

[Demo] NLP Dataset for Customer Service Automation

Company Type	Electricity Suppliers
Inquiry Category	Energy consumption analysis and advice
Inquiry Sub-Category	Appliance efficiency
Description	Customers seek advice on choosing energy-efficient appliances that reduce electricity consumption. They inquire about the energy ratings, operating costs, and benefits of specific appliances to make informed purchasing decisions.
Data Size	7,999 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Electricity Supplier" customer inquiry. (Purchased data will not be masked.)

Will replacing ____ HVAC systems with ____ units yield ____ in ____?
____ of efficient heating, ____ and ____ units may reduce ____ and ____.

Installation of energy-____ ventilating, ____ conditioning ____ to notable ____ usage and financial cuts.
____ it possible ____ save ____ electricity ____ by replacing ____ systems ____ high ____ units?
____ possible that the ____ of a ____ energy-saving ____ ventilating, and ____ lead ____
____ air conditioning systems with more ____ ones ____ save money.

Is it ____ the new ____ HVAC systems ____ electric ____?
Modern and more efficient ____ could ____.

Will ____ of ancient AC/heat systems cut ____?

Replacing old ____ and air ____ more ____ ones would ____ save ____ on electricity bills.
____ there ____ significant decrease ____ electric ____ when you update ____ heating ____ system?
____ old heating ____ with efficient ones ____ energy.

Will ____ heating, ____ and ____ systems with ____ yield ____ reductions ____ electrical use?

Replacing obsolete heating ____ cooling ____ solutions yearly can ____ electrical ____ and ____.

____ of energy ____ heating and cooling units reduce ____?

Replacing heating ____ with ____ ones may ____ able ____ reduce ____ consumption and ____.

Can updated heating ____ cut my ____?

____ a change from ____ units ____ in ____ energy bill?

____ think there ____ a decrease ____ electric expenses when ____ upgrade ____ an ____?

Will ____ swap ____ AC/heat ____ the electric bill?

____ the installation ____ modern, energy-saving heating, ____ and air conditioning ____ reductions ____ our
____ it ____ save big on ____ by ____ to ____ units?

Replacing old ____ more efficient ones ____ on electricity ____.

Is ____ possible ____ on yearly electricity ____ by ____ outdated HVAC ____ with ____ units?
____ high-efficiency HVAC ____ reduce electricity expenses?

____ I ____ old ____ new ____ systems ____ my electric costs?
____ air ____ with more efficient ones would bring ____ on electricity bills annually.

Is there ____ use ____ upgrade ____ higher ____ heating, ventilating, and air ____ systems?

Is it _____ electrical consumption _____ costs _____ old _____ systems each _____?
 _____ possible for _____ and _____ systems _____ be updated _____ power usage?

Can _____ outdated heating, _____ and air _____ systems achieve _____ in electrical use _____ associated _____?

Replacing outdated heating, ventilating, and air _____ systems with high-efficiency _____ in _____ associated _____.

Could _____ installation of modern, _____ heating, _____ (HVAC) _____ lead to _____ in _____ of _____ efficient _____ ventilating, _____ air _____ power usage and financial costs.

Is there a _____ in _____ use/ costs with _____ upgrade _____ systems?
 _____ new, efficient _____ cooling _____ reduce electric _____?

Is there _____ significant _____ in _____ and costs with _____ upgrade _____ efficiency heating _____ systems?
 _____ high-efficiency HVAC replacements _____ savings?
 _____ outdated heating _____ cooling systems _____ could save me _____ annually.

Is _____ possible _____ reduce _____ installing _____ heating and _____ units?

Do _____ and _____ air conditioning units _____ electric power _____?

Replacing _____ heating, _____ and _____ with more _____ ones _____ save electricity bills _____.

Is _____ for _____ savings in _____ electrical _____ if we replace obsolete _____ with high-efficiency _____?

Do _____ replacements lead _____ electricity?
 _____ tired heating/cooling systems for _____ could _____ lower _____.

Is it possible _____ old _____ and _____ with _____ units to reduce _____?
 _____ old _____ and cooling units _____ cut energy costs.

Is it possible _____ get _____ usage and _____ cuts by _____?

Replacing outdated HVAC _____ with _____ will yield _____ reductions in _____.
 _____ old _____ ventilating and air _____ systems with high-efficiency units _____ reductions _____ annual _____.
 _____ modern and energy- _____ ventilating and air _____ electric power _____?
 _____ of _____ heating, ventilating, _____ conditioning units might _____ electric _____.
 _____ and air _____ with high-efficiency _____ likely _____ significant reductions in electrical use.
 _____ new high-efficiency heating _____ cooling _____ cut _____ when _____ replace _____ old ones?
 _____ installation _____ modern, _____ ventilating, _____ systems could lead _____ sizable cuts _____ electrical consumption

Updating the _____ ventilating, _____ conditioning _____ units could _____ in _____ in electricity expenses.
 _____ expect to see significant _____ in _____ we switch from outdated units _____ ones?
 _____ it possible _____ electrical _____ by _____ of old and _____ efficient HVAC

Is it possible to _____ annual electricity _____ conditioning _____?
 _____ I _____ by replacing _____ conditioning _____ energy- efficient models?

Will _____ switch _____ old _____ to _____ ones _____ energy _____?

Do _____ we'll see _____ decrease _____ electricity use/costs if we replace _____ with _____
 _____ it true _____ replacing tired heating/cooling _____ modern versions equals _____?

_____ possible _____ save a _____ money when replacing _____ systems _____ more _____ options?

Replacing _____ ventilating, and _____ conditioning systems _____ more _____ might save you money _____ your _____.
 _____ you _____ a decrease in _____ electricity _____ if _____ replace old-fashioned _____ ventilating _____
 _____ it possible to reduce _____ with _____ to _____ higher efficiency _____?

I _____ modern and more efficient _____ can reduce _____.

_____ it _____ cut down _____ electricity _____ by installing _____ energy _____ heating and _____?

Replacing _____ heating/cooling _____ more efficient solutions yearly _____ consumption and _____.

Is _____ possible to _____ air conditioning _____ to cut _____ on _____?

Will an upgrade of _____ air conditioning _____ result _____ in electrical _____?
 _____ it _____ to _____ out crappy HVAC _____ for _____ systems that _____ lower _____ usage _____?

Is _____ possible _____ substantial savings on yearly electricity _____ by _____ air conditioning _____ high-efficiency _____?
 _____ decrease in _____ can be achieved through updated _____ cooling _____ installation?

Do _____ cooling systems lead _____ electric savings?

Can _____ old heating, _____ and _____ with high-efficiency alternatives reduce annual _____ use _____ costs?

Could _____ modern, _____ heating, ventilating, _____ systems lead to big reductions _____ our

_____ there _____ of significant _____ in _____ expenditure _____ models replace obsolete _____?

I _____ to know _____ new _____ cut _____ electric _____ when _____ replace my old ones.

Is it _____ decrease _____ usage through _____ heating and _____ installation?

Replacing outdated heating, ventilating, and _____ conditioning _____ with _____ units could yield _____ in _____

_____ want to know if the _____ costs when I replace _____ old ones.

_____ there _____ significant decrease _____ updated heating and cooling system _____?

_____ it possible _____ new, efficient HVAC systems _____?

Is _____ possible to _____ savings on _____ by replacing _____ systems with _____ efficiency _____?

Is it _____ to save _____ by installing _____ HVAC _____?

Is _____ to _____ when you _____ efficient heating and cooling?

_____ old heating, ventilating, _____ conditioning _____ with high _____ units _____ us _____ electricity bills.

_____ possible _____ save _____ bills if you _____ to high-efficiency air _____?

Will _____ upgrade _____ old air _____ units cut _____ use/costs?

_____ it possible to save a lot of money _____ we _____ old HVAC _____ efficient _____?

_____ reduce power _____ through _____ installation of updated _____ cooling systems?

Can _____ systems reduce _____?

_____ you _____ we'll _____ a _____ in _____ electricity use/costs if we _____ air conditioning _____ more

_____ think _____ a decrease _____ our annual _____ use/costs _____ we replace old _____ with _____ efficiency options

Is it _____ to install high-efficiency _____ decrease annual _____?

_____ old heating, _____ and _____ conditioning _____ more efficient _____ would save _____ year.

_____ old _____ and _____ conditioning _____ with more efficient ones _____ annually.

Could the installation _____ energy-saving _____ and air conditioning _____ systems _____ to _____ cuts _____ our _____

Is _____ save a lot _____ costs if _____ obsolete _____ ventilating, and air conditioning _____ more _____

_____ heating, _____ and air conditioning systems may _____ a _____ in _____ electricity _____.

_____ any _____ on electricity bills if _____ switch _____ heating _____ cooling _____?

Replacing _____ HVAC systems with _____ alternatives _____ achieve _____ in _____ use _____.

Is it possible _____ switch _____ state-of-the-art _____ and _____ machinery?

Do _____ there _____ significant cuts _____ when high-efficiency models _____ used?

Is it _____ to _____ power consumption _____ outdated heating _____ cooling _____?

_____ switch _____ state-of-the-art _____ efficiency heating _____ cooling equipment _____ significant cost and _____?

Will a swap _____ ancient _____ bill/costs?

_____ heating, _____ and air _____ with _____ efficient ones could _____ bills _____ lot.

_____ significant _____ in electrical use/costs _____ upgrade _____ higher efficiency _____ systems?

Are notable power usage and _____ energy _____ ventilating, and air-conditioning _____?

Replacing _____ heating _____ systems can _____ to notable reductions _____ and _____.

_____ we will _____ a decrease _____ our _____ electricity use/costs _____ we _____ old fashioned _____ units _____ high-efficiency

Do _____ heating, ventilating, and air-conditioning units _____ electric _____?

_____ systems _____ high-efficiency alternatives _____ result _____ substantial reductions in _____ use _____.

_____ it possible _____ save substantial _____ we replace obsolete _____ cooling units with _____ efficient _____?

Replacing _____ heating, ventilating, _____ air conditioning systems with high-efficiency _____ may _____ significant _____ in _____

_____ notable _____ usage and financial _____ possible _____ the _____ efficient _____ ventilating _____ air _____ (HVAC)
 replacements?

Is _____ that _____ be _____ cuts _____ annual _____ expenditure _____ high efficiency models _____ used?

Is _____ possible _____ decrease power _____ through _____ of _____ heating _____ cooling _____?

_____ ventilating, and air _____ systems _____ high-efficiency _____ could potentially _____ money on electricity _____.

_____ usage _____ cuts possible _____ energy- efficient heating, ventilating, and air _____?

Installation _____ energy-efficient _____ ventilating, _____ conditioning (HVAC) _____ can result _____ notable _____ and financial _____.

Do modern _____ ventilating, and _____ units reduce _____ power _____ or _____?

_____ possible _____ expenses by getting rid of _____ efficient _____ and cooling?

When _____ replace the _____ ones, can _____ new high _____ costs?

When I replace _____ want _____ if the new _____ systems will cut _____ electric _____.

_____ it possible _____ costs by _____ heating and _____ systems every year?

Can _____ outdated _____ and _____ achieve substantial _____ in _____ use and associated costs?

_____ there _____ reduction in electric consumption/bills _____ you install _____?

Replacing _____ systems _____ modern ones _____ lower electricity _____.

_____ new, _____ systems able _____ reduce annual _____ costs?

_____ it possible _____ a _____ of money on yearly electrical _____ if _____ HVAC units with _____?

_____ we _____ a _____ our annual _____ costs _____ from outdated to more _____ units?

Replacing old HVACs with _____ models _____ money.

Will _____ of energy _____ heating and cooling units _____ in _____ electrical _____?

_____ possible to switch to state-of- _____ efficiency _____ machinery?

_____ it _____ that _____ systems can slash _____?

Updating HVAC units _____ energy usage _____ will _____.

Replacing outdated _____ lead _____ significant reductions in power consumption _____.

_____ possible to save _____ on _____ to high-efficiency units?

Will _____ old to _____ units _____ energy expenses yearly?

_____ we will see _____ decrease in our _____ use/costs if _____ replace _____ HVAC units _____ high-efficiency _____

_____ old _____ air _____ with more efficient ones _____ money on electricity bills.

_____ of old _____ installing _____ and cooling _____ help reduce _____ expenses?

Can we _____ reduction in _____ electric _____ if _____ from _____ to _____ units?

_____ possible to _____ substantial savings _____ yearly electricity bills by _____ heating _____ cooling _____ with _____ efficient _____?

Is the _____ of _____ air conditioning systems going _____ to big _____ electrical consumption _____ ventilating, _____ air _____ systems _____ units might yield significant _____ in _____ use.

_____ it possible _____ new high-efficiency _____ cut my electric _____ replace _____ old _____?

_____ significant reductions in _____ costs/usage if we _____ outdated _____ highly efficient HVAC _____?

_____ to reduce annual electrical _____ by installing _____ units?

Can _____ replacement of old HVAC systems _____ reduce electrical _____?

_____ possible to save money _____ electrical costs _____ obsolete _____ conditioning units with high-efficiency _____

_____ newer, _____ ventilating, and air _____ systems _____ on electricity use?

Is it possible to _____ state-of-the-art _____ heating, _____ and _____

Is _____ decrease _____ expenses _____ you upgrade _____ efficient heating and _____?

_____ it possible _____ reduce electrical consumption _____ costs _____ old _____ more _____ solutions?

_____ heating/cooling _____ more efficient solutions _____ save _____ consumption and costs.

_____ more efficient ones _____ lead _____ big cost _____ on _____.

Could _____ installation of _____ energy-saving _____ air conditioning _____ sizable cuts in electrical

Replacing _____ ventilating, _____ conditioning _____ with _____ units can save _____ money on _____ electricity _____.

_____ old _____ with more _____ ones _____ energy costs?

Are we able _____ on yearly _____ if _____ outdated HVAC systems _____ high-efficiency units?

_____ switch _____ outdated units to _____ efficient ones, can _____ to save money _____?

Is it _____ decrease _____ electrical costs dramatically with _____?

Is _____ reduce _____ consumption _____ costs by replacing obsolete _____ annually?

_____ it possible _____ electric _____ by _____ efficient HVAC _____?

_____ possible to _____ on yearly electricity bills _____ we replace old _____ systems with high-efficiency _____?

Replacing old _____ and _____ systems _____ efficient _____ would _____ substantial savings _____ electricity bills.

Is _____ power consumption and cost by _____ outdated _____ cooling _____?

Do modern _____ heating, _____ and air conditioning _____ electric _____ costs?

Is there _____ reduction _____ electric consumption/bills _____ efficient heating _____ cooling _____?

Replacing old heating, ventilation, and _____ with _____ ones _____ bring _____ substantial savings on _____ year.

Replacing _____ heating, _____ air conditioning units _____ high-efficiency _____ will _____ decrease our _____ electricity _____ and _____.

_____ to know if updated HVAC _____ can _____ electric _____.

_____ outdated heating, ventilating, and _____ with _____ to _____ reductions in electrical use.

Is it possible to _____ power consumption and _____ systems _____ possible _____ substantial savings on _____ electricity bills by _____ old HVAC _____ units?

Is it _____ to _____ power consumption _____ expense _____ heating _____ systems? _____ installation of _____ air conditioning systems _____ electricity costs?

Is _____ savings _____ electricity _____ you switch to _____ heating and _____ units?

Can _____ anticipate _____ in _____ electric costs/usage if _____ to efficient HVAC _____? _____ the new high-efficiency _____ my electric costs _____ them?

Updating _____ systems _____ units could _____ in significant _____ in _____ electricity _____.

_____ the installation of _____ systems decrease _____?

Is _____ possible to save money on electricity _____ high-efficiency _____? _____ a switch _____ old to _____ in cheaper energy _____? _____ reductions _____ use/costs with _____ to higher efficiency HVAC systems.

Will the upgrade _____ vintage AC/heating _____ in significant _____ in _____ usage _____? _____ if _____ high-efficiency heating and cooling systems will _____ electric _____.

Is _____ reductions in electrical _____ upgrade to _____ HVAC systems?

When _____ are replaced with _____ models are there _____ in _____ expenditures? _____ it possible to _____ electric _____ updating _____ efficient _____ systems?

Is it _____ the _____ high-efficiency HVAC systems _____ decrease electricity _____? _____ high-efficiency heating and _____ a _____ idea _____ electric _____?

Is it possible _____ money _____ electrical _____ we replace obsolete _____ ones?

Can an upgrade of _____ use _____ save money?

Are _____ likely to _____ expenditures when high-efficiency models are used _____ ones? _____ outdated HVAC systems with _____ alternatives _____ in electrical use and _____.

_____ obsolete _____ systems with more efficient _____ annually can lead _____ electrical _____ and _____.

Can a _____ reduction _____ electricity _____ and _____ be expected _____ high-efficiency _____?

Can _____ introduction _____ state-of-the-art high-energy _____ ventilating, and _____ conditioning _____ it possible to swap _____ systems for _____ that _____ lower electricity _____ and _____?

_____ upgrade _____ our heating, ventilating, and _____ conditioning _____ yield _____ economies in annual _____ costs?

Can _____ money on electricity bills if _____ replace outdated heating _____ systems _____ units? _____ in both electricity use _____ costs _____ be _____ upgrades.

Replacing obsolete _____ yearly will _____ reduce _____ consumption and costs. _____ if there is _____ in electric _____ updating to efficient _____ systems? _____ the installation of _____ energy-saving _____ ventilating _____ lead to big cuts in _____ our antiquated HVAC systems _____ units _____ result _____ considerable decreases _____ electricity _____.

Can _____ a reduction _____ costs _____ we switch _____ outdated units to _____ ones? _____ we _____ reduction in _____ if we _____ outdated units to _____ efficient _____?

_____ it _____ that _____ systems for _____ versions equates to lower _____?

Replacing heating _____ systems has the _____ to _____ power _____.

_____ that replacing outdated _____ systems will lower _____ usage _____?

Is it _____ that _____ systems will _____ costs?

Is it _____ of high-efficiency HVAC _____ to _____ annual _____ expenses?

Is it possible _____ save money on _____ by replacing _____ units _____?

Can heating and _____ to save _____ electricity use?

Is it _____ save money _____ heating _____ replacing old models _____ energy _____?

Replacing outdated heating, _____ and _____ result _____ reductions in electrical use and associated costs

Is _____ that the installation of _____ energy-saving _____ ventilating, and _____ system will lead _____

Modern _____ more _____ setup might _____ charges by _____ lot.

_____ it possible _____ money on yearly _____ bills _____ replacing _____ and _____ more efficient ones?

_____ the _____ from old _____ efficient _____ result _____ lower _____ costs?

Will the high-efficiency _____?

_____ heating, _____ and air _____ systems with more _____ could _____ electricity.

Replacing outdated heating, _____ and _____ systems with _____ reductions in annual electrical _____.

When HVACs are replaced _____ there likely _____ significant _____ in _____ electrical _____?

_____ possible _____ old _____ ventilation, _____ air _____ systems _____ more _____ ones and save electricity?

Is it _____ to _____ and costs _____ replacing _____ heating _____ systems _____ year?

_____ you _____ there _____ be a noticeable decrease in _____ annual electricity _____ if we replace _____ fashioned _____

_____ possible to save a _____ electrical _____ replace obsolete HVAC units with _____ efficient _____?

_____ it _____ that _____ slash my electric bills?

Is it possible _____ on _____ we replace obsolete HVAC _____ high _____ alternatives?

_____ reductions in our electric costs if _____ from _____ efficient units?

_____ old _____ ventilating, and _____ conditioning _____ with _____ efficient _____ would save _____ on _____.

_____ it possible _____ install _____ heating and cooling _____ that _____ on electricity usage?

Can updated _____ ventilating, and _____ conditioning _____ electric _____?

Do _____ it will _____ possible _____ decrease _____ annual _____ use/costs by _____ old _____ HVAC _____ with _____ options?

Is it _____ more efficient _____ setup will _____ electricity _____?

Do modern _____ more _____ and cooling systems _____ charges?

_____ modern _____ efficient _____ make a difference to _____ charges?

Is _____ possible to _____ of _____ replacing _____ systems with _____ efficient alternatives.

Do you _____ will be significant _____ electrical use _____ upgrade _____ and cooling systems?

Do _____ and _____ efficient heating _____ cooling setups _____?

_____ it possible that new _____ reduce electric _____?

Investing _____ advanced AC/Warming units _____ cause noticeable _____ bills/expenses.

_____ we _____ reductions _____ our electric _____ if we switch from outdated _____?

_____ we _____ economies _____ electrical _____ and costs if we upgraded _____ unit?

Is it _____ to _____ electrical costs if we _____ heating _____ units _____ efficient models?

Can _____ of high-efficiency heating, _____ air _____ systems reduce _____?

_____ old _____ conditioning systems _____ more efficient ones _____ save electricity per _____.

_____ you think _____ a decrease in _____ we _____ our old fashioned HVAC units _____ high efficiency _____

_____ it _____ decrease electricity expenses with _____ high-efficiency HVAC _____?

Is _____ HVAC _____ my electric bills?

Is there a chance _____ installation _____ modern, _____ heating, _____ air _____ systems _____ lead to _____

Is it possible _____ reduce electrical _____ efficiency HVAC systems.

_____ you _____ a decrease _____ our annual electricity use/costs _____ fashioned _____ and cooling units with _____

I wonder _____ there is a _____ when updating _____ efficient _____ cooling _____.

Is _____ that _____ replacements _____ to significant electric _____?

Is it possible to _____ lot of _____ if _____ replace _____ units with _____ models?

Replacing _____ ventilating, and air conditioning (HVAC) _____ with _____ will _____ significant reductions _____ use _____

Is _____ a _____ consumption with the _____ efficient HVAC units?

_____ are _____ with high-efficiency models, are _____ likely _____ significant cuts _____ electrical _____?

_____ a switch _____ ones result _____ a lower energy cost?

_____ it possible _____ electric usage/spending by _____ in _____ efficient _____?

Higher _____ systems - _____ utilities _____?

Do you think there _____ be a _____ decrease _____ annual _____ use/costs _____ we _____ fashioned _____ high-efficiency

Is _____ to save _____ on _____ electricity _____ if we _____ outdated HVAC _____ high-efficiency _____?

Replacing _____ air conditioning systems _____ high-efficiency units could _____ reductions _____ electrical _____.

Are _____ reductions in electrical _____ the _____ to higher _____?

_____ our old heating, _____ and _____ could result _____ decreases in _____ expenses.

Replacing old _____ with high-efficiency units _____ us _____ on yearly electricity bills.

_____ modern _____ energy efficient _____ air conditioning _____ lead to _____ in _____ power _____?

_____ installation of high-efficiency _____ cooling _____ help reduce _____ costs?

Is there a _____ electrical use/costs with _____ efficiency _____ ventilating _____?

_____ upgrade to _____ high-efficiency unit _____ us noteworthy _____ electrical consumption _____?

_____ a _____ from old _____ units _____ energy costs?

Replacing _____ systems _____ will _____ significant reductions in _____ use/costs.

_____ annual _____ and costs _____ be noteworthy if we _____ to _____ system.

Replacing _____ will _____ energy _____?

Replacing _____ heating, ventilation, and _____ conditioning systems with more efficient _____ savings on _____.

_____ it _____ to save on _____ changing _____ high _____ units?

_____ it _____ upgrade _____ units will cut _____ on electricity use?

Do _____ if _____ in electric expenses when updating _____ efficient HVAC _____?

_____ possible to _____ and _____ conditioning _____ with high-efficiency alternatives that will _____ significant reductions _____

_____ high-efficiency _____ and cooling _____ good for _____?

Do you think _____ be a reduction in _____ the upgrade to _____?

Replacing _____ HVAC _____ with high-efficiency _____ likely yield substantial _____ in _____.

Will _____ of old _____ ventilating and _____ units cut _____ use?

Is it _____ the _____ energy-saving heating, _____ air conditioning systems will _____ sizable _____ in _____ of _____ heating, ventilating, and air _____ (HVAC) _____ significant _____ in _____ use _____ associated costs?

Replacing outdated heating, _____ systems with high-efficiency _____ will yield substantial _____ in _____ costs.

Replacing _____ heating/cooling systems with _____ efficient _____ lead _____ a reduction _____ electrical _____.

_____ possible to install newer, energy- efficient HVAC systems that _____?

Is it possible _____ money by _____ with _____ models.

Replacing _____ heating/cooling _____ more _____ solutions each year _____ reduce _____ costs.

Is _____ energy-saving heating, ventilating, _____ air conditioning _____ to _____ to _____ cut in our

Are notable _____ usage _____ financial cuts possible _____ energy-efficient _____ ventilating _____ air _____?

_____ and cooling equipment _____ energy _____ models can _____ money.

_____ it possible _____ upgrade _____ HVAC _____ to _____ annual electricity use _____?

Is _____ replacing tired heating/cooling systems _____ modern _____ reduces _____?

_____ heating and cooling _____ be able to _____ power _____.

Can _____ replacement _____ outdated heating, _____ and _____ conditioning _____ systems _____ reductions in _____ and costs?

_____ a _____ efficient heating and cooling _____ reduce electric _____?

_____ updating _____ and _____ units _____ energy _____ and _____ reduce _____ expenses?

Is it _____ replace _____ and _____ units _____ efficient models.

_____ it _____ efficient HVAC _____ can reduce yearly electric _____?

Is it possible to save _____ money _____ electrical _____ replace _____ units with _____ efficient ones?

_____ it _____ save a lot of _____ replacing _____ with _____ efficient ones?

Replacing _____ heating _____ cooling systems _____ able to reduce _____ costs.

_____ heating and _____ systems, less _____ yearly?

_____ it possible _____ new high-efficiency _____ systems _____ my _____ costs?

Is it _____ power _____ financial cuts _____ achieved by installing _____ efficient heating and _____?

Will the switch from old to _____ energy _____?

Is it _____ to _____ and _____ efficient HVAC to reduce _____ expenditures?

_____ it true _____ modern and more _____ heating/cooling _____ electricity _____?

_____ it possible to reduce _____ consumption _____ costs by replacing _____ ones annually?

_____ air-conditioning (HVAC) replacements _____ allow _____ notable power _____ and financial cuts

Replacing _____ will yield substantial _____ annual electrical use/costs.

_____ heating, _____ air _____ systems _____ more efficient ones _____ save electricity.

_____ it _____ swap _____ crappyHVAC systems for _____ that will lower _____ and _____?

Is _____ for _____ installation _____ high-efficiency HVAC _____ to _____ bills?

_____ possible to save _____ money by replacing _____ with efficient alternatives?

_____ old heating and cooling _____ with _____ can save _____ yearly _____ bills.

If _____ switch _____ outdated units to _____ efficient ones, can _____ our _____ costs?

Updating our _____ and _____ conditioning systems with high-efficiency _____ significant _____ in electricity _____.

_____ save a _____ money by replacing oldHVAC _____ with highly _____ alternatives.

I _____ know if new _____ systems _____ electric costs.

_____ our oldHVAC systems _____ high efficiency units _____ significant decreases in _____.

_____ big savings _____ electricity _____ you switch to high-efficiency _____ units?

When _____ and _____ systems _____ replaced _____ models _____ there be significant _____ in _____ expenditures?

Replacing _____ heating, _____ and air conditioning units _____ high-efficiency _____ will likely _____ our annual _____.

Does it make _____ upgrade older _____ cooling systems to _____?

Do _____ energy efficient heating, _____ lead to _____ electric power consumption?

Is _____ substantial savings on _____ bills by replacing outdated heating and _____ with _____?

Will _____ from _____ to _____ result in lower energy _____ each _____?

_____ and air _____ systems with high-efficiency _____ will save _____ money _____ bills.

Is _____ possible _____ energy-saving _____ ventilating, _____ air-conditioning systems _____ lead to sizable _____ obsolete _____ systems _____ more _____ solutions _____ a considerable _____ in electrical consumption and _____.

Is it _____ to _____ state-of-the-art high-energy _____ and _____ conditioning equipment _____ switch from old _____ efficient units result _____ lower _____?

Do _____ heating, _____ air conditioning units reduce electric _____?

_____ it _____ save on _____ old _____ and _____ systems with high-efficiency units.

_____ we _____ reduction _____ annual electric _____ we _____ from _____ units to efficient ones?

_____ the _____ modern, energy-saving _____ ventilating, _____ conditioning systems _____ lead _____ large reductions in electrical

_____ updated heating and cooling _____ able _____ electric _____?

_____ installation of _____ units lead _____ reductions in _____ costs _____ the business?

_____ possible to save money _____ yearly _____ bills _____ replace _____ heating _____ systems with high-efficiency _____?

_____ there a decrease _____ expenses when you _____ systems?

Replacing old _____ cooling systems _____ units _____ energy costs.

_____ of our _____ ventilating, and _____ conditioning _____ in decreased yearly _____ expenses.

_____ there a reduction in _____ consumption/bills _____ units?

_____ it be possible _____ swap out crummyHVAC _____ better _____ that will _____ electricity _____?

_____ a _____ reduction in _____ and _____ with the _____ to _____ efficiency?

Is _____ air conditioning systems _____ to _____ bill?

Do modern _____ energy efficient _____ ventilating, _____ conditioning units _____ power consumption?

Is _____ possible _____ money _____ electricity bills _____ replacing old heating, _____ conditioning (HVAC) _____ high

Is _____ and cooling system _____ for _____ savings?

_____ the efficiency of _____ heating, _____ air conditioning systems _____ result in a _____ in _____.

Is _____ to decrease _____ with _____ cooling systems installation?

_____ possible to save _____ by moving to _____ units?

Installation _____ energy-efficient heating, ventilating and air _____ (HVAC) replacements _____ notable _____ cuts.

Is _____ AC replacements can _____ electricity expenses?

Is it _____ electrical consumption _____ replacing obsolete _____ systems with more efficient _____ each _____?

_____ it _____ replace old _____ conditioning systems _____ efficient _____ to _____ costs?

_____ systems able _____ my _____ bill?

_____ to _____ consumption/bills by installing efficient _____ and cooling _____?

_____ replace the _____ ones can the new _____ cut my _____?

_____ it _____ to reduce _____ consumption _____ installing _____ heating/ cooling _____?

_____ ventilating, and air _____ replacements are capable of notable _____ financial cuts.

Is it _____ to _____ electricity _____ by going to high _____?

_____ outdated heating, ventilating _____ systems with _____ units will yield significant _____ annual electrical _____.

_____ it possible to save substantial _____ if we _____ obsolete _____ units with _____?

_____ usage and financial _____ by _____ energy- _____ heating, _____ and air conditioning?

Is it possible _____ units _____ energy _____ considerably?

The _____ of modern, energy-saving _____ ventilating, and air conditioning (HVAC) _____ in _____

Replacing _____ and cooling _____ can _____ in _____ reductions _____ power _____ expense.

Is _____ possible to _____ substantial savings _____ yearly _____ if _____ HVAC systems _____ efficiency units?

Replacing _____ and air conditioning _____ with _____ would _____ electricity per year.

_____ possible to _____ outdated _____ and air conditioning systems _____ high-efficiency alternatives _____ substantial reductions _____

Replacing _____ heating/cooling _____ with _____ solutions _____ in a _____ electrical consumption.

Will _____ ventilating, and air conditioning _____ result in a _____ electrical _____ and expenditures?

_____ it _____ consumption and _____ replacing antiquated heating and _____ systems?

_____ replacements lead to electric savings?

_____ efficient heating _____ cooling _____ usage annually?

_____ replacement of an _____ heating, _____ conditioning system _____ substantial reductions in electrical _____ costs?

Replacing _____ cooling units with energy _____ save _____ money annually.

_____ possible _____ save a _____ money on electricity bills by _____ old HVAC _____ high-efficiency _____?

Will an _____ my vintage _____ result _____ a _____ electric usage _____ spent?

_____ replace _____ ones, can I cut _____ electric costs _____ new high _____?

Installation of _____ air _____ (HVAC) replacements _____ have notable power _____ financial cuts.

Is _____ installation _____ energy-saving HVAC systems going to _____ big _____ in _____?

Updating our _____ ventilating, and air conditioning _____ units _____ in significant decreases _____.

_____ our _____ ventilating, and _____ conditioning systems _____ result _____ electricity costs.

Is it possible _____ save _____ bills _____ switch _____ efficiency units?

Can _____ expect _____ in _____ annual electric _____ if _____ from outdated _____ efficient HVAC units?

_____ new high-efficiency systems cut my _____ costs _____ replace _____ ones?

_____ new, efficient HVAC systems _____ reduce electric costs.

_____ a lot of _____ and costs _____ upgrade to higher efficiency HVAC _____?

_____ the replacement _____ outdated HVAC _____ with _____ achieve significant _____ in _____ and associated costs?

_____ yearly _____ use/costs _____ by the _____ to modern _____ systems?

_____ energy efficient _____ me money.

When obsolete _____ high-efficiency _____ could there _____ significant cuts in _____?

_____ we expect _____ reduction in our _____ costs/usage if _____ outdated _____ to highly _____?

_____ heating and cooling systems _____ to _____ power _____ and _____.

_____ our _____ ventilating, _____ conditioning systems _____ result in a _____ yearly electricity _____.

_____ tired heating/cooling _____ for _____ will lower electricity _____.

_____ outdated heating, ventilating and air _____ systems _____ units will _____ substantial _____ use/costs.

Is _____ to _____ out tired heating/cooling _____ for _____ ones _____ lower _____ bills?

_____ the _____ bill _____ if the ancient AC/heat _____ swapped out?

Do _____ be a noticeable decrease _____ our annual _____ use/costs _____ units with high -

_____ the installation _____ heating and cooling units lead _____ reductions _____ electrical costs _____ business?

Updating our _____ heating, ventilating, and air _____ systems with _____ units could _____ in _____.

_____ efficiency _____ heating, _____ and _____ conditioning systems _____ result _____ lower electricity expenses.

Do _____ we'll _____ reduction in our annual _____ if _____ old-fashioned heating _____ units with _____

Is there _____ in electrical _____ with _____ upgrade _____ a higher _____?

Do _____ think replacing _____ HVAC _____ high-efficiency options _____ in a decrease in _____ costs? _____ the _____ from _____ to _____ in a _____ in energy costs?

Is _____ to _____ consumption and _____ by replacing _____ and cooling _____? _____ power usage _____ financial cuts to be achieved _____ installing energy- _____ heating and _____? _____ replacing an _____ heating _____ cooling system _____ energy _____? _____ it possible that high-efficiencyHVAC _____ to _____? _____ our heating, ventilating, and _____ conditioning systems _____ high-efficiency _____ significant reductions in _____ electricity _____.

_____ an upgrade of an air _____ use and save _____?

Replacing _____ heating, ventilating, _____ air _____ system _____ a _____ yield notable economies. _____ replace obsolete _____ units _____ high-efficiency _____ could _____ be _____ savings in _____ costs?

Do _____ think we'll _____ decrease in _____ annual _____ use/costs if _____ replace old fashioned _____ units _____ the installation of _____ heating, _____ air conditioning _____ electricity _____? _____ heating, _____ and _____ conditioning _____ achieve significant reductions in electrical use and _____?

Installation of energy efficient _____ and air conditioning _____ notable power _____ savings.

Are notable _____ possible by _____ heating, ventilating, and airconditioning (HVAC) _____?

Is _____ to _____ out crappyHVAC systems _____ will lower electricity usage _____?

Is _____ reduce annual _____ costs _____ new, efficient HVAC _____? _____ be possible to _____ to _____ heating, ventilating and _____ (HVAC

Is it _____ that the annual _____ expenditures _____ be _____ when _____? _____ energy efficient heating, _____ air _____ replacements can have _____ power usage _____ financial _____. _____ possible that updated _____ will slash _____ electric _____? _____ it be possible _____ swap _____ old heating and _____ for _____ ones _____ lower _____ usage and _____? _____ you _____ see _____ in our annual _____ use/costs if _____ our _____ fashioned _____ units with _____ efficient _____ old _____ with _____ units can cut energy _____. _____ and cooling _____ be able to reduce power _____.

Is _____ of modern, energy-saving heating, _____ and _____ conditioning _____ going to lead to _____ old _____ Ventilation, and air _____ systems _____ more _____ would _____ annually. _____ old and installing efficient heating _____ cooling equipment help _____? _____ the _____ high-efficiency air conditioning _____ reduce electricity _____? _____ possible for electric _____ to be reduced _____ updating _____ efficient _____?

Replacing _____ ventilating _____ air _____ systems _____ high-efficiency alternatives _____ annual _____ and associated costs.

Is it _____ swap _____ outdatedHVAC systems _____ ones _____ will lower _____ and _____? _____ newer, energy _____ heating and cooling _____ to _____ down _____ our electricity costs?

Replacing outdated _____ cooling _____ with energy _____ models _____ save me _____.

Replacing our obsolete _____ and _____ conditioning system _____ unit _____ yield economies in _____ consumption _____.

_____ it _____ systems can reduce annual electric costs?

_____ it possible _____ reduce _____ consumption _____ obsolete _____ systems with more _____ each _____? _____ to save _____ electricity _____ by _____ to high-efficiency units?

Replacing _____ ventilating and _____ (HVAC) _____ high-efficiency units _____ yield substantial _____ in _____ use / _____ the installation of _____ cooling _____ decrease electricity expenses? _____ and air _____ more efficient ones might save _____ money.

Do _____ more _____ and cooling _____ reduce electricity _____? _____ the _____ of _____ heating _____ cooling equipment decrease _____ electricity _____?

The installation of high-efficiency _____ ventilating, _____ air _____ expenses.

Is it possible to replace _____ with _____? _____ systems _____ units might _____ energy costs.

Is it possible to _____ yearly _____ bills _____ replacing outdated systems _____ ?

_____ our _____ with high-efficiency _____ result _____ significant _____ in yearly electricity _____.

_____ possible to _____ out _____ systems _____ better ones that will _____ electricity usage _____ ?

Is _____ possible to _____ on _____ bills _____ to _____ units?

Is it possible to _____ electricity _____ changing _____ ?

_____ ventilating, and air conditioning systems _____ more efficient _____ electricity.

Is it _____ switch to _____ state-of-the-art high-energy efficiency _____ conditioning _____

_____ old heating/cooling _____ with _____ efficient _____ saves _____ consumption _____ costs.

Replacing _____ heating and _____ will enhance _____.

_____ it possible _____ modern heating and cooling _____ reduce _____ ?

_____ you think _____ see a _____ in _____ we replace old-fashioned _____ and _____ units with _____

Are _____ conditioning replacements _____ for electric savings?

The installation of modern, energy-saving _____ and _____ could _____ cuts in

Is _____ possible _____ electrical costs _____ we replace obsolete HVAC units with _____ ?

_____ you think there _____ significant cuts in _____ when high-efficiency _____ obsolete _____ ?

_____ it possible for _____ use/costs _____ be _____ with _____ upgrade _____ higher _____ systems?

Replacing _____ ventilation, and _____ more efficient ones _____ significant savings _____ the electricity bill.

_____ switch from _____ units to efficient _____ result _____ costs?

_____ HVACs are replaced _____ high-efficiency _____ any _____ in electrical expenditure?

Do high-efficiency _____ ventilating devices _____ electric _____ ?

_____ swap out _____ systems for _____ ones _____ will lower costs _____ electricity _____ ?

_____ it possible _____ power usage _____ an _____ heating _____ system?

_____ out tired heating/cooling _____ for modern _____ that will use less _____ ?

_____ that replacing tired _____ systems for modern ones _____ equivalent _____ lower _____ ?

Can you _____ bills by _____ units?

_____ significant _____ with the upgrade _____ a higher efficiency system?

_____ the _____ of energy-efficient HVAC _____ lead _____ electrical _____ for the business?

Updating our heating, ventilating _____ air _____ systems _____ units _____ result _____ significant _____ yearly _____ expenses.

_____ if there is a significant decrease _____ electric expenses _____ efficient system?

_____ to _____ ventilating, and air-conditioning _____ yearly electrical use?

Is it _____ decrease annual electricity _____ installing _____ heating, ventilating, _____ conditioning _____ ?

_____ efficiency of _____ ventilating, _____ air _____ systems could result _____ lower _____ costs.

_____ possible _____ efficient HVAC systems _____ reduce _____ costs?

Are _____ reductions in _____ use/costs _____ higher efficiency HVAC systems?

_____ enhance _____ efficiency

Can we expect _____ see a reduction in _____ electric _____ we _____ efficient _____ and _____ ?

_____ upgrade to _____ energy-saving HVAC system result in a _____ expenditures?

_____ old units _____ replaced with _____ units _____ lower energy _____ ?

_____ obsolete heating/cooling _____ with more _____ solutions annually _____ and costs.

Increasing the _____ our _____ ventilating, and air _____ could result in significant _____.

_____ it possible that new high-efficiency _____ when _____ replace the old _____ ?

Replacing obsolete _____ with _____ solutions each year is thought _____ costs.

Is it _____ cut my electric _____ I _____ old _____ conditioning systems?

_____ see _____ decrease _____ our annual electricity _____ if we replace _____ fashioned HVAC _____ with more

efficient _____ ?

_____ heating, ventilating and air conditioning _____ can reduce _____.

Can we expect _____ in our annual _____ costs/usage if _____ switch to _____ cooling _____ ?

Replacing _____ ventilating, _____ air conditioning systems with _____ money _____ power bills.

Replacing old _____ systems with more _____ would save _____ money on your electricity _____.

_____ an _____ modern heating, ventilating, _____ air _____ yearly electrical costs?

Increasing the efficiency _____ our _____ and air conditioning _____ result _____ decreases _____.

_____ think _____ rid _____ and installing efficient _____ help reduce _____ expenses?
_____ it possible to install newer, _____ and air conditioning _____ that will cut _____ on _____
_____ of _____ heating, ventilating, and _____ systems achieve reductions _____ use and _____?
_____ energy efficient heating, _____ air conditioning _____ can _____ notable power _____ and financial _____.
Is it _____ decrease _____ expenses _____ installing _____ systems?
_____ notable _____ and _____ possible by installing energy-efficient _____ and _____ conditioning (HVAC) _____?
Updating heating and _____ will _____ will reduce _____ expenses.
_____ high-efficiency heating and _____ to _____ electric savings?
Will _____ old units _____ efficient _____ result _____ lower energy _____?
_____ the installation of _____ heating, _____ air-conditioning _____ systems _____ to _____ big cuts
_____ it possible _____ save _____ lot _____ money on electrical _____ replace _____ and _____ units with _____ alternatives?
_____ that updated heating _____ systems _____ slash my electric _____?
_____ there a _____ in _____ and _____ with the upgrade _____ efficiency HVAC _____?
Do modern and _____ heating _____ units reduce _____?
Will _____ of _____ heating, _____ and air conditioning units _____?
_____ it _____ to _____ out tired _____ for _____ that will _____ you money on electricity _____?
_____ efficiency _____ cooling systems, which _____ utilities?
_____ it possible _____ new, efficientHVAC systems _____ lower _____?
_____ of _____ heating, _____ and air conditioning system result in a _____ or expenditures?
_____ possible to reduce electric _____ installing efficientHVAC _____?
Is it possible for new, _____ and _____ systems to _____?
_____ and cooling units _____ energy _____?
Is _____ to replace outdated heating _____ air conditioning _____?
_____ it _____ possible to _____ old _____ to _____ down on _____ use?
Is it _____ to _____ with efficient _____ reduce _____ costs?
_____ ventilating, and air conditioning _____ annual electrical expenses.
_____ possible to reduce _____ and _____ installing efficient _____ units?
_____ higher efficiency _____ ventilating, _____ air conditioning systems _____ reductions _____ electrical use.
_____ the _____ efficient heating _____ going _____ lead to reductions _____ electrical costs?
Will _____ heating, ventilating, _____ conditioning systems _____ electrical use/costs?
_____ energy- _____ heating, ventilating, _____ (HVAC) replacements can result _____ notable power _____ financial _____
Will _____ outdated heating _____ equipment _____ energy _____?
_____ major utility-bill _____ energy-consumption _____ when replacing older heating and cooling equipment with _____?
_____ obsoleteHVAC system _____ high-efficiency _____ yield noteworthy economies _____ annual electrical consumption _____?
_____ an energy-saving heating _____ system _____ in a decline _____ usage or expenditures?
_____ possible to _____ electric costs with _____ heating and cooling _____?
_____ to modern _____ and air _____ systems lower yearly _____?
_____ it possible _____ HVAC thingies will save _____ electrical _____?
_____ to install newer, energy-efficient HVAC systems _____ cut _____ expenses?
Is _____ reduction _____ electric consumption _____ installing _____ heating and _____?
Is it _____ anticipate _____ on _____ electricity bills _____ replacing old systems _____ efficiency _____?
_____ switch _____ a state-of-the-art _____ heating, _____ and air _____ (HVAC)
Will _____ electrical use/costs be lower _____ to modern _____?
_____ installation of high-efficiency _____ ventilating and _____ conditioning _____ bills?
_____ heating, _____ and air _____ systems with _____ efficient _____ save electricity.
_____ to _____ power _____ energy efficient heating, ventilating and air conditioning (HVAC) replacements?
_____ state-of-the-art high-energy _____ and air _____ machinery _____ in order to
_____ heating _____ cooling systems _____ be _____ to _____ and expense.

Higher _____ less utilities _____?

Can we _____ see _____ reductions _____ electric costs if we _____ outdated _____ to efficient _____?

When _____ replace _____ old _____ can new _____ HVAC _____ cut _____ costs?

_____ and _____ efficient _____ setups might _____ electricity charges by _____.

Installation of energy- efficient heating, _____ replacements _____ capable of notable _____ usage and _____.

_____ heating, ventilating, and air _____ systems _____ on our electricity _____?

_____ it possible _____ power _____ and financial cuts _____ be achieved _____ efficient HVAC _____?

Can _____ cooling systems reduce my electric _____ when _____ replace my _____?

I _____ if new high-efficiency _____ can cut _____ electric costs.

Is it _____ of _____ install efficientHVAC _____ reduce yearly _____ expenses?

Do _____ think we'll see _____ decrease _____ annual _____ if we _____ our _____ units with more _____

_____ air conditioning systems _____ high-efficiency units will _____ significant reductions _____ use/costs.

_____ replacing old _____ air conditioning _____ on electricity use?

_____ reductions _____ electricity use and _____ possible with _____ upgrades.

Do _____ energy-efficient _____ ventilating, and _____ conditioning units _____ use _____ costs?

When obsolete heating and _____ with _____ models are there _____ to be significant _____?

Is the installation of _____ heating, _____ air-conditioning _____ lead to huge _____

Can the replacement _____ high-efficiency _____ annual electrical use and costs?

Will _____ air-conditioning systems lower _____ electrical use and _____?

Updating _____ heating, _____ conditioning systems _____ units could result in _____ in _____ costs.

_____ a _____ electric consumption/bills if you _____ efficientHVAC _____?

Can _____ of _____ and cooling _____ electricity usage?

Does changing old _____ lower electrical _____?

_____ it make sense _____ conditioning systems _____ lower electrical _____?

_____ there _____ correlation between high-efficiency _____ replacements _____ electric _____?

Is _____ a _____ of money on electricity bills _____ replacing _____ systems with high _____?

Is _____ a _____ electric expenses when _____ heating _____ air conditioning _____?

Do _____ efficient _____ and cooling _____ save electricity?

_____ replacing _____ heating/cooling _____ with more efficient _____ a _____ reduction _____ consumption and _____?

_____ to _____ with energy-efficient models?

Is it _____ to _____ lot _____ money on electrical costs if _____ old _____ conditioning units _____

_____ it _____ to _____ electrical use/costs _____ upgrade to _____ efficiency _____ systems?

Is _____ possible _____ costs byUpgrading agingHVAC _____

_____ and air _____ (HVAC) replacements could lead to _____ power _____ and financial _____.

Is it possible _____ the new fancy _____ thingies _____ me money _____?

_____ it _____ save a lot _____ by replacing oldHVAC _____ efficient alternatives?

Is _____ possible to _____ a lot _____ with more _____ systems?

Is updated air _____ able _____ electric bills?

Is updated _____ capable _____ reducing _____ electric bills?

_____ possible _____ save a lot _____ costs if we _____ with high-efficiency _____?

_____ it _____ to _____ a lot _____ money if _____ outdated _____ systems _____ highly efficient _____?

_____ new, efficient _____ and cooling _____ electric _____?

_____ possible to save _____ lot _____ money _____ yearly electricity _____ replacing _____ systems _____ high-efficiency units?

_____ power _____ possible by installing energy efficient heating, ventilating, and _____?

_____ and cooling equipment will enhance _____ significantly.

Could _____ installation of _____ energy-saving heating, ventilating, _____ (HVAC) systems lead _____ huge _____

Is _____ to _____ newer, energy-efficient _____ and _____ systems to _____ on _____ bills?

Is _____ possible to _____ units _____ electricity use _____ money?

Replacing our _____ heating, ventilating, _____ system _____ a high-efficiency _____ would _____ economies.

_____ of high-efficiency heating, ventilating and _____ systems _____ expenditures?

Do you know _____ in electric _____ when updating _____ HVAC systems?
 _____ installation of high-efficiency _____ and cooling _____ decrease _____ electricity _____?
 Can replacing _____ and cooling units _____ efficient models _____?
 _____ that the installation _____ energy-saving heating, ventilating, _____ air _____ systems _____ lead
 Replacing old heating, ventilation, _____ with _____ ones _____ save _____.
 _____ you think we'll _____ a decrease in our annual electricity _____ replace _____ -
 Can the _____ of HVAC _____ with high-efficiency _____ reductions in _____ associated costs?
 Replacing _____ with efficient _____ can _____ energy costs.
 _____ updating to efficient heating and cooling _____ there a _____?
 _____ a _____ of _____ and air conditioning _____ achieve significant reductions in electrical _____ and _____?
 _____ it possible _____ decrease annual electricity bills _____?
 _____ there _____ in electrical use _____ upgrade _____ higher _____ heating, _____ and _____ systems?
 Is _____ reduction _____ use/costs after _____ upgrade _____ efficiency HVAC systems?
 Can _____ of high-efficiency heating, _____ and _____ decrease _____ costs?
 _____ energy-efficient _____ ventilating, and air conditioning (HVAC) _____ can reduce _____ and _____.
 Replacing obsolete _____ systems _____ save electrical _____ and costs.
 Is _____ possible _____ systems and decrease _____ consumption?
 Is _____ reduce _____ consumption _____ old heating/cooling _____ with more _____ ones?
 If we _____ from outdated _____ to more _____ can _____ expect _____ electric costs?
 Replacing old heating, ventilating, and _____ more _____ would bring savings _____ bill.
 _____ reductions in electrical _____ with the _____ to _____ efficiency heating, _____ air conditioning _____?
 Is it possible that _____ more _____ HVAC _____ reduce _____?
 Is _____ to save _____ on electricity bills _____ you _____ to _____ HVAC _____?
 Is _____ possible _____ replace HVACs _____ energy _____?
 _____ outdated _____ will make _____ more _____.
 _____ heating _____ cooling _____ with energy- efficient _____ save _____ money.
 _____ there _____ be savings on _____ if you _____ to _____ efficiency units?
 When I replace _____ old _____ high-efficiency systems _____ my _____?
 Do high-efficiency _____ conditioning _____ lead _____ electric savings?
 _____ the _____ of _____ energy-saving heating, ventilating, _____ air-conditioning _____ lead to _____ cuts _____
 _____ to _____ out outdated _____ systems _____ better ones that will _____ costs and _____?
 Is there _____ decrease _____ electric expenses when _____ upgrade to _____ systems?
 Can we expect to _____ a reduction _____ our _____ if _____ from outdated _____ heating and _____?
 Replacing _____ and cooling _____ to reduce power _____ and expense.
 Is _____ HVAC systems _____ slash my _____ bills?
 _____ of energy-efficient heating, ventilating and _____ conditioning (HVAC) replacements _____ power _____.
 _____ a _____ in electric expenses _____ you _____ to efficient heating _____?
 The _____ annual _____ and costs would be _____ if we _____ our obsolete _____ with _____ high _____.
 Do you _____ will _____ a _____ in our annual electricity _____ our _____ fashioned _____ cooling _____ with high
 Replacing tired _____ for _____ ones might result in _____.
 Higher _____ utilities _____ annually?
 _____ possible to swap _____ outdated HVAC _____ for _____ that _____ electricity usage?
 Is it possible that _____ efficient _____ and cooling _____ reduce _____?
 _____ new high-efficiency systems _____ my _____?
 _____ ventilating, _____ conditioning _____ may result in significant decreases _____ electricity expenses.
 _____ it _____ annual electric _____ with _____ efficient HVAC systems.
 Will _____ outdated HVAC systems _____ units _____ substantial reductions in _____?
 _____ and _____ efficient _____ setups _____ electricity charges.
 Is _____ to reduce electric _____ by installing efficient _____?
 _____ reduction _____ consumption/bills _____ to _____ installation of efficient HVAC units?

Updating our heating, _____ systems with _____ could result _____ decreases in _____.

Is _____ a _____ of _____ in _____ electrical costs if we replace obsolete _____ alternatives?

Is _____ possible _____ a _____ on electricity bills _____ to high efficiency _____?

_____ it possible to _____ rid _____ old _____ efficient _____ to reduce _____ expenses?

Replacing old _____ air conditioning systems _____ efficient ones would _____ on electricity _____.

_____ upgrade to _____ efficiency _____ ventilating, _____ air _____ reduce electrical use/ _____?

Is _____ that _____ will be cuts _____ annual _____ expenditure when high-efficiency _____?

A _____ efficiency heating and _____ - less _____?

Will _____ cooling systems _____ usage?

_____ we _____ reduction _____ our electric costs _____ we _____ outdated _____ to highly efficient _____?

_____ efficient _____ and air conditioning units _____ electric consumption/bills.

Replacing obsolete _____ systems _____ annually _____ to _____ in electrical consumption and costs.

Can we expect _____ save _____ electricity bills _____ heating _____ cooling _____ high-efficiency units?

_____ possible _____ HVAC units and reduce electricity _____?

Is it possible that _____ installation _____ heating, ventilating, and _____ will _____

_____ obsolete _____ with _____ solutions will _____ consumption and costs.

Are notable _____ financial cuts _____ efficient heating, ventilating, _____ airconditioning (HVAC) _____?

_____ heating/cooling _____ with more _____ solutions _____ year _____ electrical consumption _____ costs.

Is _____ possible to reduce _____ by installing _____ ventilating and _____?

Will _____ upgrade _____ systems with _____ units result _____ a _____ in _____ and _____?

Replacing _____ air conditioning _____ with more efficient ones _____ electricity every _____.

_____ it _____ reduce electric _____ by installing _____ heating _____ units?

Can _____ significant reductions in _____ if _____ switch from outdated units _____ highly _____?

Replacing obsolete _____ systems _____ solutions _____ consumption and costs.

_____ new _____ systems _____ electric _____ I replace my old _____?

Can the _____ systems with high efficiency alternatives _____ significant reductions _____?

_____ we _____ reduction _____ annual _____ costs/usage if we switch _____ highly efficient _____?

_____ possible to reduce annual _____ with _____ efficient heating _____ systems?

Can the replacement of an old _____ air _____ reductions _____ electrical _____?

How _____ heating _____ systems - less utilities _____ annually?

Installation of energy-efficient _____ and _____ (HVAC) _____ may have _____ power _____ financial _____.

Replacing old _____ ventilating, and _____ conditioning systems with _____ will _____ reductions in _____

Replacing old _____ ventilating, and air _____ systems _____ more _____ save _____.

Is it _____ get rid of old and _____ expenses?

Installation _____ efficient heating, _____ and air conditioning _____ reduce _____ and _____.

_____ old heating, ventilation, _____ conditioning _____ with _____ ones _____ save _____ electricity bills.

_____ it possible _____ change _____ consumption _____ expense _____ heating _____ cooling systems?

_____ a _____ from _____ units to efficient _____ energy expenses annually?

Is _____ possible to swap out _____ ones that _____ electricity?

Will _____ upgrade of _____ vintage _____ setup result in _____ in _____?

_____ replacing tired heating/cooling _____ with _____ lower electricity _____?

Is _____ with energy efficient models.

_____ you think _____ will be _____ decrease _____ expenses _____ updating _____ efficient _____ systems?

_____ possible _____ the new high-efficiency HVAC _____ my electric costs?

Replacing _____ ventilating, and _____ systems _____ more efficient ones might _____.

Installation _____ energy-efficient _____ ventilating and _____ conditioning _____ can have notable _____ usage _____.

_____ our heating, _____ air _____ with _____ units could _____ decreased _____ electricity expenses.

Can _____ expect _____ save _____ electricity bills if we _____ old _____ systems with _____ efficiency _____?

_____ there a _____ the _____ of modern, _____ heating, ventilating, and _____ could _____

_____ and cooling systems are _____ models, _____ there be _____ in electrical expenditure?

Is _____ true _____ replacing _____ systems with _____ ones _____ bills?

Are _____ power _____ financial _____ by installing _____ and air conditioning units?

Is it _____ old heating and cooling _____ with efficient ones _____?

_____ ventilating, and air _____ units _____ reduce electric consumption.

_____ it possible to save a lot _____ replacing _____ and cooling systems with _____?

_____ a reduction _____ our _____ electric costs/usage _____ we switch from outdated _____ to _____ efficient _____?

_____ there a reduction in electrical use _____ if _____ to _____ higher _____?

Replacing _____ and _____ conditioning _____ with high-efficiency _____ could _____ significant reductions in _____ electrical _____.

Are notable power _____ by _____ energy- efficient heating, _____ air conditioning _____?

_____ of _____ outdated heating, ventilating and _____ significant reductions in electrical _____ and costs?

Replacing _____ heating, _____ air _____ systems with _____ alternatives might _____ to _____ substantial _____ in _____ electrical use

Is _____ possible _____ and financial cuts to be achieved _____ heating, ventilating, and _____

Is _____ possible _____ newer, _____ energy efficient _____ conditioning _____ to cut _____ expenses?

_____ it possible to install _____ heating and _____ cut down on our _____?

Do you _____ is a significant _____ in electric _____ to efficient heating _____ systems?

_____ significant reduction changes in _____ expense possible _____ heating and cooling _____?

Will the _____ yearly electrical usage be _____ by _____ upgrade of _____ energy-saving _____?

Is _____ obsolete _____ systems with _____ efficient solutions yearly _____ reduce _____ consumption _____?

_____ outdated heating _____ equipment will enhance _____

_____ it possible _____ a lot of money when _____ oldHVAC _____ more _____?

Is _____ possible to install newer, _____ energy _____ heating _____ cooling _____ cut _____ electricity _____?

Are there significant decreases _____ power usage through _____?

ModernizingHVAC systems _____ power _____.

_____ tired heating/cooling _____ for modern ones _____ lower electricity bills?

Will _____ of _____ heating and _____ units cut _____ on _____?

Is it possible _____ our _____ air conditioning system with _____ high-efficiency _____?

Can _____ and air _____ systems reduce _____ expenses?

The _____ of modern, _____ could lead to sizable _____ yearly _____ consumption.

_____ the installation of _____ heating _____ cooling _____ reductions in _____ costs?

Is it possible _____ substantial _____ we replace _____ units _____ efficiency alternatives?

Can _____ switch to state-of-the-art high-energy _____ heating, _____ and _____

Is it _____ upgrade to modern _____ will _____ yearly _____ use/ _____?

_____ old _____ conditioning _____ to _____ down on electricity use?

_____ obsolete _____ are _____ with high-efficiency models, _____ there be significant cuts _____?

_____ and _____ with more efficient ones would bring _____ savings on electricity bills.

Is it possible _____ save money _____ HVACs _____ ones?

Can _____ installation of high _____ heating, _____ reduce annual _____ expenses?

_____ it possible to swap _____ systems for _____ that _____ save _____ bills?

_____ it _____ get notable power _____ and _____ installing _____ ventilating, and air conditioning (HVAC)

Do _____ think we'll see _____ decrease in our _____ if we _____ heating, ventilating _____

Will the upgrade of _____ cooling _____ electricity _____?

Replacing _____ systems with _____ options _____ electrical consumption _____ costs.

Is _____ to save _____ on yearly electricity bills _____ high-efficiency ones?

Is it possible _____ cuts _____ be achieved by installing energy efficient _____ cooling _____?

The _____ of modern, _____ heating, _____ and _____ conditioning _____ systems may _____ in our

_____ it _____ save _____ significant _____ electrical costs _____ replace obsolete units _____ high-efficiency alternatives?

Do you _____ that _____ in our annual electricity use/costs _____ old fashioned HVAC _____ with _____

_____ installation of modern, energy-saving _____ ventilating, _____ systems _____ significant cuts in

Can _____ reductions in our _____ switch from outdated to _____ efficient _____ and _____ units?

____ an ____ of ____ with energy-saving units result in a decline ____ yearly ____ ____?

____ there ____ be ____ in electrical ____ when high-efficiency ____ used ____ of obsolete ____?

Do ____ think we ____ see ____ decrease in ____ annual electricity ____ we ____ old ____ units ____ high-efficiency ____?

____ an ____ of ____ ____ down on electricity use?

____ possible to reduce ____ and costs ____ replacing ____ heating ____ systems?

____ the installation ____ heating ____ systems possible ____ decrease annual electricity ____?

____ installation of ____ energy-saving ____ ventilating, and ____ conditioning systems will lead to large ____

Can my electric ____ be slashed by ____ and ____?

____ old-fashioned heating, ____ and air ____ with high-efficiency ____ annual electricity use.

____ it ____ that ____ replacements lead to ____ electric ____?

Increasing the efficiency of ____ air ____ could result in lower _____.

____ reductions in electrical use/costs ____ to higher ____ HVAC systems?

____ you think ____ see a ____ our ____ electricity use/costs if we ____ old-fashioned ____

Increasing the efficiency ____ our heating, ventilating, ____ conditioning ____ result ____ considerable ____ costs.

____ updated heating ____ cooling ____ me money on ____?

Do modern and energy ____ units ____ power ____?

____ it ____ possible ____ to state-of-the-art high-energy ____ heating, ventilating ____ machinery?

Replacing ____ heating, ____ and ____ units with ____ will ____ result in ____ electricity

____ conditioning units be upgraded ____ reduce ____ use ____ money?

Can ____ replacement of outdated heating, ____ air ____ high-efficiency alternatives result ____ substantial reductions

____ electrical ____

____ it ____ save a lot of ____ when ____ systems with ____ alternatives?

Replacing ____ HVAC ____ units can save ____ money ____ electricity bills.

Replacing obsolete ____ systems ____ more efficient ____ reduction in ____ consumption.

Will ____ upgrade of HVAC systems ____ energy-saving units ____ in ____ electrical ____?

Replacing ____ heating and cooling ____ with ____ can ____ costs.

Do ____ energy efficient air ____ reduce ____ power ____?

Replacing ____ heating/cooling ____ with more efficient ____ annually can result ____ a considerable reduction _____.

____ it possible ____ install ____ HVAC ____ that ____ down ____ electricity expenses?

Is it possible ____ swap out ____ systems ____ will lower ____ use and ____?

Is it possible ____ tired ____ systems for newer ____ that ____ electricity?

____ modern and ____ heating, ____ and air ____ units ____ electric power ____?

____ there likely to be ____ cuts ____ expenditure ____ high-efficiency models ____ instead of ____?

Is ____ electrical use/costs ____ the upgrade to ____ efficiency heating and ____?

Is ____ electrical consumption ____ costs by ____ systems with more efficient solutions ____?

Will ____ electricity be cut down by the ____ old ____?

Do ____ possible ____ save ____ electricity bills by changing to ____ efficiency ____?

____ a ____ in ____ costs ____ upgrade to ____ heating ____ cooling systems.

Will ____ installation ____ energy-efficient ____ reduction in electrical costs?

____ outdated ____ and air conditioning systems with energy-saving units ____ a ____ electrical _____.

Is there a lot ____ bills if you switch ____?

Is ____ conditioning units going to ____?

Is ____ possible ____ the installation ____ HVAC ____ electricity expenses?

Is it ____ on ____ use/costs ____ upgrade ____ higher efficiency systems?

Is ____ that high-efficiency HVAC ____ lead ____ electric ____?

____ to ____ energy-efficient heating ____ cooling systems to ____ down on ____ costs?

____ the ____ of ____ ventilating, and ____ could result in ____ decrease ____ electricity _____.

Replacing ____ with high-efficiency ____ will ____ reductions ____ annual electrical _____.

Is ____ installation ____ energy-saving heating, ventilating, ____ air ____ to lead ____ reductions in electrical

____ there significant reductions ____ electrical use ____ with the upgrade ____ higher ____?

Is it _____ electric consumption by installing efficient _____ and cooling _____?
 _____ of _____ units _____ lead _____ a _____ electric _____ and bills.

Lower utilities _____ could _____ a _____ of higher _____ systems.

Replacing old heating, Ventilation, and air conditioning _____ efficient ones _____.

_____ that the _____ high-efficiency HVAC systems _____ cut _____ costs?

Do _____ HVAC _____ lead _____ significant _____?

Is it _____ for _____ power usage and financial cuts to _____ heating and _____?

_____ the new _____ heating and cooling systems _____ electric _____ them?

_____ we will _____ a decrease _____ electricity _____ if _____ old fashioned _____ conditioning _____ with more efficient ones

Is _____ possible _____ replace _____ HVACs _____ energy- _____ models.

Installation of energy-efficient _____ ventilating, _____ (HVAC) replacements _____ power usage and _____ old and inefficient heating _____ equipment _____ reduce _____ expenses.

Is it _____ to lower power _____ through _____ cooling _____?

_____ of _____ ventilating, and air-conditioning _____ reduce _____ consumption/bills.

_____ it _____ swap _____ HVAC systems _____ better ones that will _____ costs and _____?

Installation of _____ heating, ventilating, _____ air _____ (HVAC) replacements is possible _____ usage _____.

Is _____ possible to switch _____ high-energy _____ HVAC machinery _____ cost _____ electricity use _____ replacing _____ conditioning _____ with high-efficiency units yield significant reductions _____ electrical _____ and costs?

Is _____ possible _____ money on _____ costs _____ replacing obsolete HVAC units _____ high-efficiency alternatives?

Is _____ possible _____ money _____ electrical _____ if _____ replace obsolete _____ and cooling _____ with more efficient _____?

_____ it _____ replace outdated HVACs _____ more _____ models?

Is _____ decrease _____ costs when you _____ to efficient _____ cooling?

Replacing old heating _____ cooling _____ able to _____ power _____ and _____.

Is _____ to _____ HVACs with energy- _____ models?

Will _____ upgrade to _____ HVAC _____ electrical use/costs?

_____ switch to state-of-the-art _____ efficiency heating, _____ machinery _____ a big

Will _____ be _____ to _____ use/costs by Upgrading to modern _____?

Is it possible _____ outdated heating _____ with _____ models?

Is _____ possible to install _____ energy- efficient _____ cooling _____ cut _____ expenses?

_____ modern and energy _____ heating, ventilating, and _____ help _____ power consumption _____?

Is it _____ to decrease power _____ updated _____ system _____?

Will replacing outdated _____ ventilating, _____ air _____ yield _____ reductions _____ electrical use?

_____ a significant _____ in _____ consumption/bills _____ the installation _____ units?

_____ am _____ my _____ bills can be slashed _____ updated _____.

_____ you think _____ see _____ in _____ use/costs if _____ replace old fashioned heating, ventilating

Can the _____ high-efficiency _____ reduce electricity use?

_____ modern and _____ efficient _____ ventilating _____ air _____ lead _____ in _____ power consumption or costs?

_____ old _____ ventilating _____ conditioning units _____ down on _____ use?

Can _____ reduce annual _____ by installing _____?

I _____ like to _____ heating and _____ systems _____ electric bills.

_____ to _____ electric _____ and bills by _____ efficient heating _____ cooling _____?

_____ our _____ ventilating, _____ systems with high-efficiency units could _____ in significant _____ in _____ expenses.

_____ replacement _____ outdated _____ air conditioning systems _____ significant _____ in annual electrical use _____ associated _____?

_____ heating, _____ and _____ systems _____ more efficient ones would _____ every year.

Can _____ systems _____ electric costs?

Does _____ and cooling _____ reduce _____ costs?

_____ it possible that annual _____ expenditure _____ be cut _____ are _____?

Do _____ heating and cooling units reduce _____ consumption?

____ it possible ____ a ____ money by ____ old ____ systems with efficient ____?
 ____ upgrade ____ my ____ in ____ electric usage and money spent?
 ____ to upgrade HVAC units and ____ use?
 ____ it ____ save big on electricity bills ____ installing ____?
 Replacing obsolete heating/cooling systems ____ efficient ____ a ____ reduction ____ electrical ____ and ____.
 Will replacing outdated heating, ventilating ____ air conditioning ____ high-efficiency ____ in annual ____?
 Is it possible ____ swap ____ crappy ____ systems ____ better ____ that will ____ and costs?
 Replacing ____ conditioning ____ with more efficient ones ____ save ____ annually.
 Replacing old ____ ventilating, ____ systems with ____ units ____ significant reductions ____ annual ____ use.
 Replacing obsolete heating/cooling ____ to a reduction in electrical consumption ____ costs.
 Is ____ possible to ____ electricity bills with the ____ high-efficiency ____ cooling ____?
 Is ____ heating and ____ systems ____ to decrease ____?
 Replacing outdated ____ ventilating, and air ____ high ____ will yield ____ in ____ use.
 Do ____ we'll see ____ in ____ use/costs ____ we ____ old fashioned HVAC units with high ____
 Replacing outdated ____ ventilating ____ air conditioning ____ units can ____ to substantial ____ electricity ____.
 When ____ with ____ models, are there ____ to ____ significant ____ electrical ____?
 ____ installation of energy-efficient heating ____ units ____ lower electrical ____ for our ____?
 ____ ventilating, ____ conditioning systems with high-efficiency units ____ yield ____ in ____ use/costs.
 ____ updating ____ units ____ energy ____?
 Is ____ likely to ____ in ____ electrical expenditures when high-efficiency ____ obsolete ____?
 ____ it ____ to ____ efficiency ____ replacing outdated HVAC?
 ____ we expect to see ____ in our electric ____ switch to ____ HVAC ____?
 ____ heating ____ cooling ____ to electric savings?
 ____ of ____ efficient ____ and ____ conditioning (HVAC) replacements can reduce ____ costs.
 Will heating ____ equipment be ____ enhance energy ____?
 ____ possible to save ____ costs if ____ replace obsolete units ____ high-efficiency ____?
 Is ____ and ____ to lower energy usage?
 ____ it possible to ____ usage ____ heating ____ cooling systems?
 ____ a ____ of major utility-bill and energy-consumption drops when ____ and ____ conditioning ____ with
 Is it ____ to ____ outdated HVAC systems for ____ will lower ____ and costs?
 ____ heating/cooling systems with ____ reduces ____ consumption and costs.
 ____ we expect ____ reduction in ____ electric costs/usage ____ we ____ HVAC units?
 ____ heating, ____ and ____ systems lower ____ use/ costs?
 ____ it ____ that the ____ of modern, ____ and ____ systems ____ lead to a reduction
 Replacing outdated ____ will lower ____ and ____.
 ____ it possible to swap ____ heating/cooling ____ for newer ____ that ____ electricity ____?
 Can the replacement of outdated ____ conditioning ____ result in ____ reductions ____ electrical use ____?
 ____ our ____ heating, ____ and ____ systems with ____ units could result ____ decreases in ____ expenses
 Do modern ____ more ____ heating and cooling ____ charges?
 Replacing ____ and cooling systems ____ more ____ units can ____ cut ____.
 Is it possible ____ consumption and expense ____ retrofitting ____ and ____?
 Replacing ____ heating/cooling ____ with more ____ annually may ____ to ____ electrical consumption ____ costs.
 ____ upgrade ____ efficiency ____ and ____ conditioning systems ____ reduce electrical use ____ costs.
 ____ high-efficiency heating and cooling equipment ____ annual electricity ____?
 Replacing ____ will ____ energy ____.
 ____ you ____ be a ____ in electrical ____ with the ____ to ____ efficiency?
 Replacing outdated HVAC systems with high ____ units may ____ substantial ____.
 ____ an upgrade ____ modern ____ and air ____ systems ____ yearly ____ use/costs?
 Installation ____ efficient HVAC units ____ a reduction ____ consumption/bills.
 Is it ____ out tired heating/cooling ____ lower electricity bills?

Can the _____ air conditioning _____ electricity _____?

_____ of energy-efficient _____ ventilating, and _____ conditioning (HVAC) replacements _____ be _____ to _____ usage and _____

_____ obsolete _____ with _____ efficient _____ each year will _____ consumption and costs.

_____ heating, ventilating, and _____ conditioning _____ high efficiency _____ can save us _____ on our _____.

_____ possible _____ save _____ lot _____ costs _____ replace obsolete _____ conditioning units _____ more efficient ones?

Modern and _____ reduce electricity _____ a lot.

Is _____ possible to _____ reduction _____ electric consumption with _____ installation of _____?

_____ heating _____ equipment be _____ improve energy efficiency?

Replacing outdated heating and _____ energy- _____ models _____ save _____.

Do you _____ see a _____ our _____ as _____ replacing old fashioned HVAC _____ with high -

_____ systems may _____ able to _____ power consumption _____ costs.

Is _____ to _____ annual _____ by getting rid _____ old _____ and _____ equipment?

Is it _____ decrease power _____ heating and _____ systems _____?

Is it possible _____ via _____ and cooling _____ installation?

Replacing older heating and _____ systems may _____ able _____ power _____.

Is it possible to swap _____ for _____ lower electricity usage?

Replacing outdated _____ and air _____ systems _____ high-efficiency units will _____.

_____ and _____ system _____ able to decrease _____ usage?

_____ you think _____ see a decrease in _____ use/costs _____ our old-fashioned HVAC units _____ high

_____ of energy-efficient _____ ventilating, and _____ (HVAC) _____ may _____ to _____ power usage _____

Is it _____ down on _____ by installing _____ more energy efficient _____ and _____ systems?

_____ you think _____ see _____ in _____ annual electricity use/costs _____ our _____ air conditioning units _____

_____ we _____ save _____ electricity bills _____ replacing old _____ systems with high-efficiency ones?

Could _____ installation _____ modern, _____ heating, ventilating, _____ air _____ a reduction in _____ consumption?

Is _____ there will _____ significant _____ electrical _____ when high-efficiency models are _____?

Is _____ upgrade _____ HVAC system with _____ unit that _____ save _____ money?

Can high-efficiency heating _____ cooling _____ electric _____ when I _____ older _____?

Is it _____ to _____ money _____ yearly electrical _____ if _____ replace _____ efficiency alternatives?

Is it possible _____ updating _____ air _____ systems _____ high-efficiency _____ could result _____ a decrease _____

Do you think we will see _____ decrease _____ use/costs _____ we replace _____ old-fashioned _____ with _____

_____ it possible _____ heating _____ cooling units _____ energy- efficient _____?

_____ old HVAC systems with _____ units _____ energy _____.

Is it possible _____ replace HVACs _____.

_____ it possible _____ the _____ of energy-saving _____ ventilating, and air _____ (HVAC) _____ will _____

Replacing _____ ventilating, and _____ conditioning _____ more _____ would _____ the electricity _____ a lot.

The replacement _____ old-fashioned _____ might _____ in _____ consumption and associated _____.

_____ obsolete _____ systems _____ enough to reduce electrical _____ and costs?

_____ possible _____ replace HVACs _____ energy- efficient _____?

Can we expect to _____ on _____ by _____ old _____ with _____ ones?

_____ possible _____ old HVAC systems to lower _____ costs.

Are there significant reductions in _____ the upgrade to higher _____?

Replacing old _____ ventilating, _____ air _____ with newer, _____ efficient _____ save electricity _____.

_____ high-efficiency system cut my _____ costs when I replace _____?

_____ possible to install newer, _____ efficient heating _____ systems _____ will _____ down on _____?

Installation of _____ heating, ventilating, _____ (HVAC) _____ can cut power _____ costs.

Is _____ to cut down _____ electricity _____ by installing newer, _____ cooling systems?

_____ for _____ use _____ reduced with the _____ to higher efficiency _____ systems?

_____ a reduction _____ electric _____ if we switch from outdated _____ efficient heating and cooling _____?

_____ lower energy _____ come from _____ switch _____ old to _____?

_____ possible that _____ outdated _____ systems _____ lower _____ and costs.

____ it possible to ____ newer, ____ and ____ systems ____ cut down ____ use?
 ____ heating and cooling ____ able ____ slash ____ electricity ____?
 Is it ____ that updated ____ will ____ electric ____?
 Replacing outdated HVACs with ____ models ____ save me _____.
 Replacing ____ systems ____ high-efficiency ____ yield ____ annual electrical use/costs.
 ____ and cooling systems ____ to reduce ____ and cost.
 Do ____ there's ____ in electric expenses when ____ upgrade ____ and ____ systems?
 Increasing the ____ of ____ air conditioning (HVAC) systems ____ result ____ decrease ____ electricity expenses.
 Do ____ think ____ be ____ cuts ____ electrical ____ when ____ are used?
 Is it possible to ____ savings ____ installing ____ units?
 Is ____ possible that ____ old units ____ my power ____?
 Is ____ save on ____ electricity ____ by replacing outdated heating ____ systems with ____ units?
 ____ replacements ____ to substantial electric ____?
 ____ installation ____ high-efficiency ____ and air conditioning systems ____ electricity ____?
 Replacing ____ systems ____ efficient ____ can save ____ and costs.
 Is it ____ to ____ high-efficiency AC replacements?
 ____ of energy-efficient heating, ventilating, ____ air-conditioning (HVAC) ____ power usage and ____.
 Replacing old ____ and air ____ systems ____ more ____ result ____ substantial savings ____ electricity bills.
 Is it ____ reduce electric ____ by ____ efficient ____ and ____ conditioning ____?
 Replacing old ____ and ____ systems ____ more ____ could cut ____.
 ____ possible that ____ lead to ____ electric savings?
 Replacing heating and ____ can ____ notable ____ in ____ consumption and ____.
 ____ our old ____ ventilating and ____ systems ____ units could ____ in significant ____ electricity costs.
 ____ heating, Ventilation, ____ conditioning ____ more efficient ones ____ save electricity ____ year.
 ____ you ____ see a ____ in our annual ____ if we replace old-fashioned ____ with ____
 Is ____ decrease power ____ by updated heating and ____?
 Is ____ to ____ newer, ____ efficient heating ____ systems that will ____ our annual electricity ____?
 Is ____ to save ____ of money on electrical ____ units with ____ efficiency alternatives?
 Is it possible to ____ HVAC ____ to cut ____ on ____?
 ____ and cooling systems ____ be able to reduce power ____ expenses.
 Can ____ air conditioning systems reduce ____ electric ____?
 Could the installation ____ heating, ____ (HVAC) systems ____ reduction in electrical ____
 ____ possible to cut ____ through updated ____ and cooling ____?
 Is it ____ to ____ our obsolete ____ unit for savings?
 Do high-efficiency ____ and cooling ____ lead ____ electric ____?
 ____ possible ____ replace old HVACs ____ energy- ____ ones?
 ____ ventilating, and ____ conditioning systems ____ units ____ result in a ____ in ____ electrical usage.
 ____ lower ____ expenses result from the switch ____ to ____?
 ____ units ____ more ____ ones will ____ lower energy expenses ____.
 Is ____ chance of ____ utility-bill ____ energy-consumption ____ changing ____ older heating and ____?
