

[Demo] NLP Dataset for Customer Service Automation

Company Type	Electricity Suppliers
Inquiry Category	Renewable energy options availability
Inquiry Sub-Category	Government Incentives and Rebates
Description	Customers inquire about available government incentives, grants, or rebates for adopting renewable energy technologies, including solar panels or energy-efficient appliances, to make their transition towards sustainable energy more affordable.
Data Size	10,254 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Electricity Supplier" customer inquiry. (Purchased data will not be masked.)

_____ rebates _____ to electric water _____ instead of natural gas ones, _____ clean, _____ from _____ companies?

Does your _____ offer _____ incentives _____ homeowners to _____ from _____ gas to _____ ?

Do _____ get _____ using _____ heating systems _____ natural gas?

_____ it _____ company to _____ a monetary _____ for choosing _____ powered water _____ natural gas?

_____ possible for residential homeowners _____ receive _____ if they choose _____ water _____ instead _____ natural _____ units?

_____ residents get reimbursement if they _____ water heating _____ of _____ models?

Is _____ for homeowners _____ if they replace their natural gas _____ with electric _____ ?

_____ eligible for cost savings if _____ decided _____ all-electric water _____ ?

Is _____ possible _____ utility companies _____ clean, sustainable _____ water heaters?

Can homeowners be _____ incentives _____ natural gas to _____ ?

_____ possible for _____ get a discount _____ replace their natural gas water _____ electric _____ ?

Is it _____ to get _____ rebate _____ using _____ sustainable _____ company _____ to electric water heaters?

Is it possible _____ get _____ Rebate _____ electrical water _____ natural gas?

_____ it possible _____ people _____ from natural gas _____ heating to _____ rebates?

Is there _____ incentives _____ to _____ to _____ water heating _____ energy?

_____ there _____ incentives for people _____ gas _____ electric water heating?

_____ possible _____ utility companies _____ incentives to _____ gas to electric water boilers?

How _____ for _____ my traditional gas-powered water _____ an _____ that runs on _____ energy sources?

Is _____ possible _____ homeowners to _____ a _____ by using electric _____ natural _____ ?

_____ it _____ who switch _____ natural gas _____ water boilers _____ receive a _____ ?

_____ by clean electricity procured _____ utility companies could be eligible _____ a _____ heaters.

_____ it possible for homeowners _____ incentives to _____ their natural _____ heaters _____ ?

_____ there _____ homeowners _____ switch to electric water heaters _____ by _____ Electricity?

_____ homeowners be _____ with refunds if _____ switch _____ water _____ powered _____ energy sources _____ of _____ gas?

_____ switch to electric water heating instead of _____ could _____ .

_____ possible _____ receive refunds _____ electricity-run water _____ systems instead of _____ gas?

_____ there _____ by utility _____ eco-friendly electric water heaters _____ natural-gas-powered ones?

_____ to know _____ for transitioning from _____ gas to electric water _____ .

_____ homeowners _____ for _____ to switch to _____ heaters _____ use _____ from utility companies?
 Is it _____ get financial incentives for _____ electricity-based, _____ home _____?
 Will residents _____ refunds _____ they _____ natural-gas-run _____ units _____ efficient models?
 Is it _____ for _____ rebates _____ they switch over to _____ water _____ instead _____ gas?
 _____ there be _____ opting _____ an eco-friendly _____ heaters over a _____ one?
 _____ transitioning _____ electricity-run _____ heating systems, do individuals _____?
 If residents _____ use _____ electrical water _____ systems, _____ they _____?
 _____ any _____ for _____ for clean electricity-powered electric _____ heating over _____?
 _____ companies _____ incentives for homeowners to _____ from _____ gas to electric _____?
 Can _____ receive utility _____ if _____ switch to _____ electric water _____ uses renewable _____ sources?
 _____ there _____ incentives to switch _____ heating _____ with sustainable _____?
 Is _____ possible for _____ get incentives if _____ from _____ gas _____ water _____?
 _____ there _____ incentive offered _____ utility company for _____ electric powered _____ over _____?
 Do _____ offer incentives for homeowners _____ switch to _____?
 Would homeowners be eligible _____ cost savings _____ to run all-electric _____ heaters on _____?
 _____ it possible for people _____ switch from _____ get a subsidy?
 _____ homeowners _____ switch to electricity _____ their water heating?
 Is there _____ way for _____ give homeowners _____ switch _____ natural gas _____ water heaters?
 Is it _____ homeowners to get _____ convert from natural _____ to _____.
 _____ there any _____ homeowners to _____ gas with _____ heating?
 _____ it possible _____ homeowners _____ receive _____ they switch _____ heaters that use clean _____?
 _____ wonder _____ there _____ discounts available _____ transitioning from _____ gas _____ water _____ systems.
 Is it possible _____ to be eligible _____ their natural _____ with electric ones?
 _____ it possible _____ incentives for _____ gas _____ heating equipment _____ electric ones?
 _____ get _____ switch to _____ water heaters powered by clean energy _____ the utility companies _____ of _____?
 Is it _____ company _____ give you _____ incentive to choose _____ powered water _____ over _____ gas?
 _____ to electric _____ heaters over _____ you qualify for a _____?
 _____ to get incentives by installing utility-operated, _____ that _____ on renewable energy _____?
 Can households get _____ using _____ systems that _____ energy?
 Is there _____ for homeowners to _____ natural gas _____ electric _____?
 Is there _____ incentives for homeowners who _____ gas _____ electric _____?
 Do _____ receive _____ if they _____ from natural gas boilers _____?
 Is _____ a _____ households _____ electric _____ heating systems that use _____ energy?
 Can _____ incentives if _____ convert from _____ to _____ heating?
 Do _____ if there are any _____ for homeowners to _____ to _____ heating _____ of _____?
 Is cash _____ for homeowners _____ water heaters _____ of using _____ gas?
 _____ homeowners _____ eligible for _____ discount on _____ water _____ if they _____ electricity?
 Is _____ possible that utility companies _____ money back _____ heaters?
 If _____ electric _____ boilers _____ by _____ energy _____ utility companies, will _____ refunds?
 Would _____ eligible for rebates _____ cost _____ if they _____ to run _____?
 _____ possible _____ companies offer incentives _____ sustainable electricity-powered electric _____ heating?
 _____ choose _____ electric water _____ over natural-gas powered ones, _____ utility _____ any _____?
 _____ may _____ available for _____ traditional _____ gas-fueled _____ units with electric options.
 Is _____ possible for _____ to _____ a rebate _____ they _____ natural _____ with electric _____ eco-friendly power _____ your
 _____ I _____ water _____ from _____ to electric _____ it with renewable _____ from your _____ company, _____ I get a _____?
 How _____ I get _____ on my _____ when I switch from _____?
 _____ reimbursed if they choose _____ electrical _____ heating _____ instead of traditional _____?
 When _____ choose eco-friendly _____ water _____ over natural-gas ones, _____ offer _____?
 Is it possible _____ homeowners _____ get _____ replace their natural _____ with _____ ones?

_____ homeowners _____ from _____ gas _____ water _____ can they receive _____ ?
 Is _____ possible for _____ a _____ if they _____ utility-generated electricity _____ power _____ new electric _____ heaters?
 _____ it _____ homeowners _____ rebates if _____ utility-generated electricity to power their water heaters?
 Do you _____ incentives for _____ to switch to _____ ?
 Is _____ to get a _____ if _____ heaters over gas ones?
 Do _____ offer incentives to _____ transition _____ gas _____ electric water _____ ?
 Is it possible _____ get _____ sustainable electricity-powered _____ heating?
 _____ available _____ switch from natural gas to electric water _____ ?
 _____ it possible _____ a _____ they _____ their natural _____ water heating with electric ones?
 _____ it _____ for utility companies _____ give discounts _____ water heaters?
 Are _____ incentives _____ switch _____ natural _____ to electric water heating?
 Do utility _____ incentives _____ choose _____ electric water boilers _____ natural-gas _____ ?
 _____ possible for homeowners _____ receive _____ rebates if _____ electric water heater _____ natural _____ unit?
 Is _____ possible for homeowners _____ a rebate _____ switch over _____ electric _____ natural gas?
 _____ for homeowners _____ transition from natural gas to _____ water _____ receive _____ ?
 Can _____ replacing their natural _____ water _____ electric ones?
 _____ want to _____ to an electric _____ that _____ energy, but how can _____ get a rebate
 When _____ switch from using natural gas _____ boilers _____ heating _____ do they _____ ?
 _____ there a _____ by your _____ company if _____ the electric powered _____ heating _____ the natural gas _____ ?
 Are _____ any _____ incentives for homeowners to _____ water _____ instead _____ natural _____ ?
 Is it _____ for homeowners to _____ incentives _____ they _____ utility-operated _____ heaters _____ use renewable _____ sources _____
 _____ natural _____ ?
 _____ possible for _____ to _____ a _____ their natural gas _____ heater _____ an electric one?
 Is _____ for _____ to get _____ they switch _____ natural gas _____ water heaters?
 _____ possible _____ residential _____ to receive _____ if _____ choose _____ boilers instead of _____ gas units?
 Should _____ be _____ for _____ on _____ heaters _____ clean _____ procured _____ utility companies?
 Do utility _____ to people who _____ from _____ to _____ heaters?
 Cash incentives _____ be available _____ I _____ energy _____ instead _____ natural gas versions.
 _____ it possible to get _____ for choosing clean _____ over _____ ones?
 _____ incentive offered _____ your utility _____ choosing electric powered _____ heating _____ in
 conjunction _____ sustainable energy sources?
 Is it _____ their natural gas water heating with electric _____ ?
 _____ homeowners switch to _____ water _____ instead _____ natural _____ they _____ potentially _____ rebate.
 _____ it _____ homeowners _____ receive a discount if they replace _____ natural _____ with electric _____ ?
 Utility providers _____ choose _____ electric _____ heating _____ over natural-gas ones.
 Can _____ be _____ programs if they switch to _____ hot-water systems _____ ?
 Is _____ incentive _____ your utility company to _____ use electric _____ water heating?
 Is _____ possible _____ to _____ refund incentives _____ electricity-run water heating systems?
 Is _____ possible for _____ to get _____ rebates if they _____ over _____ gas _____ ?
 Are there any _____ for _____ natural _____ to electric _____ ?
 _____ to _____ water heaters powered _____ clean _____ from the utility _____ they _____ refunds?
 Are _____ who use electrical _____ instead of natural _____ ?
 _____ available _____ replace their natural gas-fired heating _____ electric ones?
 _____ to use sustainable, _____ electricity _____ power _____ new _____ heaters, is it possible _____ them _____ get _____
 rebates
 _____ there incentives for choosing clean _____ water _____ over _____ ?
 _____ it possible for homeowners to receive a _____ switch _____ water heater _____ ones?
 _____ homeowners to earn discounts if they replace _____ gas _____ with electric _____ ?
 Is it _____ to _____ if _____ install _____ water _____ that run _____ renewable _____ sources _____ natural gas?
 _____ homeowners _____ incentives if they install electric _____ that _____ rather _____ natural gas ones?
 _____ change _____ water _____ from _____ gas to _____ it _____ from your utility company, will _____ be eligible
 _____ a

_____ get refunds when they transition _____ to energy _____ ones?

Can _____ natural gas _____ heaters with electric ones?

_____ for homeowners to get discounts if _____ replace _____ heaters _____ ones.

What _____ are available _____ homeowners who _____ electric water _____ systems powered _____ ?

_____ homeowners switched to _____ heaters instead _____ natural _____ ones, they _____ .

Will there be any incentives _____ an _____ electric _____ a _____ gas _____ ?

Is it _____ incentives _____ electric water heaters _____ use renewable energy sources?

Is it _____ for _____ earn _____ if they _____ gas _____ Heaters _____ electric ones?

There are _____ for choosing clean _____ electric water _____ .

Is _____ homeowners would be eligible _____ electric _____ heaters powered _____ clean electricity _____ through _____ companies?

_____ possible for residents to get reimbursement if _____ eco-efficient electrical water _____ instead _____ systems?

_____ cash _____ available _____ homeowners who switch _____ heating instead _____ natural gas?

Can I _____ to _____ or given discounts _____ instead of _____ old fossil fuel-powered _____ appliance?

Monetary _____ may _____ homeowners _____ replace their _____ gas fueled heating units _____ .

Are there any incentives _____ energy for _____ water _____ ?

_____ be _____ with _____ they switch to _____ water _____ powered _____ clean _____ instead _____ using natural gas?

Would homeowners _____ discounts _____ electric water heaters if _____ powered by _____ utility companies?

Are cash refunds _____ to _____ heater instead of using _____ gas?

Is it possible _____ to get a _____ homes with electrical _____ natural gas?

Would homeowners _____ a _____ on electric _____ heaters _____ by _____ from utility companies?

If I _____ efficient electric _____ of _____ gas ones, will _____ any cash _____ available?

_____ possible _____ residents _____ a rebates if they choose _____ over _____ gas?

_____ homeowners be _____ for _____ savings and _____ they _____ all-electric _____ heating?

_____ it _____ to be _____ incentives _____ replacing their _____ gas water heating with _____ ?

Is it possible _____ for homeowners to _____ electric water heating?

_____ it possible _____ to get a _____ changing to electric _____ instead of _____ ?

Is _____ possible for _____ if they _____ utility-operated electric water _____ on renewable energy?

Utility providers might _____ residents choose eco-friendly _____ water _____ ones.

Homeowners _____ get incentives if they _____ to _____ heating.

Will _____ changing from _____ to energy- efficient models?

_____ it possible for homeowners to receive _____ clean _____ water _____ ?

_____ discounts available _____ transition _____ to electric water heating systems?

_____ it possible _____ utility companies _____ provide _____ switch _____ gas to electric _____ ?

If homeowners _____ water heating _____ of natural gas, _____ company could _____ a _____ .

_____ there a monetary incentive offered by your _____ company _____ powered _____ ?

Will _____ they switch _____ gas to electric _____ heating?

_____ incentives or discounts for _____ to switch _____ gas _____ their water heaters?

Are _____ give incentives for _____ from natural gas _____ electric for eco-friendly electricity _____ ?

_____ it possible _____ to _____ if _____ sustainable, utility-generated _____ to power their _____ heating equipment?

_____ it possible for utility _____ give incentives if residents _____ eco-friendly _____ heaters _____ ?

_____ possible _____ to get rebates if they choose _____ use electric _____ of natural _____ ?

_____ discount or compensation _____ switch to electric _____ instead _____ fossil _____ heating?

_____ possible for residential homeowners _____ a rebates _____ they choose electric _____ heating _____ to _____ units?

Is _____ homeowners who _____ from natural gas to electric _____ ?

Can _____ get reimbursements if _____ natural gas hot-water _____ to _____ ?

_____ for utility _____ give incentives _____ switch from _____ electric water heating?

Would _____ be _____ for _____ discount _____ electric _____ if they used _____ electricity?

_____ it _____ to _____ for choosing _____ electricity-powered _____ water _____ gas ones?

Are _____ homeowners who switch from natural gas _____ water _____?
 _____ possible _____ receive incentives for _____ natural gas water heater _____ electric _____?
 _____ programs are _____ homeowners who opt for _____ powered _____ clean _____ sources?
 Is it _____ homeowners could _____ if they _____ electric _____ heaters instead _____ natural gas _____.
 _____ residents _____ get _____ eco-efficient electrical water heating systems over _____ fossil-fuel based
 models?
 Those powered by clean _____ through _____ be eligible for _____ heaters.
 Is _____ possible _____ utility _____ offer _____ encourage homeowners to _____ from gas _____ electric _____ heating?
 Are there _____ switch _____ water heating from _____ gas?
 Is _____ chance of financial _____ to switch from natural _____ heating systems?
 If households switch to _____ hot-water _____ that use _____ they _____ eligible _____?
 _____ homeowners to get _____ rebates if _____ switch to _____ water heating _____ sustainable energy _____?
 _____ there _____ offered _____ the _____ company for choosing _____ powered water heaters _____ the _____ one?
 Are there _____ natural gas _____ electric water _____?
 _____ it _____ homeowners to _____ discounts if they _____ to cook _____ water?
 Is _____ any incentive for _____ to electric _____ Heaters _____ electricity?
 _____ over _____ electric _____ natural gas _____ they could receive a subsidy.
 _____ financial _____ switch from natural gas to _____ water heating?
 _____ a rebate if I change _____ water _____ from natural _____ to _____ renewable energy from your _____?
 Is _____ a Rebate on _____ electricity-powered _____ heaters?
 _____ possible for _____ to _____ incentives _____ install utility-operated, environmentally friendly electric _____ heaters that _____
 on _____ instead
 _____ know if there _____ any discounts _____ transitioning _____ natural _____ water heating systems?
 Is it _____ for _____ to get _____ incentive _____ from natural _____ heating?
 _____ possible for homeowners _____ get refunds _____ incentives _____ from gas to _____ heating?
 _____ are _____ transitioning _____ to electric water heating systems.
 Is it _____ for _____ companies _____ incentives to _____ people _____ switch from _____ electric _____ heating?
 _____ homeowners _____ over to electric water heating instead of _____ could _____.
 Would homeowners _____ for cost savings or rebates if _____ chose _____ all-electric _____ on _____?
 _____ there _____ incentives _____ I _____ to _____ electric water heaters _____ of _____ gas?
 Will _____ they replace _____ natural _____ water heaters with _____ ones?
 _____ homeowners _____ if _____ switch to electric water heaters powered by clean _____ from _____?
 When _____ choose _____ systems _____ support from _____ suppliers' _____ they get reimbursed?
 _____ it possible _____ rebate _____ my water heater _____ electric _____ renewable energy _____ your utility
 company?
 Can homeowners receive incentives by _____ electric water _____ instead of natural gas _____?
 Is there a financial reward _____ eco-friendly _____ water _____?
 Can _____ give homeowners _____ to _____ from natural gas _____ water _____?
 _____ utility companies _____ offer money back on clean, _____ water _____?
 Is _____ possible to _____ a _____ if _____ switch to _____ water _____ natural gas _____?
 Is it possible for homeowners _____ rebates when _____ switch _____ gas _____?
 _____ any _____ incentives _____ energy-efficient electric water heaters instead _____ natural gas?
 If I change _____ to an electric _____ for your company's eco-friendly _____ are _____ any _____?
 Is _____ possible _____ to receive a _____ their _____ gas _____ heater with an _____ one?
 _____ or _____ if I switch _____ electric instead _____ the old fossil _____ appliance?
 Is _____ for homeowners to _____ they _____ to _____ water _____ by green energy utilities?
 Do _____ receive refunds for using _____ heating systems _____?
 _____ homeowners _____ for a _____ if they _____ to _____ gas ones?
 _____ it _____ for _____ to get financial incentives _____ switch from _____ electric _____ systems?
 Financial _____ might be _____ households to _____ natural _____ electric _____ heating.
 _____ it possible for _____ for choosing _____ water _____ instead _____ natural gas?

Is _____ for _____ to _____ a rebates _____ adopt _____ heating _____ uses sustainable energy sources?

Will _____ refunds _____ they _____ from traditional _____ units to _____ efficient _____?

_____ homeowners _____ rewarded _____ refunds if they _____ to electric _____ heating _____ by clean _____ companies?

_____ get _____ if they _____ electric water heater _____ by clean energy, _____ of _____ natural _____?

Is _____ possible for people _____ get _____ replacing _____ heaters with _____ ones?

Those _____ procured through _____ companies _____ be _____ for _____ on electric _____ heaters.

_____ it _____ for residents _____ get _____ for _____ electrical water heating _____ natural _____?

Is _____ possible _____ who switch _____ electric water heating to receive _____?

_____ incentive offered by _____ utility company _____ choose electric powered _____ over _____ gas?

_____ it _____ that _____ companies offer rebates on _____ powered _____ water _____?

What rebate programs are _____ for homeowners who _____ to use _____ heating systems _____?

Is _____ possible for _____ to _____ gas water _____ with electric _____?

Is _____ possible for households to _____ programs _____ they _____ from natural _____ to _____ hot-water _____?

Is _____ possible _____ to receive _____ if _____ use electric _____ heaters over natural gas _____?

_____ possible _____ receive a rebates if they _____ to _____ heaters _____ of natural gas _____.

Can _____ receive reimbursement for _____ electrical water _____ traditional _____ based models?

_____ get a rebates for changing _____ traditional _____ water heater _____ an electric _____ that _____?

Are there incentives _____ homeowners _____ switch _____ gas _____ electric for _____?

_____ be eligible for _____ they switch to _____ systems?

If I switch to energy-efficient _____ heaters instead _____ I _____ cash _____?

_____ for _____ switch from _____ gas to electric _____ their water heating?

_____ you _____ electric _____ heaters powered _____ sources, you could _____ a rebates.

Do _____ get a _____ they _____ to _____ water _____ gas?

_____ possible for people to get _____ rebate if _____ electric water _____ instead _____ natural _____?

_____ to get _____ if I switch _____ water heating and power it _____ energy?

Are _____ any _____ for people to _____ electricity for _____ heating?

_____ refunds when they _____ natural gas _____ electricity-run water _____ systems?

I would like _____ know _____ there _____ any discounts for _____ to _____ heating.

_____ for homeowners _____ receive a rebate if they _____ their _____ water heaters with _____.

Would homeowners be eligible for discounts _____ water _____ if _____ were powered _____ clean _____?

_____ a _____ using clean, sustainable _____ from _____ utility company to switch _____ electric water heaters?

_____ it possible that _____ receive a _____ they _____ electric _____ heaters over natural _____?

_____ possible _____ a homeowner to receive a _____ if they _____ from _____ water heating?

Would homeowners be eligible _____ cost savings _____ they _____ all-electric _____?

Do people _____ refunds _____ to _____ water heating?

_____ I _____ a chance _____ heaters for _____ and get _____ clean _____ from the utilities?

Is _____ people _____ get _____ if they _____ their natural gas water _____ electric _____?

_____ switch to _____ heating using _____ sustainable _____ qualify for a rebate?

Are there any incentives to _____ natural _____ electric _____?

Is _____ any _____ for homeowners to _____ to _____ their water _____?

Is it possible for people to _____ for _____ water heating resources _____ of _____?

_____ discounts for _____ who _____ from gas _____ for water heating?

_____ possible for homeowners _____ from _____ gas _____ electric _____ heaters to be _____ rebates?

Is it possible for homeowners _____ rebate if _____ water heaters _____ natural _____.

_____ your _____ company willing _____ you a monetary _____ you choose _____ water _____ over natural _____?

_____ a _____ for people who _____ from natural _____ to electric _____?

_____ a _____ for residents to get a _____ for _____ heating _____ instead of natural _____?

Is it _____ for homeowners to _____ a rebate _____ they _____ utility-generated _____ power _____ water boilers?

Would homeowners _____ water heaters _____ by _____ electricity _____ through _____ companies?

_____ if they switch to electric _____ heaters using clean, sustainable utility electricity?

____ it ____ for homeowners to get a ____ for ____ water heating ____ gas?
 Are ____ discounts ____ that switch from ____ to ____ water ____?
 Will homeowners get refunds ____ switch ____ electric ____ by clean energy sources ____ using ____?
 ____ wonder if utility ____ offer incentives to ____ from ____ gas to ____.
 Will ____ eligible ____ a rebates ____ they switch ____ electric water heating ____ clean, ____?
 Is ____ for residents ____ receive ____ if ____ out their traditional propane- ____ apparatuses ____ ones?
 Is it ____ homeowners ____ company discounts or ____ they switch to an ____ water ____ renewable energy?
 ____ utilities ____ switch from natural gas ____ electric water heating?
 Is it possible for ____ to get a ____ if ____ water ____ from ____ gas ____ use ____ energy ____ your ____
 Would homeowners be eligible for cost ____ or rebates ____?
 Do ____ incentives for ____ to ____ cleaner electricity ____ their ____ heaters?
 Is there ____ available for transitioning ____ natural ____ to ____ water ____?
 Is it ____ offer ____ on clean, sustainable ____ electric water ____?
 If you ____ to ____ heating instead of ____ gas you ____ get ____ sustainable ____ your ____?
 Can anyone ____ or discounts ____ I switch ____ electric instead ____ fossil fuel-powered heating?
 Would homeowners be ____ cost ____ if ____ all-electric ____ heating on clean ____?
 Can residents get ____ choose ____ heating ____ instead ____ traditional fossil-fuel based ____?
 Is ____ possible for residents to ____ money ____ their traditional propane-burning warm-water ____ ones ____ powered
 ____ cash incentives ____ for ____ electric water ____ instead of natural ____?
 Are ____ any ____ incentives offered by ____ company ____ for ____ water heating ____ natural gas?
 ____ incentive ____ by your ____ for choosing to use ____ water ____ over natural gas?
 If homeowners ____ over to electric ____ powered ____ obtained from ____ sources, ____ could ____ a ____.
 ____ financial incentive ____ households ____ switch from natural gas ____ electric ____?
 ____ it ____ residents ____ get reimbursement ____ choosing ____ efficient electrical ____ of fossil-fuel based models?
 ____ households ____ reimbursed if ____ switch ____ gas ____ electric hot-water ____?
 Can ____ company ____ if they ____ an electric water heater that uses ____ energy?
 ____ there ____ chance that ____ will be ____ if ____ out their traditional ____ warm-water ____ with electrical ____
 Is it possible for ____ to ____ rebate for ____ to ____?
 Is ____ possible for homeowners to ____ any ____ if ____ their natural ____ with ____ ones?
 ____ companies offer ____ encourage homeowners ____ from gas ____ electric ____ heating?
 ____ it possible ____ homeowners to ____ electric ____ of using natural gas?
 Is ____ for ____ who switch ____ gas ____ heating to ____ given a rebate?
 ____ it possible ____ receive ____ they switch from natural gas ____ Heaters?
 Is ____ any ____ by your ____ encourage you to ____ powered ____ over natural gas?
 Would ____ for cost ____ or ____ if they chose ____ use all-electric ____?
 ____ offer ____ when residents choose ____ electric water heaters over ____.
 Is ____ chance of ____ homeowners who use ____ water heating?
 ____ I change my ____ heaters to ____ and ____ it with ____ company, can I ____ a ____?
 Is ____ utility ____ to ____ rebates ____ encourage people to ____ natural gas to electric ____?
 Is it possible for ____ to get ____ opting ____ electrical ____ natural ____?
 ____ any incentives ____ opting ____ clean ____ over natural gas ones?
 Is ____ for ____ companies to ____ refunds on ____ sustainable ____ heaters?
 Is it ____ for ____ to ____ a ____ they adopt electric instead of ____ water ____?
 ____ households ____ reimbursement ____ to ____ hot-water systems that ____ renewable ____?
 Is it possible ____ to ____ if ____ to ____ water heaters ____ clean electricity?
 ____ possible to ____ by using ____ electricity ____ using gas water ____?
 Would homeowners ____ eligible for incentives ____ they switched ____ electric water heaters ____?
 ____ it possible ____ to ____ incentives ____ heating systems with electric ones?

_____ companies offer incentives _____ homeowners who _____ from _____ electric _____ heating.
 Is _____ possible _____ homeowners to be _____ discounts on _____ water _____ they _____ powered _____ clean _____?
 Is it _____ to _____ incentives _____ switch from natural gas to _____ boilers?
 _____ it _____ for residents _____ get _____ they _____ eco-efficient electrical _____ systems instead _____ traditional _____ based models?
 _____ any _____ transitioning _____ gas _____ electric water heating systems that _____ power?
 _____ incentive _____ your utility company if _____ electric powered water heating over natural gas?
 _____ for _____ to get _____ if _____ use _____ instead _____ gas for water heating?
 Is it _____ for _____ to receive _____ rebate if they _____ heaters _____ by _____ electricity?
 I was _____ if there _____ available _____ gas to electric water heating _____.
 Would homeowners be _____ for _____ savings or _____ ran _____ water _____?
 _____ homeowners _____ electric water _____ powered by _____ energy _____ utility _____ will _____ receive _____?
 I _____ know if _____ incentives _____ electricity-powered electric _____ heaters _____ gas ones.
 _____ it possible for residents _____ get reimbursement _____ electrical _____ systems _____ of traditional _____ based _____?
 If homeowners switch to _____ water _____ of _____ ones, they _____ receive _____ rebates _____ utility _____.
 Is it _____ homeowners _____ a _____ they switch to electric _____ and use _____ energy _____?
 _____ residential homeowners _____ electric water _____ over _____ gas _____ they receive _____?
 _____ possible for _____ receive _____ rebates _____ they _____ their natural _____ water _____ an electric one?
 _____ may give _____ when residents _____ eco-friendly electric _____ over _____ ones.
 Is it possible to _____ change my _____ heater to electric _____ power it with _____ your _____?
 Wouldn't homeowners _____ eligible for cost savings _____ if _____ chose _____ water heaters _____ utilities?
 _____ an incentive _____ by _____ utility _____ for _____ electric powered water heaters _____?
 Is _____ possible _____ homeowners to _____ incentives _____ install electric _____ that run _____ renewable energy _____?
 _____ households be reimbursed for _____ systems _____ use _____?
 _____ rebate programs _____ who purchase electric _____ systems that _____ clean energy _____ your utility _____?
 _____ it _____ get incentives for changing from natural _____ water _____?
 If _____ change _____ boiler from natural gas to electric, _____ utility company, can _____ get a _____?
 Is _____ your utility _____ will give _____ a _____ incentive for _____ electric _____ heaters over _____ gas?
 When _____ electric water _____ alternatives over _____ powered _____ utilities offer _____?
 Is _____ companies to offer rebates on clean, _____ electric _____?
 Households _____ eligible for reimbursement _____ they _____ electric _____ systems _____ renewable energy.
 _____ homeowners _____ a _____ for replacing their natural _____ heaters _____ ones?
 Is it _____ for me to get _____ if _____ change _____ water _____ electric and _____ renewable energy _____?
 Wouldn't homeowners _____ eligible for cost savings _____ they chose to _____ water _____ clean _____?
 What rebate programs _____ available to _____ who _____ water heating systems _____?
 _____ benefits may be available _____ homeowners _____ replace _____ traditional natural _____ heating units _____.
 _____ get a _____ if they replace _____ gas _____ electric ones?
 Which _____ programs exist _____ homeowners who install _____ powered by _____ energy _____ utility company?
 _____ clean, sustainable electricity _____ company, you _____ a rebates for using _____ water heating.
 If I change _____ water heater _____ electric one for _____ company's eco-friendly _____ source, _____ incentives _____
 Is _____ possible for homeowners to get _____ if they _____ gas water heaters _____?
 _____ it possible for _____ to _____ eligible _____ savings if _____ out their traditional _____ water apparatuses _____?
 _____ it possible _____ would be _____ swapped out their traditional warm-water apparatuses _____ ones?
 _____ from power suppliers' green, _____ residents get reimbursement _____ an eco-efficient electrical _____ system
 _____ traditional fossil
 Will _____ receive _____ once _____ units to energy-efficient models?
 Can homeowners _____ utility company discounts _____ refunds _____ to _____ heater _____ renewable energy?
 Is there a _____ reward for _____ electricity-based _____ heating _____?
 Is there _____ for the switch _____ electric water heating _____?
 _____ it possible for _____ eligible for _____ on electric water heaters _____ by _____ through utility _____?

____ people get refunds ____ transition from ____ natural gas ____ water heating?
 ____ utility companies willing ____ give ____ on clean, sustainable ____ electric ____?
 ____ choose ____ water ____ natural-gas powered ones, should utility providers ____ incentives?
 ____ there a ____ for homeowners to ____ discount on ____ by clean ____?
 Is monetary ____ to homeowners who replace their traditional ____ heating ____?
 ____ residents ____ refunds when they transition ____ units to ____ efficient ____?
 ____ homeowners be ____ with refunds ____ to ____ water heater powered ____ clean ____ of using ____ alternatives?
 ____ monetary benefits ____ to ____ replace ____ natural gas-fueled ____ units with ____?
 ____ it possible for ____ to receive ____ rebates ____ they ____ electric ____ of natural gas.
 ____ possible to get ____ for choosing clean electricity-powered ____ gas?
 Is it possible for homeowners ____ to ____ water heaters ____ of natural gas ____?
 ____ homeowners choose ____ utility-generated electricity ____ power ____ new electric water heaters, ____ receive a ____?
 Is it ____ for ____ to get ____ eco-efficient electrical ____ heating system?
 ____ a rebates for using ____ sustainable ____ instead of natural gas for your ____?
 ____ it ____ to get ____ electricity-powered electric ____ heaters over ____ ones?
 ____ households ____ reimbursement ____ they ____ from natural gas-powered ____ electric ones?
 ____ it ____ to swap out ____ for electric ____ with eco-friendly ____ power?
 If I ____ to energy-efficient ____ water ____ natural ____ ones, ____ there ____ incentives?
 ____ tell me ____ there are ____ discounts available for transitioning ____ gas ____ water ____?
 Is ____ for homeowners ____ when they replace ____ natural gas water heaters ____ ones?
 Will ____ given refunds ____ they ____ electric water heaters powered ____ clean energy, ____ natural ____ alternatives?
 Monetary benefits ____ be ____ to ____ who replace ____ natural gas- ____ electric ____.
 ____ there ____ for ____ to switch to ____ for water ____?
 ____ powered ____ clean electricity ____ through utility companies could be ____ discounts ____.
 Is it possible ____ to get ____ by ____ water ____ than ____ gas?
 Is it ____ for homeowners to ____ a ____ if ____ electric water ____ by clean ____?
 Is ____ possible for homeowners to ____ a ____ if they replace ____?
 ____ homeowners get refunds ____ switch to ____ water heater ____ by clean energy from ____ gas?
 Is there a ____ gas to electric for water ____?
 ____ your ____ company ____ incentives ____ to electric ____ heating over ____ gas?
 Is it possible ____ for using electricity-run ____ instead of natural ____?
 ____ support ____ power suppliers' ____ residents get reimbursement when ____ choose an ____ heating ____?
 Can ____ be eligible for ____ programs if they ____ hot-water ____ use ____?
 Is it possible ____ switch ____ a ____ gas hot-water system ____ for ____?
 ____ transitioning from natural ____ to ____ do people receive refunds?
 If ____ switch ____ to electric water heaters instead ____ natural gas ____ eligible ____ rebates.
 Do you ____ incentives ____ electricity ____ your ____ company to ____ to electric ____ heaters?
 ____ can ____ get a rebates for changing my ____ water heater ____ electric ____ that ____ cleaner ____ companies?
 Which ____ are ____ place ____ who ____ electric water heating ____ by clean ____ sources?
 Utility providers ____ offer ____ when residents choose ____ natural-gas ones.
 ____ it ____ get ____ for opting for clean ____ water ____?
 ____ it ____ for ____ to ____ if ____ switch ____ electric water ____ instead of gas?
 Can I ____ a ____ if I ____ my water ____ natural ____ to electric and power ____ with ____ utility ____?
 ____ available to ____ from natural gas ____ electric ____ heating?
 Do ____ for homeowners to switch to ____ heating needs?
 ____ it ____ earn discounts ____ replace ____ natural gas water Heater with ____ electric one?
 ____ it possible ____ providers ____ give incentives ____ residents choose ____ electric ____ heating?
 ____ there any ____ who ____ natural gas to electric water ____?

___ monetary ___ to ___ replace their natural ___ units with ___ options?
 Green energy utilities can ___ for homeowners ___ convert ___ to electric _____.
 ___ it possible ___ to ___ rebate if ___ from natural ___ to ___ water heating?
 ___ possible ___ homeowners who switch from ___ to ___ receive a rewards?
 Incentives can ___ to homeowners who ___ natural ___ to ___ water _____.
 Is ___ homeowners ___ a rebates by ___ instead of ___ gas to ___ their water?
 ___ it ___ for homeowners to ___ discounts ___ their ___ water heaters ___ ones?
 Is ___ incentive for homeowners to switch ___ heating ___ receive clean, ___ electricity from ___ company?
 ___ it ___ for ___ receive ___ if they ___ over to ___ heaters ___ of natural ___ ones.
 ___ for homeowners to get ___ they ___ electric water Heaters ___ run ___ energy sources?
 ___ it possible ___ incentives if I ___ to ___ water ___ natural gas?
 Can ___ receive incentives by ___ water ___ that run ___ renewable _____.
 ___ to switch ___ electric water ___ systems that ___ sustainable energy?
 Is it possible ___ get ___ they choose ___ eco-efficient electrical water _____.
 Is there ___ incentive offered by your ___ powered water heater over ___ natural gas _____.
 Are ___ available to residents who ___ heating ___ instead ___ gas?
 Is ___ possible ___ to get ___ they switch to ___ water _____.
 ___ reimbursed if ___ switch to electric ___ systems ___ energy?
 ___ for homeowners ___ switch ___ electric water heating ___ sustainable power?
 ___ it ___ for ___ get ___ if ___ replace their natural ___ water ___ an electric one?
 ___ that ___ companies offer rebates ___ homeowners ___ switch from ___ gas to ___ heating?
 Incentives can be given ___ homeowners ___ switch from ___ to _____.
 ___ there an ___ for ___ electric ___ boilers over ___ gas ones?
 ___ homeowners be eligible for ___ savings if ___ water heaters on _____.
 ___ households be reimbursed if ___ gas-powered hot-water ___ electric ones that use _____.
 Will ___ refunds ___ making ___ from natural-gas-run ___ units to ___ efficient _____.
 Is ___ for me to ___ rebate if I switch my ___ from ___ gas ___ and ___ renewable energy _____.
 ___ residential homeowners choose ___ natural ___ could they ___ a rebates?
 Can residents ___ reimbursed if they ___ eco-efficient electrical ___ system instead ___ based model?
 ___ it ___ that homeowners ___ receive incentives ___ replace their ___ heaters with _____.
 ___ possible ___ to receive rebate if they ___ over to ___ heaters instead ___ natural _____.
 Do ___ refunds ___ transition ___ using natural ___ boilers to ___ water ___ systems?
 ___ for ___ to switch from ___ gas to electric water ___ systems?
 ___ it ___ for ___ a kickback if ___ switch ___ gas to electric water _____.
 Financial ___ be available for ___ switch from natural ___ electric ___ heating _____.
 If I ___ natural ___ water ___ an ___ eco-friendly ___ source, will there be any incentives
 ___ it ___ for ___ discounts if they replace ___ natural gas water ___ electric _____.
 Should ___ to ___ discounts if ___ replace their natural ___ with ___ ones?
 ___ want ___ are incentives for replacing ___ with electric ___ heating.
 ___ it ___ get a ___ if they replace their ___ water heating ___ electric ones?
 Will ___ if ___ switch ___ water heating ___ using natural gas?
