

[Demo] NLP Dataset for Customer Service Automation

Company Type	Home Repair and Maintenance Companies
Inquiry Category	Painting and wallpaper installation
Inquiry Sub-Category	Resolution of paint or wallpaper issues
Description	Customers face issues like peeling paint, bubbling wallpaper, or color discrepancies, and require troubleshooting assistance. Our professionals diagnose the problem, suggest appropriate solutions, and guide customers in rectifying these issues, ensuring customer satisfaction and a satisfactory resolution.
Data Size	5,092 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Home Repair and Maintenance Company" customer inquiry. (Purchased data will not be masked.)

Is ____ necessary before applying new coats ____ paint ____ especially if they ____ due ____?

Is using a ____ necessary ____?

____ a primer be used ____ bubbles under humid conditions when ____ additional coats?

In humid ____ where coats ____ easily ____ up, is primer ____?

When ____ darn coats are always ____ and all ____ humid ____ or something before ____.

____ need to apply a ____ primer ____ painting walls that are ____ in ____ climates?

____ primer ____ for coating old paint that ____ humidity?

____ existing ____ need ____ if ____ are vulnerable to ____?

primer is ____ before ____ new ____ is ____ to ____ in ____.

The primer ____ applied ____ is ____ the old paint ____ easily bubble ____ of the humidity.

____ should be used ____ over ____ is prone to ____ in ____.

____ you need ____ if paint ____?

____ before coating new paint that is ____

When painting ____ walls, ____ I primer ____?

____ you ____ primer to ____ are prone to ____ humidity before ____?

If ____ causes ____ is ____ necessary ____ prime before ____?

____ coats ____ by ____ forming ____ need a primer ____ painting?

____ to ____ if ____ want ____ fresh coats ____ paint over existing ____ that ____ prone to develop bubbles because ____

Should prime ____ be ____ painting ____ they tend ____ in humid ____?

____ existing coat can ____ form ____ humid conditions, would it be ____ good idea ____?

Do ____ primer to ____ are prone ____ bubbling ____ to humidity?

_____ primer necessary for _____ over _____ that _____ easily bubble _____?

_____ it necessary for _____ before fresh coats of paint are applied _____ finishes _____ bubbles?

If _____ existing _____ can easily _____ bubbles _____ conditions would _____ be wise _____ a _____?

_____ paint can _____ up _____ to _____ should the primer _____ before the _____ can be created.

_____ to use primer _____ before painting

_____ the _____ necessary for _____ bubble-prone _____?

_____ humidity _____ paint bubbles, is _____?

If the _____ can form bubbles under the _____ would _____ be _____ use _____ primer _____?

_____ Primer _____ causes paint bubbles?

Should _____ apply a coat _____ before painting _____ prone to bubbling _____ humid _____?

_____ necessary _____ coats _____ have primer due _____ humidity _____ bubbles popping _____?

_____ necessary _____ old coats _____ are _____ by humidity forming _____.

_____ with humidity, is _____ necessary to use a primer?

_____ new paint on _____ are _____ to bubbling due to _____ humidity, do _____ recommend using a _____?

Is it _____ apply a _____ before I _____ walls that _____ bubbling in humid _____?

Can I apply primer _____ if the _____?

_____ it necessary for me _____ primer before painting over _____ surfaces that are prone _____?

If _____ coats bubble _____ humid _____ they be applied _____ to _____ surfaces?

If _____ paint _____ up due _____ humidity, should the _____ be _____ before the _____ paint _____ be _____.

If the _____ paint can easily bubble up because _____ the _____ applied before _____ applied

_____ painting over layers _____ from humidity require primer?

_____ the previous paint _____ due to humidity, is _____ a _____ to apply a _____?

If the existing _____ can bubble _____ due _____ humidity should _____ primer _____ before _____ is _____.

Is it _____ to _____ if _____ want to add _____ of paint over existing _____ prone to _____?

If the existing coat _____ easily _____ bubbles under _____ conditions, _____ wise _____ a primer _____?

_____ there _____ for _____ re coating layers prone _____ bubbling?

____ painting ____ bubbled humid ____ I ____ first?
 Should a ____ used for ____ with ____ in humid ____?
 Primer ____ needed ____ humid-influenced surfaces _____.
 Primer ____ be ____ new paint ____ applied ____ paint ____ easily bubble ____ due to ____.
 Do you ____ are ____ to bubbling due to ____ humidity?
 ____ coats that are ____ humidity need ____ primer for ____?
 ____ applied before the ____ paints are applied ____ existing ____ up due to the humidity?
 If the paint ____ to the ____ should the ____ be applied ____ the new ____ applied?
 ____ apply a ____ of ____ before painting ____ that ____ prone to bubbling ____ humid ____?
 ____ necessary to ____ primer to ____ that are ____ affected by ____ bubbles?
 Is it ____ apply a ____ primer ____ painting some ____ prone to ____?
 ____ the existing ____ can ____ of ____ humidity, should ____ primer be applied before the new ____?
 ____ new layers of ____ required ____ humid environments?
 If the ____ paint ____ is it necessary to ____?
 Do ____ using a primer when ____ of current ____ that ____ bubbling ____ to high humidity ____?
 Do ____ Primer should ____ applied on ____ are ____ bubbling ____ humidity?
 ____ should ____ needed if ____ bubbles _____.
 ____ it ____ before painting ____ humidity causes ____ bubbles?
 ____ primer should be ____ before ____ new paints are applied, ____ can ____ bubble up ____ humidity.
 Is it necessary ____ start ____ a primer ____ pre-existing ____ that ____ prone to bubble?
 Should ____ paint ____ applied on ____ of current ones that ____ prone to ____ to ____ humidity ____?
 ____ to apply ____ to paint that ____ already ____ because it ____ up?
 If the humidity causes ____ bubbles, ____ it ____ painting?
 ____ a primer ____ applied ____ previous ____ are prone ____ bubbling?
 Is ____ necessary to ____ primer before adding a fresh ____ of paint ____ an ____ bubbles?
 ____ it ____ to apply ____ already ____ use because it ____ up due ____ humidity?
 ____ causes ____ is it a necessity to ____?
 Does it ____ sense ____ use a primer ____ the ____ coat ____ form bubbles ____ conditions?
 ____ old ____ that ____ affected ____ humidity need a primer ____ repainting?
 ____ be ____ that are humid prior ____ painting?
 Is there ____ primer ____ re ____ layers ____ are prone ____ bubbling?
 ____ you ____ spraying primer on ____ that are ____ bubbling ____?
 Is it ____ to ____ onbubbled up ____ painting?
 Even if ____ from the ____ I use primer?
 ____ surfaces ____ to bubbling ____ primer be used?
 When existing ____ up ____ humid ____ to ____ new layers of paint?
 If ____ existing ____ can easily bubble ____ due to humidity should the ____ new paint ____ applied.
 Would ____ to ____ a ____ first if ____ coat ____ form bubbles under humid ____?
 If ____ existing coat ____ bubbles ____ conditions ____ it be ____ good idea to ____ a ____?
 Is primer important ____ painting ____ that is ____ to ____ humidity?
 Does ____ apply ____ primer ____ the previous paint layers ____ to bubbling?
 ____ a ____ if they ____ vulnerable to bubbles?
 Is it ____ good idea ____ ahead of newly ____ where ____ tend to oxidize ____?
 ____ necessary ____ primer ____ adding fresh coats of ____ finishes that might cause ____?
 The primer ____ applied before the ____ applied if ____ existing ____ is ____ to bubble ____.
 When ____ new layers of paint on top of old ____ are ____ bubbling due ____ you ____ primer?
 Primer is required ____ of paint in humid ____ easily bubble ____.
 Primer ____ before ____ environments where ____ coats bubble up.
 ____ it necessary ____ apply a ____ coating if previous paint ____ to ____?
 Is ____ necessary for primer ____ before ____ coats of ____ to existing finishes ____ cause bubbles?

_____ required _____ environments to add new _____ of paint before _____ coats _____?

Is it _____ idea to use _____ before newly _____ tend _____ oxidize as humidity _____?

_____ need to _____ primer before painting _____ are prone to _____ in _____ conditions?

_____ it necessary _____ apply a _____ to previous paint _____ they _____ prone to _____ due _____?

_____ primer _____ over existing layers that are easy _____ humidity?

Does Primer _____ to be _____ already _____ use because _____ can _____ up?

If _____ coat _____ bubbles under humid _____ it _____ be _____ to use a _____ first.

_____ is needed _____ there _____ from the humidity.

_____ fresh coats _____ paint over _____ finishes _____ may _____ bubbles, is _____ to _____ a primer?

Do existing _____ need primer _____ in the _____ humidity?

_____ previous _____ layers are _____ to _____ is it a _____ to apply _____?

_____ necessary to use _____ re- painting bubble _____?

If _____ to _____ before adding fresh _____ paint _____ existing _____ may easily _____ bubbles, _____ that necessary?

_____ or something before slappin' on fresh _____ when _____ coats are _____ all in _____?

Does it _____ to use _____ when painting _____?

I _____ if I _____ a primer _____ new _____ over _____ walls.

_____ paint _____ humidity, do you _____?

Do _____ need _____ due to _____ risks from _____?

_____ it a _____ idea _____ to the newly painted _____ where _____ have _____ to _____ as _____ increases?

Is it _____ primer _____ used _____ fresh _____ paint _____ to _____ finishes that are prone to _____?

_____ good to _____ primer _____ bubbled up _____ painting?

If _____ layers _____ due _____ humidity, _____ it necessary _____ apply a primer?

_____ primer _____ be _____ the _____ paint is applied _____ paint can _____ bubble up.

_____ coats can _____ up _____ so should they be _____ over _____ surfaces?

_____ primer should be applied _____ new _____ the _____ can easily bubble up

Does _____ that easily bubble _____ humidity _____ primer?

Do _____ primer if they _____ exposed _____ bubbles?

_____ you _____ a _____ when _____ on top of current _____ to bubbling _____ to _____ humidity levels?

_____ over the bubbles _____ the _____?

_____ painting _____ pre-existing surfaces _____ easily _____ due _____ high _____ is it necessary to start _____ coat of _____?

_____ before applying _____ over existing _____ if they bubble up?

Is Primer _____ prior _____ adding _____ of _____ humid environments.

_____ a _____ necessary for surfaces _____ coats _____ are _____ by _____ bubbles?

_____ I _____ with _____ coat _____ primer when painting _____ pre-existing _____ that are prone to bubble _____?

_____ it necessary _____ to _____ already _____ use because _____ paint _____ easily _____?

Should _____ coats _____ applied _____ painting _____ existing surfaces, _____ they tend _____ bubble up _____?

When painting _____ top of _____ is _____ bubbling due _____ high humidity, _____ you _____ using _____ primer?

_____ existing _____ primer if _____ is excess _____?

_____ the existing paint _____ bubble up due to humidity, _____ be _____?

If _____ layers _____ prone to bubbling, is it _____ idea to _____?

_____ be applied _____ the new _____ are applied if the _____ paint can _____ to _____ humidity.

Is it best _____ primer first if the _____ forms bubbles _____?

Do you _____ is _____ causes paint bubbles?

_____ I need _____ I am painting over _____?

Should _____ prime _____ humid walls?

_____ tends to bubble in _____ so do _____ have _____ use primer _____?

If paint _____ from _____ humidity, _____.

_____ need _____ primer _____ painting _____ surfaces?

Is it necessary _____ apply _____ primer _____ re- _____ if _____ are _____ to _____?

When _____ paint on top _____ older ones that are _____ to high _____ you recommend _____ a _____?

_____ that are prone to _____ in _____ should a layer _____ be _____?

_____ be applied _____ paint _____ be applied because _____ paint can easily bubble up.

_____ the previous paint layers _____ susceptible _____ bubbling due _____ humidity, is _____ primer?

If past _____ prone to bubbling due _____ necessary _____ a primer?

Is it _____ use _____ are extensively affected by _____ forming bubbles?

_____ for re-painting bubble _____ surfaces?

Is _____ necessary _____ paint bubbles up _____ humidity?

_____ painting walls that are _____ to _____ humid conditions, _____ I need _____ apply _____ primer _____?

Is it necessary to _____ before _____ of paint _____ existing finishes _____ could _____ bubbles _____ theMoisture _____?

If _____ are prone _____ due to the _____ primer be applied?

Before painting, _____ it _____ use primer on _____?

If _____ existing _____ easily _____ should the _____ applied before the _____ paint is _____?

_____ coat creates _____ under humid conditions, _____ wise _____ use _____ primer first?

_____ bubble up due _____ is primer required _____ new paint?

Is _____ necessary _____ primer _____ the previous _____ layers are _____ to bubbling _____ to _____ humidity?

Is using _____ primer _____ painting _____ surfaces?

If old _____ bubble up _____ humidity, should I _____ before _____?

Is _____ before _____ over existing ones, since _____ bubble up _____ humidity?

Is it necessary to _____ primer _____ coats _____ existing finishes that _____ be _____ to develop _____?

_____ humidity, should I use _____ to coat them?

_____ I use primer _____ old _____ they bubble up _____ humidity?

_____ old _____ affected by humidity _____ do they need _____ primer?

If the existing coat _____ humid conditions, _____ it _____ to _____ primer?

Do you _____ applying primer to surfaces _____ prone to _____?

_____ primer required to _____ on _____ painting?

Do layers _____ are _____ from _____ need primer?

_____ before _____ new paint that is prone _____ humidity.

_____ applying _____ of paint on _____ of _____ ones _____ are prone _____ do you recommend _____ primer?

_____ be a good idea _____ primer _____ if _____ existing coat can _____ under humid conditions?

_____ the _____ humid _____ would it be _____ to _____ a primer first?

_____ wonder if _____ necessary _____ to start with a _____ of primer when _____ over _____ surfaces _____ due

If prime coats _____ humid conditions, should _____ be applied _____ to painting _____?

_____ we _____ primer when _____ on _____ of current paint that _____ bubbling due _____ high _____?

Is it _____ to _____ a _____ paint layers are _____ bubbling due _____ humidity?

_____ a _____ of primer be used on _____ bubbling _____ humid _____?

_____ a primer be applied _____ previous _____ layers are _____?

Before _____ paint _____ should I _____ primer to _____ areas?

If _____ coat can easily form bubbles under _____ conditions, _____ it be _____ a primer _____?

_____ painting over layers _____ are _____ the _____ of _____?

_____ me to use primer _____ painting _____ pre-existing surfaces _____ are _____ to _____?

"prime _____ before slappin' on fresh paint _____ coats _____ always _____ and all _____ "

_____ the layers that _____ prone to _____ primer _____ re _____?

Should _____ when painting _____ bubbles and _____ walls?

_____ be applied prior _____ painting _____ surfaces _____ humid environments?

The _____ should _____ before the new _____ applied because the existing _____ bubble _____.

Is _____ necessary _____ coat _____ before _____ walls that are prone _____ bubbling _____ humid conditions?

If _____ layers _____ nuts with humidity, is _____ use?

If _____ causes _____ necessary to prime?

_____ primer _____ before new paints are _____ if _____ paint can _____ bubble _____.

Do the existing coats _____ they're _____ bubbles?
