

[Demo] NLP Dataset for Customer Service Automation

Company Type	Home Security and Alarm Companies
Inquiry Category	Alarm system installation process
Inquiry Sub-Category	Equipment inquiries
Description	Customers seek guidance on the different types of alarm system equipment available, such as sensors, control panels, cameras, and connectivity options.
Data Size	5,012 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Home Security and Alarm Company" customer inquiry. (Purchased data will not be masked.)

Do _____ need _____ life considerations or run on a centralized _____?
_____ life _____ apply _____ equipment or _____ it _____ from a centrally _____ unit?
_____ the _____ their own power _____ or _____ rely _____ a _____ unit
Do the equipment need _____ power _____ should _____ centralized power _____?
Do the equipmentRequire individual _____ or just _____ unit _____?
_____ equipment _____ individual _____ sources or _____ single _____ supply unit?
Is _____ that _____ run _____ power sources or _____ centralized system?
It's a question _____ whether _____ device _____ source or a _____.
_____ need _____ use separate _____ for the _____ or will they use _____ supply?
_____ require _____ power sources or _____ one _____ supply unit?
_____ concerns _____ to _____ equipment _____ do they all run from a _____?
Does _____ need _____ power or can _____ centrally _____?
_____ the _____ power sources or just _____ single power supply _____?
_____ devices can either need _____ power _____ or _____ upon _____ central _____.
_____ it necessary to _____ batteries for _____ device, or if they _____ system?
_____ good question is _____ devices _____ source or central unit.
Do _____ equipment _____ an individual power _____ or _____ for _____?
_____ equipment able to run _____ supply unit?
_____ question _____ whether or not _____ their _____ power source _____ unit.
Are the _____ powered _____ or a _____ unit?
_____ the _____ run _____ a centralized _____?
Does each _____ a _____ source _____ a central _____?
Should _____ by _____ centralized _____ supply unit or by _____ power _____?
_____ equipment might require individual _____ a _____ power _____ unit.
I need _____ know _____ need _____ power _____ for _____ devices or a _____.
Do _____ need _____ sources of _____ will they use _____ same power _____ arrangement?
_____ life _____ to each equipment, or does they run from _____ supply _____?
_____ equipment _____ unit or individual power sources?

Do _____ power sources _____ they rely _____ a single _____ unit?

Do I _____ individual _____ for the _____ or do _____ depend on _____?

_____ each piece _____ equipment _____ on its own power source _____ it _____ by _____?

Do all _____ batteries _____ centralized power setup?

Do the devices need separate power _____ run _____ a _____?

Does _____ individual power sources or _____ supplies?

_____ I consider _____ life _____ each piece _____ equipment, _____ if I _____ a _____ supply?

Do _____ necessitate individual _____ just _____ single power supply _____?

_____ there _____ sources of energy _____ the equipment _____ a common power _____ arrangement?

_____ item need its _____ power source, _____ a _____?

Does battery life concerns apply _____ do _____ power supply unit?

_____ equipment _____ to run _____ centralized power _____ unit _____ power sources?

_____ the equipment need individual power _____ or a _____?

Is it _____ to consider the _____ or the _____ system?

Is _____ need _____ individual _____ equipment or _____ on _____ supply?

Does _____ of equipment _____ or is it powered _____ a central unit?

Is _____ for individual power sources or _____ on a _____ supply _____?

Do the _____ to _____ each device's operation, or can _____ run _____ one _____ power _____?

Do _____ power _____ devices or do _____ need to be _____?

_____ need separate batteries or _____?

_____ these _____ need _____ power supplies or _____ powered _____?

_____ equipment _____ individual _____ power or should _____ use _____ power supply unit?

_____ individual _____ for equipment _____ relying _____ centralized supply?

_____ think about _____ life for each piece of _____ or _____ use _____ shared _____.

_____ it _____ to consider batteries _____ each _____ or can they run _____?

Is it _____ the _____ have _____ power sources _____ a centralized _____?

_____ the devices run _____ sources _____ a centralized _____ system?

_____ each piece _____ equipment _____ on its _____ source _____ there a shared _____ that powers _____?

Do the devices _____ own _____ of _____ on a _____ unit?

_____ batteries need _____ considered for each _____ operation or can they _____ one _____?

Do _____ their _____ power _____ or is there _____ unit to power _____?

_____ gear need _____ separate _____ supply _____ centralized power _____?

The _____ need to have their own power _____.

Does _____ life _____ apply _____ each equipment _____ from _____ power supply unit?

Do _____ devices _____ to run _____ a _____ unit _____ separate _____?

Does _____ life _____ apply _____ each _____ or _____ the _____ supply unit _____?

_____ require individual _____ sources, or _____ centralized unit _____ power?

_____ life concerns _____ each equipment, or do _____ run _____ centrally power _____?

Do batteries _____ to _____ considered _____ each _____ or can _____ be _____ on _____ power system?

_____ each _____ require _____ or _____ it be powered _____?

Do _____ need separate _____ energy _____ equipment, _____ they _____ the _____ power supply?

_____ battery _____ concerns _____ equipment or is it from a _____ power _____?

Do the devices need their _____ is _____ a _____?

Is _____ individual power _____ for the _____ or _____ a centralized unit?

Do the _____ individual power _____ or just a _____ supply _____?

_____ battery life be considered for each _____ a shared _____ supply?

Do the equipment _____ individual power _____ or should _____ a _____ power _____?

Do _____ equipment require individual power _____ just _____ unit _____ power _____?

_____ it _____ the devices to _____ individual _____ sources _____ it a centralized _____?

Do _____ separate _____ sources for _____ equipment, or will _____ work with a _____?

_____ individual _____ sources or a centralized power _____.
 Do the _____ need _____ own _____ or _____ they rely _____ a _____ unit?
 _____ necessary to consider the batteries _____ device, _____ on one _____ power system?
 Does battery _____ concerns _____ to each _____ they _____ from a _____ unit?
 _____ the _____ individual power sources/battery _____ considerations or a single _____?
 Is the device _____ power sources or _____?
 _____ equipment need individual _____ or _____ centralized _____ supply unit?
 The _____ may _____ require _____ depend on a central unit.
 _____ battery life concerns _____ each equipment, or _____ come from _____ supply _____?
 _____ power sources or a _____ unit?
 _____ devices use _____ power _____ or do they rely _____ system?
 _____ their _____ power source, or _____ will depend _____ a _____ unit.
 Will I _____ more sources of _____ or will _____ one centralized _____?
 _____ I _____ individual power _____ the _____ or _____ they _____ from a _____ unit?
 Do the _____ use _____ power sources _____ a _____ power _____?
 Does the _____ centralized power _____ or _____ sources?
 Is _____ requires _____ power _____ a _____ power supply unit?
 _____ the equipment need _____ individual _____ just a centralized _____?
 _____ the equipment _____ individual power sources _____ run _____ centralized power supply _____.
 _____ apply _____ each _____ or _____ they a centrally powered unit?
 _____ a power source _____ a centralized one?
 Does the _____ need individual power _____ powered _____?
 Does _____ affect _____ run from a central powered unit?
 _____ the _____ their own _____ source _____ is _____ a central unit _____ powers _____?
 _____ have their own power sources _____ central _____?
 _____ of individual power sources or _____ for the devices?
 Do the items _____ own power _____ unit?
 Does _____ individual _____ sources _____ central power supply unit?
 _____ the _____ need _____ own power source _____ rely _____ single _____?
 _____ concerns apply _____ each equipment, _____ do they _____ a _____ supply unit?
 _____ equipment _____ separate _____ sources or will they use the same _____ supply?
 Do _____ needs _____ power _____ or a centralized _____?
 _____ needs individual power sources or a _____?
 Do the equipment _____ sources or _____ use _____ supply unit?
 Does the battery life _____ equipment, _____ they _____ a power _____ unit?
 Do battery life _____ to equipment, _____ do _____ from _____ centralized _____ supply _____?
 It _____ question _____ the _____ their own power source or a _____.
 Do each _____ its _____ source _____ is _____ a shared central _____ to power them all?
 I want _____ if _____ need _____ power _____ or _____ they operate _____ a centralized _____.
 Does battery _____ concerns apply _____ each equipment _____ if _____ run _____ unit?
 Are _____ equipment _____ separate sources _____ or _____ life?
 Does _____ a power _____ central unit?
 Do the equipment require _____ power sources or _____ it _____ power _____?
 Do the equipment need _____ power _____ or _____ centralized power _____ unit?
 Does _____ individual _____ or just a _____ supply unit?
 _____ equipment _____ individual power Sources or just _____?
 The equipment may _____ power _____ or _____ for power.
 Or are _____ powered _____ a _____?
 The equipment _____ individual power sources/battery life _____ single power _____.
 _____ there individual _____ sources or _____ power _____ unit _____ equipment?

____ the equipment ____ a centralized power supply ____ of power?
 ____ life concern ____ to ____ equipment ____ do they operate from ____ supply ____?
 Does ____ piece of ____ its own ____ source, ____ is ____ powered by ____ shared ____ unit?
 Do the ____ a power ____ of ____ central one?
 Do the ____ individual ____ sources ____ a single ____?
 ____ there separate energy ____ for the ____ or will ____ use ____ supply ____?
 ____ devices need their own ____ or ____ there ____ central ____ powers them?
 ____ need to ____ considered for each device's ____ can they ____ one ____ system?
 ____ the ____ life concerns ____ to each equipment or ____ a ____ power ____?
 I don't ____ if ____ individual ____ or ____ devices ____ from a ____ unit.
 Does ____ concerns apply ____ each ____ if ____ run ____ a ____ supply unit?
 The question is if ____ devices ____ source ____ central unit.
 Can ____ a ____ supply?
 Do the ____ their own power source or ____ a ____ them?
 ____ batteries ____ each device's operation ____ they be ____ on ____ central ____ system?
 ____ about the battery life for ____ of ____ will they use a shared ____?
 Do the devices ____ own power source ____ central ____?
 ____ the equipment ____ individual ____ sources or ____ supply unit?
 ____ the ____ a specific ____ a central unit?
 The ____ needs individual ____ sources, ____ centralized unit?
 Does battery ____ concerns apply to ____ equipment, ____ operate from ____ unit?
 ____ is ____ the ____ for a device's operation ____ if they ____ use ____ central ____
 The ____ may need separate power ____ or ____
 ____ need a ____ of their ____ or ____ a central unit ____?
 ____ equipment ____ power sources or ____ centralized ____ for power?
 Does ____ life concern apply to equipment ____ do ____ unit?
 ____ individual power sources or a ____ unit ____?
 Do the ____ require ____ power sources or ____ unit?
 ____ each equipment ____ power ____ a centralized unit?
 ____ its own power or ____ it powered centrally?
 Do I ____ individual power ____ the device or ____ centralized ____?
 Should the equipment use ____ power ____ use ____ power ____?
 Do ____ equipment need individual power ____ centralized unit?
 ____ devices ____ their own power ____ or ____ so it ____ a ____ question.
 Does ____ piece ____ equipment rely ____ source of ____ or ____ powered ____ a central unit?
 ____ a ____ whether the ____ requires ____ own ____ or a central ____.
 ____ equipment need its own power ____ or ____ a unified ____?
 Does ____ to each equipment, ____ if they run ____ unit?
 ____ the devices ____ a power ____ of their own or ____ central ____?
 Is the ____ needed for separate ____ sources ____?
 Do ____ concerns ____ equipment, ____ do they ____ a ____ power supply unit?
 ____ the ____ individual ____ or just a centralized ____?
 ____ I ____ individual ____ sources for ____ devices ____ do they ____ a centralized ____?
 ____ the ____ individual power supplies or ____?
 ____ device need to ____ separate power ____ or ____ central ____?
 Is ____ equipment ____ individual power ____ or should it ____ power supply ____?
 ____ battery ____ concerns apply ____ each ____ does ____ run ____ a centralized ____?
 ____ these ____ powered ____ or do ____ require ____ supplies?
 ____ a good one because ____ may ____ their own power source or ____.
 ____ batteries need ____ be ____ each ____ operation, ____ can ____ run on a ____ power system?

____ I ____ about ____ for each piece of equipment, or should they ____ shared ____?

Does battery ____ concerns apply ____ equipment and ____ they ____ from ____ unit?

____ devices need ____ own power ____ or ____ central ____ been ____ to ____ them?

Is ____ equipment capable ____ running ____ power ____ unit?

____ devices ____ to have ____ own ____ rely ____ a central unit?

Is it necessary for ____ device ____ have ____ or ____ centrally?

It's ____ question ____ or not the ____ require ____ power ____ or ____ unit.

The ____ may require ____ source or rely ____ central _____.

Is ____ necessary ____ the equipment to ____ they use ____ same power supply?

____ may need ____ source ____ own ____ a central unit.

Is individual power needed for ____ supplies?

____ life ____ apply to equipment, or if ____ run ____ central ____?

The devices may require their ____ or ____ is a question ____ need.

It ____ consider ____ batteries ____ device's operation or ____ just use one central power.

____ piece of equipment depend on ____ own ____ is there a shared ____ unit ____ them ____?

Do batteries need to ____ considered ____ each ____ should they run ____ system?

Should it ____ a centralized ____ supply unit ____ it ____ individual ____?

Does the ____ individual power sources or just ____ power?

____ batteries ____ considered for ____ device's operation, ____ should ____ on one ____ system?

Are ____ separate ____ sources ____ central ____ for ____ devices?

____ need individual power ____ can ____ rely ____ one centralized unit?

____ need its own power source ____ centralized ____?

Do the devices need ____ is ____ a central ____ power them?

Do ____ have to ____ considered ____ device's ____ or ____ they ____ to ____ on ____ central ____ system?

____ a ____ question since ____ may ____ their own power ____ central _____.

____ devices are ____ or do they ____ power ____?

Does ____ life concerns ____ to each ____ or is ____ a ____?

Will ____ more ____ sources ____ will the equipment just run ____ one ____?

Do the equipment need individual ____ or ____?

____ own power source ____ depend upon the ____ unit.

____ there ____ for separate ____ sources for ____ equipment or ____ common power ____ arrangement?

Should ____ equipment ____ powered by ____ power ____ a centralized ____ unit?

____ equipment require individual power sources ____ on ____ power supply unit.

____ the ____ need their ____ power ____ use ____ central unit?

Do ____ concerns apply ____ each equipment, or ____ operate from ____ supply ____?

____ life concerns apply ____ each ____ they ____ from ____ central unit?

Should the ____ individual ____ sources ____ should it ____ a ____ supply ____?

I ____ I need individual ____ sources ____ the devices or if they ____ a _____.

Should ____ consider ____ each piece of equipment, ____ should they ____ shared power ____?

The equipment ____ power sources ____ a ____ power ____ unit.

Does ____ item require ____ or a ____ unit?

It's important to consider the ____ for ____ should ____ one ____ power.

Is it a ____ for ____ devices ____ have individual ____ unit?

____ life ____ apply ____ equipment, or is ____ a ____ supply unit?

Do battery ____ concerns apply ____ every equipment or ____ they ____ a ____?

Do ____ require ____ power sources ____ run on ____ supply unit?

The equipment may ____ and battery life _____.

Do the ____ need ____ is it powered ____?

Does ____ to each equipment or do they operate ____ power ____?

____ it necessary ____ batteries for ____ or ____ one central power system?

____ it necessary ____ separate ____ sources for the ____ or will they ____ a ____ power ____ ?
 The devices need ____ source or ____ unit?
 Is ____ equipment ____ need of separate ____ or ____ ?
 Does the ____ individual power sources/battery ____ considerations, or ____ power ____ ?
 ____ need ____ if the devices need ____ source or ____ central unit.
 Does the ____ need ____ own ____ or ____ ?
 Do batteries have to be considered ____ each ____ or ____ they ____ run ____ system?
 ____ the ____ their own power ____ or is ____ the ____ that powers ____ ?
 Do the devices need ____ own power ____ unit?
 Is ____ device needs ____ power or ____ it be ____ powered?
 The question ____ whether or not ____ requires ____ power ____ or ____ .
 Is there a ____ centralized power ____ equipment?
 Does battery ____ each equipment or do ____ run from ____ ?
 ____ the ____ need ____ power source or ____ a central unit?
 Is the ____ sources or a central ____ ?
 It ____ a good question if the ____ need ____ source ____ .
 Do the ____ sources ____ should ____ run on ____ power source?
 Do ____ require individual power ____ centralized ____ ?
 Should ____ be ____ on a centralized power supply ____ power ____ ?
 ____ the ____ require ____ power ____ a centralized ____ for power
 The ____ may ____ their ____ power source ____ central ____ order to ____ .
 ____ equipment ____ individual power sources/battery ____ there is ____ power supply ____ .
 ____ there a ____ for individual ____ sources ____ the devices or ____ it ____ ?
 ____ battery life concerns ____ to each ____ or does it ____ powered power ____ ?
 Is ____ a ____ for ____ energy ____ for ____ equipment, or ____ work ____ one common power ____ ?
 Should ____ for each ____ or should ____ run on ____ single ____ system?
 Is there a ____ separate sources of ____ or ____ they ____ the same ____ supply ____ ?
 ____ consider ____ life for ____ equipment, or ____ I just use a ____ supply?
 Is it ____ to have ____ can ____ one power ____ ?
 Do the ____ their ____ power ____ or central ____ ?
 Devices ____ own power ____ depend on a ____ unit.
 Do ____ need a power source ____ their ____ a central ____ ?
 Do the ____ need a power source ____ their ____ or ____ ?
 Do batteries need to ____ each device's ____ only ____ power system?
 Does ____ to have ____ power source ____ unit?
 Is ____ a need for ____ sources ____ the equipment ____ will ____ a ____ power ____ arrangement?
 ____ battery life concerns apply ____ equipment, ____ run from ____ power ____ ?
 ____ need individual power ____ the ____ do they ____ a centralized unit?
 Does the equipment ____ individual power ____ a ____ for ____ ?
 Do ____ be ____ each device's ____ or ____ they need ____ run on one ____ system?
 ____ individual power ____ for ____ devices, or a ____ unit?
 ____ battery life ____ to the ____ or ____ they operate ____ a centralized ____ unit?
 ____ equipment required ____ use individual ____ sources or ____ power supply ____ ?
 ____ individual ____ needed for equipment or ____ a ____ ?
 Does ____ equipment require ____ power ____ is there a centralized ____ unit?
 Will I need extra power ____ the ____ just run ____ thingamajig?
 ____ can either ____ their ____ power ____ or rely upon ____ unit.
 Do the ____ have their ____ power ____ or ____ central unit?
 ____ it ____ for ____ power for ____ or ____ on ____ supply?
 ____ equipment need to ____ their own ____ rely on one centralized ____ ?

_____ to each _____ do it _____ from a centrally powered unit?

_____ the equipment need to have _____ or battery _____?

_____ need their _____ source or is it a _____?

_____ it necessary to _____ separate _____ sources for equipment or _____ common _____ supply _____?

Should the _____ power _____ or _____?

Should _____ have individual power _____ or _____ power _____ unit?

Do _____ need individual power _____ a _____ power _____?

_____ need individual power _____ the _____ or _____ they use _____ unit.

_____ the _____ apply _____ each equipment _____ they _____ from the power _____ unit?

Do the devices _____ source _____ a central _____ to _____ them?

It _____ question of _____ as the devices may _____ their _____ or _____.

_____ piece of equipment need _____ source or _____ use a _____ electrical _____?

_____ life concern applicable _____ equipment, _____ is it _____ centralized power _____ unit?

Is the _____ power sources _____ just _____ centralized unit?

Is the _____ individual _____ sources _____ just a _____?

_____ the _____ need their _____ does a central unit power _____?

Does _____ requires individual _____ or just a single _____?

_____ each item _____ power source _____ central unit?

Should _____ run on a centralized _____ unit or _____?

Do the _____ need _____ power source _____ own _____ rely on _____?

_____ the _____ their own _____ source or _____ powered _____ a _____ unit?

Is there _____ for individual _____ equipment _____ on centralized _____?

Does _____ life _____ apply _____ equipment, or _____ they _____ from _____?

_____ each _____ of _____ have _____ own _____ or is _____ powered by a _____ central _____?

_____ need to _____ device's operation or can they be _____ on a single _____?

_____ piece of _____ rely on its _____ does _____ central unit power them all?

_____ need individual _____ or _____ powered centrally?

_____ the devices _____ their _____ source _____ it a _____ unit?

_____ the equipment _____ power _____ or battery _____?

_____ are powered centrally, _____ do _____ require _____ power _____?

Does each device _____ can it be _____?

It's a _____ whether _____ the _____ require a power _____ unit.

_____ to use individual power sources or _____ it _____ a centralized _____ supply _____?

Should _____ be _____ for each _____ should they _____ on _____ single power _____?

Do _____ need _____ a central unit or _____ sources of _____?

Should I consider battery _____ each _____ of _____ they _____ a shared _____.

Do _____ equipment _____ an individual _____ source _____ just _____ unit?

_____ the _____ require _____ sources or just a _____?

Do equipment _____ individual power _____ it run _____ a _____?

_____ equipment require _____ power sources, or _____ single power _____?

The devices _____ a _____ source _____ a _____ unit.

Do _____ equipment need individual _____ or should _____ on _____ supply unit

_____ necessary to _____ the batteries for a _____ operation or _____ they should _____ one _____.

_____ the devices _____ to have their own power _____?

_____ apply _____ equipment, or do they _____ from the _____ supply unit?

Do the equipment _____ centralized _____ individual power source?

Does _____ battery _____ apply to each _____ or do they _____ a _____ supply _____?

_____ the _____ requires individual _____ just _____ centralized unit?

Does equipment _____ individual _____ or _____ one _____ power _____?

_____ know _____ I need individual _____ the _____ or if they use a centralized _____.

Is the ____ needs ____ sources ____ a centralized power ____ ?
 ____ piece ____ rely on ____ own ____ source ____ does ____ shared ____ unit power them ____ together?

Are ____ powered centrally ____ do ____ need ____ power ____ ?
 ____ the ____ require ____ sources ____ just a single power ____ ?
 ____ the equipment ____ individual ____ sources or should ____ centralized power ____ ?
 ____ battery ____ apply ____ each equipment? or ____ they ____ a centrally ____ unit?
 ____ I ____ life for ____ piece of equipment, ____ shared power supply.
 ____ the ____ need ____ or ____ centralized power supply unit.

Do the ____ a power ____ or ____ a ____ unit?

Is it ____ the devices to have individual ____ is ____ a ____ ?

Do ____ need ____ power ____ the ____ a centralized unit for ____ ?
 ____ need a power source ____ central unit?
 ____ the equipment ____ power sources ____ single ____ supply unit?
 ____ to have ____ power ____ or only ____ centralized unit?
 ____ batteries ____ considered for each device's ____ can they ____ used ____ central power system?

Is there ____ energy sources ____ is there one ____ power supply?
 ____ have individual power sources ____ just a centralized ____ for ____ ?
 ____ the equipment requires ____ or a centralized ____ ?
 ____ separate sources ____ power or ____ central unit?

Do ____ equipment ____ individual power sources or ____ by ____ unit?

Do ____ need individual power ____ or need ____ power ____ ?
 ____ devices may use independent ____ sources ____ rely on ____ .
 ____ is ____ or ____ the ____ a ____ source or central unit.
 ____ each ____ need a ____ source ____ central ____ ?
 ____ may need ____ single ____ unit or individual power ____ .

Do ____ separate sources of energy ____ or ____ they use ____ supply?
 ____ have ____ sources or just ____ unit for power?
 ____ all ____ equipment reliant ____ one centralized ____ their own individual ____ sources?

Does the equipment ____ own power ____ or ____ ?
 ____ equipment ____ own ____ sources or ____ they ____ a centralized unit?
 ____ equipment need their own individual ____ they rely ____ a centralized ____ ?
 ____ battery ____ affect each equipment, or ____ they run ____ unit?

Should the equipment ____ a ____ supply unit?

Is the equipment required ____ have individual power ____ a ____ ?
 ____ the equipment ____ power ____ or ____ it use a ____ power ____ unit?
 ____ there ____ need ____ energy ____ for the equipment or ____ it ____ the same power ____ ?
 ____ battery life concerns ____ each equipment ____ they ____ a ____ powered unit?
 ____ if ____ separate ____ for ____ or just one common power supply arrangement.
 ____ I ____ life ____ each piece ____ or will ____ use a shared ____
 ____ the ____ need their own power sources ____ can ____ depend ____ single ____ ?

Will I need ____ or will ____ equipment ____ off ____ thingamajig?
 ____ need to be separate power ____ life ____ equipment?

Do ____ centralized power supply unit ____ battery ____ to each equipment?

Do ____ equipment need individual ____ or ____ centralized ____ .
 ____ concerns ____ each equipment, ____ do they run ____ a centrally powered ____ supply ____ .
 ____ battery life concerns ____ or do ____ from a centralized power ____
 ____ these devices need ____ supplies ____ centrally powered?

Do ____ equipment need individual ____ sources ____ a ____ ?

Can ____ be run on ____ centralized ____ unit?
 ____ may require ____ own power ____ or ____ on ____ unit.

Does battery _____ concerns _____ each equipment or _____ it _____ central power _____?

Are the devices _____ need individual power _____?

Is _____ provide _____ batteries _____ each _____ or should _____ use _____ single main power _____?

_____ device need _____ run _____ a _____ unit or _____ power _____?

_____ machines require their own power _____?

Does _____ equipment _____ individual _____ sources _____ a single _____ unit?

_____ require _____ power sources or should it _____ on _____ supply unit?

_____ need individual _____ for _____ or _____ they need _____ centralized unit?

_____ about battery life for _____ piece _____ equipment, _____ will _____ shared _____ supply?

_____ life concerns apply to equipment, _____ run _____ a centrally _____?

Do _____ individual power _____ or _____ it powered _____?

I _____ know if _____ need _____ sources for _____ or if they need _____ unit.

Do _____ power _____ or just a _____ unit?

_____ need separate _____ or _____ they be powered _____?

Does _____ battery life _____ each _____ run from a _____ supply unit?

Do equipment _____ sources or a _____ unit?

_____ need _____ power _____ or just rely on _____ central _____?

The _____ may _____ their own _____ on a central _____.

Does _____ equipment _____ power _____ just _____ centralized unit _____ power?

_____ concerns apply _____ equipment _____ does it just run from _____ unit?

_____ their _____ power _____ just rely on a central unit?

_____ need their _____ power source _____ there _____ central _____ used to power _____?

Does each piece _____ its own power _____ central unit power it all?

Is _____ devices _____ use individual power _____ or is it just _____?

_____ is _____ the devices require _____ power _____ or a _____.

Do _____ need _____ have _____ own power _____ or one _____?

Is _____ necessary to think _____ batteries _____ each _____ or _____ they _____ system?

Do machines _____ own _____ of power _____ unit?

Does _____ device _____ power or _____ it _____ powered?

It's a _____ question if the _____ a _____ source _____.

Do _____ need their _____ source _____ supplied by a central _____?

Do the _____ use _____ sources or rely _____ centralized _____?

Do _____ need _____ considered for each device's _____ run _____ one _____ power system?

_____ concerns apply to equipment, or _____ power supply unit?

_____ require individual _____ or should _____ have a centralized _____ supply?

Does battery life _____ or do _____ from a _____ power supply?

Are batteries _____ for each device's _____ or can _____ power _____?

Do _____ power supplies or are _____ powered centrally?

_____ life concerns apply _____ or _____ they _____ from _____ centralized power _____ unit?

_____ battery _____ concerns apply to _____ does _____ run from _____ power _____?

The _____ whether the _____ own power _____ or _____ central unit.

Does battery _____ apply to each equipment _____ from _____ power supply _____?

Does battery life concerns _____ to _____ do they run _____ unit?

_____ the equipment require _____ power sources or _____ single _____?

Does battery life concerns apply _____ or do _____ supply _____?

_____ can need _____ own power _____ or _____ central _____.

It's _____ to consider the batteries for _____ if _____ should just _____ one _____.

Is _____ equipment _____ individual _____ or is _____ power supply unit?

_____ equipment _____ individual power _____ a centralized _____ unit.

_____ need _____ power _____ of their own or _____ a _____ unit _____ them?

Consider _____ a device's operation _____ they _____ on just a _____.

_____ the equipment _____ power sources, or _____ centralized _____?

Is it necessary for _____ equipment to _____ centralized unit?

Do the equipment need _____ sources or _____ unit _____.

_____ it possible _____ each device _____ separate power _____ can _____ centrally?

Does _____ need a _____ or _____ central one?

_____ equipment need individual power sources _____ on a _____ unit?

_____ there a need for separate energy _____ for the _____ a _____?

_____ batteries need to _____ considered for _____ device's operation, or can they be _____?

Do the equipment _____ their _____ sources _____ can _____ use _____ centralized _____?

_____ need to _____ individual _____ sources or a _____ power _____ unit?

Do the _____ need _____ sources _____ single _____ supply unit.

_____ needs _____ power _____ or a _____ supply unit.

Does _____ centralized _____ individual _____ sources?

_____ run on a _____ or separate power sources?

Do _____ need _____ power sources _____ rely on a _____ supply _____?

_____ the equipment _____ individual _____ a centralized unit?

Does the device require separate _____ central _____?

Is _____ need _____ energy sources _____ equipment, or will they _____ the _____ supply?

Will I _____ will the _____ run on one _____ thingamajig?

Do the _____ need their own _____ unit

Do _____ separate _____ sources for _____ equipment _____ they use _____ common power _____?

The _____ their own power _____ or depend _____ unit.

Do the _____ power sources _____ should _____ centralized power supply?

_____ the devices _____ their own _____ source _____ the _____ unit?

_____ battery life _____ apply to each _____ run _____ a centrally _____ unit

_____ need separate power _____ can they be _____?

_____ life concerns _____ to each equipment, _____ operate from _____ power _____ unit?

_____ devices _____ power _____ or is it _____ unit that powers them?

_____ possible that each _____ or can they be _____ centrally?

_____ to _____ if _____ need separate energy sources _____ the _____ or if they _____ a _____ supply _____.

Do I _____ separate _____ of energy _____ use a common power _____ arrangement?

_____ equipment _____ a centralized power _____ unit _____ if it requires _____ sources?

Does _____ equipment _____ sources or _____ they rely on _____ centralized _____?

Can the _____ one _____ unit, _____ need _____ own individual power sources?

There is a question _____ whether _____ need _____ power _____ central _____.

I _____ know _____ sources or a centralized _____ for _____ devices.

_____ need _____ supplies _____ are they powered centrally?

_____ the devices _____ their own power source _____ is _____ unit _____ power _____?

Do the _____ individual power source or _____?

Are _____ requires individual _____ sources or _____ centralized _____?

_____ don't know if I _____ individual power _____ for the _____ or if _____ centralized _____.

Do _____ equipment _____ to _____ individual power sources _____ it use _____ unit?

_____ the _____ require their own _____ do they use _____ unit?

_____ devices _____ to have individual _____ supplies or are _____?

_____ piece _____ equipment need its own _____ of the battery?

Do _____ devices need a power _____ that _____ a central _____?

_____ your system _____ an independent _____ unit, _____ centralized energy _____?

The _____ can _____ their own _____ source _____ rely _____ central _____.

_____ requires individual power sources or _____ centralized unit for _____?

_____ equipment _____ power sources or _____ it _____ a centralized power _____ .
 _____ life _____ apply _____ each _____ or do they _____ from a _____ ?
 _____ I need to use _____ sources _____ the equipment _____ do _____ use _____ power supply _____ ?
 _____ that each _____ needs separate _____ or can _____ be _____ powered?
 _____ the devices powered _____ or do _____ supplies?
 Do batteries need _____ be considered _____ operation, or _____ to run on _____ central _____ ?
 Do the _____ power _____ just a _____ of power supply?
 _____ to _____ separate energy sources for equipment or _____ use _____ power _____ arrangement?
 _____ the equipment require _____ power _____ should _____ be _____ on _____ supply unit?
 _____ power sources _____ a single power supply unit.
 _____ concerns _____ each equipment, _____ is _____ a centralized _____ supply unit?
 _____ do not _____ if _____ individual _____ sources or _____ unit for _____ devices.
 _____ the _____ require their _____ power _____ a central _____ ?
 _____ life _____ apply _____ equipment, or _____ they operate _____ a power _____ unit?
 Should I _____ for each piece _____ equipment, or _____ a _____ supply?
 Do _____ devices _____ source of their own _____ a _____ ?
 Are there _____ sources for _____ will they _____ the same power _____ ?
 Is _____ the _____ to _____ individual _____ supplies or _____ they powered _____ ?
 The _____ can require _____ power _____ depend on _____ unit.
 _____ the _____ need _____ power source or a _____ ?
 The _____ may _____ own power source or _____ on _____ .
 Do equipment _____ sources or can they _____ a _____ ?
 Do _____ to each equipment or do they _____ centralized _____ supply _____ .
 Should batteries _____ for _____ device's operation, _____ should _____ one power system?
 Is _____ power _____ dependency on centralized supply?
 Will _____ need _____ power sources or _____ considerations?
 Do battery _____ equipment, or do _____ work _____ a _____ power supply _____ ?
 The _____ may _____ source or a _____ so it's _____ question of _____ .
 _____ battery life concerns _____ to _____ equipment, _____ from a _____ powered unit?
 Do I need _____ use separate energy sources _____ the equipment _____ will _____ use _____ ?
 _____ battery _____ apply to each _____ does _____ run _____ a _____ powered unit?
 _____ is _____ whether _____ devices need _____ or a central unit.
 _____ need _____ batteries _____ a centralized _____ ?
 _____ the devices require _____ power _____ of _____ own _____ it _____ unit?
 Do _____ power _____ or centrally _____ ?
 _____ batteries need _____ considered for _____ operation, or can _____ be used _____ power _____ ?
 Do _____ require _____ sources _____ does it _____ a centralized power _____ unit?
 _____ equipment requiring _____ sources or just _____ centralized _____ ?
 Is _____ possible that the equipment _____ power _____ or _____ a _____ ?
 Should _____ run _____ a _____ supply unit _____ the individual _____ sources?
 _____ devices _____ to _____ central _____ or separate power sources.
 _____ each piece of _____ its _____ source or is _____ shared central unit to _____ ?
 _____ devices _____ separate _____ or _____ they be _____ centrally?
 _____ necessary _____ use _____ energy _____ for the equipment, _____ they _____ a common power _____ arrangement?
 _____ devices _____ their own _____ rely on a central unit?
 _____ battery _____ each equipment _____ does it _____ from _____ central _____ supply unit?
 Does battery life _____ to each _____ or _____ unit?
 Do devices _____ power source _____ rely on _____ unit?
 Does battery _____ concerns apply _____ is it _____ a _____ power _____ unit?
 _____ a _____ equipment _____ on its _____ power _____ or _____ it powered by _____ single central _____ ?

Does _____ concerns _____ each equipment, or _____ from _____ powered power _____ unit?

Do _____ equipment _____ sources _____ centralized power supply.

Does each _____ depend _____ its _____ source, or does _____ shared _____ unit _____ them all?

Do battery life concerns apply to _____ equipment, _____ centralized _____ supply unit?

I'm _____ sure if I _____ individual _____ for the devices _____ operate from _____ unit.

Do _____ be _____ for each device's _____ or can _____ run _____ system?

Should _____ equipment run _____ centralized _____ do they need individual _____ sources?

Will _____ additional _____ sources or _____ the equipment _____ on _____ thingamajig?

_____ I need additional _____ the _____ run _____ one centralized thingamajig?

Does battery _____ to equipment and _____ they run from _____?

_____ each _____ on its own _____ of power _____ is _____ powered by _____ single _____ unit?

Is _____ their own power source _____ unit?

_____ the equipment _____ individual _____ sources _____ a central _____?

Do the _____ own power or _____ powered centrally?

_____ a _____ energy sources for _____ or will they _____ using _____ power supply arrangement?

_____ may require their own power _____ on _____ unit

It is necessary to _____ the _____ device's _____ or _____ operate _____ power system.

Is it necessary to _____ for each _____ can _____ central power _____?

_____ may _____ their own power source _____ a _____.

Does _____ concerns apply to each equipment _____ run from a _____ unit?

_____ equipment run _____ a centralized _____ if _____ requires individual _____ sources?

_____ have _____ use individual power _____ for _____ devices or _____ they _____ centralized _____?

I _____ know _____ the _____ need _____ power _____ a central unit.

Do batteries _____ be considered _____ each device's _____ or _____ run on one _____ power _____?

_____ equipment require _____ or should it use _____ centralized _____?

Do the equipment run _____ power supply _____ power _____?

Should _____ be _____ each _____ operation, _____ they run _____ a _____ power system?

_____ equipment Require individual power sources or _____ a single _____?

Do _____ require separate _____ sources or _____ centralized _____?

_____ devices _____ individual _____ or _____ they powered centrally?

Does _____ concerns apply _____ each equipment, or do _____ run _____ a _____?

Do the _____ to _____ sources or a _____ unit?

_____ equipment run _____ centralized power supply unit _____ sources?

_____ of equipment have its own power _____ powered by _____ unit?

It's important _____ the batteries _____ operation _____ if _____ should just use one _____.

Does _____ item need _____ power source _____ to function?

The devices may need their _____ or _____ may _____ unit.

The _____ need _____ sources or _____ power supply unit.

_____ individual _____ sources _____ should _____ run on a centralized unit?

_____ equipment _____ individual _____ or _____ single power supply unit?

_____ battery _____ important _____ each _____ equipment, or _____ a shared power supply?

_____ battery life _____ to _____ they operate from a _____ power supply _____?

Should _____ have separate _____ or _____ central supply?

_____ this device powered _____ or _____ require individual _____?

Is _____ necessary _____ separate _____ for _____ can _____ use a single _____ source?

Devices _____ need _____ own power _____ depend on _____ unit.

Is _____ of individual _____ for the _____ or _____ centralized unit?

Does battery life concerns _____ to each _____ they _____ from a _____

The devices _____ need their own power _____ be _____ on _____.

Does _____ life _____ to each _____ and does _____ run from _____ power _____ unit?

Do I _____ source for the equipment or _____ they use _____?

_____ life concerns apply to each equipment _____ power supply unit?

Does _____ life _____ equipment, or _____ run from a _____ unit?

_____ equipment _____ individual power _____ just a centralized _____ power?

Do _____ devices _____ separate power sources or _____.

Do _____ use individual _____ or just _____ centralized unit _____ power?

_____ devices _____ own power _____ or _____ it a central _____?

Do the _____ need _____ own individual _____ can they depend on _____?

Do batteries need _____ be considered _____ device's _____ or _____ only _____ power system?

_____ individual power sources _____ just a single power _____?

Do the equipment have to use _____ power _____?

Is it _____ equipment to have separate energy sources or will _____ common _____?

Do _____ sources or a _____ supply unit?

_____ be _____ each device's operation, or _____ on one _____ power system?

It's _____ since the devices may need _____ or central unit.

_____ it necessary to _____ individual _____ equipment _____ centralized supply?

_____ the equipment have _____ use individual _____ sources _____ unit?

_____ devices _____ power source _____ own or rely on _____ centralized _____?

Do _____ equipment _____ sources _____ a single powersupply unit?

_____ I need _____ sources _____ devices, or _____ they _____ on a _____ unit?

_____ there _____ need _____ energy sources _____ the _____ or will _____ with _____ common power supply _____?

Do _____ need separate sources of _____ the equipment, _____ use a _____?

_____ the _____ a _____ or a _____ unit for running?

_____ batteries have _____ be _____ each _____ operation or can _____ one central power _____?

_____ require _____ power or can they _____ powered centrally?

It _____ necessary to consider the _____ for a _____ or _____ they _____ solely _____ power _____.

_____ battery _____ issues _____ to each _____ or do they _____ from _____ supply _____?

I want to _____ if I need _____ sources for _____ or _____ from _____ unit.

_____ a good question, _____ may need _____ own _____ source _____ central unit.

_____ battery _____ concerns _____ to _____ equipment, _____ is _____ a _____ power supply unit?

Is battery _____ to each equipment, _____ they from a centralized _____?

Do they _____ individual power supplies _____ they _____?

Do _____ devices _____ a power _____ central _____?

_____ need individual _____ it use _____ centralized power supply?

_____ battery life be _____ for _____ piece _____ equipment _____ use a _____ supply?

Do _____ equipment require _____ power _____ just a centralized _____.

Does _____ to equipment or _____ it operate from _____ supply _____?

It is important to consider the batteries _____ operation, _____ can _____ just a _____.

_____ don't _____ I _____ to use separate _____ the _____ or use a _____ power supply _____.

The question is _____ requires _____ own power _____ central unit.

I _____ know if _____ sources for the devices or if they _____ a _____ unit.

Does _____ need _____ individual _____ sources or a _____ supply unit?

_____ the equipment _____ individual _____ a _____ power supply unit?

It's a good idea _____ batteries for a device's operation _____ can _____ on _____.

Is _____ to _____ sources for the equipment _____ they use _____ common _____ supply arrangement?

_____ need separate _____ or _____ power?

Does a piece of _____ depend _____ or is _____ a shared _____?

_____ devices need their own _____ rely on _____ central _____?

_____ the equipment need their own _____ can they rely _____ unit?

Is the equipment _____ sources _____ single _____ supply unit?

The batteries need _____ be considered for _____ operation _____ they just _____ power _____.
 Do the equipment need _____ have _____ power _____ or just _____?
 _____ devices need their own _____ or _____ a central _____?
 Is it _____ devices need separate power _____ or _____?
 Does _____ need separate power _____ or battery _____?
 Do _____ devices need _____ power sources _____ they _____ a _____ unit?
 _____ the _____ need an _____ power source _____ power supply?
 Do _____ devices need _____ own power _____ or _____.
 _____ devices _____ own power _____ or rely on _____ central _____.
 Does _____ concerns apply to each equipment _____ they _____ a _____ supply _____?
 Devices _____ own power source or rely _____ a _____.
 The devices may _____ their _____ power _____ or central _____ question of _____ or _____.
 Do equipment _____ their _____ sources or _____ rely _____ centralized unit?
 _____ individual power needed _____ or _____ the _____ supply?
 Does _____ concerns apply to each _____ it _____ centralized _____ supply _____?
 _____ these _____ need individual _____ central power?
 _____ need _____ run on a _____ unit _____ have separate _____ sources?
 It's a question of _____ needs _____ power _____ or central _____.
 _____ need _____ the _____ or do _____ use _____ same power supply arrangement?
 Do _____ separate batteries _____ power?
 _____ the _____ own power _____ or a centralized _____?
 Do the _____ need _____ power _____ battery life _____?
 Are _____ devices _____ do they need _____ supplies?
 Is _____ necessary for batteries _____ considered for _____ device's _____ run on one _____ power _____?
 _____ the battery life _____ to each _____ or _____ a centralized power _____?
 Does the device need _____ power _____ central unit?
 _____ equipment need _____ power source _____ unit?
 _____ battery life _____ apply to _____ equipment _____ they run from _____ centrally _____ supply _____?
 Do _____ need _____ considered _____ device's _____ can _____ on a single power system.
 _____ the _____ required to run _____ a _____ unit _____ power _____?
 Do battery _____ apply to _____ they run from a centrally powered _____?
 It's a _____ need _____ may _____ own power _____ or a central _____.
 _____ the equipment _____ individual _____ just a _____ unit?
 _____ the _____ need _____ power sources _____ is _____ a _____ unit?
 Does _____ concerns apply _____ each equipment _____ do they _____ from _____ powered _____?
 _____ individual power sources _____ just a _____ unit?
 Should battery _____ into _____ for each _____ of equipment or should _____ use a _____?
 _____ require _____ own power _____ or is _____ central _____ used?
 The _____ may require _____ or _____ a central unit.
 Does the item _____ power source _____ central _____ to _____?
 _____ the battery _____ each equipment or _____ operate _____ the _____ supply unit?
 _____ equipment _____ individual _____ sources or a unified _____?
 _____ may need their own _____ depend on _____ unit.
 _____ devices _____ their own _____ source or is _____ unit used _____ power _____?
 Does battery _____ concerns _____ to _____ do they _____ from the _____ power _____?
 Do _____ need _____ of their own or _____ centralized _____?
 Do I need _____ the _____ use _____ common power supply arrangement?
 Does battery life _____ apply _____ equipment, _____ is it _____ a _____ unit?
 Devices _____ need their own _____ on _____ central unit.
 I _____ know _____ power _____ if they operate from a _____ unit.

_____ individual power sources for the _____ do _____ from _____ centralized unit?
 Do the _____ require _____ power _____ single unit _____ supply?
 Does _____ life concerns apply _____ equipment _____ does _____ the _____ supply unit?
 It _____ consider _____ for _____ device's operation or can _____ only a power system
 _____ these devices _____ centrally or are _____ supplies _____?
 Is _____ necessary to _____ equipment on _____ centralized _____ supply _____ sources?
 Does _____ need its _____ power or can they _____?
 _____ the equipment require _____ sources, _____ just _____ power _____ unit?
 _____ battery life concerns _____ equipment, or _____ they _____ from _____ power _____ unit?
 Does each _____ of equipment rely on its _____ a _____ central _____ to power _____?
 _____ need _____ considered for _____ or _____ they need _____ run on a _____ power system?
 Do the equipment _____ their own _____ unit?
 Do the _____ their _____ power source _____ central _____?
 Does _____ need their own power _____ or _____ central unit used _____?
 _____ I need _____ separate sources of _____ the equipment or will _____ same _____ supply _____?
 _____ all the equipment need _____ sources or can _____ rely _____ a _____?
 Does _____ concerns apply _____ equipment, or _____ from a central _____?
 Is it necessary for _____ have its _____ batteries _____ they use _____ system?
 _____ to consider batteries _____ each device, _____ can _____ run _____ power system?
 _____ the devices need _____ power source _____ or do they _____ central _____?
 Is _____ requiring separate power _____ or _____ supply?
 Does _____ need _____ power source or _____ unit?
 _____ devices might need _____ own _____ or there _____ a _____.
 _____ the device need _____ source _____ is _____ a central unit?
 Do the equipment require _____ or _____ there _____ centralized _____ unit?
 _____ concerns _____ to each equipment or _____ depend on _____ power _____ unit?
 Does each _____ of equipment _____ its _____ source, or _____ there _____ unit that _____ all?
 _____ have to be considered for _____ device's _____ do they run _____ power _____?
 Is _____ centrally or _____ it _____ individual _____ supplies?
 Is _____ necessary for a piece of _____ have _____ sources _____ a _____?
 _____ the _____ require _____ sources _____ is _____ a centralized unit?
 _____ item need _____ power source _____ a _____ unit.
 _____ battery life concerns apply to each _____ from a _____ unit?
 Do _____ separate _____ of power or run _____ unit?
 Does battery life concerns _____ to _____ or whether they _____ a _____?
 _____ devices may _____ their own power _____ on _____ unit
 Is it _____ to _____ individual power sources or _____ unit _____?
 _____ the _____ their _____ or is it powered by _____ unit?
 _____ it _____ for each _____ operation or _____ they _____ on one central power _____?
 Do _____ equipment _____ individual _____ sources _____ a central _____ supply _____?
 Does _____ of _____ depend _____ its own _____ source, or is _____ a shared _____ unit?
 It is necessary to consider the _____ for _____ device's operation _____ should _____ use _____.
 Do batteries _____ for each device's operation _____ they just run _____ one _____ system?
 _____ centralized power sources _____ do they need individual _____?
 Does the battery _____ concern apply to each _____ a _____ supply _____?
 Do _____ power sources or should _____ on _____ centralized _____ supply _____?
 Do equipment require _____ sources or _____ single _____?
 Does _____ device _____ their own _____ or is it _____ by _____ central _____?
 The devices may need _____ unit, so _____ a _____ question.
 _____ the equipment requires _____ sources or just a _____.

Do _____ individual _____ sources for the _____ or do they operate _____.

Do _____ be considered for _____ can _____ on a single power system?

_____ the equipment _____ their own _____ can they rely _____ centralized unit?

Does _____ concerns _____ to each _____ do _____ from _____ centrally powered _____ supply unit?

_____ life _____ apply _____ do they happen _____ centralized power supply unit?

Do I _____ sources _____ for the _____ or will _____ same _____ supply arrangement?

It _____ necessary _____ consider _____ a device's _____ should use one _____ power.

_____ is a _____ the devices _____ need _____ own power _____ or _____ unit.

_____ life concerns _____ to equipment, or _____ they _____ a _____ supply _____?

_____ important to _____ batteries _____ a device's operation _____ run _____ just _____ system.

_____ for individual power _____ or just a centralized _____?

_____ know _____ I _____ individual _____ sources _____ centralized unit for the devices.

Do I need separate sources _____ for the _____ do _____ rely on the _____?

Do I need _____ sources _____ or _____ they work with a common _____ arrangement?

_____ battery life _____ to _____ do they operate from _____ power supply _____?

_____ the _____ power sources or _____ on _____ power supply unit?

_____ batteries _____ to _____ considered for _____ operation, _____ can _____ run _____ a single power _____?

Is the equipment _____ individual _____ sources _____ a _____?

_____ be considered for each _____ or _____ they _____ run on _____ power _____?

Does _____ equipment need individual _____ a _____ power _____ unit?

_____ devices need _____ power supplies _____ they powered centrally?

They need to _____ batteries for _____ device's _____ or if they _____ just _____.

I don't know _____ I need _____ sources _____ the _____ if they _____ with _____ common _____ supply _____.

_____ the _____ use _____ individual battery _____ rely on communal _____?

_____ machines _____ their own _____ sources _____ single unit?

Does battery _____ concerns apply _____ equipment _____ does the _____ supply _____?

Does _____ life _____ each equipment, _____ does it _____ centrally powered power _____ unit?

_____ it possible _____ its own power source or _____ unit?

_____ life concerns _____ to each equipment, _____ from a central _____ supply?

Is there _____ need _____ individual _____ equipment _____ supply?

Is _____ equipment _____ sources or just a centralized _____?

_____ battery life concerns apply to _____ do they run _____ a power _____ powered?

Does _____ apply to _____ equipment or does it _____ centrally powered _____?

_____ equipment need their _____ sources _____ they rely on a _____?

Is the _____ requires _____ or _____ a _____ unit?

_____ have their own _____ source or rely on _____ unit.

The question is _____ not _____ requires _____ power _____ central unit.

_____ know _____ power sources or battery life considerations?

The _____ may require individual power _____ a _____ unit.

Are the _____ separate _____ sources or _____ central _____?

_____ equipment _____ individual power sources _____ just a single _____?

_____ equipment requires either _____ sources _____ a centralized _____ power.

Do _____ life _____ apply to _____ do _____ run from _____ unit?

_____ equipment _____ individual _____ sources _____ a centralized unit for _____?

_____ don't know whether I _____ sources _____ devices _____ a centralized _____.

Do the _____ does _____ have a centralized unit?

_____ to know _____ need individual power _____ or _____ they _____ from a centralized unit.

Does _____ device _____ its _____ or is _____ centrally _____?

Does battery life concern _____ to _____ or do _____ power supply _____?

Does _____ life _____ apply to each _____ and _____ run from _____ powered _____?

_____ battery life _____ apply _____ equipment _____ run from a centrally powered _____.

_____ need _____ I _____ individual _____ sources or _____ centralized unit for _____ devices.

Can batteries be _____ for _____ or _____ they _____ single power system?

Do the equipment _____ to use _____ power _____ single _____ unit?

_____ the equipment need _____ sources _____ a centralized _____?

Does battery life _____ do they operate _____ a power _____?

Is there _____ for _____ sources _____ a centralized _____ supply?

_____ is _____ batteries for _____ device's _____ or can _____ run on _____ power _____.

_____ equipment _____ their own individual _____ sources _____ they rely _____ centralized _____?

Will _____ need _____ power _____ the _____ run off _____ one centralized _____?

Do _____ sources _____ one power supply unit?

_____ the equipment require _____ centralized unit _____ or _____?

_____ the _____ need a _____ of _____ own _____ just rely on a _____?

Does _____ make sense to consider batteries _____ operation, or can they _____ power _____?

_____ a _____ because _____ devices _____ need _____ own _____ source _____ central unit.

Are _____ required to have _____ power sources _____ central _____?

Do _____ individual power sources or _____ they _____ unit?

_____ you _____ individual _____ for equipment or _____ centralized supply?

Do _____ equipment _____ power sources _____ should it run _____ a _____?

_____ the item _____ a _____ source _____ the _____ unit?

_____ may need their own power source _____ unit

_____ each _____ need their _____ or can _____ be centrally _____?

_____ for individual power supplies _____ is it powered _____?

Do the _____ require individual _____ sources/battery life considerations _____ power _____?

_____ the equipment _____ power _____ or should _____ a centralized _____ unit.

_____ a good question _____ may need _____ or a central _____.

Does _____ life _____ apply to _____ equipment, _____ does _____ run _____ power supply _____?

Does the _____ require individual _____ sources _____ unit _____ power?

_____ equipment need individual power sources _____ is it _____ on _____ centralized _____?

_____ battery _____ apply _____ equipment _____ whether _____ from a centrally powered unit?

_____ machines need _____ own power sources _____ one _____?

Do _____ their own _____ power sources or can _____ centralized _____?

Is the equipment _____ or battery life _____?

_____ devices may require their _____ source or central _____ a _____.

Do batteries _____ to _____ for _____ device's operation or _____ be used _____ power system?

_____ you _____ for equipment _____ depend on _____ supply?

_____ each _____ of _____ own power source, or _____ it powered _____ a central _____?

Do the _____ power sources _____ use a centralized unit?

_____ equipment need individual power _____ or _____ only use a _____ power _____?

Do _____ equipment _____ individual _____ sources/battery _____ considerations _____ a single power _____?

_____ the equipment require individual _____ is _____ centralized unit?

Does _____ concerns apply _____ is it from a _____ powered _____?

Can the equipment _____ a _____ supply _____?

If _____ needs _____ power sources _____ life _____ are they?

Does the equipment _____ power _____ or _____ on _____ unit?

Do batteries need _____ be considered for _____ device's _____ run on _____ central _____.

_____ devices _____ to _____ own _____ source _____ rely _____ central unit?

_____ is _____ to consider the _____ device's operation _____ run _____ only a power system.

Do battery _____ to each _____ do they _____ the centralized _____ unit?

_____ equipment need their own _____ power sources, _____ they rely _____ centralized _____?

Will _____ need _____ considered for _____ can they run on _____ power system?

Do the devices _____ their _____ or is it _____?

Does battery _____ or do _____ run from _____ power supply unit

The _____ might _____ individual _____ centralized power supply unit.

Devices _____ their own power source _____ a central _____.

The _____ may need _____ own _____ or there may be _____.

_____ the battery life concerns apply _____ or _____ from _____ supply unit?

_____ equipment _____ different power _____ or a _____ supply unit?

It is _____ consider the batteries _____ a _____ or if _____ simply use one _____.

Is it possible that _____ power _____ one unit?

_____ of equipment _____ on _____ own power source or is _____ a single _____ unit?

Does _____ to use individual _____ sources or _____ it _____ on a _____ unit?

_____ individual batteries or _____ there one _____ supply?

_____ to _____ equipment, or _____ they run from a power _____ unit?

_____ individual power sources or should _____ on a central _____ supply _____?

_____ life _____ apply to _____ equipment, or do they _____ a _____ powered _____

_____ the _____ power sources _____ can _____ rely on a single _____?

Do the equipment require individual _____ sources or _____ a _____?

Is the _____ individual _____ sources or just _____?

Does battery _____ to _____ do _____ run from a powered _____ supply _____?

Do I _____ individual _____ sources _____ devices, _____ use _____ centralized unit?

_____ to _____ or _____ they come from a _____ powered unit?

Do I _____ energy _____ for the equipment or do they _____?

_____ the equipment require individual power _____ or _____ centralized power _____?

It _____ necessary _____ consider the batteries for a _____ just use _____ power.

_____ equipment require individual power sources or _____ unit?

Do equipment require _____ sources _____ a _____ power?

_____ the equipment need _____ own _____ sources _____ they _____ on a _____ unit?

Does _____ separate batteries _____ a _____ power setup?

Do _____ devices _____ their _____ source or _____ central _____?

_____ the _____ on a _____ power supply _____ individual _____ sources?

_____ the _____ need its own _____ of power or _____?

Do _____ need _____ sources or _____ power supply _____?

_____ a good _____ if _____ devices require _____ own _____ or central _____.

Do you think _____ needs _____ a centralized _____ supply?

_____ equipment need separate power sources and _____?

_____ be _____ for each device's _____ or _____ they _____ on a single _____?

I _____ know _____ I need _____ sources for the _____ or _____ operate from _____ unit.

Does _____ concerns _____ to the equipment _____ do _____ from _____ power supply _____?

I _____ wondering if _____ consider battery life _____ piece _____ equipment _____ I should _____ a _____ supply.

_____ each _____ need its own _____ or a _____?

_____ life concerns affect each equipment _____ do _____ central power _____ unit?

Individual _____ equipment _____ dependence _____ centralized supply?

_____ separate power, _____ can it _____ powered centrally?

Do _____ equipment require _____ power _____ a power _____ unit?

Does equipment use individual _____ main power _____?

Is _____ device needs _____ own _____ source _____ unit?

_____ devices _____ need a power source _____.

_____ have separate power sources _____ a _____ unit?

Do the equipment require _____ power _____ power supply _____?

_____ the battery life concerns _____ if _____ from a _____ powered unit?
 It is _____ batteries for _____ device's operation _____ can they run _____ a _____ system.
 _____ the equipment need individual _____ sources _____ only _____ for _____?
 Do _____ devices _____ their own _____ source or _____ it _____?
 _____ needs _____ power _____ or _____ life _____?
 _____ concerns _____ to _____ equipment, or do _____ a central powered unit?
 _____ the _____ require individual _____ or just _____ single _____ supply unit?
 _____ a good _____ the devices _____ their _____ power source or a _____.
 Do _____ need their _____ or a _____ unit?
 Are individual power sources required for _____?
 Do _____ equipment require _____ sources or _____ centralized _____?
 _____ equipment need _____ power _____ or _____ on a centralized unit?
 It _____ necessary to _____ the _____ for _____ if it should use one _____.
 _____ or reliance on centralized supply?
 I _____ battery life concerns apply _____ or if they operate _____ a centralized _____ supply _____.
 Does _____ device need to _____ power _____ or _____ it _____?
 The devices _____ require _____ sources _____ a _____ unit.
 Does _____ item _____ power source _____ unit?
 _____ considered for each _____ operation, or can they _____ on _____ power _____?
 Does _____ power source or _____ central unit?
 Do the _____ individual _____ or _____ run on _____ centralized power _____?
 It is important _____ consider _____ batteries _____ a device's _____ or _____ run _____ a _____ system.
 _____ the equipment _____ power sources or should it _____ supply _____?
 Do _____ require _____ of _____ or just _____ single unit?
 _____ battery life issues _____ each equipment, or do _____ run _____ powered _____?
 Do the devices need _____ power _____ own _____ is _____ central _____?
 Are _____ equipment needs separate _____ sources _____ considerations?
 _____ concerns _____ each equipment, _____ are they _____ a centrally powered _____?
 Is the _____ individual _____ sources or _____ a single power _____?
 Are the equipment _____ sources _____ life considerations?
 Does the _____ sources _____ should it _____ on a centralized _____ unit?
 Is individual _____ needed _____ equipment _____ the _____ supply?
 Do the equipment _____ individual power _____ unit?
 _____ battery life concerns _____ to _____ equipment, _____ does _____ from a centrally _____?
 _____ equipment required _____ power sources or a single _____ supply _____?
 _____ a good question as the devices _____ power source or _____.
 _____ may need their own power _____ or central _____ which _____ of _____.
 _____ a power _____ a central unit?
 _____ the devices need _____ power supplies _____ they _____?
 Does battery _____ or does they run _____ a _____ unit?
 Do I need _____ sources for the equipment, _____ they _____ one _____?
 _____ it necessary _____ batteries for each device, _____ they _____ one _____ system?
 It's a _____ if _____ a _____ or a _____ unit.
 _____ it necessary _____ the _____ have _____ energy sources _____ it work _____ a _____ power _____ arrangement?
 _____ a _____ of _____ depend _____ power source _____ is it powered _____ a single central _____?
 Should _____ on _____ centralized power _____ unit _____ individual _____ sources?
 Is it necessary _____ power sources _____ just a centralized _____?
 _____ might _____ individual _____ sources or _____ centralized unit.
 _____ devices _____ their own power _____ or a _____.
 It is necessary to consider _____ a _____ operation, or _____ a power system.

_____ need to have its _____ power _____ or is it powered _____ ?
 _____ compatible _____ power sources or _____ centralized power _____ unit?
 Do _____ require _____ own power _____ unit to _____ them?
 _____ the equipment _____ power sources, _____ just _____ unit?
 Does battery life _____ each _____ or _____ they _____ from _____ supply unit?
 The devices _____ own power source _____ central _____.
 _____ equipment depend _____ centralized unit or _____ need _____ own individual power _____ ?
 _____ the devices need _____ or rely _____ a central _____ ?
 Does battery life concerns _____ to _____ is _____ centrally powered power _____ ?
 _____ each item need its _____ or _____ a _____ unit?
 _____ it necessary _____ equipment _____ or centralized power?
 Do they _____ individual power _____ from a _____ unit?
 _____ is necessary to _____ a _____ can they run on a power _____.
 _____ the _____ own power _____ or _____ central unit?
 Does the equipment require _____ centralized power _____ unit?
 _____ devices _____ separate _____ or a central unit?
 _____ the equipment require individual _____ or _____ use a _____ unit.
 Do the equipment _____ power sources or _____ power _____ ?
 _____ the _____ need a power _____ of _____ own or _____ central unit _____ ?
 _____ the _____ need _____ or _____ a central unit?
 Is _____ a need _____ energy for _____ equipment or _____ power supply?
 _____ might need their _____ power _____ or central _____.
 Is battery life _____ applicable _____ equipment _____ it _____ power supply _____ ?
 Should _____ require individual _____ sources or _____ a _____ ?
 _____ the _____ demand individual power sources _____ single _____ unit?
 _____ of _____ the devices need a _____ source or _____ unit.
 _____ need separate sources _____ the equipment or _____ the _____ power supply?
 Does the _____ need _____ power _____ or _____ unit?
 Do _____ equipment _____ to _____ individual power _____ or _____ a _____ ?
 Does _____ equipment need _____ centralized _____ unit _____ power sources?
 _____ machines need to have _____ sources or _____ single _____ ?
 Does _____ device _____ sources or does it need _____ ?
 Do _____ to _____ considered _____ each device's operation or do they just _____ on _____ ?
 _____ apply to each equipment _____ they operate from the power _____
 _____ the devices _____ own _____ or rely _____ a central _____ ?
 Do _____ life concerns apply _____ do _____ operate from _____ power supply _____ ?
 _____ the _____ for _____ device's operation or can _____ on a _____.
 Do _____ need _____ or can _____ be powered _____ ?
 _____ it _____ to use _____ energy sources for _____ will _____ with one _____ supply arrangement?
 Does _____ equipment _____ or Centralized unit?
 The _____ whether or not _____ need _____ source or a central _____.
 Do _____ gadgets need _____ supplies _____ they _____ centrally?
 Does _____ equipment require individual power _____ or _____ power _____ ?
 Will I need additional power sources, _____ off of _____ thingamajig?
 _____ life concerns _____ to _____ or do they run _____ supply unit?
 _____ a _____ separate _____ for the equipment _____ just a single _____ arrangement?
 _____ think about _____ for each _____ of _____ should _____ use a shared power _____ ?
 Do _____ need individual power _____ a _____ supply unit?
 Is it possible that _____ needs _____ individual _____ or can _____ rely on a _____ ?
 _____ or will the _____ just run _____ of one Centralized thingamajig?

_____ needs individual _____ or a _____ unit for _____.

It is necessary to _____ device's operation _____ if _____ should _____ use _____ central power.

I don't _____ I _____ individual _____ sources _____ the _____ they are centralized.

_____ battery life concerns apply _____ equipment, _____ they run _____ centrally _____ unit?

_____ there a _____ for _____ energy sources _____ the _____ or _____ it _____ same _____ ?

Do _____ require individual _____ or _____ centralized _____ of power?

Does _____ life _____ apply to each _____ is _____ just from _____ unit?

_____ individual power supplies, _____ is it powered _____?

_____ piece _____ equipment _____ own power source or a _____ central _____ to _____ all together?

_____ life _____ to each _____ or they run _____ a _____ unit?

Do the _____ sources or a centralized _____ supply _____?

_____ separte _____ or can _____ be centrally powered?

Do _____ the _____ require _____ own _____ sources or _____ they _____ centralized unit?

Do _____ need _____ sources or _____ a centralized _____.

Does battery _____ concerns _____ equipment, _____ they _____ a centrally powered _____?

_____ devices require an _____ supply _____ are they powered _____?

_____ equipment _____ sources or merely a _____ unit?

Do _____ equipment requires individual power sources _____ single _____?

_____ important to _____ for _____ device's _____ if they _____ simply _____ one central power.

Do the _____ need separate _____ a _____ unit?

_____ life concerns apply to each equipment, or _____ from _____ powered _____?

Do _____ to be _____ each device's _____ or _____ run _____ central power system.
