

[Demo] NLP Dataset for Customer Service Automation

Company Type	Water and Wastewater Utility Companies
Inquiry Category	Water pressure and flow issues
Inquiry Sub-Category	High Water Pressure
Description	Customers are facing excessively strong water flow or high pressure, leading to plumbing leaks, burst pipes, or water wastage. This could be due to malfunctioning pressure regulators, pressure spikes in the water supply system, or inadequate plumbing fixtures.
Data Size	6,449 paraphrases

_____ risk as water _____ of _____ too strongly.

Are you _____ that tap _____ could affect _____?

It's concerned _____ can damage _____.

_____ due _____ faucet flow?

The fast-flowing _____ a _____ impact on _____.

_____ a possible cause of _____.

_____ potentially hurt _____ lines.

_____ over pipe condition were prompted _____ tap _____.

_____ faucet pressure _____ worrying.

Plumbing integrity _____ the _____ of _____ flow.

Is there _____ coming _____ taps?

_____ pipe condition _____ excessive tap water pressure.

Plumbing _____ be affected _____ output?

_____ might get _____ because water _____.

_____ for _____ when a faucet is pouring.

Plumbing _____ rushing water.

_____ plumbing break _____ gushing from taps?

_____ is subject to _____ due to _____ tap _____.

Plumbing _____ at risk if _____ rushing _____ faucets _____ strongly.

Are _____ worried _____ water _____ harm _____ pipes?

_____ due to _____ flow?

Plumbing _____ faucet _____ too _____.

The _____ shoots _____ risk?

Plumbing harm isious _____ forcefully.

Damage _____ be _____ vigorous _____.

Plumbing could _____ risk _____ strong _____ flow.

_____ fast _____ flow from _____ pipes.

_____ any chance _____ high-water _____ harm plumbing infrastructure?

Overpowering stream _____ a _____.

Is _____ water _____ from _____ the pipe?

_____ the plumbing system at _____ damaged if _____ out _____ faucet?

Plumbing ____ is ____ of force tap ____.

____ on the ____ is ____.

____ water endangers the pipes.

I ____ repercussions of ____ faucet ____.

Is itative tap ____ of ____ the infrastructure?

____ high-pressure ____ could cause ____ to ____ pipes.

Can fast water ____ taps ____ damage ____?

____ power in tap ____ can ____ the ____.

Water ____ taps could ____.

____ at ____ from strong ____ flow

____ at risk when ____ out ____ faucets too ____.

Concerns ____ over the ____ due to excessively ____ pressure.

Is ____ intensity from ____ any harm ____ plumbing ____?

____ possible that high-water intensity from ____ harm plumbing ____.

There ____ when tap ____ forcefully.

Too much ____ water ____ the ____.

____ can ____ damaged by ____ tap ____.

____ can ____ pipe system longevity.

____ high water intensity ____ the ____ infrastructure?

____ System damaged ____ stream from ____?

My piping ____ damaged by ____.

____ harm can ____ to ____ flows ____ forcefully.

____ infrastructure could be ____ high-water intensity ____ the ____.

Plumbing damage could ____ of ____.

Crazy water ____ problems.

____ running ____ could affect ____ pipes negatively.

The high-pressure ____ could ____.

____ might be ____ by ____ certain ____ faucet output.

____ water flow from ____ problem?

____ get hurt if the water ____ is ____.

____ system damage from ____ stream ____?

____ plumbing ____ at risk ____ a ____

____ water force from taps ____.

____ tap flow could ____.

Are you ____ tap ____ pipes?

Plumbing potentially ____ from ____ flow?

____ flow ____ cause harm ____ plumbing ____.

There is worry ____ damaged ____ a ____ pouring.

____ integrity ____ concerned ____ forceful ____ Flow.

____ cause harm to plumbing ____.

____ system damage is ____ overpowering ____ from ____.

____ concerned ____ water streams will harm ____ pipes?

____ negatively by the excessively faucet ____.

____ may happen ____ to ____ water ____.

____ harm is ____ tap flows ____.

____ heavy ____ raises ____ for damaged ____.

Could ____ water ____ from ____ damage to plumbing ____?

It's concerned that ____ faucet flow ____ damage ____.

____ may ____ by water ____ too ____.

____ related to ____ taps?

_____ break, _____ gushing from _____!
 Tap _____ could _____.
 _____ get _____ due to water _____ hard.
 There is potential for _____.
 The excess _____ from _____ pipe integrity.
 There is _____ coming _____ excessive force.
 _____ water can _____ problems.
 Plumbing _____ from _____ rush.
 _____ flow could _____ harm.
 _____ the _____ is flowing _____ pipe _____ is _____.
 Damage _____ if my _____ shoots _____ with _____?
 _____ be harmed _____ the water coming _____?
 _____ water _____ is causing concern over _____ pipe _____.
