

[Demo] NLP Dataset for Customer Service Automation

Company Type	Electricity Suppliers
Inquiry Category	Conversion from gas to electric request
Inquiry Sub-Category	Conversion eligibility criteria
Description	Customers seeking clarification on the eligibility requirements for converting their appliances or heating system from gas to electric, such as the specific requirements for their location or the age and condition of their current gas infrastructure.
Data Size	5,054 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Electricity Supplier" customer inquiry. (Purchased data will not be masked.)

____ can ____ my current ____ infrastructure ____ the requirements for ____?

____ are the requirements for ____ existing ____ infrastructure?

____ gas system suitable ____?

Does ____ infrastructure meet ____ changing?

____ wondering ____ my ____ infrastructure is eligible ____.

____ gas ____ ready ____ conversion?

How ____ I make sure my ____?

____ determine if the gas ____ is suitable ____?

____ help ____ current gas ____ for conversion.

Can ____ tell ____ if ____ gas ____ is ____ converting?

____ you ____ us how ____ gas setup meets the ____ for ____ over?

____ gas setup meet ____?

How can ____ gas setup ____ meeting conversion ____?

____ if my gas system is qualified ____.

____ my ____ infrastructure sufficient ____?

Can ____ tell us ____ to check our ____ setup ____ if ____ complies ____?

Is ____ gas ____ good ____ to ____ conversion?

Is ____ infrastructure ____ for ____?

____ my ____ infrastructure qualifies for ____ purposes.

____ can I ____ if my ____ infrastructure ____ in ____ with ____ need ____ convert?

Is ____ suitable for ____?

____ can ____ know if ____ current ____ infrastructure ____ with ____ I have ____ do ____ order to ____?

____ gas ____ sufficient ____ changing over?

____ sorry excuse of a ____ the conversion specifications.

Is ____ proof that ____ system ____ with ____ conversions?

____ I know if ____ facility meets the ____?

____ whether ____ gas ____ complies with ____ switch in fuel usage.

What ____ I ____ see ____ my ____ system ____ meet conversion ____?

_____ should we check _____ gas setup _____ it's _____ the standards?
 Can my gas _____?
 _____ know _____ my current _____ infrastructure _____ with what I need _____ do _____ convert?
 How _____ make _____ that the gas _____ complies with _____?
 Is _____ signs that _____ current gas _____ compliant _____ fuel _____?
 _____ it possible to tell _____ gas _____ requirements?
 Is _____ way _____ if _____ gas infrastructure meets _____ conversion?
 Can anyone _____ determine if or not my _____ with a _____ switch _____ usage?
 _____ there a way _____ check our existing _____ to _____ the standards?
 Is _____ possible _____ check the _____ make _____ it meets the _____?
 _____ I _____ if our current _____ me _____ a _____ in gas _____?
 I need to _____ of _____ gas infrastructure _____.
 How do I _____ my _____ is _____ be converted?
 What _____ should _____ use to assess _____ a _____ infrastructure _____
 _____ anyone tell me if _____ qualifies for _____?
 Can _____ determine _____ qualifies us _____ a _____ to gas systems?
 If the _____ complies for potential switch, _____ confirm _____?
 Is it _____ to _____ if my _____ infrastructure _____ criteria for _____?
 _____ my gas _____ conversion purposes?
 _____ I _____ if my _____ gas infrastructure _____ eligible _____ conversion?
 Does _____ infrastructure meet _____ change?
 How can _____ know _____ my _____ adequate for _____?
 _____ wonder if _____ system _____ suitable for _____.
 I _____ to know _____ my gas _____ is _____.
 _____ should I do _____ make _____ that _____ gas system _____ converted?
 _____ complies for potential _____ how _____ I affirm?
 _____ my _____ infrastructure _____ need for conversion, _____ can I _____?
 _____ I have _____ check _____ gas setup _____ conversion _____?
 _____ possible to determine whether my gas _____ meets _____ conversion?
 _____ setup _____ over, could you tell us how to check?
 Can you _____ if _____ can code for _____?
 _____ should _____ check _____ system _____ conversion standards?
 Can _____ tell if my current gas _____ conversion _____?
 _____ my setup _____ conversion _____ for _____?
 Is it possible to _____ the _____ to _____ meets the _____?
 Should we _____ our _____ to _____ if _____ matches the standards _____?
 How _____ current layout _____ us to _____ to gas systems?
 _____ my _____ gas _____ fit the _____?
 Are my _____ infrastructure _____ with _____ requirements _____ conversion?
 How would _____ if a _____ setup _____ the _____?
 _____ gas system _____ for _____?
 _____ do _____ my gas infrastructure _____ eligible for _____?
 Should _____ current _____ facility meet _____?
 Does _____ gas _____ match _____ conversion?
 _____ my _____ enough _____ for conversion?
 What _____ I do to _____ sure my _____ is _____ conversion _____?
 I'm _____ if _____ gas _____ complies _____ a potential _____ fuel _____.
 Can _____ if my current gas _____ line with what I _____ to _____ in _____?
 Is it _____ determine if the requirements _____ are _____ my gas _____?
 _____ can I find out if _____ to _____ task?

I _____ my current gas setup _____ suitable for _____.

Can _____ help _____ figure _____ or not my _____ structure _____ with a _____ switch _____ usage?

_____ I determine if our _____ for switch to _____ systems?

Is _____ safe to convert _____?

_____ gas infrastructure is _____ conversion?

Is _____ infrastructure suitable _____?

If _____ setup _____ switch, how can I tell?

How _____ the _____ setup complies with the _____?

Should _____ check the existing gas setup _____ standards?

I _____ current _____ system can _____ converted.

_____ anyone _____ if my _____ gas _____ a potential switch _____ fuel usage?

_____ I do _____ order to _____ that _____ current _____ can be _____?

_____ gas _____ ready _____ be converted?

_____ criteria _____ use _____ determining _____ of a gas _____ conversion?

How do I _____ if _____ infrastructure _____ for _____?

_____ know _____ my _____ facility is _____ to meet _____ requirements?

_____ gas infrastructure ready _____ conversion?

How do I find out _____ my _____?

_____ me determine _____ my existing _____ with _____ switch to fuel usage?

_____ need to know if _____ crap is _____ to _____.

_____ not _____ what to _____ that my _____ system can _____ converted.

How _____ I make _____ my _____ setup _____ for _____?

_____ would like _____ know if _____ setup _____ needs.

_____ know if my gas system is _____ converted.

How do _____ know _____ gas infrastructure is in _____ with what _____ convert?

_____ confirm _____ capable of code for conversion?

Is my _____ gas _____ adequate _____?

Can you _____ to check our gas _____ to see _____ it meets _____ switch _____?

What _____ to do to _____ sure my gas _____ complies _____?

_____ confirm if _____ is _____ conversion?

I _____ like to _____ should be _____ to confirm _____ current gas system _____ converted.

_____ I tell _____ our current _____ for a switch to _____?

_____ gas _____ to be converted?

Are my _____ compatible _____?

_____ to _____ if my current _____ infrastructure matches _____ requirements _____ conversion.

Does _____ existing _____ infrastructure meet the _____?

How _____ if my current gas _____ with _____ I _____ to do in _____ to convert?

_____ anyone _____ existing gas structure complies _____ potential _____ in _____ use?

_____ anyone tell me _____ my gas _____ enough to _____?

Does _____ gas _____ needs?

Can _____ decide if _____ for conversion?

_____ gas _____ the requirements _____ change?

_____ curious if my _____ gas _____ suitable _____ conversion.

_____ my existing gas _____ comply _____ requirements?

_____ criteria should _____ know the viability _____ a _____ conversion?

Does _____ infrastructure _____ required _____ conversion?

_____ good is my _____ for _____?

_____ don't know _____ is suitable for conversion.

_____ should _____ my current gas _____ can be _____?

Is _____ up _____ code _____ conversion?

How do _____ determine _____ we are qualified _____ in _____?

Can _____ tell us _____ if _____ gas setup is _____ to _____?

_____ setup to make sure it _____ with the standards for _____?

_____ there _____ to know if converting _____ gas _____ work _____ case?

I don't know how _____ if my _____ requirements for _____.

How _____ if my current _____ in _____ with _____ I have to _____ in _____ to convert?

_____ if _____ gas infrastructure is _____ with conversion?

Can I _____ gas infrastructure is _____ conversion _____?

_____ this _____ a gas set-up _____ specifications is _____ problem.

Can you _____ if my _____ to _____ for conversion?

I want to find _____ infrastructure _____ for conversion.

Can I assure _____ that _____ existing _____ with a _____?

Is it _____ to _____ the _____ fuel conversions _____ my present _____?

I _____ if _____ existing gas _____ with a _____ in fuel _____.

_____ am _____ sure _____ my _____ is qualified _____ converting.

_____ gas _____ ready _____ conversion?

_____ this gas system _____?

How _____ find _____ gas infrastructure complies _____ requirements for _____?

Can _____ tell us how _____ our current gas _____ standards _____ over?

_____ existing _____ infrastructure _____ requirements _____ conversion?

_____ my _____ meet conversion _____?

Is there _____ that shows _____ is compliant _____ fuel _____?

_____ should I _____ gas system can _____ converted?

Gas _____ is suitable _____?

_____ my _____ setup _____ the _____?

_____ my _____ infrastructure _____ what _____ need for conversion how can _____ tell?

_____ to _____ if my gas system _____ be _____.

_____ current gas _____ for conversion?

_____ if my _____ gas _____ matches requirements _____ conversion.

_____ my _____ system _____ good _____ for _____?

I _____ know _____ my _____ gas _____ is _____ conversion.

Is _____ to _____ whether my gas infrastructure _____ for _____?

_____ if my gas system meets _____ standards?

_____ anyone _____ me if _____ gas structure _____ with a _____?

Is there a _____ find _____ my _____ meet the requirements?

_____ am wondering if my _____ is in _____ with _____ have to do _____ convert.

Is _____ ready _____ conversion?

_____ should _____ to confirm that my _____ can be converted.

_____ I _____ if my _____ is in line with _____ I _____?

Does _____ the standards?

If my _____ is _____ for _____ how _____ know?

_____ I _____ my gas setup meets conversion needs?

What _____ to confirm _____ my _____ system can be converted?

_____ the _____ a _____ switch, how can I affirm?

_____ my gas infrastructure _____ enough _____?

I _____ to know _____ my _____ infrastructure _____ the requirements _____.

I _____ determine _____ gas setup is suitable for _____.

Where can I _____ out _____ gas facility meets _____?

I'm _____ my gas _____ is qualified _____.

_____ your _____ infrastructure _____ conversion?

You can confirm _____ is up to _____ for _____.

I _____ to _____ if my _____ for converting.

If my current _____ infrastructure _____ in _____ I _____ to do to convert, _____ I _____?

_____ I determine if _____ gas infrastructure _____ for conversion?

_____ if the gas _____ complies for potential _____.

Can _____ tell us how _____ our _____ setup _____ line with _____ standards?

Is the gas _____.

_____ my _____ infrastructure _____ for conversion?

I want _____ if my _____ is _____ code _____ conversion.

_____ setup _____ standards for switch _____ you tell us how _____ check?

I _____ to _____ gas infrastructure _____ line with what _____ need for _____.

_____ you _____ me _____ my _____ is _____ code for conversion?

Can _____ the requirements _____ changing?

I'm wondering _____ my _____ is up _____ conversion.

_____ do _____ have _____ to _____ sure my _____ system meets conversion _____?

How _____ current gas facility complies with _____ requirements?

Is _____ way _____ determine _____ existing gas infrastructure is _____ to _____?

Is _____ gas _____ enough to _____ for conversion?

_____ my gas _____ the _____?

I'm not sure _____ is _____ for converting.

Does _____ infrastructure _____ criteria _____ conversion?

Can you _____ my gas is _____ enough _____?

_____ shit _____ to code _____ conversion?

If _____ gas _____ matches the _____ can I tell?

Can _____ check _____ my gas setup _____ see _____ the requirements _____ are _____?

_____ there _____ way _____ see if _____ is in _____ conversion requirement?

Is _____ any indicator _____ my _____ is compliant _____?

_____ criteria should _____ to _____ a _____ infrastructure conversion is _____?

If my gas _____ conversion _____ can I _____?

_____ to meet the requirements for conversion?

_____ gas setup suitable _____?

_____ have _____ question _____ existing gas infrastructure _____ for conversion.

I don't _____ infrastructure matches requirements _____ conversion.

_____ don't _____ infrastructure is needed _____ conversion purposes.

I'm not sure _____ my _____ gas structure _____ switch _____ fuel _____.

_____ my _____ setup meet _____?

I _____ know _____ my gas _____ in line with _____ I _____

_____ want _____ gas _____ is capable of converting.

_____ I figure _____ if _____ current _____ qualifies _____ a switch _____ gas _____?

Does _____ gas _____ for changing?

Is _____ to _____ if our existing gas setup _____?

How _____ I tell _____ current _____ infrastructure is _____ to _____?

Is the gas _____?

_____ wondering _____ gas structure _____ a potential switch in _____ usage.

_____ it possible _____ my gas infrastructure _____ in line _____ need?

_____ my _____ infrastructure meet _____ for _____?

_____ there a way _____ my existing _____ infrastructure _____ requirements?

_____ don't know _____ my gas _____ necessary criteria.

Is it _____ confirm _____ current _____ facility meets _____ conversion _____?

_____ do I find out if our current _____ qualifies us _____?

Is it _____ determine _____ gas infrastructure _____ up to _____?

_____ infrastructure good enough _____ the _____?

_____ system suit a _____?

I want _____ my _____ infrastructure is _____ with _____ to do to convert.

Can you confirm _____ is able _____ code for _____?

_____ my _____ good enough _____ conversion?

_____ I know _____ gas infrastructure is suitable for _____?

I _____ wondering _____ current gas _____ is _____ for _____ conversion.

_____ to know if _____ gas _____ the _____ standards.

Can _____ find _____ if _____ current gas infrastructure _____ conversion?

_____ I _____ if my _____ infrastructure is _____ for _____?

I _____ like to know _____ the requirements for _____ are _____ by _____ my current _____.

Can anyone _____ or _____ my gas structure _____ with the switch _____?

_____ my gas _____ enough _____ the _____ for conversion?

_____ my gasILITY suitable _____?

I want _____ my existing _____ structure complies _____ a _____ switch in _____

_____ need help _____ if or not _____ structure _____ with a potential switch _____.

_____ gas _____ the _____ for conversion?

Should we check _____ existing _____ setup _____ the standards _____ switch _____?

_____ determine _____ or not my gas _____ complies with _____ switch?

_____ to _____ if the _____ setup complies _____ a _____ switch.

Does _____ gas _____ requirement to be _____?

The requirements for _____ conversions _____ be _____ my _____ setup.

_____ I make sure my gas infrastructure _____?

_____ know if _____ current gas system is _____ fuel _____?

_____ want to know _____ my _____ stuff _____ conversion.

How should I _____ the viability of _____?

_____ anyone _____ me if my _____ a switch in _____ use?

Is it _____ to check our existing gas _____ to _____?

_____ our _____ setup _____ see if _____ up to standards?

_____ should I decide _____ a gas _____ is _____?

Can you tell _____ how to _____ to _____ if _____ meets _____?

I wonder _____ the _____ infrastructure _____ for _____.

How _____ I know if my _____ gas _____ conversion?

_____ I figure out _____ infrastructure meets _____ criteria for _____?

Is _____ suitable _____ converting?

_____ I _____ if _____ infrastructure complies with _____ necessary criteria _____?

_____ my gas setup _____ needs?

Can anyone _____ out if my existing gas _____ complies _____ a potential _____?

_____ don't _____ do if my current _____ system _____ be _____.

_____ do I _____ my gas _____ for conversion?

_____ gas network _____ conversion?

_____ to know _____ gas system _____ qualified for _____.

I _____ if _____ take _____ my _____ system can be converted.

Is there any _____ tell _____ my gas _____ compliant with _____?

I _____ to _____ out _____ my current _____ matches _____ requirements _____ conversion.

How can _____ tell _____ my current gas _____ is _____ line with what _____ order to _____?

I _____ know if _____ existing _____ structure _____ switch in fuel use.

_____ don't know _____ to _____ sure my gas system can _____.

Is it _____ determine _____ or not converting from _____ work _____?

_____ if _____ gas set-up fits _____ is _____ to _____ about.

_____ should I determine _____ gas infrastructureConversion?

Can _____ me _____ my _____ gas _____ complies with _____ conversions?

Will _____ gas _____ be _____ for _____?

I wonder _____ my _____ gas setup _____ suitable _____.

How _____ I _____ current _____ infrastructure _____ adequate for conversion?

_____ know if _____ for a _____ in gas systems?

Does my gas _____ change?

Are my _____ infrastructure _____ conversion _____?

Is my _____ for _____?

_____ gas _____ meet requirements?

_____ do I know if _____ facility _____ line _____ conversion _____?

Is there _____ way to _____ my gas _____ is _____?

I _____ like _____ affirm if the existing gas _____ with _____.

_____ sure if _____ gas system _____ good enough _____.

_____ there _____ way to see _____ my _____ infrastructure _____ to _____?

_____ do I _____ out if our _____ layout _____ a switch _____ systems?

I don't know _____ system is _____ for _____.

Does my _____ match requirements _____?

I _____ know _____ to _____ if my _____ is in line with _____ I _____ do to _____.

Is my gas infrastructure _____ enough _____ for _____?

I am wondering _____ figure _____ whether or _____ converting from _____ my case.

_____ know _____ my gas _____ qualifies for conversion.

Is _____ possible _____ know whether _____ requirements for fuel _____ examining my current _____?

Is it _____ determine if _____ infrastructure meets _____ for _____?

How can I tell _____ current _____ is in _____ with _____ do?

What _____ I _____ gas _____ can be converted?

_____ I figure out _____ the _____ fuel conversions _____ met _____ my _____ gas setup?

I'm _____ if my _____ enough for conversion.

_____ system a _____ for conversion?

_____ tell us _____ our _____ gas _____ see if it meets _____ standards?

_____ don't _____ what _____ do to _____ system can be _____.

_____ appropriate for conversion?

How _____ know _____ my gas infrastructure _____ good _____ be _____?

Can someone _____ me _____ my _____ gas _____ is suitable _____?

Is _____ existing _____ for change?

_____ know _____ my current gas system _____ converted.

_____ gas _____ compatible _____ conversion?

_____ determine _____ my current gas infrastructure complies _____ conversion _____?

I _____ current gas setup _____ conversion.

_____ don't know _____ my _____ system _____ good _____ conversion.

How _____ determine if _____ gas setup _____ with _____?

_____ you know if _____ eligible for conversion?

Is _____ possible for _____ gas infrastructure _____ meet _____ for _____?

_____ infrastructure ready _____?

Does _____ meet changing _____ requirements?

Is the gas _____ conversion _____?

_____ anyone help me _____ my gas structure complies _____ change _____ use?

_____ my _____ for changing over?

_____ do I make sure my _____ facility _____ requirements?

_____ the _____ infrastructure _____ requirements for _____?
 Does _____ system _____ well for _____?
 _____ gas _____ cut it for _____?
 _____ need _____ find out _____ current _____ is suitable for _____.
 Is my _____ fit _____ conversion?
 Can _____ tell _____ my _____ system _____ qualified to _____?
 Is it _____ my gas _____?
 _____ a _____ to _____ if my gas infrastructure is up _____?
 _____ our _____ gas _____ see if it meets _____ standards _____ switch?
 _____ criteria _____ I _____ determine _____ viability _____ a gas infrastructure _____?
 _____ my gas _____ be _____ conversion?
 Can I _____ the _____ for _____ conversions are met by _____ at _____?
 _____ I use _____ if a gas _____ is possible?
 _____ know _____ be taken to confirm that my current _____ be converted.
 Can I _____ my gas infrastructure meets the _____?
 _____ infrastructure _____ the _____ criteria for conversion?
 _____ possible _____ determine if my _____ gas infrastructure _____ up _____ the _____?
 If my _____ setup meets _____ needs _____ it?
 _____ is _____ best way _____ confirm _____ current gas system _____ converted?
 _____ the _____ gas infrastructure meet the _____ over?
 _____ do _____ if _____ existing gas _____ is eligible for _____?
 _____ my _____ infrastructure _____ suitable for _____?
 _____ setup meet _____ requirements?
 Is it possible _____ check our _____ setup to see _____ switch _____?
 _____ am wondering if _____ gas setup _____ suitable _____.
 _____ don't know _____ take to _____ that my _____ can be _____.
 _____ there _____ way _____ viability of a gas _____ conversion?
 _____ the requirements _____ met by examining my present _____?
 _____ should I _____ out _____ my _____ system _____ with _____ standards?
 _____ I _____ if the current _____ us _____ a switch _____ systems?
 _____ it _____ convert my gas _____?
 How _____ I know if _____ infrastructure _____ line with _____ conversion?
 _____ it _____ determine if _____ requirements _____ conversion are met _____ examining _____ gas _____?
 _____ steps _____ take to see _____ my _____ system can _____?
 _____ should _____ if my _____ gas _____ meets _____ requirements?
 Is _____ gas _____ option _____ conversion?
 Can _____ let me _____ my gas _____ is _____ code _____ conversion?
 _____ it possible _____ check the _____ setup to _____ it _____ standards _____ over?
 Is my _____ gas _____ in line _____ things _____ need _____?
 _____ should _____ to see _____ my _____ system complies with _____?
 _____ system _____ for conversion?
 I _____ wondering _____ current gas _____ is good _____.
 Should we check _____ setup _____ see if _____ switch over?
 If my gas system _____ standards, _____ do?
 Is my _____ infrastructure capable _____ meeting _____ conversion?
 Is my _____ infrastructure _____ the _____?
 Is _____ infrastructure _____ enough _____ conversions?
 Is it possible _____ determine _____ current _____ meets _____ requirements for _____?
 Can I _____ see if my _____ conversion _____?
 Does _____ gas _____ fit _____ criteria?

____ my gas ____ compatible ____ ?
 ____ my gas ____ the standards?
 I wonder ____ can confirm ____ my ____ gas system ____ .
 I wonder what I ____ make ____ gas ____ can ____ converted.
 There is a way to ____ my ____ infrastructure ____ conversion.
 Can I decide if ____ gas ____ criteria ____ conversion?
 Are my ____ for conversion?
 How can ____ know if my ____ is compatible ____ ?
 ____ be a ____ to ____ gas ____ line with conversion requirements?
 How can I ____ out ____ my ____ conversion requirements?
 ____ my gas ____ meet ____ for ____ ?
 ____ gas setup ____ rules?
 ____ how ____ check if our current gas ____ is up ____ ?
 ____ tell me if ____ system is good ____ ?
 ____ a ____ to determine ____ my existing gas infrastructure meets ____ ?
 ____ there ____ way ____ find out ____ the gas ____ in ____ with the ____ ?
 Can ____ determine whether my ____ infrastructure ____ necessary ____ ?
 ____ you confirm ____ gas ____ is up ____ code ____ conversion?
 How ____ if my ____ gas infrastructure is ____ for ____ ?
 If my ____ gas facility ____ conversion ____ do ____ verify ____ ?
 ____ do I ____ if ____ facility can meet ____ requirements?
 ____ the ____ strong enough to ____ ?
 ____ find ____ setup is up to the job?
 Is my gas ____ to meet ____ for ____ ?
 ____ you let ____ know ____ my ____ to code ____ conversion?
 Can anyone ____ me ____ existing ____ complies ____ a change in ____ ?
 Should ____ check ____ gas ____ to see if it's up ____ ?
 ____ tell ____ if my ____ gas structure complies with a potential ____ ?
 I want ____ my gas infrastructure is ____
 ____ do ____ out ____ our layout qualifies us ____ a ____ systems?
 How ____ out if my ____ meets conversion ____ ?
 Is ____ setup ____ with these ____ ?
 I want ____ gas ____ is in ____ I have ____ do to convert.
 ____ you tell us ____ to check ____ to ____ if it's ____ standards?
 ____ can ____ make sure ____ setup complies with a ____ ?
 If ____ stuff is up ____ conversion, ____ you confirm?
 ____ someone ____ me decide ____ my gas setup ____ conversion?
 ____ the gas ____ fit the criteria ____ ?
 ____ way to tell if my ____ system ____ with conversions?
 ____ my gas ____ criteria?
 Is ____ with conversion rules?
 I ____ to know ____ setup complies ____ a potential switch.
 ____ current ____ infrastructure meet the ____ conversion?
 ____ criteria should ____ use to ____ gas infrastructure conversion ____ viable?
 ____ possible to ____ if ____ infrastructure ____ requirements for conversion?
 ____ my gas ____ snuff for conversion ____ ?
 ____ a way ____ figure out ____ conversion ____ gas will ____ my ____ ?
 ____ tell ____ current gas infrastructure is suitable ____ conversion?
 Can ____ gas stuff is code ____ conversion?
 I am wondering if my ____ system ____ .

I ____ to know ____ current ____ qualifies ____ in gas systems.

Is ____ to figure ____ if converting ____ will work ____?

If the existing gas ____ complies with ____ I ____?

____ want to know if my ____ gas ____.

How ____ if ____ gas system ____ with conversion ____?

I don't ____ how to ____ our ____ layout qualifies ____ a ____ systems.

Can I determine ____ gas ____ meets ____ for ____?

If my gas ____ requirements ____ going ____ can ____ tell?

____ there a way to make sure ____ gas ____?

Is ____ gas ____ for a ____?

____ the gas setup ____ potential ____ how ____ I assure?

Do you ____ gas ____ to ____ for conversion?

____ would ____ to know ____ my gas infrastructure meets ____.

____ gas ____ be suitable ____ conversion?

____ you confirm ____ my ____ is ____ to code?

____ if ____ gas setup qualifies?

____ I ____ if my ____ infrastructure ____ with what ____ need ____ do to ____?

Will my gas ____ appropriate ____?

Does ____ comply with ____ requirements?

I ____ if my current gas infrastructure matches what ____ have ____ do ____.

____ criteria ____ I use ____ the viability of ____ infrastructure ____

____ I ____ if my ____ infrastructure ____ necessary for ____?

I ____ to ____ if ____ infrastructure can ____ converted.

____ do I ____ if my gas ____ is in ____ have to ____ in ____ convert?

Can I determine ____ not my ____ infrastructure ____ conversion ____?

____ do to know ____ gas system can meet ____?

Can anyone ____ if my ____ structure complies with ____ in ____ usage?

What ____ the steps I should ____ complies with conversion standards?

____ anyone ____ me determine if ____ gas ____ with the ____ to fuel ____?

Does my gas ____ the ____?

Can ____ infrastructure ____ the ____?

I am ____ if ____ gas system ____ for ____.

____ should ____ determine if ____ gas system meets ____?

____ criteria ____ I ____ to ____ whether or not ____ conversion is ____?

How ____ I tell ____ is in line ____ what ____ to convert?

____ help me figure out if ____ gas structure complies ____ a ____?

What criteria ____ use to determine ____ of ____ gas ____?

____ me ____ gas ____ complies with ____ switch in fuel usage?

____ my gas ____ ready to ____?

If the ____ setup complies ____ the potential switch, ____?

Does ____ gas ____ pass ____ a ____?

____ am wondering if ____ infrastructure ____ line with ____ need for conversion.

____ can I ____ out ____ setup meets the ____?

____ ready for conversion?

____ you ____ how to check our gas setup ____ see if ____?

____ I figure out ____ our ____ qualifies us to switch ____?

____ gas system good ____ converting?

Is ____ network ____ for ____?

____ my gas ____ good ____?

What ____ my ____ for conversion?

_____ don't know _____ my _____ gas _____ appropriate for _____.
 _____ make _____ my gas _____ with conversion needs?
 How _____ know if _____ is compatible with _____ need for _____?
 What _____ to make _____ system complies _____ conversion standards?
 _____ my _____ for conversion?
 _____ setup _____ for conversion?
 I _____ if _____ gas _____ is appropriate for _____.
 Is my _____ able to _____?
 _____ the _____ for conversion?
 _____ can I _____ out _____ gas infrastructure matches _____?
 _____ gas _____ for conversion?
 Is it possible _____ figure _____ whether or _____ from _____ will _____ in _____?
 _____ don't _____ if the _____ gas setup complies.
 _____ don't _____ steps to take to _____ that _____ gas system _____.
 I wonder if _____ for a _____ to _____ systems.
 _____ if _____ system is suitable for _____.
 Can _____ tell _____ how to check our _____ to make _____ up _____?
 How _____ I _____ my _____ infrastructure is compatible with _____?
 _____ it possible _____ figure out if converting _____ gas _____ work _____?
 _____ there _____ way to _____ the _____ with the requirements?
 How do I know if our _____ in _____ systems?
 Is there a _____ find _____ the gas _____ with _____ requirements?
 How can I tell _____ gas _____ line _____ I need for _____?
 _____ my gas system is suitable _____.
 Should _____ check our existing _____ to see _____ up _____ the _____?
 _____ gas setup _____ the standards for switch _____ tell _____ how to _____?
 Is _____ current gas _____ with _____ conversion?
 Can _____ tell _____ check if our gas setup _____ with _____ standards?
 Can _____ gas system _____?
 _____ determine _____ gas infrastructure complies with the _____ for _____?
 Are _____ good for _____?
 If _____ gas is _____ code for conversion, _____ confirm _____?
 How _____ determine if _____ system met conversion _____?
 _____ my gas infrastructure _____ criteria _____?
 Can I _____ converting _____ will work in _____?
 Will my _____ criteria for conversion?
 _____ can I _____ my gas infrastructure can _____?
 Is _____ system _____ conversion?
 _____ the _____ meet _____ requirement _____ conversion?
 _____ gas _____ ready for _____?
 How _____ I _____ my gas _____ complies with _____ requirements?
 _____ want to _____ gas _____ good _____ meet the requirement for conversion.
 _____ the _____ for switch over, _____ tell me how to check?
 What _____ know if _____ gas _____ is eligible _____?
 Can _____ whether or not _____ the criteria _____ conversion?
 _____ gas network good enough _____ meet the _____?
 Can _____ my gas infrastructure is _____ for _____?
 _____ there _____ to know _____ my _____ gas infrastructure _____ the requirements _____?
 _____ system _____ for conversions?
 I _____ if my _____ infrastructure is eligible _____

Can anyone _____ if my gas _____ complies _____ a _____?

_____ my _____ ready to _____?

_____ you tell _____ gas stuff _____ code for _____?

Is _____ gas _____ compatible _____ those _____?

Is _____ ready _____ conversion?

Is _____ gas infrastructure _____ over?

_____ my current gas infrastructure is in line _____ can I _____?

Is my _____ compatible to _____?

Does _____ gas _____ meet the requirements _____?

_____ want to know if my _____ for conversion.

How can I _____ if my _____ is _____ conversion _____?

_____ should _____ use _____ assess _____ of a gas _____ conversion?

_____ I _____ gas infrastructure can be _____?

_____ my _____ prepared _____ conversion?

_____ do I _____ my gas _____ suitable?

What is the best _____ make sure _____ system _____?

I _____ to know if _____ current _____ need to do in order _____.

I don't _____ how to affirm _____ the _____.

Is _____ to figure out _____ gas _____ will work _____ case?

_____ any steps I should _____ to confirm _____ gas _____ be _____?

_____ a question _____ if _____ existing _____ is _____ for conversion.

_____ anyone _____ me figure _____ if _____ existing _____ structure _____ with _____ potential _____?

_____ the _____ facility _____ conversion requirements?

_____ can I _____ my gas _____ is _____ with what _____ do _____ convert?

_____ it _____ to know if _____ gas _____ my case?

How _____ I know _____ my gas infrastructure _____ required _____?

_____ anyone tell _____ whether _____ gas structure _____ with _____ potential _____ fuel usage?

What _____ knowing _____ the gas _____ the conversion _____?

Are my _____?

_____ steps _____ take _____ sure _____ gas system complies with _____ standards?

_____ should _____ do _____ determine if my _____ system _____ conversion _____?

Can you confirm _____ is up _____ code _____?

Can you confirm _____ gas _____ conversion?

Does _____ meet requirements?

I _____ to _____ if _____ setup _____ conversion needs.

What about knowing _____ set-up _____ conversion _____?

Is _____ possible _____ ascertain whether _____ for _____ conversions are _____ by examining _____ present _____?

_____ my _____ infrastructure qualify _____ conversion?

Can anyone help _____ or _____ my gas structure _____ with a switch _____?

Will _____ confirm if _____ gas _____ is _____ code?

_____ gas infrastructure _____ eligible _____ conversion, how _____ I _____ out?

_____ any _____ gas _____ is compliant with conversions?

Is there any _____ see if the _____ compatible with _____?

Does _____ gas _____ criteria _____ conversion?

Can _____ tell me whether or _____ complies with _____ switch?

I'm wondering _____ my _____ setup _____ be _____.

Is _____ possible to _____ whether _____ is _____ for conversion _____?

Criteria _____ to _____ the _____ of a _____ infrastructure conversion?

What steps _____ take _____ my _____ system meets _____?

I'd like to _____ structure _____ with _____ potential _____ fuel usage.

_____ if my gas _____ code _____ conversion?

_____ gas infrastructure is in _____ with _____ I _____?

Should we _____ our existing _____ if it complies _____ the standards _____?

I wonder if _____ requirements for fuel _____ are _____ gas _____.

_____ the gas _____ requirements?

_____ I _____ verify _____ my current gas system _____ be _____?

Is it _____ to determine _____ my _____ infrastructure complies _____?

I _____ determining _____ my _____ complies with a _____ in fuel _____.

_____ like to know if _____ facility _____ conversion _____.

If the existing _____ setup complies _____ potential _____ can _____?

_____ a _____ to know _____ existing gas _____ up to _____ task?

Can _____ tell _____ if _____ system _____ good enough for _____?

Is _____ possible to assess the _____ examining my _____ gas _____?

_____ the _____ grid ready _____?

_____ I look _____ to _____ if the _____ for fuel _____ are met?

_____ want to _____ my _____ in line with what I _____ do in _____ to convert.

_____ my present gas _____ allow _____ to _____ whether _____ requirements for _____ are _____?

_____ like to _____ if _____ is suitable for conversion.

How _____ if _____ gas infrastructure complies with _____ requirements?

_____ know if my gas infrastructure is _____?

What _____ be done to make sure _____ is in _____?

I _____ my gas _____ is suitable _____.

_____ way to find _____ gas _____ matches the requirements for _____?

Can you _____ me _____ stuff is _____ to _____ for _____?

I don't _____ if _____ be converted.

I am _____ current _____ can be converted.

Is _____ gas system _____?

I _____ if my _____ is good _____ for conversion.

_____ my _____ gas infrastructure meet _____ over?

I _____ to _____ my _____ infrastructure meets _____ for _____.

_____ my current gas infrastructure _____ line with _____ need _____?

Is there a _____ to _____ if _____ will work _____ my _____?

_____ can _____ find out if _____ gas _____ is _____ for _____?

Does _____ existing gas _____ for _____?

_____ a way to _____ if _____ complies with _____ requirements?

_____ I _____ out _____ my gas _____ complies _____ requirements?

What _____ I _____ to _____ my _____ can be changed?

_____ I _____ if _____ gas _____ has the _____ for conversion?

Is _____ a _____ to affirm _____ the gas _____ switch?

_____ like to _____ if _____ existing _____ structure complies _____ a potential _____ usage.

_____ gas infrastructure appropriate _____?

_____ know if my gas _____ for conversion.

Can anyone help me _____ if my _____ gas _____ with _____ fuel _____?

How do _____ if my _____ be converted?

I _____ the requirements for _____ conversions _____ met by examining _____ setup.

What can _____ say about _____ setup _____ complies _____ a potential _____?

Does _____ my _____ gas structure complies _____ potential _____ in _____ usage?

I'm wondering if my _____ structure _____ with a _____ usage

Does my gas infrastructure fit _____?

_____ there _____ to see if _____ is compatible with _____?

Can _____ me _____ my _____ gas system qualifies _____?

I _____ my gas _____ the requirements for _____.

I _____ know if _____ infrastructure can _____.

_____ gas infrastructure suitable _____?

How should I _____ the viability of _____?

_____ determine whether _____ not my existing _____ structure _____ with a switch _____ fuel _____?

How _____ I _____ if _____ gas _____ be converted?

_____ my gas system _____ conversion standards, _____ I do _____?

Can someone tell me _____ is _____ for _____?

Can _____ out _____ gas _____ complies with a potential switch to _____?

How _____ out if _____ current _____ us to switch to _____?

Is there _____ way _____ figure out if _____ infrastructure _____ conversion?

Where _____ find out if my _____ is in line _____ I have _____ do _____?

_____ if _____ existing gas _____ with a potential switch _____ fuel usage?

_____ it _____ determine _____ for fuel conversions _____ inspecting my _____ setup?

Are _____ signs _____ system _____ with fuel conversions?

_____ I _____ if my gas infrastructure _____ line _____ what _____ to _____ in order _____ convert?

_____ confirm _____ gas stuff _____ good enough _____ conversion?

_____ current gas _____ for conversion?

Is my _____ compatible _____ standards?

I _____ know if there are _____ that show _____ gas _____ with _____ conversions.

Is my gas _____ enough _____?

_____ gas _____ fit the _____?

Is my gas _____ enough to _____?

_____ the gas infrastructure _____?

_____ to ascertain _____ fuel conversions by examining my current _____?

Can _____ tell _____ how _____ setup to see _____ we meet the _____?

Do I _____ of _____ if gas conversion _____ my case?

_____ someone _____ determine _____ my gas setup _____ suitable _____ conversion?

_____ anyone know if _____ structure _____ for a _____ in _____ usage?

What criteria _____ I use _____ of a _____ infrastructure _____?

My _____ infrastructure _____ be _____ conversion.

_____ current gas setup suitable _____?

Can anyone help _____ if my existing gas structure complies _____ usage?

Is it _____ whether the _____ for _____ are met by looking _____ gas setup?

I want _____ know _____ my _____ infrastructure is compatible _____ I need _____ do _____ convert.

_____ gas _____ ready _____ changing?

_____ am _____ if _____ current gas _____ is suitable _____.

I _____ to _____ my _____ setup is appropriate for _____.

_____ my gas system _____?

_____ enough _____ meet the requirement for conversion?

Can _____ confirm if _____ gas _____ conversion requirements?

Can _____ tell me _____ my gas _____ of _____?

_____ don't _____ if my existing _____ qualified _____ conversion.

_____ anyone _____ me _____ gas structure _____ with a _____ fuel switch?

_____ should I _____ to make sure _____ gas _____ can _____ converted?

_____ we _____ to see if _____ meets the standards _____ changing _____?

Do conversion _____ apply to _____?

Can _____ determine _____ my gas infrastructure _____ necessary _____ for conversion?

Can _____ out whether _____ will work in _____ case?

Do I _____ a way _____ determining if _____ work _____ case?
 _____ my _____ infrastructure _____ requirement to be _____?

Can _____ if _____ infrastructure matches _____ requirements for _____?

I _____ what I _____ to _____ confirm _____ current _____ system can _____.

_____ a way to determine _____ from _____ work in _____ case?

How _____ my gas infrastructure is _____ with _____?

Can _____ tell _____ my current gas _____ in _____ with _____ I _____ to convert?

How _____ I _____ out if _____ gas _____ can _____ requirements for _____?

_____ should I use _____ the viability of _____ conversion?

_____ gas _____ conversion standards?

If _____ current _____ infrastructure is _____ with what _____ to do _____ convert, _____ I tell?
 _____ can I determine if my _____ complies _____?

Should my _____ gas infrastructure match _____?

_____ gas setup meet _____ conversion?

Does my gas infrastructure _____ meet _____ criteria _____?

_____ system good _____ converting?

_____ to know how _____ confirm that _____ current _____ system _____ converted.

_____ I be _____ to _____ the requirements for _____ conversions _____ by _____ current gas setup?
 _____ complies with _____ switch, how can _____ affirm it?
 _____ the _____ complies _____ a _____ switch, how _____ I confirm?

Is _____ gas _____ with _____?

How do _____ know _____ my _____ gas _____ requirements _____ conversion?

How do _____ out _____ current _____ qualifies us for switch _____?

How _____ tell _____ my _____ is compliant _____ fuel conversions?

Is there a way _____ gas conversion will work in _____?

Can anyone _____ me _____ not my _____ structure complies _____ switch in _____ usage?

Is it _____ to _____ gas _____ for _____ needs?
 _____ need to know _____ system is _____ for _____.

Can _____ requirements for fuel conversions _____ my gas setup?

How _____ I say _____ gas _____ with the _____?

_____ it _____ my gas setup _____ conversion needs?

_____ would like to _____ if _____ are _____ that my current _____ compliant _____ fuel conversions.

_____ my _____ gas _____ is suitable _____ can someone _____?

Is _____ possible to know whether _____ requirements _____ fuel conversions _____ met _____ at _____?

Should my _____ be sufficient _____ requirement for _____?

_____ my gas _____ evaluated _____ see if it _____ standards?
 _____ gas _____ fit _____ requirements?

_____ I figure _____ if converting from _____ will _____?

Is my _____ compatible with _____?

Is _____ to determine whether _____ gas infrastructure _____ conversion?

Will _____ infrastructure _____ conversion?

I want to know _____ gas infrastructure _____.

_____ there _____ way to determine _____ the _____ is _____ conversion _____?

Should my _____ criteria _____ conversion?

Does _____ is good enough to convert?

_____ my _____ gas setup compatible _____?

_____ my gas _____ the criteria _____?

Is _____ for my _____ system _____ meet conversion _____?

How do _____ know _____ current gas infrastructure _____ for _____?

I need to _____ if my _____ conversion.

I don't know ____ my gas ____ eligible ____

I want to know ____ my ____ for conversion.

____ like to ____ if my ____ setup is ____ conversion.

____ would ____ my current ____ is in ____ with what I have to ____ convert?

____ there ____ should ____ confirm that my current gas system can ____?

How can ____ if my ____ is compatible ____ requirements?

What ____ my gas system ____ conversion standards?

____ you tell us ____ to check our ____ setup ____ complies ____ standards?

____ I find ____ my gas ____ meets the ____?

____ anyone tell ____ my gas structure complies with the ____?

____ to know ____ my current ____ is ____ what I need ____ conversion.

____ to know ____ my ____ infrastructure meets requirements ____ conversion.

Is ____ indication ____ my current gas system ____ compliant ____?

I want ____ know ____ the necessary ____ for conversion.

How can ____ know if ____ conversion needs?

Is my ____ infrastructure ____ to ____?

Can I ____ if the ____ is in ____ have to ____ convert?

____ you tell ____ if my ____ ready ____ code?

How ____ I ____ if ____ infrastructure is up to ____?

____ the gas ____ the ____?

____ take ____ steps to ____ my current ____ system can be ____?

Does my ____ suit ____?

Are ____ good ____ to ____ the requirement ____ conversion?

____ criteria should I ____ whether or ____ gas infrastructure ____ is ____?

What can I ____ know ____ gas infrastructure ____ the ____?

____ possible ____ determine ____ gas infrastructure complies with ____ requirements?

Is there ____ determine if ____ infrastructure ____ the ____ for conversion?

____ have a way to ____ converting ____ will work?

Will ____ gas ____ requirements ____ conversion?

I want ____ of a gas ____ conversion.

How do ____ know ____ our ____ layout qualifies for a ____?

____ a way ____ determine if my ____ infrastructure is ____ for ____?

____ I ____ gas ____ meets certain ____ for conversion?

If my ____ infrastructure is ____ line ____ what ____ in order to convert ____ can I ____?

____ I ____ in line with what I need?

Is there ____ way ____ determine ____ is up to the ____?

____ anyone ____ decide ____ gas structure complies with a ____ switch in ____?

____ help ____ determine if ____ existing gas structure complies ____?

Is it ____ see if ____ requirements for fuel ____ met ____ my ____?

____ I ____ to ____ my ____ system can be converted?

Should we ____ our existing ____ to ____ it ____ standards?

____ I ____ my gas ____ meets ____ criteria ____ conversion?

____ possible to ____ that ____ existing ____ setup ____ potential switch?

How ____ determine ____ of the ____ infrastructure conversion?

I ____ like to know ____ current gas ____ with what ____ for conversion.

____ gas ____ meet ____ requirements for ____?

I am ____ if ____ gas crap ____ to ____ conversion.

Should we check ____ our ____ to ____ if ____ standards for switch ____?

____ do ____ out if our ____ layout ____ for ____ gas systems?

Does ____ fit ____ requirements?

If my gas _____ in line with _____ for _____ can I _____?
 _____ gas _____ with what _____ have _____ do in order _____ convert?
 _____ you _____ me how to check if _____ existing _____ switch over?
 _____ use _____ evaluate a gas infrastructure conversion?
 Is _____ gas _____ for _____?
 I _____ know what to _____ to confirm _____ current _____ system _____.
 Is my gas _____ purposes?
 _____ there a _____ to _____ if the gas _____ requirements?
 _____ it possible _____ our _____ gas _____ to see _____ for switch over?
 Is it _____ determine if _____ requirements _____ fuel conversions are met _____?
 How can I _____ if _____ infrastructure _____ with _____ I have _____ to convert?
 _____ I _____ if my _____ infrastructure is appropriate _____?
 I don't _____ my _____ gas _____ a potential _____ in _____ usage.
 _____ there any _____ that my current gas _____ conversions?
 _____ want to _____ if _____ gas _____ complies _____ a potential _____.
 _____ meet the _____ for changing?
 How _____ know if my gas _____?
 _____ there any _____ current gas _____ is _____ with fuel conversions?
 _____ I _____ if _____ current gas _____ is _____ conversion?
 _____ I _____ if my _____ infrastructure matches the _____?
 _____ my _____ gas infrastructure _____ eligible for _____ I know?
 Can you _____ is up to code for _____.
 Is _____ with the standards?
 If my _____ infrastructure _____ I have to do _____ can _____ tell?
 _____ gas _____ meet the requirements?
 _____ I know _____ infrastructure matches the requirements _____ conversion?
 Should my existing _____ considered _____?
 _____ current gas _____ with conversion _____?
 _____ able to _____ whether the requirements _____ conversions _____ met _____ examining my _____ setup?
 How is _____ infrastructure ready _____?
 _____ can _____ if my gas infrastructure _____ be _____?
 _____ the requirements for _____ conversions _____ met _____ my gas _____?
 _____ the _____ setup complies _____ a potential _____ how _____ tell?
 _____ wonder if my gas _____ conversion
 _____ want _____ know whether or _____ gas _____ a _____ switch _____ fuel usage.
 How _____ determine if our _____ qualifies me _____ a _____ gas _____?
 What _____ taken to confirm that my _____ system _____?
 How do _____ know if my _____ infrastructure is _____?
 I _____ to confirm _____ my current _____ conversion _____.
 _____ infrastructure is _____ for conversion, _____ do I _____?
 If _____ is in _____ with _____ have _____ do to convert, how _____ I know?
 Is my _____ to _____?
 _____ should I check _____ my gas _____ meets _____?
 _____ would _____ if the _____ complies with potential switch.
 _____ should _____ determine _____ gas _____ meets the conversion _____?
 I _____ if _____ gas _____ can _____ necessary criteria for _____.
 Is there a way to make _____ infrastructure _____?
 _____ know what steps should be _____ that _____ gas system _____ converted.
 Can anyone _____ if _____ existing gas structure _____ with _____ switch _____ use?
 Should _____ check _____ existing gas _____ make sure it's _____ to _____ over?

_____ know _____ for fuel conversions are met _____ my present _____ setup.

Does _____ gas _____ for conversion?

I don't _____ infrastructure meets required _____ conversion.

I _____ do _____ confirm my gas system _____ be _____.

What can _____ do _____ gas _____ be converted?

How _____ I confirm _____ gas _____ can be _____?

_____ my gas _____ criteria?

What _____ I _____ in _____ to confirm that my _____ system _____?

How _____ I _____ if my _____ infrastructure is in _____ conversion?

_____ if my gas _____ good enough _____ for conversion?

_____ gas infrastructure fit the _____?

_____ don't _____ my _____ gas infrastructure is eligible _____.

_____ I determine _____ my _____ infrastructure _____ requirements for _____?

_____ my current _____ infrastructure _____ I need to _____ can I tell?

Can I _____ if _____ gas _____ meets _____ necessary criteria _____?

Can I _____ current layout qualifies _____ a switch _____ systems?

_____ would _____ my current gas infrastructure is compatible with what _____ have to _____.

_____ gas system _____ for _____?

_____ existing gas setup _____ switch, how can _____ confirm?

_____ if _____ current gas _____ can _____ converted.

Is there a _____ to _____ to par for conversion?

_____ should I do _____ my current gas _____ be _____?

Can you _____ gas _____ is _____ to code for _____?

I wonder if _____ indicators _____ show my gas system _____ compliant _____.

_____ current gas _____ be converted, what _____ should _____ take _____ confirm _____?

Can _____ be prepared for _____?

_____ if my existing gas _____ for a _____ fuel _____.

I _____ to know if _____ structure complies with _____ switch _____.

Will _____ confirm if my _____ crap _____ code _____ conversion?

Do I _____ confirm if _____ current gas facility _____?

_____ gas setup comply with _____?

_____ my gas _____ conversion?

_____ am wondering _____ current gas system _____ be _____.

_____ out if my gas _____ conversion rules?

_____ network meet the criteria _____?

_____ to know _____ my gas system can _____.

_____ I confirm _____ my _____ gas system can _____?

_____ my _____ with them?

_____ do _____ my current gas _____ is compatible _____ what _____ have to _____ to _____?

_____ would _____ know if _____ gas _____ is eligible _____ conversion.

Do _____ my _____ infrastructure _____ eligible for conversion?

Is there _____ to find _____ if my _____ meets _____ conversion?

Can anyone _____ me _____ my current gas structure _____ a _____ in _____?

Is _____ that my _____ infrastructure _____ eligible _____ conversion?

_____ wondering _____ my gas _____ is appropriate for _____.

_____ would like _____ know _____ gas infrastructure qualifies _____ purposes.

If _____ current _____ infrastructure _____ line with _____ do to convert _____ can I tell?

Does _____ my _____ gas _____ complies with a _____ to fuel _____?
