

[Demo] NLP Dataset for Customer Service Automation

Company Type	Auto Repair and Maintenance Shops
Inquiry Category	Car heater not working properly
Inquiry Sub-Category	Temperature control issues
Description	Customers find that they are unable to properly control the temperature of the air coming from their car's heater. This could be caused by a faulty temperature control valve, blend door actuator, or a malfunctioning thermostat.
Data Size	5,458 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Auto Repair and Maintenance Shop" customer inquiry. (Purchased data will not be masked.)
