

[Demo] NLP Dataset for Customer Service Automation

Company Type	Electricity Suppliers
Inquiry Category	Information regarding scheduled maintenance
Inquiry Sub-Category	Equipment replacement
Description	Inquiries about the replacement of old or faulty electrical equipment. Customers want to know if the suppliers will be replacing any equipment in their area and if there will be any disruptions during the replacement process.
Data Size	5,300 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Electricity Supplier" customer inquiry. (Purchased data will not be masked.)

What should _____ if _____ intermittent _____ due to Electrical Suppliers' _____ improvements _____?
 _____ homeowners _____ intermittent _____ nearby improvements in the vital systems of _____ Suppliers, _____ them
 _____ to _____?

When there _____ to _____ carried out _____ Electricity Suppliers _____ the area, what steps _____ be taken
 by _____?

_____ should homeowners _____ supply following _____ upgrades performed by _____ Electricity Suppliers?
 _____ do _____ faced with sporadic power _____ essential upgrades being _____ out _____ Electricity Suppliers
 _____ the area?

_____ should _____ deal _____ power _____ caused by _____ important _____ upgrade?
 _____ system improvements cause _____ to _____ what _____ can homeowners _____?

If residents _____ caused _____ infrastructure improvements _____ by electric suppliers, _____ they _____?

If homeowners _____ intermittent power due _____ improvements in the vital systems of _____ Suppliers, _____
 _____ to _____?

_____ should _____ done _____ household experiences _____ disruptions _____ to system modernizations?
 _____ with _____ electricity coverage _____ suppliers' _____ on nearby systems?
 _____ to _____ with power disruptions from electrical _____ improvements?

Is _____ way _____ availability _____ by electrical suppliers' nearby system improvements?

During important _____ within close _____ of _____ electric service provider _____ to _____?

During electrical network _____ what _____ about on-and-off _____?

_____ important developments _____ proximity _____ their _____ service provider, _____ can _____ power _____ interruptions?
 _____ actions _____ take _____ faced with intermittent electricity _____ vital system _____?

What can homeowners _____ intermittent power _____ nearby improvements?

What _____ intermittent _____ caused by _____ suppliers nearby improvements?
 _____ homeowners _____ with _____ losses _____ electrical system _____?

Can _____ advise homeowners _____ with _____ during critical improvements _____ electrical systems?

What will be _____ about _____ home electricity _____ system _____?

If _____ experience _____ power _____ to nearby improvements, _____ you _____?

Can _____ ways _____ intermittent _____ during electrical improvements?

There _____ things homeowners _____ take care of _____ power _____ improvements.
 _____ with sporadic power availability _____ essential upgrades _____ carried out by electricity _____

the area?

How _____ homeowners _____ power supply _____ of system _____?

What _____ homeowners do _____ power availability due _____ vital system _____?

What _____ homeowners _____ when _____ sporadic power _____ to essential upgrades _____ carried out _____ Suppliers _____ the _____?

_____ should homeowner respond _____ intermittent _____ due _____ essential _____?

_____ do if _____ frequent breaks or fluctuations in the electrical service due _____?

_____ power during the suppliers' _____?

_____ they experience intermittent _____ due to _____ in the vital systems _____ you _____ them _____ do?

How _____ handle sporadic electricity caused by vital _____ improvements _____ local _____?

If homeowners _____ power _____ to _____ improvements in the _____ suppliers, _____ actions?

Can you give _____ advice about dealing with _____ power _____ electrical _____?

What _____ be _____ by affected _____ when _____ are _____ disruptions caused _____ important _____?

How should _____ inconsistent _____ supply _____ there _____ system _____ near their home?

_____ do _____ deal _____ power _____ electrical system improvements?

_____ can _____ homeowner do if there _____ frequent _____ service _____ of essential _____?

How should _____ electricity disruptions _____ by _____ infrastructure updates?

_____ should _____ deal with _____ failures during electrical _____?

_____ residents deal with on-and-off electric _____ due to _____ being _____ contractors?

_____ there _____ homeowners when their _____ supply _____ interrupted while suppliers _____?

_____ experience intermittent _____ due _____ nearby improvements _____ the vital systems of Electric _____ can _____ to _____?

_____ ways to _____ the _____ loss of power _____ infrastructure _____ near residences.

What can be done _____ supply _____ critical _____ enhancements?

_____ homeowners address _____ there is _____ availability _____ to vital system improvements?

_____ actions should _____ taken during _____ enhancements for _____ electricity _____?

_____ should homeowners respond to inconsistent power supply _____ result _____ by _____ Electricity Suppliers?

Is there _____ to _____ the sporadic _____ caused by _____ improvements?

What measures must be _____ by _____ affected _____ electricity _____ disrupted due _____?

_____ homeowners have _____ availability because _____ electrical suppliers _____ what _____ do?

What _____ happen to inconsistent _____ electricity _____ enhancements?

Where vital _____ cause _____ interruptions, _____ should residents do?

_____ get through _____ power _____ upgrades?

Where vital system enhancements by _____ what _____ should the residents _____?

_____ be taken _____ affected individuals when electricity _____ by _____ updates in close _____?

How can _____ sporadic _____ due _____ vital _____ improvements?

What should be _____ experience _____ disruptions due to _____ modernizations?

_____ do _____ facing sporadic power availability due to _____ being _____ by Electricity Suppliers _____ area?

_____ should _____ deal with power _____ electrical _____ upgrades?

Is there _____ to _____ sporadic power availability caused _____ improvements?

During _____ advancements _____ close proximity of their _____ service _____ how _____ address _____ power _____?

_____ should _____ when there is an electricity _____ infrastructure updates?

How to _____ during supplier _____?

_____ to address _____ supply _____ during essential improvements _____ the electric _____ provider?

Should homeowners _____ to do if they experience _____ to nearby _____ the Electric _____?

_____ it _____ homeowners on _____ actions _____ experience intermittent power due _____ nearby _____ in the electric _____?

_____ be _____ appropriate _____ they _____ intermittent power due to nearby improvements _____ electric _____ system?

_____ are _____ to _____ electric _____ vital systems, _____ can _____ owners do?

_____ essential advancements _____ close _____ their _____ service _____ homeowners deal with power _____ interruptions?

_____ homeowners _____ power _____ improvements in the Electric Suppliers, _____ them what they should _____?

What should _____ do if there is _____ due to _____ system _____ by _____ electrical _____?

How _____ homeowners _____ availability _____ the system _____ are carried _____ Electric Suppliers?

_____ within _____ of _____ electric service provider, how _____ address disruptions in _____ power _____?

_____ improvements within close _____ of _____ electric _____ how _____ power supply interruptions in _____?

_____ with intermittent power _____ supplier _____.

_____ measures should _____ take if _____ frequent breaks _____ the _____ because of essential _____ nearby?

_____ vital system _____ by _____ Suppliers cause _____ interruption, what course of _____?

_____ homeowners _____ if they _____ sporadic power availability due to _____ improvements?

_____ crucial _____ system upgrades how _____ with power _____?

What _____ can be taken by _____ if _____ power _____ to essential upgrades _____ carried _____ electricity _____?

_____ should homeowners take in _____ power _____ during electrical _____ renovations?

How _____ intermittent electricity caused by _____?

_____ should _____ the event of intermittent _____ availability due _____ improvements?

How should _____ to _____ to supplier upgrade?

_____ should _____ done when households _____ intermittent _____ disruptions _____ supplier modernizations?

_____ homeowners _____ sporadic _____ that comes from _____ vital _____ improvements?

When _____ is sporadic power _____ to _____ upgrades being _____ out in _____ area, _____ steps _____ by _____?

During _____ improvements within close _____ service provider _____ to address _____ in _____ homes?

How to manage periodic _____ disruptions _____ electrical _____?

_____ can homeowners _____ address irregular access to _____ nearby?

If _____ experience intermittent power _____ to improvements _____ of Electric _____ could _____ them on _____ do?

_____ should _____ do if intermittent _____ because _____ supplier _____?

_____ are ways to manage _____ loss _____ by electrical _____.

_____ should _____ do if there _____ frequent breaks _____ because of essential _____ their house?

_____ can _____ facing _____ power _____ due to essential upgrades being _____ by Electricity _____ in _____ area?

What do homeowners _____ to get _____ power _____ improvements?

What should _____ do _____ electricity goes _____ due _____ essential _____?

_____ should homeowners do if _____ is _____ of system _____?

_____ to advise _____ on how to deal with _____ power _____ critical improvements _____ electrical _____?

_____ deal with unreliable power supply _____ system upgrades nearby?

What actions can homeowners take _____ sporadic power availability _____ upgrades being carried _____ the area?

What can _____ do _____ experience irregular _____ to _____ due _____ made _____?

_____ homeowners _____ access to power due _____ repairs _____ what _____ they _____?

What should _____ faced _____ sporadic _____ caused by system _____?

_____ can _____ homeowner _____ there are frequent breaks _____ electrical service _____ of essential _____ near their _____?

_____ be actions taken for inconsistent _____ during _____ enhancements?

How should _____ power supply due _____ upgrades performed _____ local _____ suppliers?

Is there _____ way to _____ supplier upgrade?

_____ it comes _____ access _____ to repairs _____ can homeowners do?

How _____ homeowners address _____ availability _____ Suppliers conduct _____ improvements?

_____ deal _____ periodic _____ disruptions _____ electrical system upgrades?

_____ recommend for residents if _____ vital system enhancements _____ periodic interruptions?

_____ vital _____ enhancements by _____ cause periodic interruptions, _____ course _____ residents take?

How should homeowners respond to _____ electricity _____?

What _____ I do _____ by electrical Suppliers _____ system improvements?

_____ to _____ power disruptions caused by _____ system _____?

What are _____ homeowners _____ when _____ to essential upgrades being carried out by _____ Suppliers?

When ____ is ____ electricity ____ vital ____ improvements, what ____ do?

How do you ____ when there ____ improvement ____?

What ____ do ____ electricity is intermittent due ____?

How ____ respond ____ supply as a ____ critical system upgrades?

____ if ____ are frequent ____ or ____ in the ____ service due ____ essential ____ near their home?

When ____ sporadic power availability due to ____ carried out ____ suppliers, ____ do ____ do?

During supplier ____ how ____ cope ____?

Is ____ okay ____ to ____ intermittent power ____ critical improvements to ____ systems?

What ____ if ____ is frequent breaks ____ electrical service due to essential ____ near ____?

How should ____ power supply once critical system upgrades ____ property?

What can homeowners ____ if there ____ nearby improvements?

____ homeowners ____ action ____ electric Upgrades ____ by?

____ intermittent power due to nearby ____ electric suppliers, ____ give them advice on ____ deal with ____?

____ can homeowners do ____ sporadic electricity ____ vital ____ improvements?

____ essential advancements within close ____ electric ____ can homeowners ____ interruptions ____ their power supply?

What is ____ for ____ from ____ electrical supplier ____ system updates?

Is it possible ____ advise ____ on appropriate ____ if ____ experience intermittent ____ due to ____ the ____?

____ can ____ do ____ they face sporadic ____ due to ____ being ____ by electricity suppliers?

____ homeowners deal with power ____ from repair ____?

____ availability due ____ essential ____ being ____ by Electricity Suppliers, what steps can be ____ homeowners?

What ____ if ____ power during vital system improvements?

What should ____ power occurs ____ to ____ improvements?

____ homeowners ____ to inconsistent power supply ____ Electricity Suppliers ____ their ____?

____ there ____ to deal with ____ during ____ updates?

How can ____ of ____ power ____ important system ____?

How ____ electrical system upgrades?

____ is the plan for ____ with intermittent ____ my ____ supplier during ____?

If intermittent power ____ due ____ improvements, what ____ homeowners ____?

____ there anything ____ about ____ electricity ____ you guys are making ____ system improvements ____?

____ you tell ____ intermittent ____ during critical ____ the supplier's electrical ____?

If ____ experience ____ in ____ systems of Electric Suppliers, could ____ tell ____ what to do?

How to ____ during supplier ____?

What should ____ do about ____ availability caused ____ Suppliers' ____ system ____?

Is it ____ homeowners ____ power ____ critical ____ to their electrical systems?

There ____ managing ____ temporary ____ of ____ when ____ suppliers ____ their infrastructure.

Are there ____ homeowners when ____ is interrupted ____ work nearby?

What ____ must ____ by ____ individuals ____ is disrupted ____ infrastructure updates?

What should I ____ with intermittent ____ my ____ supplier ____ system ____?

____ can ____ power availability ____ adjacent vital system improvements?

How can ____ if ____ intermittent ____ availability due ____ system improvements?

During ____ advancements within ____ proximity of ____ electric ____ how can ____ power ____?

Can ____ give ____ advice about intermittent power ____ to ____ supplier's ____?

How to fix lost ____ are ____ nearby?

____ can homeowners ____ power availability ____ are ____ by system ____?

During essential ____ within ____ proximity of their ____ provider, how ____ address interruptions ____?

____ homeowners ____ intermittent power ____ improvements in ____ vital systems of Electric Suppliers, ____ them ____ actions?

____ to the ____ door can cause irregular interruptions ____ their electricity ____.

If ____ have ____ power ____ of ____ improvements ____ what ____ they do?
 ____ should ____ do if there ____ in ____ electrical ____ due to ____ repairs ____ the home?
 ____ essential ____ within close ____ their ____ provider, how ____ homeowners ____ power disruptions?
 How ____ respond ____ intermittent ____ caused ____ supplier improvements?
 During ____ advancements ____ close proximity ____ their ____ how to ____ with ____ supply ____?
 If ____ experience inconsistent energy ____ of infrastructure ____ measures ____ they ____?
 ____ when ____ improvement causes ____ electricity?
 ____ can ____ take ____ intermittent power during important ____?
 ____ facing ____ power availability ____ to ____ upgrades ____ out ____ what steps ____ be taken by homeowners?
 ____ critical system ____ should be ____ for inconsistent ____ supply?
 ____ homeowners on ____ to ____ they experience intermittent ____ due ____ in the Electric Suppliers?
 ____ you ____ with power ____ during electrical system ____?
 What should ____ done to ____ with ____ caused ____ in close ____.
 ____ done if households experience ____ disruptions due ____ modernizations?
 ____ best ____ to deal with sporadic ____ by vital ____ out by local electrical ____?
 ____ homeowners experience ____ availability ____ of ____ improvements, how ____ they ____ it?
 ____ homeowners do when there are power ____ caused ____ system ____?
 ____ are ways of managing temporary ____ of ____ upgrade their ____.
 If ____ experience intermittent ____ to ____ Electric Suppliers, could you ____ them how to ____?
 Which ____ taken by ____ when there ____ power availability ____ to essential ____ carried ____ by ____ Suppliers?
 How do you deal with ____ improvements?
 ____ should ____ do if ____ is ____ to essential system improvements?
 What should ____ do ____ they ____ access ____ due to ____ nearby?
 ____ power might be ____ work.
 If ____ experience inconsistent ____ supply caused by infrastructure ____ suppliers, ____ measures ____?
 ____ needs ____ affected individuals when ____ disruptions are ____ by ____ updates?
 ____ should ____ to ____ power supply ____ to ____ upgrades?
 ____ manage periodic power disruptions ____ system ____?
 If ____ system improvements by ____ suppliers ____ can homeowners take?
 How ____ to inconsistent power supply ____ there are ____ upgrades ____?
 Are ____ facing ____ to ____ improvements?
 What ____ homeowners ____ intermittent power during ____?
 ____ enhancements can cause ____ home ____ supply.
 How should ____ to power ____ by electrical supplier's ____?
 What ____ a ____ take ____ there are frequent ____ in the ____ essential repairs near the ____?
 What ____ be taken ____ individuals ____ electricity disruptions are ____ important infrastructure ____?
 Should I ____ intermittent ____ supply from ____ supplier ____ updates?
 ____ inconsistent power during ____ updates?
 ____ tell homeowners how ____ deal ____ intermittent ____ repairs to their ____?
 Will ____ deal ____ power ____ updates?
 Should ____ if there ____ due to supplier ____?
 What ____ do if ____ electrical service ____ because ____ essential repairs near ____?
 How can ____ availability if ____ system ____ are conducted by Electric ____?
 ____ should homeowners ____ faced with sporadic ____ caused ____ system ____?
 ____ the ____ homeowners can ____ when ____ sporadic power availability due to ____ by electricity suppliers?
 ____ should homeowners ____ they experience intermittent power ____ to ____ nearby?
 If ____ are frequent ____ or fluctuations in the ____ service because ____ what ____ homeowner do?
 If ____ experience inconsistent energy supply ____ enhancements ____ by ____ what ____ can they ____?
 ____ homeowners do ____ there ____ irregular access ____ power ____ repairs nearby?

Is _____ can _____ about the intermittent electricity when _____ are making _____?

Should homeowners _____ on what to do _____ they experience _____ nearby _____ in _____ systems of Electric _____?

What _____ homeowners _____ about the _____ access _____ power caused _____ nearby?

_____ essential _____ within close proximity of _____ service _____ how _____ address _____ in _____ power _____?

Should _____ face _____ power _____ renovations?

How _____ you manage intermittent _____ supply _____?

How should _____ respond _____ inconsistent power _____ local electricity suppliers?

How should _____ deal _____ failures during electrical _____?

Can _____ tell _____ how _____ with intermittent _____ critical _____ work?

Should _____ deal _____ power _____ electrical supplier's vital _____ upgrade?

_____ essential _____ within close _____ their _____ service provider how can _____ power _____?

What _____ homeowners do _____ they _____ irregular _____ to power _____ nearby?

_____ upgrade, _____ to deal _____ power?

What _____ do _____ address sporadic _____ by vital _____ improvements?

If _____ experience _____ energy supply _____ what _____ be done _____ it?

How should homeowners deal _____ power shortages _____?

_____ homeowners _____ if _____ are _____ electricity due to vital system _____?

How should homeowners _____ electrical supplier's _____ system upgrade?

_____ with sporadic power availability _____ to essential upgrades being carried _____ the _____ homeowners do?

_____ electrical _____ nearby system _____ should cause _____ availability.

If there is _____ due to system improvements, _____?

How can homeowners _____ during _____ improvements?

_____ important _____ within _____ proximity of their electric _____ can _____ address _____ interruptions?

How _____ homeowners respond to intermittent electricity if it _____?

_____ to _____ with _____ disruptions during _____ improvements within close proximity of _____?

How _____ respond if intermittent electricity _____ to _____ supplier _____?

_____ homeowners _____ power due to repairs nearby, what should _____?

How do _____ cope _____ electricity _____ result of _____ improvement?

Do homeowners _____ action if _____?

When intermittent _____ availability _____ due to essential _____ improvements _____ homeowners _____?

What do _____ when there _____ power _____ nearby _____ improvements?

What should _____ about _____ electric _____ during _____ updates?

How should _____ sporadic electricity caused by vital _____ by _____?

_____ done if _____ experience intermittent electricity _____ to electrical suppliers _____?

_____ taken _____ there _____ sporadic _____ availability because of _____ upgrades being carried out _____

Electricity Suppliers?

_____ are _____ nearby, _____ fix lost power?

How should homeowners _____ with _____ system work?

What _____ when _____ face _____ electricity because _____ system improvements?

What _____ by affected _____ when _____ electricity is disrupted _____ infrastructure _____?

During critical improvements _____ the _____ systems can _____ advise homeowners _____ dealing _____?

What _____ should _____ if there _____ frequent _____ or fluctuations _____ because of _____ repairs near their home?

What should _____ done _____ households _____ intermittent electricity _____ because _____ electrical _____?

_____ electrical _____ updates that cause power disruptions?

Is _____ anything _____ can _____ the intermittent _____ when you _____ are _____ system _____?

When power _____ to _____ being _____ what steps can be taken by homeowners?

_____ frequent breaks _____ in the _____ service because _____ near _____ home what should _____ homeowner do?

Is _____ possible to _____ homeowners what _____ if they _____ intermittent _____ due to nearby _____ the _____?

_____ with unreliable _____ during supplier's _____?

What should the ____ individuals do ____ with electricity disruptions ____ ?

What ____ homeowners ____ when there ____ electrical supplier's vital ____ ?

What should ____ about intermittent power ____ my ____ system ____ ?

How ____ handle ____ during ____ system improvements?

____ should homeowners do if they ____ sporadic ____ availability ____ upgrades being carried ____ by ____ ?

If electrical suppliers' ____ intermittent power availability, what ____ do?

How ____ with ____ electricity ____ there is ____ supplier upgrade?

____ can homeowners do ____ system ____ cause ____ power?

During vital ____ what steps ____ take to ____ power?

Should residents ____ system enhancements ____ Electric Suppliers ____ periodic ____ ?

____ electrical ____ have important ____ improvements nearby, what ____ ?

What should homeowners ____ power ____ to system improvements?

____ homeowners experience intermittent ____ availability due ____ system improvements, how ____ situation?

____ the best way to handle sporadic ____ system ____ ?

When ____ access ____ caused ____ repairs nearby, ____ can homeowners use?

____ should homeowners deal with ____ issues ____ electrical ____ ?

What ____ be done ____ affected ____ disruptions are caused ____ close proximity?

How ____ homeowners respond to inconsistent power supply ____ by ____ system ____ their ____ ?

When intermittent electricity occurs due ____ essential ____ upgrades ____ ?

____ be done to ____ inconsistent home ____ supply ____ system ____ ?

What ____ should homeowners ____ when facing sporadic ____ caused ____ ?

What ____ by ____ when electricity is disrupted by infrastructure ____ ?

____ power ____ be ____ to ____ work.

What ____ homeowners do ____ there ____ electricity due ____ essential ____ ?

How ____ deal ____ power failures because ____ supplier's ____ system?

____ the ____ way to deal ____ intermittent power during critical ____ to ____ ?

____ to ____ with unreliable power ____ ?

____ are people ____ intermittent ____ with ____ .

____ improvements within close ____ electric service provider, how ____ power supply ____ ?

____ homeowners ____ when faced with ____ by ____ system improvements?

If homeowners experience ____ power due to nearby improvements ____ the vital ____ Suppliers, ____ ?

During ____ advancements within close proximity ____ the electric ____ to address ____ power ____ ?

____ do to ____ with ____ power supply ____ supplier during system ____ ?

Are there ____ guidelines ____ homeowners ____ supply is interrupted ____ suppliers perform ____ ?

How should ____ power disruptions ____ electrical ____ upgrades?

____ with inconsistent ____ coverage related to suppliers' essential ____ on ____ initial ____ impacted?

What ____ homeowners do ____ make ____ they have ____ there ____ repairs ____ ?

What ____ if there ____ power availability ____ system improvements nearby?

____ be ____ on ____ actions if they experience ____ of nearby improvements ____ the Electric ____ ?

____ occurs due to ____ improvements, what do ____ do?

____ should a ____ do if there ____ electrical ____ repairs near ____ home?

How can ____ address ____ power ____ system improvements?

How ____ homeowners deal ____ power ____ by nearby ____ work?

____ do ____ suppliers upgrade their vital system?

____ are facing ____ power due to ____ .

What ____ done ____ modernizations cause intermittent electricity ____ ?

How to deal ____ interruptions during ____ close proximity ____ their ____ service ____ .

How should ____ deal with sporadic ____ caused by ____ carried ____ by ____ ?

How ____ unreliable power supply ____ critical system upgrades?

What should ____ do if ____ experience ____ supply ____ of ____ ?

How do _____ with intermittent _____ during _____ upgrade?

_____ homeowners _____ there _____ power availability _____ to important system _____ nearby?

_____ do _____ do when they _____ to power due _____ nearby?

_____ happens _____ intermittent power _____ from my _____ supplier _____ system _____?

_____ homeowners _____ facing _____ during _____ renovations.

_____ homeowners take _____ faced with _____ caused by vital system _____?

Is there a _____ to _____ with _____ caused by _____ nearby _____?

_____ is _____ due to essential supplier upgrades, _____ should _____?

_____ do _____ deal _____ intermittent _____ during _____ upgrade?

_____ handle _____ electricity _____ during critical system enhancements?

Can _____ advise _____ to _____ with _____ power during _____ the electrical system?

_____ they experience _____ irregular _____ power due to repairs nearby?

_____ homeowners address the _____ availability caused _____ improvements?

Are homeowners advised on _____ actions if they _____ intermittent power _____ Suppliers?

The _____ by electrical suppliers _____ system improvements.

_____ there _____ due to _____ system _____ nearby, _____ should homeowners do?

During _____ proximity of their electric _____ address power interruptions in homeowners' _____?

_____ homeowners deal _____ electricity _____ happens due to _____ upgrades?

What actions should be _____ electricity disruptions caused _____ infrastructure updates?

What _____ homeowners _____ they _____ intermittent power availability _____ to essential _____ out by _____ in _____ area?

_____ would _____ residents _____ system enhancements by Electric Suppliers cause _____ interruption?

_____ is sporadic power availability _____ essential upgrades being _____ out by _____ what _____ do to _____?

_____ do if _____ are frequent breaks in the _____ because _____ repairs near their _____?

Can _____ tell _____ deal with _____ power during _____ to the electrical _____?
