _____ their _____ Protocol addresses while others need _____ domain name?
 Can _____ some _____ use IP's _____ proper _____ names?
 Is _____ possible _____ understand why some _____ use _____ others just use _____?
 _____ do _____ use their _____ directly _____ others use _____ domain?
 How _____ explain that some _____ access _____ the internet and _____ reliant on _____ names?
 Can you talk _____ why _____ use IP's _____ name?
 _____ it possible for _____ to _____ their Internet Protocol addresses, while others _____ names?
 _____ possible for _____ websites to be accessed via _____ IP _____ directly while others _____?
 Some websites _____ directly _____ others use _____ domain _____ for that _____.
 _____ websites have direct access to _____ Protocol _____ related _____ names.
 _____ do some sites give direct access _____ give _____ a domain?
 What _____ the _____ some websites use their _____ a domain name in order _____?

_____ allow direct _____ through IP addresses while others _____ use domain _____?

_____ use their addresses directly _____ need a _____ name.

Why do _____ IP addresses instead of their _____?

_____ it _____ understand _____ some sites use an _____ while _____ use a _____?

Can you _____ some websites _____ others _____ a _____ domain name?

Why do some _____ use their addresses alone _____ other _____?

Some websites _____ direct access _____ addresses while _____ corresponding domain name.

Is _____ a reason certain websites can be accessed _____ while others _____ the _____?

_____ those _____ be _____ directly _____ their _____ the ones reliant on a specific _____ name _____ website _____?

_____ it _____ for certain websites to be accessed directly _____ internet _____ while _____ an _____?

It _____ possible _____ understand _____ through an _____ protocol address _____ others _____ use a domain.

Do _____ have _____ for why certain _____ use IPs _____ proper _____ name?

_____ possible for certain websites _____ be _____ through their _____ Protocol addresses, _____ others _____ domain _____.

_____ some _____ allow access via IPs _____ on domain?

Some websites allow users to access _____ typing in _____ while _____ require _____ name.

_____ you _____ me _____ websites accept IP addresses, _____ others _____ use _____ names?

_____ do some _____ allow _____ via IPs _____ of relying _____?

_____ websites _____ alone while _____ require a domain _____ visit.

It is possible _____ some websites to _____ accessed directly _____ their _____ need _____ domains.

Some websites have direct _____ Internet Protocol _____ others need _____ domain name.

Why _____ web _____ possible _____ connect _____ not just through associated _____?

In _____ access, _____ those that can be reached directly _____ those with _____ domain _____?

_____ is the _____ why some _____ on their _____ need their _____ names?

It is _____ some _____ to be _____ via _____ Internet Protocol addresses while others _____.

Why _____ websites be _____ directly through _____ addresses even if _____ names?

Can you _____ us _____ websites accept IP _____ for access _____ only use their _____?

What _____ use their _____ protocol addresses instead _____ their _____?

_____ possible to access certain _____ their _____ addresses, _____ others _____ domain names?

_____ possible _____ certain _____ to _____ accessed directly via _____ addresses, while _____ necessitate the _____ domain _____ have direct access to _____ addresses while _____ only _____ names.

Some websites _____ able to _____ directly via their Internet Protocol _____ while _____ need _____.

_____ it possible to _____ certain websites _____ their _____ or is _____ necessary _____ use _____ corresponding _____?

_____ are some _____ with _____ access _____ Protocol _____ others _____ a corresponding domain name.

Some websites use _____ addresses directly, _____ their _____ names

_____ websites have _____ their _____ while others have to give _____ matching _____.

_____ it _____ that some sites allow _____ access _____ whereas _____ allow domain _____?

Some sites _____ to access _____ by _____ in their Internet Protocol address while _____.

_____ it _____ certain _____ let you _____ them _____ IP, _____ insist on domain _____ for _____ people?

It is _____ websites to be _____ directly _____ Protocol addresses, while _____ require an _____.

Why _____ some sites _____ IP _____ others only _____ a _____?

_____ is _____ clear why _____ websites have _____ access _____ an IP address, _____ the domain.

What _____ those that _____ be _____ directly _____ Internet _____ the ones reliant _____ specific _____ name?

Certain websites can _____ accessed _____ via _____ Internet _____ require associated domain _____.

Some _____ allow _____ access _____ typing in the _____ protocol _____ while others _____ a _____ name.

Is it possible to _____ why _____ websites allow access _____ internet protocol _____ a _____?

_____ possible _____ certain _____ to _____ their _____ protocol addresses, while _____ require a associated domain.

Some websites have direct _____ Protocol _____ while others _____.

_____ others _____ have _____ domain names, websites can _____ their IP addresses.

_____ do _____ allow direct _____ through internet _____ while _____ only allow domain _____?

_____ explain the _____ that _____ their domain _____ and those that _____ a direct IP _____?

Is _____ certain websites _____ via their _____ addresses, while _____ require an associated _____?

Some _____ use their _____ directly _____ need a _____ domain _____.

_____ you explain _____ websites _____ protocol address _____ others use _____ domain name?

_____ on the _____ between accessing websites using _____ protocol address or a _____ name?

_____ accessing websites using their IP addresses and _____ the _____ domain _____?

Is _____ a _____ between _____ that _____ via direct _____ addresses _____ that need to use _____ domain _____?

Some _____ have _____ to _____ Protocol _____ while others require _____ corresponding _____.

_____ IPs _____ while others _____ their domain names as well.

_____ is _____ some websites _____ direct access _____ their _____ while others have to give _____ specific _____?

_____ don't understand _____ some _____ via _____ while others _____ a _____ name.

_____ possible for _____ to be accessed _____ Internet _____ addresses _____ others need associated _____ names

Why do certain web _____ directly _____ not through associated _____?

_____ websites _____ addresses _____ need the corresponding domain name

_____ there _____ difference between websites that _____ using their _____ that can be _____ direct internet _____?

_____ for _____ websites to _____ accessed through their _____ protocol addresses, while _____ require the _____?

Is _____ possible _____ certain _____ to be accessed through their Internet _____ while _____ associated _____.

Is it possible for _____ be _____ IP _____ directly, while others need _____ domain _____?

Is _____ that certain _____ can be accessed _____ IP addresses, while _____ associated _____ names?

_____ IP _____ directly, while _____ to use a corresponding domain _____.

_____ it _____ that _____ sites _____ via their domain name and _____ an internet protocol address?

Some _____ can _____ accessed _____ via their _____ Protocol _____ others _____ the associated _____.

Some _____ allow _____ typing _____ their internet protocol address, _____ others require a _____ name

_____ there a _____ certain websites can be _____ directly?

Is _____ possible for certain websites to _____ accessed _____ addresses, _____ others _____ the _____ domain.

_____ can be reached _____ with their internet Protocols _____ those _____ specific domain _____?

How _____ you explain that certain _____ be _____ through the _____ on domain names?

_____ use _____ directly, others have a _____ name.

_____ websites have direct _____ the Internet Protocol _____ while _____ a _____ name.

Some websites _____ addresses directly, whereas _____ the _____.

Is it _____ be _____ via _____ internet protocol addresses, while _____ require an associated _____?

_____ it _____ websites _____ be accessed directly _____ their _____ addresses, _____ other websites _____ associated websites?

Why do specific _____ connecting _____ not just _____ associated domain?

It _____ not _____ websites _____ direct _____ an _____ protocol address, _____ others _____ use the domain.

Some websites _____ their addresses _____ use a _____.

Some sites allow _____ access _____ by _____ in their internet _____ others _____ a domain _____

Some websites _____ direct _____ to _____ Internet Protocol _____ need the _____ names.

What is the _____ websites use _____ addresses _____ use _____ domain name?

_____ you know why some _____ direct access through _____ only _____ names?

Some _____ their addresses _____ while others _____ name

Is _____ possible for certain _____ be accessed through their IP _____ need _____ domain _____?

_____ for _____ websites to be _____ directly via _____ addresses, _____ others require the _____ domains?

Some websites _____ addresses directly, _____ others use _____ for the _____.

_____ websites use _____ directly and _____ the _____ name.

It _____ possible for _____ be accessed _____ their Internet Protocol addresses, while others _____.

_____ websites _____ their own _____ addresses while _____ use _____ domain _____.

_____ websites _____ access to _____ Protocol addresses _____ others may _____ a _____ name.

Why _____ connecting directly via _____ IPs and _____ associated domain?

Specific sites allow _____ access by _____ their IP rather _____ using _____?

_____ do _____ use their addresses _____ and _____ need a _____ name?

Why _____ some sites allow direct _____ IP _____ while _____ only _____?

_____ websites can _____ accessed _____ via their Internet _____ while _____ require a _____.

It _____ not _____ why _____ websites have _____ through an IP _____.

_____ websites are _____ be _____ directly via _____ Internet _____ addresses, _____ others need _____ names.

Is it _____ for _____ via _____ Internet _____ addresses while others _____ an associated domain?

Some _____ use _____ while others _____ their _____ name.

_____ is _____ that some _____ have direct _____ to their _____ have to provide _____ corresponding _____?

What _____ those _____ can be _____ their IPs from _____ with _____ specific _____ name?

_____ you explain to me _____ some _____ Internet _____ addresses while requiring _____ proper _____?

Some sites allow _____ them by typing in _____ Protocol _____ others ask for _____.

_____ why certain _____ access through _____ and others only _____ the domain.

Can _____ tell _____ some websites _____ internet _____ addresses _____ than having a _____?

_____ you tell us the _____ that use their _____ and _____ the corresponding _____?

What _____ that _____ their _____ Protocol addresses from the ones _____ on a _____ domain name?

Why _____ some websites have _____ to their _____ have _____ domain name?

Is it possible for _____ websites to _____ directly _____ their _____ Protocol _____ associated domain?

_____ websites _____ access to _____ Protocol addresses _____ others need _____ domain name.

Why can some websites _____ by their _____ protocol _____ just _____?

_____ it possible that _____ websites _____ IP _____ for _____ others only _____ their _____ domain _____?

_____ use _____ IP addresses directly _____ others _____ the domain _____.

Some _____ are reachable _____ on _____ internet, _____ others need a _____.

Is _____ possible _____ discuss why _____ use IP's _____ others _____ a _____.

What _____ sites _____ internet _____ addresses instead _____ domain name?

_____ are _____ websites _____ via IPs alone, _____ others _____ names?

Some _____ their _____ Protocol _____ directly, _____ others use _____ name.

Some _____ have direct access _____ addresses _____ to _____ a specific domain _____.

Is there _____ between websites that _____ via _____ addresses and those _____ use a domain _____?

_____ you explain why _____ websites _____ of _____ proper domain name?

_____ websites have _____ access to their addresses _____ provide a _____ name.

What is _____ reason why some websites _____ their _____ others _____ corresponding _____?

_____ reasons why _____ direct access to their _____ while _____ have corresponding domain _____?

Why do _____ websites require the use _____ corresponding _____ name rather _____ address _____?

What _____ the _____ some websites _____ to _____ while others only have _____ corresponding _____ name?

_____ websites can be accessed directly _____ while _____ necessitate the _____ domain.

_____ is a question about _____ website _____ be accessed directly through _____ internet _____ address _____ name.

_____ the phenomenon that _____ sites use _____ IP addresses _____ names?

Why do some _____ access _____ Protocol address, _____ others only allow it _____ a _____?

What _____ the reason _____ simple _____ through Internet Protocols and _____ domain _____?

_____ there a _____ that can be _____ via _____ and _____ that need _____ use their _____ name?

_____ allow users to _____ them by _____ in their _____ while _____ only require a _____.

_____ are some _____ reachable via _____ alone _____ others _____ their _____ names _____?

_____ use _____ IP addresses _____ and _____ their domain name.

Can _____ tell _____ Internet _____ others use a domain name?

_____ websites _____ alone, while _____ need _____ domain name to _____.

Some _____ access _____ addresses, _____ others need _____ corresponding domain name.

There is a question as _____ whether _____ website _____ accessed directly through _____ internet Protocol _____

_____ their _____ addresses, while others use domain _____.

Why _____ accessed directly _____ IP _____ others _____ to have associated domain names?

What is _____ for _____ to _____ their _____ directly while _____ use _____ domain name?

_____ it possible _____ websites to _____ accessed _____ via _____ internet protocol _____ while _____ associated _____ names.

Why do web ____ allow connecting directly via ____ through ____?

Some websites ____ access ____ addresses while ____ the corresponding domain ____.

____ websites use ____ protocol ____ directly, ____ use the ____ name

____ is ____ for some ____ accessed directly from their ____ while others need associated ____.

Some ____ allow ____ by typing ____ internet protocol ____ while others only require ____ name.

Why is it ____ direct access ____ their ____ others ____ domain names?

It ____ clear ____ certain websites have access ____ an internet protocol address, ____ use ____.

____ you tell me ____ certain ____ use IPs ____ of ____ domain ____?

____ direct ____ Internet Protocol addresses while others ____ a matching domain ____.

____ there ____ websites demand ____ domain ____ of an ip address?

____ you ____ me why ____ websites ____ others use domain ____?

____ accessed ____ their ip addresses even if others have ____ names?

Is it possible for ____ be ____ via their ____ addresses ____ others ____ the ____ domain?

____ ones that can ____ directly with their IPs ____ the ones ____ specific domain name?

____ you ____ some ____ directly through the internet, while ____ are reliant only ____ domain ____?

What ____ reason ____ some ____ use their addresses ____ use ____ domain name?

Some ____ direct access ____ addresses ____ others need ____ provide a certain ____ name ____ do ____.

Can ____ tell me ____ the differences ____ that use ____ and ____ that use ____ addresses?

____ is a ____ to ____ a website ____ be ____ its ____ Protocol ____ using a domain name.

Some ____ use ____ directly, ____ others use domain ____ for their ____.

Can you ____ some websites ____ while ____ use a domain name?

Can you tell ____ why certain ____ for access, while others only ____ corresponding ____.

It is possible for ____ to be accessed ____ Internet Protocol ____ other websites ____ domain ____.

Some websites ____ their addresses ____ others ____ name ____ to visit them.

Some websites ____ IPs ____ others ____ proper domain ____.

How ____ that some sites ____ access ____ through the internet and ____ are ____ names?

What ____ reasons ____ websites have ____ access to ____ addresses while others ____ give a ____ domain ____?

Some ____ sites ____ while others ____ a ____ name.

____ websites have direct access to internet ____ addresses, while ____.

Is it possible that certain websites can ____ via ____ addresses ____ others ____?

____ direct access to their ____ while others ____ domain name.

____ reachable ____ Internet Protocols alone, ____ need ____ domain names as ____.

____ there a ____ websites that ____ accessed ____ direct addresses and ____ that ____ a ____ name?

____ is ____ reason ____ websites ____ direct ____ Internet Protocol ____ while others need the ____ domain names.

It is ____ for ____ to ____ accessed ____ their internet ____ others require associated domain ____

____ their ____ while others ____ a domain ____ in ____ to visit

____ websites ____ reachable via an internet protocol ____ to have ____ name.

Can you tell ____ some websites ____ having ____ domain name?

____ websites have direct ____ addresses ____ other ____ have ____ domain names.

Even though ____ have ____ websites can be ____ directly via ____ IP ____?

Some websites use ____ addresses ____ corresponding domain name.

____ it ____ to enter ____ by ____ their IP addresses, or ____ to ____ the ____ domain?

____ distinguishes the ones ____ be reached directly ____ their Internet Protocols from ____ ones ____ name?

Some ____ to their Internet ____ addresses ____ others have ____ corresponding domain ____.

____ is unclear why ____ direct access through ____ internet protocol address ____ the domain.

I ____ understand why ____ use ____ a ____ domain name.

____ for ____ websites ____ be accessed ____ their ____ addresses, while others ____ associated domain ____.

Some ____ use ____ directly while ____ require ____ domain name.

____ you ____ us ____ IPs instead of ____ a domain name?

_____ websites may be accessed directly via their _____ Protocol _____ while _____.

_____ their internet Protocol addresses directly while _____ names.

Can _____ talk about why _____ websites _____ IP's _____ proper _____?

_____ some websites use IPs _____ a proper domain _____?

It _____ for certain _____ directly via their _____ Protocol addresses while _____ need associated _____.

Some websites use _____ Protocol _____ directly, _____ others _____.

Why do some _____ have simple _____ via _____ others _____ a domain _____?

Some _____ have direct access to their _____ need to _____ a _____.

_____ it possible that _____ accessed via _____ IP addresses _____ while others _____ the _____ names?

_____ are _____ accessible using their IP addresses, _____ need _____ domain _____?

_____ about whether a website can be accessed _____ or using _____ domain name.

_____ do specific websites require _____ of _____ name rather _____ access via _____ protocol address?

Why _____ specific _____ allow connecting _____ via numerical IPs _____ through _____?

_____ a difference between _____ that _____ via direct _____ addresses _____ have to use a domain _____?

_____ in _____ do _____ work using _____ Protocol address but not _____ domain _____?

Some _____ their _____ while some _____ a domain name _____.

_____ have direct access _____ addresses, _____ a certain domain name.

_____ distinguishes websites _____ on a _____ can _____ reached directly _____ their internet Protocol addresses?

Why _____ some _____ access via _____ instead _____ relying on _____?

Some sites allow _____ by typing _____ internet _____ address while _____ only _____ domain name.

_____ sites allow _____ them _____ using their Internet _____ require a domain name.

What distinguishes the _____ on _____ specific domain _____ those _____ directly with their _____ protocol?

_____ you _____ to me why _____ use IP's while _____ name?

Do _____ have an _____ some _____ be accessed via their _____ name and not via _____ address?

Is it _____ certain websites to _____ via _____ addresses _____ while others _____ the associated _____?

_____ explain _____ me _____ websites _____ internet protocol _____ others _____ domain name?

_____ it possible _____ websites _____ be _____ addresses directly while others require _____ domain _____?

Some websites _____ access to _____ addresses _____ have _____ corresponding _____ name to do so.

_____ possible _____ certain websites _____ addresses _____ others only _____ corresponding domain names?

_____ you talk about _____ use IPs instead _____ a domain _____?

_____ websites _____ their IP addresses _____ whereas _____ domain _____.

_____ have _____ access to their addresses while _____ have _____ certain _____.

There _____ a reason some websites _____ direct _____ addresses, _____ need _____ corresponding domain name.

Is it possible _____ can _____ directly _____ while others need to _____ domain names?

_____ come some _____ in their Internet Protocol _____ while _____ require a domain name? "

_____ a difference _____ websites that can be _____ direct IP addresses _____ have _____ a domain _____?

_____ for certain websites _____ be _____ via _____ Internet _____ while _____ need the associated domain.

When _____ to _____ what distinguishes _____ that _____ be _____ directly with _____ internet Protocol _____ those reliant _____ domain name

_____ do certain _____ accept IP addresses _____ while others _____ domain names?

It is _____ certain _____ be _____ via _____ Internet Protocol addresses, _____ others necessitate _____ domain.

_____ direct access _____ Internet Protocol _____ while _____ need _____ corresponding _____ name.

_____ websites have _____ to _____ others have to _____ a domain _____.

_____ have direct access _____ their addresses _____ provide a corresponding _____ name.

Why can _____ directly via their internet _____ have associated domain _____?

Some _____ can be _____ directly _____ their _____ others need an _____ domain.

Some _____ access _____ addresses _____ only have corresponding domain names.

Is _____ for _____ websites _____ accessed directly from their _____ addresses, _____ others require _____ associated _____?

_____ allow _____ to _____ them by typing in _____ Internet _____ while _____ only require _____ domain _____.

Why _____ websites _____ accessed directly _____ IP _____ though _____ need _____ use associated domain names.

It's _____ why certain websites have _____ internet protocol _____ use the domain.

Why are _____ IPs _____ while others _____ their _____ names also?
 _____ shed some _____ the difference between _____ using _____ internet protocol address _____ a domain _____?
 What _____ websites use their IP _____ rather than _____?
 _____ is _____ certain _____ be accessed directly _____ their Internet Protocol addresses _____ associated domains.
 _____ the reason that some _____ reachable _____ IPs _____ while others need _____ domain _____?
 Why _____ websites _____ accessed _____ IP addresses _____ if _____ domain names?
 Is _____ possible _____ understand _____ some _____ use _____ internet _____ address _____ use a _____?
 Some websites _____ reachable _____ others _____ domain name
 _____ specific _____ the _____ of _____ corresponding domain name _____ using an internet _____ alone?
 Is _____ possible for _____ websites to _____ accessed _____ via _____ while others _____ the associated _____.
 _____ a _____ some websites _____ to _____ Internet _____ addresses while others need a corresponding _____ name.
 _____ possible to _____ why some websites give access through an _____ protocol _____ on _____?
 Some _____ have direct access _____ addresses _____ others _____ to provide _____ domain _____
 Is it _____ some _____ use _____ instead of _____ proper _____ name?
 Is it _____ some _____ direct _____ addresses, while others rely solely _____?
 _____ those _____ can _____ directly _____ their ips _____ those reliant on _____ domain name?
 What _____ the _____ for _____ websites having _____ access _____ addresses _____ have to _____ a certain domain _____?
 Is it _____ for _____ to _____ accessed _____ their _____ addresses, while others require _____ domain?
 _____ websites are _____ alone, while _____ need their domain _____.
 _____ me about the differences between _____ an _____ protocol _____ a _____ for websites?
 _____ websites can be _____ Internet _____ addresses, _____ others require the associated _____.
 _____ have direct access _____ Protocol _____ while others need a _____ domain _____.
 Is _____ a _____ why _____ sites _____ access _____ IP addresses _____ others only use _____?
 What _____ why _____ use their _____ alone, _____ use a domain name?
 Is _____ to understand _____ some _____ internet protocol _____ while _____ only use _____?
 How do _____ explain that _____ websites can _____ the internet, _____ are _____ on _____ names?
 _____ access to _____ while others _____ to give _____ certain domain name.
 It _____ for certain _____ be _____ directly via _____ Internet Protocol addresses _____ others _____ associated _____.
 _____ causes some _____ to use _____ IP _____ instead _____ names?
 Can you _____ me why _____ websites _____ IP _____ for _____ others only use _____ domain _____?
 Some _____ use their IP _____ directly, _____ others use _____.
 Some websites _____ reachable _____ Internet _____ address _____ while _____ a domain _____ too.
 _____ it possible that certain _____ can _____ directly via _____ IP _____ others need to _____ associated _____?
 Is _____ that _____ websites _____ IP addresses for _____ on their corresponding domain _____?
 _____ do some websites _____ access _____ Protocol addresses _____ others need a _____ name?
 Some _____ addresses alone, while others have to _____.
 Why _____ websites require _____ use of _____ corresponding domain name _____ internet _____?
 Some websites _____ direct _____ their _____ Protocol addresses while _____ use _____ names.
 Is it possible for _____ websites to be _____ their IP addresses, _____ others need _____?
 Is it _____ to be accessed _____ their _____ protocol _____ others need the associated _____
 Is there a _____ between websites _____ can _____ via _____ addresses _____ websites that _____ to _____ name?
 _____ there a reason why _____ direct _____ IP addresses, while _____ domain names?
 _____ you _____ me about the _____ between websites _____ use _____ domain _____ and _____ use _____ addresses.
 _____ websites to _____ accessed directly _____ their internet protocol _____ while others _____ a _____ domain.
 Some websites _____ via _____ internet protocol address, _____ need _____ domain _____
 Some websites allow users to access _____ typing in _____ Internet _____ address _____ domain _____.
 Some websites use _____ directly, _____ the corresponding _____ name.
 Some websites _____ addresses _____ others _____ a domain _____ be found.
 Why _____ specific _____ via numerical IPs rather _____ associated domains?
 Some websites can be _____ via their _____ while _____ names.

_____ can websites be _____ IP addresses _____ other _____ have _____ domain names?
 _____ it _____ websites to _____ directly through their _____ protocol addresses, _____ require _____ associated domain?
 _____ do _____ have _____ access to _____ Protocol _____ while _____ need _____ corresponding domain name?
 _____ whether a _____ can _____ directly through its internet _____ using a domain _____?
 _____ websites use _____ while others need to have _____ domain _____.
 _____ some websites that have _____ access to _____ Internet _____ others need a corresponding _____.
 It's strange that _____ sites need domain _____ while _____.
 Is it feasible _____ certain websites to _____ accessed directly _____ Protocol addresses, _____ names?
 _____ possible that _____ sites _____ direct _____ addresses _____ others only _____ domain names?
 _____ some websites _____ internet protocol _____ while requiring _____ domain names?
 _____ some websites _____ use _____ Protocols and others to _____ domain _____?
 _____ me why some websites use _____ protocol, _____ a proper _____?
 Why do _____ sites allow _____ through _____ address, while others _____ allow access through _____?
 Is it possible for _____ accessed _____ their internet _____ addresses _____ require the _____ domain?
 _____ is possible _____ websites _____ directly through their internet protocol _____ need the associated _____.
 Can you explain _____ certain websites _____ only _____ their corresponding _____ names?
 _____ are _____ reasons why _____ websites _____ direct _____ to their _____ while others have _____ certain domain _____?
 _____ websites use _____ IP addresses directly, _____ for that website.
 What is _____ reason some _____ have simple _____ it via internet _____ others _____ a _____?
 It _____ possible _____ certain websites _____ accessed _____ via their Internet Protocol addresses, _____ associated _____ why some websites have direct access to _____ internet protocol addresses _____ a _____ domain _____?
 Is there _____ between _____ accessed via direct addresses and _____ that _____ to _____ domain names?
 Some _____ have _____ access to their _____ Protocol _____ while _____ need _____ domain _____.
 _____ direct _____ to _____ addresses while _____ have to provide a _____ domain _____ what is _____?
 _____ possible _____ sites enable _____ through IP _____ while others _____ exclusively _____ domains?
 _____ websites have _____ their addresses _____ other sites have _____ domain _____.
 Some websites use IP _____ directly _____ use _____.
 _____ come some _____ while others use IPs?
 _____ is the reason for _____ to _____ their addresses directly _____ a _____?
 _____ websites use _____ addresses _____ others _____ their domain names.
 Is _____ possible _____ websites to be accessed directly via their Internet _____ domains?
 Is it possible for _____ websites to _____ their _____ while _____ need associated domain _____
 _____ there a _____ some sites have direct _____ IP _____ use domain names?
 _____ is the difference _____ website reachable _____ internet protocol address _____ that _____ a domain _____?
 Some _____ direct _____ to _____ Protocol addresses, while others _____ domain _____.
 _____ possible _____ certain _____ be accessed _____ via internet _____ addresses, _____ others need associated _____ names?
 Is it _____ for websites _____ their Internet _____ addresses, _____ need associated domain names?
 _____ websites have _____ access _____ their _____ while others need _____ provide _____ domain _____.
 Some websites _____ direct access to _____ give a _____ name.
 _____ not _____ why _____ websites have direct access _____ IP _____ and others _____ on _____ domain.
 _____ websites _____ direct _____ addresses _____ others need _____ give a corresponding domain _____.
 _____ websites _____ access to their addresses _____ others have to _____ a _____.
 _____ use their addresses _____ while others need _____ register _____.
 Some websites _____ be _____ their Internet Protocol _____ others require _____ associated _____.
 _____ websites are reachable using an internet _____ a _____ name
 Is it possible _____ certain websites to _____ accessed directly via _____ internet _____ addresses, _____?
 Do _____ an explanation _____ why _____ to _____ their domain _____ and not through _____ internet protocol address?
 Is it possible for _____ websites _____ be _____ Protocol addresses, _____ require associated _____ names?
 Some websites _____ protocol _____ while others need _____ domain name

Why do _____ direct access _____ their _____ others have a corresponding domain _____?
 _____ possible _____ to be _____ directly via their internet _____ while _____ require an associated _____

Why can _____ accessed directly via their _____ others have _____ domain _____?

Is it _____ certain _____ be accessed using their Internet _____ addresses, _____ associated domain _____?

Some websites have _____ access _____ Internet _____ while others _____ the _____ names.

Some _____ access them by _____ in their Internet Protocol address and _____ require _____.

Is it _____ why _____ sites _____ protocol _____ and others _____ a domain?

_____ you explain that _____ websites can _____ through the internet _____ others _____ dependent on _____?

Some _____ access _____ an _____ protocol address, while _____ only _____ a _____

Is it _____ websites directly _____ IP addresses _____ there a _____ domain?

_____ it possible _____ to be accessed directly _____ their _____ while others need associated _____?

It is _____ clear _____ websites _____ direct _____ an internet _____ address, _____ others only _____ domain.

_____ some websites _____ direct _____ to _____ others have to _____ a certain _____?

There is _____ have _____ access to Internet _____ while others need corresponding _____ names.

Some _____ let _____ access _____ by typing in their _____ protocol _____ while _____ name.

Is _____ that _____ websites can be _____ their _____ addresses _____ others need the _____ domain _____?

Is it possible for _____ directly _____ addresses, while others need the associated _____?

_____ be _____ their _____ addresses if others need to _____ associated domain _____?

_____ those that can _____ reached directly with their _____ Protocols _____ on a particular _____?

_____ websites use _____ directly, _____ a corresponding _____ name.

_____ reason _____ some websites have direct access to their Internet Protocol _____ others need _____?

_____ distinguishes the ones _____ on _____ name from _____ can be _____ directly with their ips?

What is the reason _____ some websites have _____ access _____ while _____ need _____ a corresponding _____?

Some websites use _____ while _____ require a _____ to _____.

What _____ that _____ reached directly with _____ from the ones that need _____ specific _____?

Is it _____ to _____ why _____ internet protocol _____ others _____ on a _____?

Some websites have direct _____ to _____ addresses, while _____ need _____ domain _____.

Why _____ possible to _____ using numerical IPs not just _____ associated _____?

Some websites have _____ their _____ Protocol _____ directly, _____ need a _____ name.

Why _____ websites _____ accessed _____ their _____ addresses even _____ might _____ to use _____ domain names?

Why _____ allow access via IPs _____ of relying _____?

_____ websites have _____ access _____ their _____ need to _____ a domain name.

What _____ ones that _____ be _____ directly _____ their _____ Protocol addresses from _____ ones _____ on _____ domain name?

Is it possible _____ explain why _____ allow _____ through IP _____ while others _____ allow _____?

_____ it possible _____ certain _____ to _____ directly _____ Internet Protocol _____ others _____ associated domain names?

Is _____ to figure out why _____ protocol _____ while others _____ use a domain?

Is there _____ difference _____ websites _____ be accessed via _____ those _____ need using _____ domain name?

_____ direct _____ to their _____ websites need to _____ a _____ domain name.

_____ the reason _____ some _____ have _____ protocol addresses _____ others need a _____ domain name?

Some _____ to their internet _____ addresses while _____ corresponding domain name.

Can _____ explain _____ me why some websites _____ name?

What _____ reason _____ use their own _____ others need a _____ domain _____?

How _____ you explain that _____ sites can _____ through _____ internet, while others are _____?

_____ can _____ be _____ directly via their _____ Protocol _____ websites have associated _____ names?

Some _____ access to _____ while _____ their corresponding domain names.

Some _____ their Internet _____ other need a corresponding domain name.

_____ why _____ websites use their addresses _____ while others _____ a _____ name?

Can _____ why _____ use IP's while others _____ names?

_____ why _____ websites _____ IPs _____ of a domain name?

_____ websites have _____ access _____ their _____ provide a _____ domain _____.

Is _____ possible that _____ websites _____ be accessed _____ via _____ Protocol _____ need the _____ domain names?

How do _____ that _____ websites can be accessed _____ internet _____ are _____ on _____ names?

_____ do some websites _____ IPs _____ requiring _____ proper domain _____?

_____ possible _____ certain websites _____ IP addresses _____ access, _____ their corresponding _____ names for access?

Some _____ users to access them by _____ their Internet _____ address _____ others _____ name.

_____ it _____ why some websites allow access _____ internet _____ while others _____ rely on a _____?

Is _____ possible _____ certain _____ via their Internet _____ addresses, _____ others require associated domain _____?

_____ me about _____ difference between _____ an internet _____ address versus a _____ name _____?

Some _____ via an internet _____ address _____ others _____ a domain _____.

What causes some _____ to _____ Internet _____ of _____ domain name?

_____ have _____ to their addresses _____ others _____ to provide a _____ domain _____.

Some _____ their _____ while others need the _____ domain name _____ accessed.

What is the reason _____ websites have _____ addresses _____ others have _____ a certain _____?

_____ a reason why some websites _____ to _____ Protocol _____ others need _____ corresponding _____ names.

_____ websites _____ to their internet _____ while others _____ the corresponding domain _____.

_____ it _____ to access certain _____ Protocol addresses, while _____ need the associated _____?

Is _____ possible _____ certain websites _____ accessed _____ their Internet Protocol _____ others _____ associated _____ names.

_____ their _____ directly while others have _____ use _____ domain name.

Some websites _____ direct access _____ internet _____ addresses _____ need _____ corresponding _____ name.

_____ websites _____ users _____ access them _____ in _____ internet protocol address while _____ allow domain _____.

_____ though others _____ to use _____ names, _____ be accessed directly _____ their IP _____

_____ websites have _____ access through _____ protocol _____ while others _____ the _____.

_____ websites have _____ to _____ addresses _____ while _____ to _____ certain domain name.

Is _____ possible that some _____ allow direct _____ addresses, _____ others _____ domain _____?

_____ that certain websites can _____ accessed _____ IP _____ directly, while others _____ the _____ domain _____?

_____ reason _____ some _____ have direct access _____ their _____ while others _____ give a certain _____ is _____.

It is _____ accessed _____ Internet Protocol addresses, while other websites _____ the associated domain.

_____ is _____ why _____ websites have direct access _____ their internet Protocol addresses while _____ domain _____?

_____ websites can _____ their _____ Protocol addresses while others require _____ associated _____.

Some sites allow users to access _____ typing in their internet _____ domain _____

_____ it _____ direct _____ through IP addresses while others only _____ a _____?

Some _____ addresses _____ and others use _____ domain _____.

_____ you _____ me why some _____ instead _____ being _____ have a domain _____?

What _____ those _____ be _____ IPs from those _____ a specific domain _____?

_____ certain _____ directly via _____ IPs, not just through associated _____?

What _____ reason _____ some websites to use _____ while _____ corresponding domain name?

Some websites _____ via IPs _____ domain names.

It is unclear _____ certain websites _____ access _____ others _____ on the domain.

_____ can _____ be accessed _____ from _____ addresses even if _____ need to _____?

_____ websites have direct _____ their _____ Protocol _____ a corresponding domain name

_____ possible for certain _____ be _____ their Internet _____ address, while _____ need _____ domain names.

Some _____ accessed directly via their _____ others need to have _____ associated _____.

_____ possible _____ websites to _____ via their _____ Protocol addresses, _____ others need the associated _____

Some websites use their addresses _____ name _____ to visit.

What distinguishes _____ can be reached _____ from those reliant on _____ specific domain _____?

_____ do _____ pages _____ directly via numerical IPs _____ through associated domains?

_____ is _____ some _____ to _____ directly via their Internet _____ while _____ associated domain names.

Can you explain _____ me _____ websites use IP's while _____?

Why do _____ websites allow access via _____ on _____?

It _____ possible for _____ websites _____ accessed directly _____ their internet _____ while others _____ associated _____.

Some websites use _____ while other _____ a _____ domain _____

What distinguishes those _____ be _____ with _____ IPs from those _____ rely on a _____?

_____ reason _____ use their _____ directly _____ others need a _____ domain name?

_____ you _____ me _____ the differences _____ websites that _____ accessed _____ direct _____ and _____ that need _____ a domain _____?

_____ it possible _____ certain _____ can be accessed _____ while others require _____ associated _____ name?

_____ websites _____ direct access _____ addresses while others _____ provide a _____.

_____ have direct _____ internet protocol addresses _____ others _____ corresponding _____ names.

_____ websites have _____ to _____ addresses despite others having _____ corresponding _____ name.

_____ do specific _____ pages allow _____ through numerical IPs _____ not _____?

Some websites _____ their addresses _____ need _____ a domain _____.

Is it possible for _____ websites _____ accessed _____ via _____ Protocol addresses, while _____ associated _____ names?

Is it _____ that certain _____ IP _____ for _____ while _____ corresponding domain _____?

_____ you _____ why some websites use _____ while requiring _____ name?

_____ those _____ be reached _____ IPs _____ who can only be reached by _____ specific _____ name?

Is it possible _____ sites _____ names _____ others _____ use _____?

_____ reason certain _____ be accessed via _____ addresses directly, while _____ need _____ have associated domain _____?

It _____ not clear _____ certain _____ have direct access through _____ others _____ the domain.

Is _____ for _____ to _____ directly from _____ Internet _____ while _____ need associated domain names?

Is it _____ websites _____ be accessed directly via _____ Internet _____ others need _____ associated _____

_____ possible for certain websites _____ directly via their internet protocol _____ others _____ domain?

Can _____ the difference between websites that use their _____ and _____ that _____ address?

There is a _____ some websites have access _____ their Internet _____ corresponding _____ name.

_____ some websites _____ access directly through _____ internet while others only rely _____ domain _____?

Is _____ difference _____ that can _____ direct internet _____ and those _____ need _____ use _____ domain name.

There _____ websites that _____ direct _____ to their _____ while _____ need the corresponding _____ names.

_____ require the use _____ domain name rather than simply using _____ internet _____?

Why does _____ on _____ some permitting entry using _____ others demanding _____ URLs?

_____ it possible _____ certain _____ allow you to access them _____ insist on _____?

_____ is _____ that certain _____ directly via their Internet _____ while _____ associated domain names.

Why _____ via _____ IP addresses even _____ other _____ have _____ domain names?

_____ websites _____ accessed directly _____ their internet _____ addresses, while others _____ names.

Is it _____ for certain websites _____ be accessed _____ their Internet _____ others require _____?

_____ you _____ why some sites _____ be _____ via their _____ name _____ than through an internet _____?

_____ possible _____ understand _____ some sites use internet protocol addresses _____ domain _____?

_____ for certain websites _____ be _____ directly via their _____ addresses _____ others require _____ domain.

It's _____ for certain websites _____ be accessed directly _____ their _____ addresses, while _____ names.

_____ addresses _____ whereas others require a corresponding _____ name.

_____ between a website _____ via an _____ protocol _____ and one _____ needs _____ name?

_____ that some _____ their addresses directly while others _____ corresponding _____ name?

Can _____ websites use _____ others use domain name?

It _____ unclear _____ certain _____ have _____ through _____ address and _____ the domain.

Why do some websites allow _____ through IP _____ while _____?

Can _____ tell me the _____ between using _____ internet _____ websites _____ a corresponding domain _____?

Is _____ difference _____ a _____ reachable _____ an _____ protocol _____ and one that _____ domain name?

Some _____ use their addresses directly, _____.

_____ the _____ why _____ have direct access _____ addresses while _____ a certain domain name?

_____ websites _____ directly, while others _____ domain _____ to be accesible.

Can you _____ why _____ use _____ a proper _____ name?

I would _____ to _____ why _____ websites _____ while _____ need a _____ domain _____.

Is it possible for _____ accessed _____ their internet _____ addresses, _____ others _____ the associated _____?

_____ come _____ have direct _____ to their _____ while others need _____ corresponding domain _____?

_____ are _____ websites reachable _____ alone, while _____ a _____ name?

_____ are _____ reachable via _____ Protocols alone while others _____ their _____?

Can you _____ me _____ difference _____ an _____ protocol address _____ domain name to access _____?

_____ it possible _____ some _____ IP addresses _____ access, _____ others _____ use their _____ name?

It is _____ for certain _____ accessed _____ their _____ while others need associated _____ names.

_____ possible _____ websites _____ be _____ directly via their Internet Protocol addresses _____ require _____ names

_____ is the _____ some _____ to their addresses while others _____ provide a _____ name?

_____ it possible for certain websites to _____ accessed _____ Protocol _____ while _____ necessitate _____ associated _____?

_____ between accessing _____ using their _____ addresses _____ requiring a corresponding _____ name?

_____ is _____ reason that _____ websites _____ direct access _____ while _____ have _____ provide a certain domain _____?

_____ it _____ that certain websites can be accessed via _____ addresses _____ to _____ associated _____ names?

It _____ possible _____ be accessed _____ via their _____ Protocol addresses, _____ others _____ the _____ domain.

_____ do _____ allow direct access _____ address while _____ only _____ via _____ domain?

Is _____ websites that can _____ via direct addresses and _____ that _____ use _____ domain name?

Why do some sites _____ access through IP _____ while _____?

Is _____ for _____ website _____ be _____ its _____ protocol address or _____ using _____ domain name?

_____ you _____ me about _____ difference _____ websites using an internet protocol _____ domain _____?

_____ sites to use _____ internet _____ address rather _____ domain name?

Is _____ to discuss why _____ IP's _____ a _____ domain name.

Some _____ have _____ to _____ addresses _____ others have _____ a certain domain name _____ so.

_____ it possible _____ insist _____ domain _____ others, _____ allow you to access them by _____?

Some websites _____ direct _____ to _____ Internet Protocol _____ while _____ domain names

Why does _____ to their Internet _____ others need a corresponding _____ name?

_____ to _____ in accessibility via either _____ use _____ protocol _____ or reliance on _____ domain name?

It _____ for certain websites _____ accessed directly via their Internet Protocol _____ associated

_____ for certain _____ be accessed directly via _____ Protocol addresses, _____ domain names.

Some _____ use _____ directly, _____ others _____ a domain _____.

Some _____ permit users _____ access _____ in their Internet _____ address _____ require a _____ name

Some _____ use _____ addresses directly _____ a _____ domain _____ to access.

Some websites _____ access _____ their Internet _____ others need _____ domain _____.

Even though _____ might _____ names, websites can be accessed _____ IP addresses?

Some websites use their _____ addresses directly _____ name.

_____ websites use their addresses alone, _____ name _____ order to _____.

_____ understand why _____ allow access through an internet _____ address while _____ just rely _____ domain?

_____ tell me about _____ between _____ websites _____ an internet protocol _____ requiring a _____ name?

_____ possible _____ certain websites to be _____ directly via _____ protocol addresses, _____ others need _____.

_____ websites allow users _____ access _____ by _____ in their Internet Protocol _____ while _____ require _____.

What causes _____ sites to _____ Protocol addresses rather _____ domain _____?

_____ websites _____ reachable _____ IPs alone _____ others _____ their domain _____ as _____.

Is it _____ that certain websites _____ be _____ directly, while _____?

_____ possible that _____ can be _____ Internet Protocol addresses _____ while others need _____ associated _____ names?

_____ can websites _____ directly via theirip _____ though others _____ need _____ domain names?

Is _____ possible that some _____ insist _____ for _____ but let you _____ IP?

_____ is the _____ why _____ websites _____ direct access to their _____ while others _____ names?

Why are specific web _____ connect with _____ IPs _____ through _____?

____ can websites be accessed ____ via ____ even though others ____ need ____ associated _____.
 ____ there a ____ why some ____ rather ____ proper domain name?
 Why ____ some ____ IPs alone ____ others ____ their ____ names?
 Some ____ use their addresses ____ some require ____ name _____.
 Some ____ can route by Internet Protocol directly, but ____ insist _____.
 Can you give an ____ why some ____ to be ____ their domain name ____ than ____ protocol ____?
 ____ some websites ____ direct access to ____ Internet Protocol ____ a ____ name.
 Is it ____ certain websites ____ accessed ____ their ____ Protocol addresses, while others ____ associated _____.
 Can ____ explain the ____ websites that ____ their domain name ____ that ____ addresses?
 ____ to ____ why some sites use internet ____ while others ____ domain?
 ____ is it about specific ____ that ____ directly via numerical ____ associated domain?
 ____ sites let ____ them by ____ in their ____ address ____ require ____ domain name.
 It's possible for ____ websites to ____ accessed directly ____ their ____ Protocol ____ require ____ domain.
 ____ it ____ that ____ acceptip addresses ____ access, ____ rely on ____ corresponding domain _____.
 Is it ____ some ____ enable direct access ____ addresses, ____ others ____ on ____?
 There is ____ reason for some websites to ____ access ____ their addresses ____ have to _____.
 ____ are ____ an internet ____ need a domain name.
 Some websites have ____ access through ____ address, ____ the domain.
 ____ does ____ vary ____ some permitting entry using ____ but ____ demanding ____ URLs?
 ____ possible ____ certain websites ____ accessed ____ via their IP ____ while others ____ domain names?
 It ____ to ____ why some ____ allow access ____ an internet ____ only rely ____ a domain.
 It ____ possible ____ certain websites ____ be ____ from ____ internet ____ addresses, while others ____ associated _____.
 ____ is possible for certain ____ to ____ via ____ internet ____ addresses ____ others need the _____.
 ____ are the ____ some websites use ____ addresses ____ others ____ domain name?
 ____ some websites to ____ addresses ____ of domain names?
 How do you explain that ____ websites can ____ directly through the internet and ____ accessed _____.
 ____?
 ____ causes some sites ____ use ____ rather than ____ domain ____?
 Can you tell me ____ websites ____ whilequiring ____ name?
 How ____ you ____ that some websites ____ through ____ internet ____ others ____ rely ____ domain names?
 ____ websites ____ users ____ access them by ____ in ____ Internet Protocol ____ while ____ require ____ domain _____.
 What ____ does ____ make ____ some ____ reachable ____ while others ____ a domain name?
 It is ____ certain ____ to be accessed directly ____ Protocol ____ while ____ need ____ domain _____.
 What distinguishes ____ who can ____ from ____ who depend ____ a specific domain name?
 Is it possible ____ websites to be ____ via their internet ____ others require _____.
 It is ____ clear why ____ websites ____ direct ____ address.
 What ____ some websites ____ simple ____ it via Internet ____ others have domain ____?
 What is the ____ some ____ have ____ to ____ while others have ____?
 ____ differentiates the ____ a specific domain ____ from ____ ones that ____ directly with their ____?
 ____ that ____ some ____ use their ____ while others need a corresponding _____.
 It is possible for certain ____ to be ____ directly via their Internet ____ associated _____.
 Why are specific ____ required ____ use ____ rather than access via ____ protocol ____?
 ____ websites can ____ directly via their ____ while ____ need the associated _____.
 ____ it possible ____ certain websites ____ access them by ____ insist ____ domain names ____ others.
 Is it possible for ____ websites ____ via ____ Internet Protocol addresses, ____ a ____ domain?
 ____ like ____ know why ____ IP's ____ a proper domain name.
 ____ have ____ access to ____ protocol ____ others need their ____ domain names.
 ____ possible for certain websites to ____ their ____ Protocol addresses, while ____ require associated _____.
 ____ is the reason why ____ websites ____ direct access to their ____ only ____?
 ____ not ____ certain websites have direct access through ____ internet ____ and ____ only use _____.
 ____ possible ____ why ____ sites use ____ while others simply ____ a domain?

Is it _____ certain websites accept IP _____ while _____ their _____ names?

Some websites use their Internet addresses _____ the _____.

_____ have _____ their _____ whereas others have _____ domain names.

Can you _____ certain websites _____ addresses for _____ while others _____ use their corresponding _____.

_____ can be _____ their Internet _____ addresses while _____ need an _____ domain.

Some websites _____ direct access to their _____ addresses _____ to _____ the corresponding _____.

Some _____ addresses _____ while others _____ a _____ domain name.

_____ you tell me _____ websites that _____ domain name and websites _____ use a _____?

_____ is a reason why _____ websites _____ addresses _____ others have to provide _____ certain _____.

_____ is the reason why _____ websites use _____ directly _____ others use _____?

Can _____ about _____ difference _____ accessing _____ using _____ IP addresses _____ requiring a _____ name?

_____ have direct _____ to their Internet _____ need their corresponding _____ names.

Some websites _____ direct access to _____ while others need _____ corresponding _____.

Some _____ have _____ access _____ their _____ other _____ have to give _____ domain _____.

_____ sites _____ access _____ an _____ while _____ only use a domain

Why can websites _____ through _____ though _____ associated domain names?

_____ you explain _____ websites _____ access directly through the _____ while others are _____ domain _____?

It's _____ certain websites _____ be _____ directly via their _____ Protocol _____ require the _____ domain

Is _____ for certain _____ accessed via _____ Protocol _____ while others require associated _____ names

_____ websites _____ their addresses directly _____ use _____ domain _____.

_____ web pages allow you _____ connect directly _____ IPs?

There is a _____ some websites have direct access _____ internet _____ while _____ need the _____.

Is _____ possible for certain _____ be _____ their internet protocol _____ while _____ need _____ names?

Some _____ use _____ directly _____ others _____ a _____ domain name.

How do _____ websites can _____ directly _____ the _____ while _____ are _____ on domain names?

Some websites allow _____ to _____ them _____ in _____ internet Protocol _____ need a domain _____.

_____ website access, _____ distinguishes those _____ can _____ with their ips _____ those reliant _____ a specific _____?

Is _____ to understand why some websites use _____ protocol _____ others _____ use _____?

Why _____ websites _____ accessed directly via _____ addresses even if _____ to use _____ domain _____?

_____ distinguishes the _____ reliant _____ a specific domain _____ from _____ be _____ with their internet protocol _____?

_____ the _____ why certain websites use _____ a _____ domain name?

Is there a reason _____ some _____ use _____ domain _____?

What causes some _____ to _____ addresses _____ domain _____?

_____ directly via _____ addresses even if _____ use associated domain _____?

_____ possible _____ websites to _____ via _____ addresses directly, while others have to have _____ domain _____?

Is it _____ to be _____ their Internet Protocol _____ while _____ necessitate the _____ domain?

_____ do some websites have simple _____ it via Internet _____ and _____?

_____ specific web _____ possible _____ connect _____ numerical _____ not _____ associated domain?

Why _____ use _____ directly _____ others have to use a _____ domain _____?

Do _____ an explanation _____ why some websites need _____ via their domain name rather than _____?

How do you _____ can _____ directly through _____ others _____ reliant on domain names?

Do you have an _____ for _____ use IPs _____ a _____ domain _____?

_____ their addresses directly _____ others _____ a _____ domain name.

_____ have direct access _____ their _____ but other websites _____ provide _____ certain _____.

Why _____ some websites use _____ of _____ proper _____ name?

_____ is _____ certain _____ to be _____ directly _____ their _____ while _____ need an associated domain.

Is there _____ that need to use _____ domain _____ those _____ can be accessed _____ addresses?

_____ make sense _____ some _____ direct access _____ IP addresses while _____ use domain _____?

What _____ the reason _____ websites have direct access to _____ while _____ have _____ give _____?

_____ is the reason _____ websites have direct _____ their internet _____ addresses _____ need _____ domain names.
 Is it _____ certain _____ can _____ their ip _____ directly, while others require the _____ names?
 What _____ reliant on a _____ name from _____ can _____ directly _____ their Internet Protocol addresses?
 Is _____ possible _____ certain _____ be accessed directly _____ addresses, while _____ require _____ names?
 Can _____ tell _____ using an internet protocol _____ versus _____ domain name?
 _____ can _____ be _____ directly _____ addresses _____ though others _____ to _____ associated _____ names?
 It's possible _____ certain websites _____ directly _____ their Internet _____ but others _____ associated _____ names.
 Why do specific _____ need to _____ their corresponding domain _____ protocol _____ alone?
 _____ specific web pages possible _____ numerical IPs, _____ through _____ domain?
 _____ websites have direct access _____ while others _____ domain name.
 _____ websites _____ their _____ directly _____ a corresponding domain name.
 How do you _____ be accessed _____ internet, while _____ are reliant _____ domain names?
 _____ tell _____ why some _____ IP's when they need _____ name?
 _____ tell us why _____ websites _____ internet protocol's _____ a _____ domain _____?
 Do you _____ why _____ websites _____ while _____ a _____ domain name?
 _____ do _____ web pages _____ via numerical IPs, _____ just through associated _____?
 _____ websites _____ websites demand _____ fancy-pants domain name, why?
 What is the _____ of _____ as _____ only _____ with _____ names while _____ accept conventional IPs?
 _____ sites _____ users to access _____ their _____ others require a domain name
 Can you _____ websites _____ internet protocol, while _____ domain name?
 _____ can websites _____ accessed directly _____ their addresses _____ to use associated _____ names?
 It's _____ websites have _____ access through _____ address, and _____ use _____ domain.
 _____ certain websites _____ IPs rather _____ requiring a _____?
 _____ access _____ Internet Protocol addresses _____ others _____ a _____ domain name.
 _____ are certain _____ accessible _____ inputting _____ without _____ domain, _____ why is _____ different elsewhere?
 _____ reachable via an internet _____ while others need _____ a _____ name.
 Is it _____ for _____ be _____ their Internet _____ addresses while _____ have _____ domain names?
 Some websites allow _____ by _____ in their Internet Protocol _____ other require a _____.
 Can you _____ me why some _____ others only _____ their _____ domain _____.
 _____ there _____ that require using their _____ and those that can _____ accessed _____ direct _____ addresses?
 _____ some _____ directly via numerical _____ just through associated domains?
 Can _____ about why some _____ use internet protocol, _____ a _____?
 _____ causes some _____ use _____ addresses rather than _____ names?
 _____ you tell us _____ IP _____ while others only _____ their corresponding _____?
 _____ it possible for certain _____ their Internet Protocol addresses _____ need the _____ domain?
 Why _____ websites _____ Internet Protocols alone, while others _____ domain _____?
 Why _____ access _____ IPs _____ than relying on domains?
 Is there a difference between _____ that _____ accessed via _____ to use their _____ name.
 Is there a reason why some _____ use _____ corresponding _____ name?
 What causes some sites _____ use _____ domain name?
