

[Demo] NLP Dataset for Customer Service Automation

Company Type	Internet Service Providers
Inquiry Category	Speed and performance inquiries
Inquiry Sub-Category	Speed test results interpretation
Description	Customers perform internet speed tests and need help interpreting the results, understanding what is considered good or optimal, and if they are getting the expected speeds based on their subscribed internet plan.
Data Size	5,016 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Internet Service Provider" customer inquiry. (Purchased data will not be masked.)

____ there other ____ besides network congestion that ____ affect ____ ____ ____ ____ ____ maximum values by ISPs?
 ____ there a ____ besides the ____ ____ ____ causes ____ throughput to ____ different from the ____ max ____?
 ____ more to ____ congestion ____ what ____ ____ ____ is it possible ____ ____ elements ____ affect ____ ____ bandwidth
 beyond what the ____ says
 Network congestion is one ____ the ____ ____ affect ____ ____ is there anything else besides that ____ ____ ____ ____ ____
 values
 Is there ____ factor besides ____ ____ ____ causes ____ throughput ____ ____ different ____ the advertised ____ values ____ the
 internet service ____?
 ____ congestion ____ one ____ the variables, ____ what effects ____ ____ ____ real ____ when ____ comes ____ internet service
 provider ____?
 Does non-congestion ____ elements ____ ____ ____ compared ____ ____ values of ____ service providers?
 ____ ____ related elements influence real speed ____ ____ ____ values?
 ____ non-congestion ____ ____ affect the transaction speed over the ____ ____ ____ maximum ____?
 ____ stated ____ values ____ ____ internet service ____ may ____ ____ by non-congestion related ____.
 When deciding ____ ____ ____ to the advertised ____ ____ factors beyond network congestion ____ ____?
 Is ____ ____ else ____ ____ real throughput and maximums ____ ____ what ____ ____ the networks?
 ____ factors ____ ____ congestion determine the ____ of ____ maximums?
 ____ there more to the ____ data ____ ____ than the network ____ and top ____ that the ____ ____ ____?
 ____ impact does network ____ ____ factors ____ the ____ have ____ real ____ ____ the advertised ____ ____ internet service
 providers?
 ____ ____ more than ____ ____ ____ affect Internet speed?
 Do ____ ____ and other factors ____ how ____ ____ ____ ____ ____ an advertised internet service provider?
 Network ____ ____ factors beyond the network ____ real ____ ____ to the advertised ____ ____ ____ service ____
 ____ ____ ____ the real data transfer ____ than ____ ____ overcrowding ____ top speeds that ____ ____ service Provider
 advertises?
 ____ congestion ____ factors beyond the network can ____ real ____ ____ ____ ____ of the ____.
 Do factors ____ network ____ ____ the ____ of ____ you ____ get from ____ advertised ____ service ____?
 ____ it true that the ____ ____ ____ ____ ____ outside of what happens on ____ ____ networks?
 ____ are variables other than ____ congestion ____ ____ true ____.
 Is ____ something else that influences ____ ____ and stated ____ other ____ ____ happens ____ ____ ____?

Network _____ one of the factors that _____ is there _____ else besides _____ related _____ advertised maximum _____ by _____

The _____ on real throughput _____ are _____ on the congested networks

Is there _____ to data transfer rate than the network _____ the internet _____?

_____ extra _____ affect actual _____ transfer _____ simple _____ congestions as advertised?

_____ congestion is _____ of the _____ throughput, but _____ there _____ else besides _____ that is related _____ maximum _____?

_____ congestion is _____ the _____ affect throughput, but is there _____ else _____ that that _____ maximum _____?

_____ the network and advertised _____ of _____ impact real throughput.

_____ congestion _____ of _____ factors that affect _____ but _____ anything _____ that is _____ the advertised _____ values?

_____ possible for _____ related elements to affect _____?

_____ it true _____ more than one element _____ to real throughput _____ to the _____ figures _____?

Is it _____ more _____ one element contributes _____ throughput, compared _____ service provider's _____?

_____ there _____ influence _____ besides congested networks _____ stated maximums by _____?

_____ it _____ beyond network congestion affect the throughput _____?

_____ congestion and _____ have an impact _____ compared to the _____ maximums _____ internet service providers.

_____ is one _____ factors that _____ is there anything else _____ to the advertised _____ of the

Is _____ real throughput and the _____ what happens on the _____ networks?

Network congestion is a _____ affects actual _____ but is _____ related to _____ maximum _____?

Is _____ true that _____ than _____ contributes _____ service _____ maximum figures?

_____ it _____ that _____ element contributes _____ real _____ a service provider's max figures?

Is _____ the real data _____ rate than network _____ top _____ the Internet Service _____?

Network _____ is one of _____ but _____ are there _____ throughput when _____ to _____ service provider _____?

_____ affected by things _____ than congestion?

In _____ to the _____ by the _____ other factors that _____ impact _____.

Is _____ more to the _____ data transfer rate than _____ and the top _____ the _____?

Is there more involved in real _____ than _____ network overcrowding _____ the _____ speeds advertised _____?

Is _____ possible _____ factors outside of _____ speed?

_____ else that _____ affect actual speed other than the _____ service _____?

Is _____ than _____ congestion that is _____ throughput from _____ advertised by the _____ service providers?

When _____ the actual throughput _____ to _____ advertised ISPs maximums, _____ congestion be taken _____?

_____ judging _____ throughput _____ to _____ advertised maximums, _____ congestion be considered?

Is _____ any outside elements that _____ the _____ and the _____ of _____ advertisements _____ the _____ service provider?

_____ judging actual _____ relative to _____ maximums by _____ internet _____ provider, factors _____ should be _____.

Beside _____ else affects _____ throughput?

_____ non-congestion related _____ affect _____ compared _____ the stated _____ values _____ the _____ provider?

Is there a _____ besides _____ congestion _____ be different _____ the advertised max values?

_____ congestion _____ factors _____ affects _____ throughput, _____ there anything _____ that is _____ the advertised maximum _____ of the ISPs

_____ there more to the _____ the top Speeds advertised by the _____ Provider?

Is _____ congestion and _____ can _____ throughput as opposed _____ advertised _____ values?

Will factors outside _____ speeds?

_____ congestion _____ of the factors _____ actual _____ but _____ there anything else that _____ to the _____ values?

_____ congestion is one _____ the _____ but what _____ there on _____ in _____ claims from _____ service _____

Is there any external elements that affect _____ bandwidth _____ network congestion, and the _____ the _____

_____ non-congestion related _____ affect the _____ speed _____ the _____ maximum value?

Is _____ true that _____ than _____ element _____ to _____ compared to _____ service provider's _____?

_____ more than _____ overcrowding and _____ speeds advertised by _____ Service _____ in _____ real data transfer _____?

What if more _____ one _____ real _____ compared _____ maximum figures _____ service _____ websites?
 _____ affect _____ compared _____ the stated maximum values for internet _____ providers?
 _____ network _____ along _____ other _____ affecting the _____ speeds by _____ service providers?
 Do network _____ other _____ the throughput of _____?
 _____ could affect _____ in comparison to the _____ maximum values _____ internet service _____.
 Network _____ and factors _____ the network _____ effect _____ real throughput _____ to the _____ maximums _____ service _____.
 _____ are other _____ may _____ real data _____ network overcrowding issues that have _____ light
 Is _____ any external element _____ the network _____ affecting the values of _____ advertisements _____ internet
 _____ provider
 When _____ throughput relative to advertised maximums, _____ be taken _____ account?
 _____ data transfer rate than network overcrowding and top _____ advertised by _____ Internet _____?
 _____ other _____ could affect actual _____ to _____ maximum values listed on the ISPs' _____.
 _____ factors outside _____ congestion affect _____?
 _____ there _____ influence on _____ other than congested _____ stated _____?
 _____ judging _____ relative to _____ advertised maximums by _____ internet service _____ factors _____ be taken into
 _____?
 When _____ advertised _____ maximums, should factors beyond network congestion _____?
 _____ non-congestion related elements _____ real speed of _____ internet?
 Can _____ factors _____ not _____ real network speeds?
 _____ non-congestion _____ affect the real _____ of _____ internet _____?
 _____ related _____ affect _____ more than _____ stated maximum _____ of _____ internet _____ providers?
 Is _____ different factor _____ the _____ throughput to be different than advertised _____ for the _____
 service _____?
 _____ non-congestion _____ elements impact _____?
 _____ factors _____ networks _____ affect _____ than what _____ internet service _____ is saying.
 _____ there _____ than _____ congestion causing _____ throughput _____ be different _____ advertised values?
 Is _____ more to _____ transfer rate than _____ overcrowding and _____ advertised _____ service provider?
 The impact of _____ congested networks _____ maximums _____ the ISPs
 There are things other _____ overcrowding that _____ real _____.
 _____ there more to the _____ the network _____ top Speed advertised _____ service providers?
 Is the throughput of _____ network congestion?
 _____ the _____ overcrowding _____ affecting the advertised high speeds _____ providers.
 _____ elements _____ an _____ the real speed _____ internet service providers?
 Do non-congestion related _____ impact _____ of _____ the speed _____ by _____ internet service providers' _____?
 When _____ the advertised maximums, should factors _____ network _____ be considered?
 _____ it possible _____ non-congestion _____ elements can influence _____?
 Is _____ other than network _____ the _____ throughput from _____ as _____ by the _____ service _____?
 Network congestion and _____ factors _____ throughput compared _____ advertised _____ ISPs.
 _____ there a factor _____ congestion that causes _____ throughput _____ be _____ the _____?
 The _____ values of _____ internet service _____ impacted by _____ elements.
 Aside _____ the _____ issues that have _____ there are other things _____ may _____ real _____ rates.
 _____ there more _____ traffic variables _____ have an _____ speed?
 Is it _____ more _____ one component _____ to _____ compared _____ the service _____ stated maximum _____?
 Do additional _____ contrary to the promises _____ the _____?
 Is there more _____ in _____ data _____ rate _____ network _____ the top Speeds advertised _____ service _____?
 _____ congestion _____ factors _____ affect _____ compared to the _____ values.
 _____ are _____ of congestion that affect _____ network _____.
 _____ there more than _____ overcrowding affecting the _____ speeds _____ service _____?
 _____ the real _____ affected by _____ other than _____?
 _____ there a _____ than network congestion that _____ the _____ to _____?
 _____ non-congestion related elements _____ the _____ internet service _____ maximum values?

Is there anything that affects real-time bandwidth _____ the network _____ the values _____ that _____?

Do _____ related _____ affect _____ speed _____ to maximum _____ of _____ service _____.

Network _____ the network affect real _____ the advertised maximums of the _____ providers.

Is it _____ more than _____ contributes to the _____ maximum _____?

_____ network congestion that causes _____ throughput to be _____ than advertised?

Is there _____ other _____ affects _____ speed _____ limits _____ internet service providers?

_____ beyond _____ affect throughput _____ maximums.

Is _____ any element _____ can affect _____ bandwidth beyond _____ network congestion, _____ the _____ internet service providers

_____ it _____ than _____ element contributes to real _____ to internet _____ Provider's maximum _____?

_____ to what _____ internet _____ claims, other factors can _____ actual _____

_____ congestion is _____ factor that _____ throughput, _____ anything else besides _____ that _____ to advertised maximum _____?

Do factors _____ crowded lines cause _____ downloads than the _____?

Network _____ is one of the _____ throughput, _____ anything _____ to the advertised _____ values _____ ISPs?

Network congestion is _____ effects _____ throughput in _____ to internet service _____ claims?

It _____ claimed that more than _____ contributes _____ real throughput _____ figures _____ service providers' _____.

_____ maximum values _____ Internet _____ may be affected _____ non-congestion related _____.

_____ anything _____ the throughput _____ as _____ by _____ internet service providers?

_____ any _____ factors _____ bandwidth _____ the network congestion, _____ values of _____ advertisements _____ the internet service provider

_____ the actual throughput _____ advertised _____ should factors beyond network _____ considered?

Is _____ to the _____ transfer _____ the network overcrowding and top speeds _____ the _____ service _____?

Do _____ congestion _____ factors beyond _____ affect _____ throughput of _____?

_____ judging _____ throughput relative _____ maximums, _____ things _____ network congestion _____ into account?

Do _____ variables _____ actual _____ transfer _____ from network congestions, _____ issue _____ speeds _____?

_____ factors _____ congestion _____ throughput from _____ advertised internet _____?

_____ influenced _____ other factors _____ congested _____ and stated maximums _____ ISPs?

There _____ things that can _____ aside _____ network _____.

_____ related elements _____ real _____?

_____ non-congestion _____ impact real _____ on _____ internet?

_____ there _____ beyond _____ congestion _____ affects how _____ you can get?

_____ network _____ can _____ optimal throughput?

Is there _____ besides _____ the _____ be less than advertised?

_____ congestion _____ not _____ only factor _____ actual _____ versus advertised values.

Is it possible for _____ factors _____ an effect _____ the transfer _____ when _____?

_____ is _____ factor that affects throughput, but is _____ that is related to _____ advertised _____?

Do _____ other factors _____ of advertised maximums?

_____ something else besides _____ congestion _____ the _____ throughput to _____ different than _____?

Network congestion _____ that affect _____ is there _____ else besides _____ which is related to the advertised _____

_____ service _____ values, but did _____ related elements affect _____ speed?

_____ advertised maximums may _____ affected by _____ the _____ congestion.

Do _____ non-congestion _____ elements _____ speed _____ to the _____ of the _____ providers?

Do _____ affect real _____ compared _____ of _____ internet service providers?

Can _____ other _____ congestion affect my _____ advertised speeds?

There can be _____ of _____ affect _____ speed.

Is _____ more to data _____ than _____ overcrowding _____ the _____ advertised by _____ Service Provider?

Other _____ are some _____ that _____ optimal throughput.

Network congestion is one of the _____ affects _____ there anything _____ besides _____ is _____ maximum values?

_____ it _____ that _____ than one _____ contributes _____ real throughput _____ to _____ providers _____ figures?

Is there more involved _____ the _____ data _____ rate than the _____ advertised by _____ internet _____?

Are _____ factors that _____ throughput _____ networks and _____ maximums?

_____ non-congestion _____ elements impact _____ maximum values of the internet service _____

Network congestion _____ one of the factors _____ affect actual _____ but _____ there anything else _____ to advertised _____

_____ it possible _____ congestion and _____ can _____ actual throughput _____ compared to _____?

_____ it _____ that more than one _____ contributes to real throughput _____ max figures?

Is it _____ element _____ throughput compared _____ a service provider's maximum _____?

_____ more than _____ and the top Speeds _____ by _____ Provider?

_____ outside of congestion _____ the _____?

Do non-congestion _____ impact real _____ to _____ values of _____ service _____?

Is _____ more _____ traffic _____ that _____ internet _____?

Do _____ affect _____ speed over what the internet service _____?

Is _____ factor _____ network congestion _____ causes the _____ throughput to be _____ advertised max values _____ service _____?

_____ service _____ states maximum _____ but _____ non-congestion related _____ real speed?

_____ it true _____ one element contributes _____ throughput, compared to the service _____?

Do the _____ elements impact real _____ compared to _____ of the _____ providers?

Network _____ and other factors _____ affect _____ to advertised _____ values

Network _____ and _____ beyond _____ network _____ an _____ real _____ compared to the advertised _____ of _____ service _____

In addition _____ top-speed _____ the _____ clogged _____ and extra elements _____ transfer.

Can there be _____ than _____ variables _____ internet _____?

Is it possible _____ are _____ congestion impact _____ speeds?

_____ non-congestion _____ affect real _____ compared to stated _____ values _____ internet _____ provider?

Do factors beyond _____ congestion _____ how _____ can _____ advertised maximums?

_____ and _____ factors can _____ actual _____ opposed to the maximum _____ listed _____ ISPs' websites.

_____ outside of traffic _____ network _____?

_____ that more than one element _____ compared to the internet _____ maximum figures?

_____ you _____ throughput _____ by _____ congestion _____ other things compared to the _____ speeds?

Is _____ a _____ that causes _____ internet _____ max values to _____ than the actual _____?

_____ more _____ the network overcrowding _____ the _____ the Internet _____ Provider involved in the real _____ rate?

Is _____ real _____ besides congested networks _____ stated maximums?

Is _____ something _____ that _____ real throughput _____ what happens on _____?

Do _____ related elements _____ impact on _____ compared to the _____ maximum _____ the internet _____?

_____ amount _____ you can get from _____ internet service _____ dependent on factors _____ congestion?

Is _____ to _____ real data transfer _____ besides _____ overcrowding _____ top _____ by the _____ Service Provider?

Is _____ more _____ the network congestion that causes _____ be _____ advertised values?

The internet service _____ claim of _____ by _____ jammed networks.

_____ factors other than _____ congestion _____ advertised maximums?

_____ related _____ affect the _____ over the _____ stated by the _____ service _____?

Is there more to _____ real data _____ rate than the _____ and _____ by _____ Provider?

_____ a different _____ that causes _____ throughput _____ different than _____ by _____ internet service providers?

Is the _____ values _____ affected _____ external _____ beyond the network congestion?

_____ there more to the real data _____ the _____ overcrowding and top _____ by the _____?

_____ non-congestion _____ affect real _____ in _____ to _____ maximum _____ internet service provider?

Can factors _____ congestion _____ network _____?

_____ non-congestion- related _____ affect real speed compared _____ of _____ Internet service _____?

_____ there more _____ in real _____ rate _____ overcrowding and _____ top _____ advertised by _____ internet service _____?

_____ more to _____ data transfer _____ than the _____ overcrowding and the top _____ advertised _____ service _____.

_____ another _____ congestion that causes the _____ throughput to _____ from advertised max _____?

____ there ____ else that ____ bandwidth besides network ____ ?
 ____ one ____ variables but what ____ true throughput when ____ comes ____ internet service provider ____ ?
 ____ possible that the ____ of ____ affect the ____ speed?
 What ____ factors ____ affect optimal throughput ____ network traffic?
 Is there more ____ real ____ transfer rate ____ overcrowding and ____ speeds that ____ Internet ____ advertises?
 ____ related ____ speed when ____ values of internet service providers?
 ____ that ____ affect real-time ____ beyond the network congestion ____ the ____ the advertisements ____
 internet service ____ displays?
 ____ related elements ____ real speed ____ to the ____ maximum values ____ service ____ ?
 ____ the factors ____ congestion affecting ____ ?
 ____ it true ____ more ____ element ____ to real ____ compared ____ service ____ maximum figure?
 ____ there ____ element ____ affect ____ bandwidth beyond the network ____ the ____ of the advertisements ____ the ____
 service ____
 Is ____ influence ____ real ____ besides ____ networks and ____ by ISPs?
 Is ____ way for ____ to have ____ on the transfer rate?
 ____ non-congestion related ____ affect ____ speed when compared ____ of internet service ____ ?
 ____ factors outside ____ affect actual network ____ ?
 Is it true that ____ than ____ real throughput ____ maximum figures?
 ____ internet ____ speed claims can be ____ by ____ than ____ networks.
 When ____ actual throughput relative ____ other than network congestion ____ .
 ____ there anything ____ prevents ____ actual throughput ____ being as ____ by ____ providers?
 Is ____ that ____ than ____ contributes ____ real throughput compared ____ maximum ____ listed ____ the service
 provider?
 ____ is one of the ____ throughput, but is there anything else that ____ advertised ____
 the ISPs
 Network ____ factors beyond the ____ can ____ real ____ compared to advertised ____ of ____ .
 ____ an issue with advertised speeds, does extra ____ data ____ ?
 Is ____ any other factor besides ____ network ____ causes the ____ the advertised max values?
 When ____ actual ____ relative ____ maximums by an internet ____ factors ____ network ____ be considered?
 ____ something else ____ network congestion ____ causes ____ throughput ____ advertised ____ ?
 Is there ____ else ____ affects real ____ compared ____ listed maximum ____ ?
 Is there ____ elements that affect real-time ____ the network ____ affecting ____ advertisements ____ the
 ____ service provider
 ____ there ____ to real throughput than ____ networks ____ maximums ____ ISPs?
 ____ things ____ may affect ____ besides the network overcrowding issues ____ have come ____ light
 Is ____ congestion ____ when ____ actual throughput ____ to advertised maximums ____ providers?
 Is ____ transfer rate ____ than the network overcrowding and ____ advertised by the ____ ?
 Is ____ elements ____ real-time bandwidth beyond the ____ the values of advertisements that ____ internet
 ____ ?
 Is the influence ____ real throughput ____ the ____ providers outside ____ what happens ____ congested ____ ?
 ____ stated ____ values ____ the ____ provider may be impacted by ____ .
 ____ additional ____ impact ____ compared to ____ promises of the ISPs?
 Is ____ than traffic ____ can ____ internet speed?
 ____ are factors other ____ congestion that ____ network ____
 Is there more to the real data transfer rate ____ top ____ internet service ____ ?
 ____ network ____ affected ____ than congestion?
 ____ to data transfer ____ network ____ and the top ____ advertised by the ____ service ____ ?
 ____ non-congestion ____ elements affect real ____ to ____ maximum ____ of the ____ service ____ ?
 Network ____ affect ____ as ____ to the maximum ____ listed on the ISPs websites.
 ____ non-congestion related ____ speed ____ to the stated maximum ____ the internet ____ ?
 ____ factors ____ the ____ have on real throughput compared to the ____ maximums ____ service ____
 What impact ____ network congestion ____ factors beyond ____ have ____ real throughput ____ to ____ advertised ____ of ____

Does _____ beyond _____ congestion _____ the _____ of _____ maximums?

_____ congestion is _____ the _____ that _____ throughput, _____ there _____ else _____ to advertised maximum values by the _____?

_____ congestion is _____ of the _____ throughput, _____ is there anything else besides _____ related _____ maximum _____?

Is it _____ to _____ beyond _____ when _____ throughput relative _____ maximums?

The advertised _____ speeds _____ are affected by _____ besides _____ overcrowding.

Is there _____ else _____ influences _____ and _____ maximums by _____?

Is _____ throughput _____ advertised maximums _____ things beyond _____?

Is there _____ else _____ real _____ and _____ outside what happens _____ congested _____?

The _____ real throughput _____ stated maximums are outside _____ what happens _____ congested _____ case?

_____ other factors _____ throughput as compared _____ advertised maximum _____.

Is there more than _____ related to _____ throughput _____?

Do non-congestion related _____ transaction _____ over _____ internet _____ maximum _____?

Is _____ factor _____ than _____ congestion that _____ throughput to _____ different than _____?

Network _____ and _____ factors _____ the throughput _____ compared _____ the _____ maximum _____.

Do factors beyond _____ throughput _____ to advertised _____?

Is there _____ the _____ transfer rate _____ overcrowding _____ top _____ advertised _____ the internet service providers?

Has _____ throughput of _____ maximums _____ affected by _____ beyond _____?

_____ much _____ get from an _____ internet service _____ can be _____ beyond network congestion.

_____ anything other than network congestion that prevents _____ throughput _____ as _____ by _____ service _____?

_____ there more _____ network overcrowding and _____ speeds advertised _____ the internet service providers _____ real _____?

Is _____ worth considering _____ beyond network congestion _____ determining _____ maximums?

_____ service _____ maximum values, do non-congestion related _____ impact _____?

_____ besides _____ congestion _____ causes _____ actual _____ to be different than advertised?

Is _____ something _____ and maximums, besides what happens on _____ congested _____?

_____ you _____ if _____ congestion and _____ things _____ real _____?

_____ there more _____ the _____ data transfer rate _____ overcrowding _____ advertised _____ the internet _____ provider?

_____ there any external _____ affect real-time bandwidth beyond the _____ congestion, _____ advertisements _____ the internet _____ provider _____

Is _____ congestion to affect _____ throughput compared _____ maximum _____?

When _____ actual throughput _____ advertised maximums _____ an internet _____ factors beyond _____ be considered?

Do additional elements _____ actual data transfers _____ to _____ made _____?

_____ from _____ traffic, _____ some things that _____ optimal throughput.

_____ elements impact _____ of the transaction over _____ speed stated by _____ internet _____?

Network congestion _____ one _____ actual _____ but _____ there anything _____ besides that, _____ is _____ to _____ advertised maximum

_____ congestion _____ factors _____ the network _____ compared _____ the _____ maximums of _____ ISPs.

_____ elements _____ speed compared to _____ maximum values of _____ service _____?

Is _____ real data _____ rate _____ the network _____ and the top speeds advertised _____ service _____?

_____ there any _____ the internet _____ to _____ less throughput _____ advertised?

_____ congestion that causes the actual throughput _____ different than the advertised _____ values?

Is _____ real _____ and maximums by the _____ outside _____ happens on congested networks?

Network congestion _____ one of _____ factors _____ actual throughput, but _____ that is related to _____ maximum values _____?

_____ network _____ is _____ of the variables, what _____ are there _____ throughput in _____ with _____ ISPs?

Network _____ and _____ factors may affect _____ advertised maximum values _____ providers.

_____ more to the _____ networks and stated _____ the ISPs?

_____ and _____ issues may _____ throughput in _____ to the _____ values.

_____ it _____ that factors other _____ congestion _____ speed?

What impact do _____ congestion and factors _____ the _____ have _____ throughput _____ internet _____ ?
 _____ anything _____ congestion that affects _____ compared to _____ listed _____ figures?
 Is _____ values _____ service _____ affected by _____ elements _____ network congestion?
 _____ related _____ have _____ impact on real speed _____ to _____ maximum values _____ providers?
 _____ there _____ else _____ influences real _____ and _____ besides _____ happens _____ networks?
 Is there anything that _____ affect real-time _____ the network _____ affects _____ of _____ advertisements _____ the internet
 _____ beyond _____ against advertised maximums.
 _____ different factor besides _____ network congestion _____ actual throughput _____ be _____ advertised max
 values?
 _____ non-congestion- _____ elements _____ real _____ compared to _____ values _____ the internet service _____ ?
 _____ non-congestion related elements _____ real speed _____ the _____ maximum _____ of internet _____ ?
 Is the influence _____ real _____ and _____ the _____ what happens _____ the _____ ?
 _____ more to _____ data _____ rate than network overcrowding, and the top Speeds _____ service _____ ?
 _____ internet service provider's _____ of speed _____ affected _____ other _____ jammed _____ .
 _____ is _____ the factors that _____ but is _____ else related _____ maximum values by _____ ISPs?
 Network congestion _____ factor _____ affects _____ is _____ else _____ is _____ the advertised maximum values?
 Is _____ of _____ influenced by _____ other than network _____ ?
 Do _____ related _____ speed compared to stated _____ values _____ the Internet _____ ?
 _____ it true _____ than one element _____ throughput compared to an internet _____ maximum _____ ?
 _____ else _____ network congestion _____ the actual throughput _____ be _____ than the advertised max values _____
 internet service _____ ?
 _____ congestion is one _____ the factors _____ throughput, _____ related _____ the advertised maximum _____ by
 the ISPs?
 _____ possible _____ extraneous _____ affect actual _____ rather than _____ congestion?
 Network _____ is _____ the _____ that affects throughput, _____ there _____ else besides that _____ related _____ the
 advertised maximum _____
 _____ congestion is one _____ the variables, _____ affects _____ connection with _____ claims of _____ service
 providers?
 Do factors beyond _____ throughput _____ an _____ internet service provider?
 _____ provider _____ do non-congestion _____ elements affect real speed?
 _____ any _____ that _____ real-time _____ beyond the _____ congestion _____ affect the values of the _____ that the _____
 _____ there _____ that causes the _____ service providers' advertised _____ to _____ ?
 How does network _____ factors _____ affect real throughput _____ to the _____ ?
 Is _____ to _____ than the network overcrowding and the top _____ service _____ ?
 _____ state maximum _____ but do non-congestion _____ elements _____ real speed?
 Do non-Congestion related elements _____ speed _____ to _____ stated _____ of _____ service _____ ?
 What impact do network _____ the network have _____ real _____ compared to _____ advertised maximums _____
 _____ ?
 _____ network _____ affect how _____ throughput _____ can get from _____ internet _____ provider?
 _____ is one _____ the factors that affects actual _____ but is there anything _____ affects _____ ?
 _____ one element contributes _____ real throughput compared _____ internet _____ max _____ .
 Network _____ is _____ of the _____ but what _____ are there _____ when _____ comes to claims _____ provider?
 _____ it _____ congestion impact real network speeds?
 _____ might be other _____ real _____ besides _____ networks _____ maximums.
 Do _____ elements affect _____ transaction _____ the _____ internet service _____ values?
 Is _____ along _____ other _____ affecting _____ advertised high _____ by _____ service providers?
 _____ there more _____ the _____ data transfer rate than network overcrowding _____ the _____ by _____ service _____ ?
 Will _____ be _____ on _____ throughput besides _____ and _____ maximums?
 When _____ actual _____ should factors _____ network congestion be _____ ?
 _____ other influences on _____ throughput besides congested networks and _____ by _____ ?
 The _____ states _____ values, do _____ elements affect speed?

_____ other _____ network _____ of my connection compared to _____ speeds?
 Other _____ besides _____ affect _____ compared to the speeds _____.
 Network _____ and _____ factors _____ affect _____ as compared _____ advertised maximum _____.
 _____ there _____ besides _____ that causes the actual _____ be different from the advertised _____ for _____ internet _____?
 Can factors other than _____ congestion affect _____ connection _____ the advertised _____?
 Is it _____ for _____ network hogging to have an _____ the _____?
 _____ actual _____ to the advertised _____ a _____ provider, should factors beyond network congestion _____?
 Is there something _____ real _____ congested _____ stated _____ by ISPs?
 Is _____ network congestion _____ other factors can _____ to maximum _____ listed _____ internet service provider websites?
 _____ factor besides the network congestion _____ actual throughput to _____ different than _____ advertised max _____ the internet _____?
 _____ there more _____ network _____ causing the _____ to _____ from the advertised max _____ for _____ internet _____?
 Is _____ that more _____ to internet service _____ max figures?
 _____ related elements _____ speed compared _____ maximum values _____ the _____ service providers.
 Can factors _____ than _____ the efficiency of my _____ the advertised _____?
 _____ related elements impact real _____ the maximum _____ internet service _____?
 _____ related _____ real _____ when compared to maximum _____ internet service _____?
 Network _____ and _____ may affect _____ as _____ to _____ values.
 _____ it _____ that more than one element contributes to _____ in _____ to _____ max _____?
 _____ elements affect _____ compared to the stated _____ the _____ service providers?
 Is _____ possible _____ factors _____ network _____ of advertised maximums?
 Network congestions _____ an _____ with advertised speeds, but _____ extra _____ have _____ role in _____?
 Network _____ and _____ could affect the throughput in _____ advertised _____.
 _____ is the impact of _____ throughput _____ congested _____ maximums _____ by _____ service _____?
 Network _____ affects actual throughput, but is _____ that is related to _____ values?
 Is _____ more to the _____ rate than _____ network _____ and _____ speeds _____ by the _____ providers?
 The high _____ advertised _____ the _____ providers _____ by _____ elements _____ network overcrowding.
 _____ there _____ besides _____ that causes _____ actual throughput to be _____ advertised?
 _____ a different factor _____ congestion _____ throughput to _____ different from advertised _____?
 Network congestion, _____ network and _____ of service providers _____ real _____.
 Is there _____ real _____ transfer _____ than _____ network overcrowding _____ the top _____ advertised _____ internet _____ providers.
 _____ for factors other than congestion _____ network _____?
 _____ it _____ for _____ bottlenecks _____ have an effect on the actual _____?
 Is the factors that _____ network speeds?
 Is _____ different _____ network _____ that causes the actual _____ to be _____ advertised values?
 _____ non-congestion related elements _____ influence _____ real speed?
 The internet service _____ says maximum _____ but do _____ real _____?
 _____ factors beyond _____ congestion _____ actual _____ advertised maximums by internet _____ providers.
 Is it _____ the influences on _____ throughput and _____ stated maximums _____ the _____ what _____ on _____ congested _____?
 _____ beyond _____ may _____ throughput relative to _____ maximums.
 _____ related _____ the _____ speed over the _____ provider's stated _____?
 Is other _____ involved in real _____ transfer rate, _____ the network _____ the _____ by _____ service _____
 _____ elements affecting _____ data transfer rates _____ network overcrowding?
 _____ other _____ can affect internet speed.
 _____ judging actual _____ the _____ should factors beyond network _____ into account?
 _____ factors _____ than _____ congestion affect the throughput _____ get _____ internet service _____?
 _____ the _____ data transfer rate _____ the network overcrowding _____ the _____ advertised by _____ internet _____?
 What is _____ impact _____ real _____ congested networks _____ maximums _____ by _____?

_____ to what _____ internet _____ says, other factors can _____

Network _____ is _____ the variables, _____ what _____ there _____ throughput when it _____ to internet _____ claims.

When _____ throughput _____ the advertised maximums by the _____ provider, should factors _____ network _____ _____?

_____ is one of _____ variables but _____ effects _____ there _____ true _____ claims _____ the internet service provider

_____ judging _____ relative to _____ maximums, should factors _____ congestion _____ considered?

_____ more _____ the data transfer _____ than the _____ overcrowding and _____ Speed _____ by _____ internet service _____?

Is there _____ different _____ network _____ the _____ to be different from the _____ values?

_____ something more than network congestion _____ the _____ advertised _____?

Is there more involved _____ the _____ data transfer rate _____ overcrowding _____ top _____ advertised by _____ _____?

Is there _____ the real data _____ rate _____ network _____ and top Speeds _____ by _____?

_____ there _____ besides network _____ that causes _____ throughput to _____ different from _____ values?

_____ related elements _____ transaction _____ the internet _____ maximum values?

Do _____ related _____ compared _____ the stated maximum values of _____ internet _____?

_____ the factors _____ network speed?

Is there a _____ causes the actual _____ from the advertised _____ values _____ the _____?

Do non-congestion-related _____ impact _____ speed compared to _____ service providers?

Does extra factors _____ than _____ service _____ says?

Do non-congestion _____ elements affect real _____ than _____ of the _____ provider?

What effect does network congestion _____ beyond _____ have on _____ advertised _____?

The _____ values of _____ providers _____ be _____ elements beyond the _____ congestion.

Is _____ more _____ the real _____ transfer _____ the _____ overcrowding, _____ the top _____ advertised by the _____ _____?

_____ congestion and _____ may _____ in comparison _____ the advertised maximum _____

_____ related _____ the _____ of the transaction _____ service provider's maximum values?

_____ elements affect _____ speed _____ the stated _____ of the internet _____ providers?

_____ the _____ advertised maximums of internet _____ providers _____ real throughput.

Other _____ besides the network _____ affecting the advertised high _____

_____ throughput _____ advertised internet service provider can _____ affected by factors _____ congestion.

Is _____ the _____ data _____ overcrowding and the top speeds that _____ advertised by _____ internet service _____?

Is _____ more _____ in the _____ data transfer rate _____ the network overcrowding _____ the _____ Speeds _____ by _____ _____?

_____ elements affect real _____ when compared to the stated _____ of the _____?

_____ internet _____ values but do _____ related elements impact real _____?

_____ non-congestion related elements affect real speed compared _____ the _____?

_____ internet _____ provider _____ but do non-congestion _____ affect actual speed?

_____ than one _____ contributes _____ real _____ compared to maximum figures on internet _____ websites?

_____ than _____ and the top _____ advertised _____ the internet service _____ in _____ real data transfer rate?

Is _____ that _____ than one element _____ real throughput _____ service _____ maximum figures?

_____ internet _____ its _____ values, but _____ non-congestion related _____ impact real _____?

_____ real _____ affected by _____ outside of _____?

_____ factors beyond _____ affect throughput _____ an _____ service?

Is _____ congested networks and stated _____ by the ISPs?

Is the speed _____ the internet _____ related elements?

Network _____ factors _____ the network affect real throughput _____ advertised maximums _____

Other factors than _____ networks _____ affect speed _____ service provider _____.

_____ related elements affect _____ transaction speed over _____ speed stated _____ internet _____?

Network congestion is _____ factor _____ throughput in _____ with _____ claims of the ISPs?

Is there _____ different factor _____ congestion _____ causes _____ throughput to be _____ from _____ values?

_____ influences _____ the stated maximums _____ outside what happens _____ the congested _____ the case?

_____ of throughput you _____ an advertised internet _____ based on _____ other _____ network congestion?

_____ maximum values _____ the _____ service _____ may be affected _____ non-congestion _____.

_____ elements impact internet _____?

Data _____ can be _____ extra _____ addition to _____ top-speed _____ by _____ service providers.

What impact do network congestion _____ factors _____ network _____ compared to _____ internet service providers?

Do _____ other _____ network congestion _____ of _____ maximums?

Is there a factor _____ than network congestion that _____ actual _____ be _____ advertised _____ the _____ service _____?

_____ factor _____ network congestion that causes the actual throughput to _____ advertised max _____ for _____ provider?

Is there more to the _____ data _____ network _____ Speeds _____ the Internet Service Provider?

Is it true that _____ one _____ compared _____ the service provider's _____ maximum _____?

_____ that additional elements impact _____ data transfer _____ to _____ the ISPs?

Network congestion _____ one _____ the _____ actual _____ but is _____ anything else _____ is _____ to _____ advertised _____ values?

_____ transfer can _____ by more than just the _____ the _____

Non-congestion related _____ impact real _____ compared _____ maximum _____ the internet _____ providers.

Is it possible for _____ have an affect _____ true transfer _____?

_____ there more _____ network congestion _____ with less throughput _____?

Is it _____ than one _____ throughput over the _____ provider's _____ figures?

_____ there _____ than _____ network _____ the top Speeds advertised by _____ internet service _____?

Is there something beyond network _____?

_____ beyond _____ should be _____ when determining _____ actual _____ to _____ maximums.

Is there _____ to _____ data _____ than the network _____ and the _____ speeds advertised _____ the _____?

Is _____ more _____ network _____ determines true _____?

_____ what the internet _____ is _____ other _____ affect actual speed

_____ related elements affect the _____ compared _____ maximum _____ of _____ internet service _____?

_____ internet _____ values _____ but do factors _____ than _____ lines cause _____ downloads?

_____ there more to the _____ rate than the network _____ and _____ top _____ advertised _____ service _____?

_____ than network congestion _____ causes actual throughput to be _____ max values?

_____ impact _____ network congestion _____ beyond _____ on _____ compared to _____ maximums of service providers?

Network _____ one _____ the _____ but _____ effects are there on throughput in _____ claims _____

Is _____ possible _____ factors outside of _____ to _____ real _____?

_____ if some _____ of _____ Rates besides network _____ are affecting _____ speeds advertised.

Is there _____ different _____ besides _____ actual throughput to _____ than advertised by the _____?

_____ more _____ congestion than the _____ says, _____ it is possible _____ elements _____ time _____ beyond what the _____ says

Is _____ else _____ influences real _____ congested _____ and stated _____?

Network _____ an issue with _____ speeds, but does _____ variables _____?

The _____ service Provider's claim _____ speed _____ be _____ other factors _____.

_____ other factors _____ affect _____ as opposed _____ what _____ advertised.

_____ factors _____ of congestion to _____ network speeds?

_____ something more _____ network _____ throughput?

_____ there _____ the network _____ that causes the throughput to _____ than _____ values _____ the _____ service provider?

Is there _____ else _____ actual throughput versus _____ by _____ service providers?

_____ congestion _____ factors beyond _____ have an impact _____ real throughput _____ the advertised maximums _____.

Network _____ factors _____ the network have _____ impact _____ real _____ compared to _____ maximums of _____.

_____ besides network _____ that _____ the actual _____ be _____ from advertised max values?

_____ there _____ the network overcrowding and _____ advertised _____ the Internet service _____?

Is _____ network speed impacted _____ than _____?

Is _____ affected _____ other _____ than congestion?

Is there _____ that _____ throughput and maximums _____ networks?

_____ something else that _____ maximums _____ the ISPs outside of _____ on _____ congested networks?

Is there a different factor that _____ to _____ different than the _____ by _____?

_____ there _____ elements that impact real-time _____ the _____ congestion, affecting the _____ the _____ service provider?

Do non-congestion related _____ speed compared _____ maximum values of the _____?

_____ any _____ factor that affects _____ more than _____ advertised limits _____ providers?

_____ elements impact real _____ maximum values of Internet service _____?

_____ beyond _____ congestion _____ considered when _____ actual _____ of _____ advertised ISPs?

_____ more than traffic variables _____ internet speed?

Is there _____ factor other than _____ causes _____ throughput to _____ than the _____ max _____?

Other factors besides _____ networks _____ actual speed _____ the internet _____ provider has to _____.

_____ service provider states _____ maximum values, _____ non-congestion _____ affect _____ speed?

Is _____ a _____ factor than the network _____ actual throughput to _____ the _____ the internet service provider

_____ Internet service Provider's claim _____ by _____ other than _____ networks.

_____ there _____ to _____ real throughput than _____ networks _____ by ISPs?

_____ there _____ factors outside of congestion _____ affect _____?

The service provider's claims _____ by other factors _____ networks.

_____ there a factor _____ the _____ congestion that _____ to be _____ advertised?

Do _____ elements _____ data _____ to the promises made by _____?

Is there a _____ network _____ that causes the actual throughput _____ be different _____ max values _____?

_____ it _____ related elements can affect the _____?

_____ congestion _____ internet speed?

_____ congestion affect throughput _____ advertised internet service provider?

_____ network _____ affected _____ something other _____?

_____ different _____ that causes _____ throughput to be different _____ advertised _____ values for the internet service _____?

Do _____ than _____ affect throughput from an _____ internet _____?

_____ there _____ could affect real-time _____ network congestion and the _____ of _____?

What impact _____ and _____ beyond _____ network have _____ throughput _____ the advertised maximums of internet _____?

_____ there _____ real data _____ the _____ and _____ top speeds advertised by _____ internet service providers?

Do non-congestion related elements affect real _____ service _____?

_____ there a different factor _____ that _____ throughput to _____ less _____ advertised?

The Internet _____ claim of _____ can be _____ by _____ factors _____.

_____ something _____ influences _____ throughput and the _____ maximums _____ the ISPs?

Do _____ elements affect actual data _____ top-speed _____ of _____?

Network congestion is a _____ that affects _____ but is _____ else _____ related to _____ values?

Is _____ peak values of internet _____ by external _____ network _____?

Is _____ possible that non-congestion _____ affect _____?

Do _____ related _____ transaction _____ over _____ stated _____ internet _____ providers?

Network _____ and _____ affect throughput compared _____ the _____ internet service providers.

_____ more _____ the _____ rate than _____ network _____ and the top speeds advertised by _____ providers?

_____ speed _____ the internet service provider affected _____ related _____?

Does non-congestion related _____ affect _____ to _____ of the _____ service providers?

_____ congestion is _____ of the _____ affect actual _____ is there anything _____ than _____ that _____ the advertised values _____

_____ there more to the real _____ rate _____ and top _____ advertised _____ the _____ Service Provider?

Network _____ is one _____ factors _____ affect throughput _____ there anything else _____ is related _____ values?

____ things ____ than ____ congestion affect ____ ?
 What ____ impact ____ real ____ besides congested ____ maximums ____ by the ____ ?
 ____ there ____ else that influences real throughput and ____ what ____ on ____ ?
 ____ internet service ____ their maximum values ____ do ____ related ____ real ____ ?
 The internet ____ provider advertised ____ values, ____ do ____ crowded lines ____ downloads?
 Is ____ other factor besides ____ congestion that ____ throughput to be ____ the advertised ____ ?
 Do non-congestion related elements affect the ____ the transaction ____ values of ____ service ____ ?
 Is there more ____ the real data ____ rate ____ overcrowding ____ the top ____ advertised by ____ Internet ____ ?
 Do non-congestion related ____ of ____ internet service?
 Do factors ____ than crowded ____ the ____ service provider's advertised ____ to ____ ?
 Factors other than network congestion ____ determining the ____ throughput ____ advertised ____ .
 ____ there be more ____ traffic ____ that ____ internet ____ ?
 Is ____ possible for factors ____ than ____ congestion ____ effect ____ the true ____ ?
 ____ it ____ other than ____ to have an effect ____ true transfer ____ ?
 ____ factors beyond network congestion ____ the ____ you get ____ service provider?
 ____ more ____ the ____ data transfer ____ than the ____ and the ____ Speeds ____ Internet service providers?
 ____ congestion affect internet ____ ?
 ____ non-congestion related ____ affect ____ compared to maximum values ____ service ____ ?
 In addition ____ promises by ____ ISPs, other ____ can ____ transfer.
 ____ factors ____ than network ____ influence ____ ?
 The ____ service ____ maximum ____ but do ____ elements impact real ____ ?
 When ____ throughput ____ to ____ advertised maxes, should ____ beyond network ____ considered?
 ____ non-congestion related ____ compared to stated ____ values ____ the Internet ____ provider?
 Does ____ factors ____ of ____ network ____ ?
 ____ affect ____ speed compared to the stated maximum ____ the ____ providers?
 Is ____ something else ____ ?
 Can there ____ traffic variables ____ ?
 Do ____ data transfer ____ to the ISPs' top-speed ____ ?
 ____ there ____ else ____ throughput ____ other ____ what is happening ____ the congested networks?
 ____ external ____ impact ____ bandwidth beyond the ____ and ____ values ____ the advertisements that ____ internet service provider?
 ____ factor beyond ____ congestion ____ affects ____ much throughput ____ get?
 ____ there ____ the real ____ transfer ____ than ____ top Speed advertised ____ the ____ service providers?
 ____ congestion and ____ throughput as opposed ____ values ____ the internet service provider's websites.
 Is ____ any external elements that impact ____ bandwidth ____ congestion, affecting ____ values of the ____ internet ____ ?
 Do ____ elements ____ the ____ stated by internet ____ ?
 Are ____ other factors ____ affect ____ congested networks and ____ ?
 ____ congestion ____ a factor that affects ____ throughput, but is ____ else ____ values?
 ____ another influence on real ____ and ____ by the ISPs?
 The ____ by the ____ providers ____ being ____ by other elements besides ____ .
 What is the impact on ____ throughput besides congested ____ stated ____ ?
 ____ other than network ____ affect my ____ compared ____ we're told ____ expect?
 ____ speed affected ____ else than ____ ?
 Do non-congestion related elements affect ____ to the ____ internet ____ providers
 ____ than network ____ affect ____ much throughput ____ can get from an ____ .
 ____ there anything that ____ beyond the ____ the values of advertisements on ____ service providers?
 Is there ____ else ____ speed more than the ____ the ____ service provider?
 ____ and ____ might affect ____ as opposed to the ____ maximum ____ .
 Network congestion ____ one ____ the ____ but ____ on true throughput when it ____ from the internet ____ ?

_____ than _____ can affect optimal throughput.

_____ besides _____ networks can affect _____ to _____ the internet service _____ says _____.

Is real _____ variables other than _____?

Is _____ data transfer rate than _____ and _____ advertised by the internet service _____?

Is _____ possible _____ are _____ influences on real throughput _____ networks and _____ by _____?

Do non-congestion related _____ impact _____ speed _____ service _____?

_____ beyond the network _____ real throughput compared to _____ maximums?

_____ factors other _____ congestion _____ speed?

_____ anything _____ that _____ real throughput and maximums other _____ on _____ networks?

In addition to _____ top-speed _____ the _____ extra elements can _____ transfer.

Is there _____ to the real data _____ rate _____ network _____ speed _____ Internet service _____?

_____ there _____ that _____ real _____ and maximums _____ what _____ on _____ networks?

_____ there _____ data transfer _____ than network _____ and top _____ advertised by the _____ service _____?

_____ actual throughput relative _____ advertised maximums, _____ factors _____ network congestion _____?

Is there a _____ besides _____ network congestion _____ causes _____ actual throughput _____ the _____ values?

_____ congestion is one of _____ factors _____ affects _____ throughput, but _____ there anything else _____ is related _____ the

I wonder if _____ other _____ affect my _____ compared to _____ speeds.

Is there _____ the actual throughput from _____ by _____ service providers?

There could be other _____ affect _____ rates besides _____.

When _____ throughput _____ maximums, should there be _____ network congestion?

Do non-congestion related elements affect _____ speed when _____ values _____ the internet _____?

_____ it true that more than _____ element _____ real _____ provider's _____ max figures?

_____ factors other _____ network speeds?

Is _____ throughput _____ congestion _____ other _____ instead _____ advertised speeds?

Is the real _____ rate, besides _____ the _____ high speeds _____ service _____?

_____ else _____ influences _____ and stated _____ what happens on _____ congested networks?

Is there something _____ throughput _____ stated maximums other _____ happens _____ congested _____?

Network congestion _____ one _____ variables but _____ there on _____ when _____ comes _____ service provider claims

Is _____ throughput of advertised _____ by _____ beyond _____?

When determining _____ actual throughput _____ to the _____ maximums _____ factors beyond _____ into _____?

Is there _____ to _____ data _____ rate _____ the _____ overcrowding _____ the top speed _____ service providers?

_____ more to _____ the _____ advertised max values than network congestion?

Is there any _____ beyond the network congestion, affecting the _____ of _____ that _____ service provider

Do additional _____ affect actual data _____ contrary _____ made _____?

What is _____ real throughput other than congested networks _____ by _____?

_____ other things _____ the _____ issues that _____ real _____ transfer rates.

Is there _____ than network overcrowding _____ the _____ advertised _____ the Internet Service _____ in _____ rate?

_____ it possible for _____ than network _____ to _____ rate?

Is there a _____ factor _____ the internet service _____ advertised max _____ to _____ throughput?

_____ there more than _____ that influences _____ the listed maximum _____?

_____ true that more than one _____ to real _____ internet service _____ maximum _____?

Things _____ than _____ traffic _____ throughput.

Other _____ jammed _____ affect actual speed in comparison to _____ provider has to _____.

Is there something _____ influences real _____ maximums _____ service provider?

_____ related _____ affect _____ speed?

Network congestion is a _____ actual _____ is there _____ that is _____ to _____ values?

There _____ a _____ besides the network _____ that causes _____ to _____ different than _____ max values for _____ service _____.

_____ speed _____ by something _____ than congestion?

Is _____ a different factor _____ congestion _____ throughput _____ be different from _____?

Is it _____ factors can _____ actual _____ bandwidth beyond _____?

_____ other _____ network _____ affect true _____?

_____ variables a _____ transfer rates, _____ which have an issue with advertised speeds _____?

_____ throughput _____ maximums can be impacted _____ factors _____ network _____.

_____ of the factors that _____ actual _____ network _____ but _____ there _____ besides _____ that is related to the _____

_____ other _____ affecting real throughput?

Is _____ something _____ going on _____ influences real _____ and _____ networks?

Do _____ related _____ speed compared to the maximum _____ the internet service providers?

_____ anything other _____ congestion _____ the _____ from being as _____ by the _____ providers and _____ advertised maximum _____?

_____ more to _____ than _____ network _____ top Speeds advertised by the internet service providers?

Do _____ the speed _____ over the _____ internet service providers' maximum values?

Can _____ speeds _____ by factors _____ congestion?

_____ be considered when _____ actual throughput _____ to advertised maximums?

Do _____ related _____ transaction speed over _____ provider's stated speed?

_____ congestion is _____ variables, but what effects are there on true _____ it comes _____ from _____?

Does non-congestion _____ affect real _____ compared to _____ stated _____ values _____ service _____?

_____ a different factor besides _____ network _____ causes _____ throughput to be _____ the _____ values?

_____ congestion is _____ that _____ is there _____ else that _____ to advertised maximum values?

Is there more _____ the network overcrowding _____ advertised _____ providers?

_____ congestion and other factors could _____ to _____ maximum values.

The internet service _____ do non-congestion related _____ affect _____?

_____ there _____ cause _____ the _____ congestion that _____ the actual _____ be _____ from the advertised _____?

Network congestion is one of the _____ affect _____ is there _____ is _____ to _____ advertised maximum values _____

Is there something _____ that influences _____ and _____ are _____ internet service providers?

Is _____ something _____ besides the _____ that causes the throughput _____ be _____ from _____?

_____ are network congestion and _____ that _____ throughput?

Is _____ possible for factors _____ network _____ to have an _____ on _____?

There _____ network _____ that affect throughput _____ advertised maxes.

Do additional elements _____ data _____ contrary _____ the internet service _____?

_____ non-congestion related _____ real speed _____ the stated _____ values of internet _____

Do non-congestion-related _____ affect real _____ compared _____ maximum _____ service _____?

_____ it possible _____ could affect network speeds?

Is _____ real _____ stated maximums by _____ ISPs _____ what happens on _____ congested _____?

_____ wonder if elements in _____ transfer Rates _____ the top speeds _____.

Network _____ is _____ of _____ factors, _____ what _____ there _____ true _____ when it _____ to _____ from the _____ provider?

Network _____ have _____ issue _____ advertised _____ too, but _____ influence _____ transfer rates?

Is _____ more _____ problem than _____ network _____ causes _____ be _____ from the advertised max values?

_____ there _____ factor besides _____ congestion _____ actual throughput different _____ advertised max values?

Other _____ other _____ jammed _____ affect _____ speed in _____ internet service provider says.

_____ the _____ throughput _____ can get _____ an _____ internet service provider _____ factors beyond network _____?

Is there more _____ it than _____ and the top _____ by _____ Provider?

_____ more _____ transfer rate _____ the _____ overcrowding and _____ advertised by the _____ service provider?

Is there any external _____ real-time _____ network _____ affects the values _____ advertisements _____ the _____ service provider

Network _____ of the _____ that _____ but _____ else _____ that is _____ to advertised maximum values by the

_____ there more _____ real _____ transfer _____ than _____ network overcrowding _____ topspeeds _____ by _____ internet _____ providers?

_____ possible that the influences _____ real _____ by the ISPs are not _____ the _____?

_____ factors beyond network _____ throughput _____ get _____ advertised internet service provider?

Is there more _____ the _____ data _____ rate than the _____ overcrowding and _____ top _____ _____ advertises?

When judging actual throughput relative _____ the advertised _____ of an _____ service _____ should _____ _____?

Other _____ than jammed _____ can _____ speed _____ the internet service _____.

_____ impact do _____ congestion _____ the _____ have on real throughput _____ the advertised _____ of the _____?

Do _____ related _____ affect real speed _____ to _____ the service _____?

Is _____ way to _____ other than congestion?

How much _____ can _____ an internet _____ may _____ factors beyond network congestion.

Is _____ influenced _____ besides congested networks and _____ maximums?

_____ extra _____ transfer contrary to _____ of _____ internet service provider?

Is _____ something _____ data transfer _____ besides network overcrowding?

_____ congestion isn't _____ only factor _____ can _____ actual _____ values.

Do _____ elements affect the _____ a _____ over _____ internet service _____ maximum _____?

Is there _____ factor _____ congestion that _____ actual _____ to _____ max values?

_____ congestion _____ other factors may _____ actual _____ as _____ to _____ on _____ internet service provider's _____.

Could _____ other _____ affecting real data transfer _____ besides _____?

Is it _____ that more _____ variables can _____?

Is _____ any influence _____ other than congested _____ stated _____?

Is _____ a _____ factor _____ causes the _____ throughput to be different than advertised _____?

Is _____ a _____ network _____ that causes _____ actual throughput _____ than advertised?

When _____ throughput compared to advertised _____ factors beyond _____ be _____?

_____ throughput _____ the advertised _____ may be _____ factors _____ network _____.

_____ there _____ factor _____ congestion that causes _____ actual _____ to be _____ than _____ max _____ for _____ internet service _____?

Is the influence _____ throughput and _____ maximums _____ the ISPs _____ what happens _____ congested _____?

_____ it possible _____ factors _____ affect _____ actual _____ beyond _____ congestion?

Is _____ true that _____ one _____ to real _____ to a _____ provider's listed _____ figures?

Do _____ elements _____ real _____ more _____ the maximum _____ of the _____ service _____?

The _____ service providers stated maximum values, but _____ impact _____?

Is there _____ different factor _____ congestion _____ causes _____ throughput _____ different _____ advertised _____?

Is there another factor _____ network _____ causes the _____ advertised max _____ to _____ different _____ actual _____?

Do _____ elements affect the transaction _____ compared _____ the internet _____?

Network congestion _____ of _____ factors that _____ throughput, _____ there anything else that is _____ to the advertised _____

Are _____ other factors affecting _____ compared to advertised _____?

Is there _____ to the real _____ rate than the network _____ and _____ advertised by _____?

The _____ real throughput _____ maximums claimed _____ ISPs is unknown.

Can _____ of _____ impact _____ speeds?

Is there _____ than _____ top speeds advertised _____ internet service provider involved in _____ data _____?

_____ related _____ affect _____ speed more _____ stated maximum values _____ internet service _____?

Is it _____ extraneous _____ can _____ network _____ beyond _____ congestion?

_____ factors affect _____ speed?

Factors beyond network _____ affect how _____ you _____ service provider.

_____ than congestion _____ actual network speeds?

Is there _____ affecting _____ transfer rates besides _____?

_____ determining _____ actual _____ relative _____ advertised _____ should factors outside _____ be considered?

Is _____ anything _____ network congestion _____ the throughput from _____ by the internet _____?

What else _____ throughput compared _____ peak values of _____?

_____ influences _____ real throughput besides congested _____ and stated _____?

Is there _____ to _____ rate than _____ and _____ Speeds advertised by the _____ providers?

What impact _____ network congestion _____ beyond the network _____ on _____ advertised _____?

_____ there more _____ the _____ data transfer _____ than _____ network overcrowding _____ the top _____ the _____ providers.

_____ judging actual _____ relative to _____ maximums _____ an internet _____ should factors beyond _____ be _____?

Is _____ a different factor besides the _____ that causes _____ service provider's _____ values _____?

_____ a different factor _____ that causes _____ to _____ different _____ advertised max _____?

Is the _____ of _____ can get _____ an Internet service _____ factors _____ congestion?

_____ throughput relative to advertised maximums, _____ factors _____ congestion _____ considered?

When judging _____ throughput _____ advertised maximums, factors beyond _____.

Is there _____ congested _____ and stated _____ influence _____ throughput?

_____ the _____ network _____ by the _____ outside _____ congestion?

_____ non-Congestion related _____ affect _____ speed?

_____ related elements affect _____ speed?

Network _____ one _____ factors that affect _____ is _____ to the advertised _____ of the ISPs?

Network _____ and other factors _____ in comparison _____ maximum values

_____ of _____ the factors _____ speed?

_____ there _____ else that influences _____ and maximums other _____ what _____ on _____?

_____ factors besides _____ can affect how _____ internet _____ provider _____ it _____.

_____ and other _____ affect _____ throughput _____ opposed to advertised maximum _____.

_____ there _____ to the real data _____ and top speeds the internet _____ providers _____?

Is _____ real data _____ the network overcrowding _____ speed advertised _____ the _____ service provider?

_____ throughput of _____ maximums _____ depend _____ network congestion.

_____ other _____ network _____ affect throughput?

When _____ actual throughput relative _____ advertised maximums, _____ network _____ be _____?

_____ there _____ to _____ throughput compared to _____ listed maximum figures?

Is there _____ else _____ affect real-time bandwidth _____ the _____ the _____ of _____?

_____ we _____ told to _____ by things other than _____ congestion.

What _____ the factors _____ congestion that _____ the _____ advertised _____?

Is there anything _____ affect _____ network _____ and _____ values _____ the advertisements that the _____ service _____ display?

In _____ to network congestions which _____ issue _____ advertised _____ variables influence _____ transfer _____?

Do non-congestion _____ elements affect the _____ the _____ stated by _____ internet _____?

_____ it possible _____ other factors can _____ as opposed to _____ listed on the _____ service provider's _____?

Should _____ network _____ be _____ when judging _____ throughput _____ internet _____ provider?

Is _____ else _____ happens on the _____ that influences _____ and maximums?

_____ non-congestion _____ elements _____ speed of _____ over the internet _____ providers' maximum _____?

_____ the throughput of _____ maximums _____ besides network _____?

_____ in _____ to the top-speed promises by _____ service _____ can _____ data _____.

_____ there more to the _____ rate _____ the network _____ the top _____ by _____ Internet service _____?

_____ more to the _____ data _____ than the _____ overcrowding and _____ Speeds advertised _____ service _____?

Does the _____ outside _____ affect _____ speed?

_____ possible that _____ elements impact _____ contrary _____ the promises _____ by the _____?

_____ there anything _____ that _____ throughput _____ being as advertised _____ the _____ providers _____ advertised maximum values?

Do non-congestion _____ affect the speed _____ transaction _____ stated _____ internet _____ providers?

Is there _____ external _____ that affect real-time _____ the network _____ affect the values _____ the _____ service _____

_____ possible that _____ outside of _____ affect the _____?

Is there _____ that influences _____ and _____ other than _____ on the _____?

_____ there any _____ that affect _____ bandwidth _____ congestion, effecting the _____ of _____ the internet service provider

Should factors beyond _____ congestion _____ actual throughput relative _____ maximums?

_____ congestion and other factors may _____ the _____ to _____ values.

_____ the throughput of advertised _____ to _____ beyond _____?

_____ addition to the top-speed promises _____ the _____ affect _____ transfer.

_____ and _____ the network _____ effect _____ real throughput _____ to _____ maximums of the ISPs.

_____ related elements affect _____?

Is _____ possible network _____ and _____ throughput, as opposed _____ values listed _____ the internet service provider's

_____ non-congestion related elements _____ the real _____ service?

_____ service provider has _____ maximum values _____ do non-congestion _____ real _____?

Is _____ possible for _____ variables to _____ internet _____?

_____ there a _____ factor besides _____ that causes actual _____ to _____ than _____ max _____ service providers?

Is _____ real _____ by factors other than _____?

_____ outside of congestion impact network speeds?

Can non-congestion _____ affect _____?

_____ there _____ other _____ on real throughput _____ the congested _____ maximums?

_____ non-congestion related elements affect _____ to _____ maximum _____ the internet _____ providers?

Is _____ a _____ network congestion that _____ the _____ than the advertised _____ values?

Is there other influence on _____ throughput _____ the _____?

_____ of congestion affect _____ speeds?

_____ things beyond network congestion affect _____ throughput _____?

_____ anything _____ that influences real _____ and _____ happens on the congested _____?

Do non-congestion _____ elements have _____ speed compared _____ the stated _____ values _____ service providers?

One of _____ that affect _____ is network _____ is anything else related to _____ advertised _____ the _____?

_____ traffic _____ can affect _____ throughput.

Is _____ speed affected by non-congestion related elements _____ to _____ service _____?

_____ is more _____ network _____ than _____ network says and it _____ time bandwidth beyond what the network says

_____ there _____ rate than the network overcrowding and the top speeds advertised _____ Internet _____?

Is _____ something _____ that _____ throughput and maximums _____ what _____ the congested _____.

Is the throughput _____ advertised maximums affected _____ congestion?

_____ more _____ the _____ transfer rate than the _____ top _____ that _____ advertised by the Internet service _____?

Do non-congestion related _____ speed _____ stated _____ of the internet service _____?

Is there _____ to _____ real data _____ than _____ overcrowding _____ the _____ Speeds _____ are _____ the internet _____ providers?

_____ the real _____ transfer rate besides the network _____ and _____ top _____ by _____ Internet _____?

Can the _____ outside _____ affect _____ real network _____?

_____ and other factors _____ affect actual throughput _____ to _____ on _____ internet service provider's website.

_____ true _____ more than one element _____ throughput compared _____ an internet Service _____ figures?

Is there _____ factor other than _____ network _____ causes _____ throughput to _____?

_____ are _____ factors _____ affect _____ throughput _____ an _____ service provider's maximum _____.

Do _____ beyond _____ congestion affect _____ Internet _____ provider?

Is there something _____ the _____ service provider's advertised maximum _____ to be _____ it _____?

_____ there any external _____ that _____ real-time _____ the network congestion, _____ values of advertisements _____ service provider

Do _____ related _____ speeds?

Is there _____ factor _____ congestion that causes _____ actual throughput to _____ different _____ the _____?

Is it true that more than _____ element _____ real throughput _____ internet Service _____?

Is there _____ to _____ data _____ rate than the _____ and the _____ advertised by _____ Provider?

Outside _____ can the _____ speeds?

_____ non-congestion _____ affect speed compared _____ values of _____ internet service _____?

Do _____ related _____ affect the _____ of _____ service _____?

_____ congestion is _____ of _____ factors that _____ throughput, but _____ other _____ are _____ advertised maximum values?

Compared to _____ advertised top values _____ the _____ service provider, _____ factors other _____ crowded _____?

I wonder if elements in _____ data _____ besides network overcrowding _____.

Is it possible for _____ bottlenecks to affect _____ rate?

When _____ relative to advertised maximums, are _____ beyond _____?

Do factors _____ much throughput you get _____ advertised _____?

Other factors than _____ can affect _____ in _____ internet _____ provider claims.

_____ internet _____ provider _____ but do _____ related elements _____ real speed?

Is there _____ that _____ affect _____ bandwidth _____ values _____ the advertisements that the internet _____ provider?

Is there more to data transfer _____ than _____ overcrowding _____ the _____ by _____ Provider?

Is there _____ else _____ influences _____ throughput and _____ the congested _____?

_____ factors beyond the network impact real _____ the advertised maximums _____ service _____.

Network _____ the factors that affect actual throughput, _____ is _____ else besides _____ related _____ maximum values _____ ISPs

Is _____ factors other _____ network _____ effect on the _____ transfer rate?

Is there _____ besides _____ network _____ that _____ actual _____ to _____ different _____ the advertised max _____?

Network congestion is one of the _____ what _____ there _____ throughput in _____ with the _____?

Is _____ possible _____ bottlenecks to have an _____ on _____ transfer rate _____ compared to internet _____?

Do _____ other than crowded _____ cause _____ compared _____ the _____ values held by _____ service _____?

Is _____ element besides congestion _____ affects real _____ to the _____ maximum _____?

Do non-congestion _____ elements affect _____ speed _____ comparison to _____ stated _____ values _____ service _____?

_____ affect the speed _____ internet?

_____ and _____ beyond _____ impact real _____ compared to the advertised _____ of the internet _____.

It _____ possible that _____ factors _____ affect _____ bandwidth _____ congestion _____ transfer rate than _____ network _____ the _____ advertised by the internet service provider?

Do _____ related _____ impact _____ real _____ of the internet _____?

Is _____ are _____ factors _____ real data _____ than network overcrowding?

_____ than _____ certain things _____ affect optimal _____.

Is _____ network _____ causes less throughput?

Beyond _____ network overcrowding _____ have _____ to light, there _____ other _____ affect real _____ rates.

_____ things other than _____ congestion _____ my _____ compared to _____ to expect?

_____ the factors _____ network _____ affect throughput from _____ provider?

Is there anything _____ bandwidth beyond network congestion and _____ values _____ advertisements _____ provider?

_____ there more _____ traffic variables _____ internet _____?

Is there anything _____ that _____ throughput from _____ as advertised by the _____?

_____ the _____ congestion affect network _____?

_____ factor _____ the throughput of advertised maximums?

Do _____ beyond network congestion affect the _____ you _____ service _____?

Is it possible _____ than _____ have an _____ the true _____ rate?

Other elements _____ network overcrowding _____ affecting the _____ by _____ service _____

Do non-congestion _____ real _____ compared to _____ actual _____ of the _____ providers?

_____ there something _____ than network _____ causes _____ decreased throughput _____ maxes?

Network congestion and other _____ might affect _____ compared _____.

Is _____ that _____ than _____ contributes to the _____ throughput _____ service provider?

Is there another _____ on real _____?

_____ related _____ real speed _____ to _____ maximum values?

_____ than network _____ affect true _____?

When judging _____ relative _____ advertised _____ should factors _____ congestion _____ into consideration?

Network congestion _____ one of _____ that affect _____ but is _____ anything else _____ that _____ to advertised _____

_____ than _____ congestion affect my connection _____ to _____ speeds _____ to reach?

Do non-congestion _____ compared to the _____ of internet service providers

Do _____ than network congestion _____?

_____ something else that _____ and _____ outside _____ what happens _____ congested networks?

_____ factors _____ congestion _____ an _____ on the _____ of advertised _____?

_____ beyond network _____ should be _____ actual throughput _____ internet _____ providers.

Could there _____ than _____ overcrowding _____ transfer rates?

Network congestion _____ only impact on real _____ advertised _____.

Is the influence on _____ and _____ by ISPs _____ what _____ the _____?

_____ more to _____ real _____ than _____ overcrowding and _____ top speed advertised _____ service providers?

_____ a factor _____ affects actual _____ but is there _____ that's related to the advertised _____ by _____?

_____ more to _____ data _____ rate _____ network _____ and _____ top _____ advertised by _____ internet _____ providers?

_____ it _____ that extraneous factors _____ affect _____ beyond network _____?

_____ other than _____ throughput you _____ from an Internet service provider?

_____ other than _____ to affect the true transfer rate?

_____ non-congestion _____ elements impact _____?

Network congestion and other factors _____ affect actual _____ listed on _____ internet _____ providers _____.

Do _____ affect speed differently _____ internet service _____?

_____ addition to the _____ overcrowding issues that _____ to _____ are _____ things that could _____ transfer _____.

_____ something else besides _____ on _____ affects real _____ and maximums by ISPs?

Is _____ a _____ speed _____ the _____ of the _____ service providers and non-congestion related _____?

_____ congestion _____ factors may _____ opposed to the advertised maximum _____.

The Internet service provider's claims _____ speed _____ factors _____ than _____.

Is the _____ the internet _____ provider _____ non-congestion _____ elements?

_____ congestion _____ one _____ that affect throughput, _____ is there anything else _____ to the _____ values?

Is _____ more to data _____ than _____ network overcrowding _____ the top _____ by _____ Provider?

_____ non-congestion related elements affect _____ real _____ internet _____ provider?

_____ possible that there _____ more _____ variables that affect _____?

Other factors than _____ networks _____ affect _____ a _____ way _____ internet service _____.

_____ congestion and _____ the _____ affect _____ compared to advertised _____ of _____ ISPs

There could _____ real data transfer _____ network overcrowding.

_____ there any external elements _____ bandwidth beyond the _____ congestion, _____ the _____ of _____ internet service providers

The advertised _____ by _____ might _____ affected _____ network _____ other factors.

_____ is a _____ that affects throughput, _____ is there _____ related _____ advertised maximum _____?

_____ non-congestion related _____ transaction speed over the _____ service _____ values?

Do _____ additional _____ affect actual _____ contrary to _____ made by _____?

_____ congestion is one of _____ throughput, _____ anything else _____ related to advertised maximum values by _____?

_____ there more to the _____ transfer rate _____ the network _____ Speeds _____ by _____ internet _____ provider?

Do _____ related _____ affect the _____ stated speed?

Is _____ possible network _____ can affect actual throughput _____ to the _____ values _____ on _____ internet service _____

_____ a _____ other than network _____ throughput to be different _____ the advertised max _____?

What _____ impact on _____ throughput other than congested _____?

How _____ congestion and _____ network affect real throughput compared _____ the _____?

_____ speeds _____ factors _____ than congestion?

_____ there be more _____ traffic _____ internet _____?

Network congestion _____ the _____ impact real throughput _____ the _____ the ISPs

Is _____ that causes the _____ throughput to be _____ than _____ providers?

_____ one _____ the factors _____ affect throughput, but _____ there any other _____ advertised maximum _____?

_____ the _____ of data _____ to the _____ made by _____ ISPs?

Do _____ elements impact _____ speed more than _____ stated _____ values _____ service _____?

Do non-congestion related _____ impact _____ speed _____ maximum _____ internet service _____

Is _____ anything _____ that _____ differently _____ the advertised _____ of internet service _____?

_____ determining the actual _____ the advertised maximums should factors other _____?

Do _____ affect speed _____ than _____ internet service _____?

Over _____ above _____ issues, _____ there _____ factors affecting _____?

Do non- congestion related _____ real speed compared to _____ of _____ internet _____?

Network congestion _____ of _____ factors _____ actual throughput, but _____ there _____ that, that is related _____ the advertised _____

Is _____ more to real _____ the congested _____ stated _____ the _____?

There _____ be factors _____ network congestion _____ advertised maximums.

The _____ provider stated _____ but did _____ related _____ real speed?

Is it possible _____ factors _____ congestion _____ network _____?

_____ related _____ speed _____ than the _____ maximum values of _____ Internet _____ providers?

Is _____ possible _____ outside _____ traffic impact network _____?

The speeds _____ to _____ by _____ other than network congestion.

_____ do other _____ affect the internet _____?

Is it _____ more _____ element contributes _____ throughput _____ figures _____ internet service providers' websites?

_____ issue with advertised _____ too, but do _____ have a _____ in _____ transfer rates?

Is _____ that _____ elements affect _____ data _____ contrary _____ the promises _____ ISPs?

_____ there a _____ factor _____ congestion _____ causes the _____ throughput to be different _____ advertised max _____ service provider

_____ there more _____ network overcrowding and _____ top Speeds _____ by _____ service _____ involved in _____ data _____?

_____ factors _____ than congestion _____ network _____?

_____ it true that non-congestion _____ real _____?

Is _____ factor _____ congestion that _____ actual _____ to be _____ advertised max _____ for the internet service _____?

The _____ values _____ the _____ service provider are _____ do non-congestion _____ impact _____?

Is the influence on _____ throughput and stated _____ service _____ on congested networks?

_____ beyond _____ congestion _____ the _____ you can get from an _____ service _____?

_____ congestion, _____ well as _____ factors, _____ affect throughput _____ to the _____ values.

_____ the influence on _____ maximums by the ISPs _____ on the networks?

_____ additional elements _____ actual data _____ to _____ promises _____ internet service _____?

Is it true that more _____ to real throughput over _____ service _____?

_____ it true that more than _____ element contributes _____ throughput _____ the _____ maximum figures?

Is it true _____ factors beyond _____ throughput _____ maximums?

_____ additional factors affect _____ speed _____ the advertised _____ internet service _____?

_____ there _____ factor other _____ the network _____ that causes the actual throughput _____ advertised _____?

Do _____ impact real _____ compared to maximum values of _____?

_____ other influence _____ throughput other than congested _____ and stated _____?

_____ other factors _____ affect actual throughput as _____ the _____ values listed on the _____.

_____ other influence on _____ throughput besides _____ stated _____ the ISPs?

_____ non-congestion related _____ affect real _____ by internet _____?

_____ congestion _____ beyond _____ network impact real throughput _____ to _____ maximums of the _____

Is _____ true that _____ influences _____ and maximums _____ ISPs are _____ of _____ happens _____ congested networks?

_____ a _____ beyond _____ congestion _____ affects how much throughput you can _____ from an _____?

_____ and factors beyond _____ network have an affect on real _____ the _____ maximums _____.

_____ factors other than _____ speed?

Is there any elements that can _____ real-time bandwidth _____ congestion, affecting _____ values of the _____

_____ beyond _____ congestion be _____ when _____ actual throughput relative to _____ advertised _____?

Do factors outside _____ network congestion affect _____?

Do the additional elements _____ actual _____ transfer _____ the _____ of _____?

Is _____ a different _____ that causes _____ actual throughput _____ be different than _____ the _____?

In comparison to the _____ maximum values _____ congestion and other _____.

Is _____ for _____ than network _____ to have _____ on the _____ transfer _____?

_____ judging _____ throughput _____ advertised maximums _____ internet service _____ the factors beyond _____ congestion _____ considered?

_____ congestion is _____ of _____ factors _____ actual _____ but is _____ else related _____ the advertised maximum _____ by _____?

Do _____ related elements _____ real speed compared _____ the _____ of _____ internet _____

_____ judging _____ to the advertised maximums, _____ factors other _____ be taken into _____?

Is _____ influence _____ besides the _____ and stated _____ by the ISPs?

Do non-congestion _____ affect _____ speed as compared _____ of _____ service providers?

_____ there _____ the network _____ and the _____ advertised _____ Internet service providers?

_____ non-congestion related elements _____ transaction speed _____ than _____ providers _____ values?

_____ the amount of _____ you get _____ advertised internet service provider dependent _____?

_____ actual data transfer rates _____ than _____ simple _____ congestions advertised?

Is _____ to _____ actual data _____ rate _____ the network _____ and _____ top _____ the internet _____ providers?

_____ there _____ the _____ data _____ rate than the _____ that is affecting the _____ high _____ service providers?

_____ different _____ the _____ congestion that causes the actual throughput _____ be _____ than _____?

Network congestion and _____ the _____ impact _____ real throughput compared to the _____ the _____ providers

Network congestions _____ an _____ advertised speeds too, do _____ variables have _____ influencing data _____?

_____ real speed compared to _____ max values _____ internet _____ providers?

_____ impact real speed _____ the _____ values of the internet _____ providers?

Is _____ true that more _____ element _____ to _____ throughput _____ to _____ internet service _____ max _____?

Network _____ and _____ maximums of internet service _____ affect _____ throughput.

_____ that external elements could _____ time bandwidth _____ what the _____ says, in _____ congestion?

Network _____ is _____ of the _____ affect _____ throughput, _____ is _____ that _____ related to advertised _____ values?

_____ internet service providers have _____ maximum values, but _____ speed?

What _____ congestion and factors beyond the network _____ on real _____ compared _____ advertised _____ service _____?

_____ elements affect actual _____ transfer, _____ to the _____ the _____?

One _____ the _____ actual _____ is network congestion, but _____ there _____ that _____ related to advertised _____?

_____ beyond _____ congestion _____ affect _____ advertised maximums.

Beyond congested networks, _____ actual throughput _____?

Is there _____ that causes _____ and _____ to _____ different on the _____?

Is it _____ that _____ element contributes to _____ compared to _____ maximum _____?

In _____ top values held _____ the internet _____ provider do _____ crowded lines cause slower _____?

Do additional elements _____ actual _____ contrary to the _____ of _____?

Is _____ throughput _____ by _____ congestion _____ compared to advertised _____?
