

[Demo] NLP Dataset for Customer Service Automation

Company Type	Telecommunications Equipment Manufacturers
Inquiry Category	Feedback and complaints resolution
Inquiry Sub-Category	Coverage area inquiries
Description	Customers seeking information about network coverage, range, or signal strength in specific areas, or reporting areas with weak or no coverage.
Data Size	5,014 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Telecommunications Equipment Manufacturer" customer inquiry. (Purchased data will not be masked.)

Should I expect ____ Wi-Fi ____ using ____ via ____ provided by ____?
 ____ my internet service provider ____ my ____ using ____ over ____ access?
 Will the ____ over ____ on ____ internet service plan ____ wi-fi strength?
 Do you believe that ____ reliability ____ with voice ____ services ____ adversely ____ by ____ an ISP-supplied ____?
 ____ my ____ strength ____ affected ____ internet ____ using voice over ____ access?
 Will ____ strength ____ down because of the ____ internet ____ service ____?
 Is the connection affected ____ using ____ over ____ service ____ the same ____ my service ____?
 ____ choosing ____ via ____ Internet service ____ influence the wireless network?
 Is ____ internet ____ provider's ____ of ____ affecting my wi-fi strength?
 Does that mean ____ signal ____ on ____ wireless network will ____ voice- ____ Internet services ____?
 ____ I ____ poor wi-fi when ____ an ____ service ____?
 Is ____ possible ____ the ____ wi-fi will be worse if I ____ the ____ the ____?
 The use ____ via my internet service ____ will affect ____ strength.
 Is ____ to anticipate ____ wi-fi ____ using VoIP ____ my ISP's ____?
 There is a ____ of ____ weaker ____ Voice ____ internet Protocol.
 ____ to ____ weaker wi-fi while using ____ over ____ Protocol?
 Do ____ the ____ wi-fi ____ over internet ____ be negatively impacted by ____ an ISP-supplied routers?
 ____ use of VoIP services by ____ internet service provider ____ my ____?
 ____ you think my ____ connection ____ weakened ____ I ____ voice over ____?
 ____ it possible for ____ to get a ____ signal ____ using ____ internet ____?
 ____ the internet ____ weaken ____ the ____ service provider ____ a ____ for VoIP?
 ____ a ____ the strength of ____ wi-fi when ____ VOIP?
 Is ____ possible ____ weaker wi-fi when using ____ service ____ router?
 Do you believe ____ the reliability of ____ voice over ____ can be ____ ISPs-supplied ____?
 ____ that the ____ strength ____ will decrease with voice-over-IPA services from ____ modem.
 Will ____ use ____ voice over ____ access via ____ service plan ____ wi-fi ____?
 ____ strength be ____ use of voice over internet ____ my ____ service provider?
 ____ the ____ connection be ____ provider's router during ____?
 Can I ____ decline ____ signal strength with ____ services ____ the ____ from ____?

_____ expect _____ decrease _____ signal strength with voice-over-IP _____ my modem/router _____ my _____?
_____ you think _____ internet connection _____ weaken _____ I _____ VoIP _____?

_____ to anticipate _____ wi-fi while using _____ service provider's _____ for _____?

Voicing services via _____ service _____ may _____ in _____ networks.

I would like to _____ if _____ anticipate a _____ while _____.

_____ to anticipate _____ while using VoIP on your modem?

_____ my internet _____ be _____ by the _____ over internet _____ via my _____?

Could the _____ the internet _____ provider's device _____ when making _____ internet?

_____ use of voice-over-IP _____ service _____ affect the overall wireless network _____?

_____ a _____ a weaker wi-fi _____ when using VoIP _____ the _____ provider.

_____ my _____ strength be impacted _____ I use _____ over _____?

_____ to _____ reduced internet speed _____ VOiP through _____ device?

Is my internet connection _____ to _____ when _____ with _____ internet _____ provider?

When using a _____ that _____ internet _____ provider, _____ a _____ wi-fi.

_____ it possible that the _____ of _____ be _____ if _____ use the modem _____ the internet _____?

Would _____ use _____ Voice _____ Protocol (VoIP) _____ the internet _____ provider (ISP) _____ availability of _____?

Will _____ over internet access negatively affect my _____?

_____ weaken if the _____ Router and Modem for VoIP services?

Is _____ internet _____ if I _____ Voice _____ Internet Protocol services?

Does _____ connection weaken if the _____ provider _____ a _____ Modem _____ to _____?

Do you _____ reliability _____ voice over internet protocol _____ be affected _____ using an _____?

There is a chance _____ when using voice over _____.

Does _____ if _____ service provider gives a _____ for voice over _____ protocol services?

_____ it possible that the performance _____ wi-fi will _____ poorer _____ use _____?

Do _____ that using _____ internet _____ provider-supplied routers _____ affect wi-fi _____ over internet _____?

I am wondering _____ I _____ wi-fi _____ using _____ on my _____.

_____ my _____ of the voice _____ internet protocol service _____ from my provider?

_____ the use _____ voice-over-ip _____ service _____ performance of the wireless network?

Is _____ possible _____ poor _____ while using an _____ routers?

_____ you _____ of wi-fi with voice _____ internet Protocol services _____ using _____ internet service _____ routers?

When using _____ service _____ expect weaker wi-fi?

Will the wireless connection be _____ Router _____?

_____ the _____ connection _____ if the _____ provider provides a routers _____ for voice over _____?

When _____ calls _____ the internet, _____ service provider's device _____ in performance?

Will my _____ when _____ Internet Protocol services _____ the internet service _____?

_____ voice-over-IPA services _____ my _____ will _____ the _____ strength on _____ wireless network?

_____ my _____ impacted if _____ use _____ over internet _____ with my modem _____?

Will _____ strength go down when I _____ voice _____ protocol _____ my _____?

_____ is a possibility _____ wi-fi signal _____ Voice over _____ Protocol _____ the internet _____ provider.

_____ the _____ provider _____ wi-fi for voice calls?

_____ VoIP services via _____ internet _____ weakened wi-fi?

Is _____ connection _____ by using voice over _____ the _____ my _____ has?

Is it _____ using the internet _____ provider's modem?

Does the _____ connection _____ voice _____ internet services _____ the same _____ as my _____?

_____ internet _____ the _____ service _____ provides a _____ that is specifically _____ VoIP services?

_____ I _____ a poor _____ using _____ from the _____ service _____?

_____ like to know _____ anticipate a weaker _____ when _____ VoIP.

_____ the _____ connection weakened if the internet _____ provider provides _____ and _____?

Will _____ use _____ VoIP services _____ internet service _____ affect my _____?

Is it ____ to ____ wi-fi when ____ provider's routers for ____?

Is ____ internet connection affected if ____ with my modem and/ ____ my ____?

Do you believe that ____ reliability ____ with voice ____ protocol can ____ adversely ____ by ____ router?

____ an internet ____ provider modem ____ voice ____ internet protocol, ____ wi-fi.

Is it possible ____ while ____ the internet provider's ____?

Is ____ connection ____ by using ____ internet ____ therouter ____ provided by ____ Internet ____?

Is my internet ____ I ____ over ____ Protocol with ____ or routers

____ the connection affected ____ over internet ____ with therouter ____?

____ anticipate poorer wi-fi ____ ISP-modem and VoIP.

Will ____ strength go ____ voice over internet ____ services ____ use?

____ it ____ anticipate weaker wi-fi ____ over internet ____?

____ you believe ____ reliability ____ with voice ____ can be ____ impacted by ____ an ____ provider-supplied routers?

____ a possibility of ____ weaker ____ using voice over ____?

____ this ____ the ____ network will decrease with voice ____ internet services ____ the ____?

____ the internet connection ____ if ____ internet service ____ provides ____ and ____?

____ that the ____ strength on ____ wireless network ____ voice-over-IPA services ____ my modem?

I ____ if my internet ____ be ____ if I ____ aVoIP ____.

____ affected ____ using ____ over internet ____ with ____ same ____ that the ____ provider provides?

____ it possible to ____ wi-fi if ____ VoIP ____ modem combo?

Do ____ reliability ____ voice ____ internet ____ can ____ adversely affected by using an internet service provider's ____

Is ____ that the ____ of ____ wi-fi ____ worse when ____ VoIP?

____ possible to anticipate ____ when using ____?

Do VoIP services ____ the internet service ____ internet ____?

____ it possible that I will ____ a bad ____ when ____ gear ____?

Does ____ the ____ wireless ____ will decline with voice-over-IPA services ____ modem?

____ it ____ to ____ using ____ on your modem combo?

When ____ service ____ for voice calls, expect slower ____.

____ want ____ know ____ internet connection ____ be ____ if I ____ VoIP ____.

____ voice over ____ protocol ____ from my provider ____ my signal strength to ____.

Does ____ weaken if ____ internet is ____ with aVoIP service ____ service ____?

____ service provider's ____ of voice over ____ access ____ my ____?

Will ____ use of ____ services ____ router ____ of my ____ connection?

____ internet connection weaken if ____ internet service provider ____ aRouter ____ VoIP?

The use of voice ____ wi-fi strength.

____ it possible to get a ____ using ____ provided ____ the ____ service ____?

____ connection may be ____ internet service ____ provides a Router ____ Modem for ____.

____ connection affected ____ use Voice over Internet ____ with ____ modem or ____?

____ the use ____ over internet access going ____ my ____ fi ____?

Weakened ____ a ____ of ____ services via ____.

Can ____ a reduced ____ internet service provider's routers?

____ it possible that the ____ of ____ would make ____ hard to connect ____ the internet?

____ is a possibility ____ a ____ when ____ through internet ____ providers.

____ I ____ their ____ for VoIP, can I ____ internet connection?

Is it ____ the performance of ____ wi-fi ____ poorer if ____ use ____ via the ____ service ____?

Is ____ is a weak ____ signal ____ using VoIP through the ____?

____ my internet connection ____ to weaken ____ I ____ over ____?

Will my ____ service plan's use ____ voice over ____ affect ____?

Do ____ believe ____ of wi-fi ____ voice ____ internet protocol can ____ by using an ____ routers?

Does ____ connection affect by using voice over ____ with the ____ provided ____?

_____ to anticipate _____ while using the internet _____ provider's _____?

Does the _____ if _____ internet service provider _____ a _____ and Modem _____?

Is _____ possible _____ me _____ anticipate _____ while using _____ internet _____ routers?

Is _____ chance of _____ weak wi-fi _____ voice _____ internet protocol _____ the _____ service provider?

Does this _____ the _____ strength _____ the wireless network _____ with _____ services from _____

_____ the use _____ over internet protocol (VoIP) services by _____ interfere with _____?

_____ use of VoIP services via _____ provider impact _____ of _____ wi _____?

_____ there _____ chance of _____ wi-fi signal _____ the internet service provider?

Is _____ use _____ services by the internet _____ provider (ISP) going to _____ connections?

_____ possible to _____ wi- _____ when _____ an internet service provider's _____?

_____ the _____ over internet access _____ my _____ service plan affect my _____?

_____ you believe that the _____ of wi-fi _____ voice _____ Protocol _____ impacted by _____ an _____ routers?

_____ wondering if it's possible _____ anticipate reduced _____ VoIP.

Is _____ affected by using _____ over internet _____ my _____?

_____ normal for the _____ when using _____ service _____ for a call?

Will the use _____ VoIP _____ by _____ affect _____ strength _____ my wireless _____?

_____ using an internet _____ modem _____ calls, _____ weak wi-fi.

Will my _____ service provider impact _____ by _____ voice _____ internet _____?

Should I prepare for _____ connection _____ using the _____ service _____?

When _____ an _____ service _____ modem _____ over Internet _____ a weaker _____.

_____ you _____ that _____ reliability _____ and voice over _____ services _____ impacted _____ the use of _____ internet service provider

Is it _____ of VoIP services _____ cause a problem with the internet?

Can I anticipate _____ wi-fi while _____ internet _____?

Is it _____ expect poor _____ using an internet _____?

_____ there a chance _____ a weaker _____ signal when _____ use _____ provider?

Is it possible _____ the _____ will be _____ I _____ the modem _____ the ISP?

_____ use _____ internet protocol _____ by the internet service provider _____ the _____ of _____ fi?

I wonder _____ I _____ reduced _____ strength _____ using _____.

The _____ on _____ wireless _____ may decrease with voice-over-IP _____ modem

Is _____ a _____ of a _____ when using _____ through _____ internet service _____?

_____ my internet _____ weaker _____ when using VoIP?

Is it _____ to anticipate _____ using _____ VoIP?

I don't _____ if _____ suffer when _____ use a _____ service.

Does this _____ strength _____ network _____ decrease with the voice-over-IP services _____ the provider?

Can _____ bad _____ an internet service provider's _____?

_____ mean the signal strength on _____ wireless _____ will _____ Voice-over-IP _____ on _____?

How _____ the _____ of voice-over-ip _____ the _____ service _____ overall wireless _____?

_____ poor _____ expected when _____ an _____ service _____ modem?

Do _____ the reliability _____ with voice over _____ Protocol _____ adversely _____ by using an Internet Service _____

_____ using internet service provider _____ and _____ internet _____ expect _____ poorer wi-fi?

Is it _____ the utilization of VoIP _____ the routers would _____ difficult _____ internet.

I'm wondering _____ can _____ while using _____ on my _____.

_____ of _____ services _____ internet service provider impact the _____ internet service?

_____ internet service _____ have a weaker _____ signal _____ VoIP?

Does _____ stability diminish _____ using a _____ service provider?

_____ stability diminish when using _____ modem/router with _____ service _____?

When _____ service provider _____ VoIP, expect weaker _____.

_____ internet _____ weaken if the internet service _____ aRouter and _____ over _____ protocol?

_____ I expect _____ see a _____ strength with voice-over-IP _____ on _____?

_____ mean the signal strength _____ wireless _____ go down with voice _____ ?

_____ can expect poor _____ when using an internet _____ provider's _____.

_____ it possible to _____ weaker _____ while using Voip _____ ?

_____ the choice _____ use voice-over-ip via _____ service _____ the _____ network?

Will my internet connection be _____ I _____ internet _____ ?

Is _____ possible to anticipate _____ wi-fi _____ using VoIP _____ ?

Is it possible that the _____ VoIP services via the ISP-supplied _____ connect to _____ ?

_____ strength _____ of the voice over internet protocol services _____ from _____ ?

Is _____ to _____ using VoIP over my internet service _____ routers?

Is _____ that my internet _____ use VoIP services?

_____ you _____ of wi-fi with voice over _____ can _____ adversely affected _____ an ISPs-supplied routers?

Do you _____ my _____ will _____ weakened _____ use a _____ service?

_____ connection _____ by _____ voice over _____ services _____ or modem _____ by my network _____

Will _____ internet service _____ internet _____ to affect my _____ strength?

_____ wondering if my wi-fi _____ will _____ over internet protocol.

_____ get a crappy signal when using gear _____ provider?

Is the connection _____ using voice over _____ services with _____ my _____

_____ would _____ to _____ I can _____ wi-fi strength while using VOIP _____ my internet _____.

How _____ choosing to _____ the internet service provider _____ capacity?

_____ mean _____ the signal strength _____ the _____ network will _____ voice- _____ services on _____ modem?

_____ you think that the _____ wi-fi with _____ internet protocol can _____ you use _____ service provider's

_____ this _____ on the wireless network _____ decrease _____ services on the modem?

_____ might _____ to _____ voice-over-ip via the _____ service provider influence _____ ?

_____ possible to _____ reduced _____ speed through an ISP supplied _____ ?

Will my internet _____ provider _____ weak _____ when I _____ phone?

If _____ true, _____ signal _____ on _____ wireless network will decrease _____ from _____ modem.

Is _____ to _____ wi-fi while using VoIP on _____

Does this _____ the _____ strength on _____ wireless network _____ decline _____ over- Internet services _____ ?

_____ service _____ router, expect degraded wi-fi?

_____ to _____ wi-fi when using VoIP on your _____.

_____ might _____ use of _____ internet service provider affect _____ network?

_____ my wi-fi strength be affected _____ of _____ over _____ access via _____ plan?

_____ the _____ of _____ with voice over internet protocol can be _____ impacted by _____ ?

Is it _____ internet when _____ internet _____ provider's router?

Will my internet _____ cause weaker _____ during _____ ?

Does _____ mean that the _____ the wireless _____ decrease with voice-over- _____ the modem?

_____ might choosing to use voice-over-IP via _____ Provider _____ of _____ wireless _____ ?

Can _____ anticipate _____ when _____ my internet service _____ ?

_____ it possible that the use _____ VoIP _____ via the ISP-supplied routers would _____ to _____.

The _____ of voice over internet access _____ my _____ will _____ my _____.

_____ my _____ cause _____ weak _____ during voice calls?

When making _____ over _____ could the device of _____ a _____ in _____ ?

Is it _____ the wi-fi will be _____ internet _____ an internet _____ ?

Do you _____ the reliability _____ with voice _____ can be adversely _____ by _____ an ISP-supplied routers

_____ possible that the use _____ voice over _____ access _____ my _____ ?

Will _____ signal _____ down _____ I _____ over _____ protocol services from _____ provider?

_____ this mean the _____ strength on _____ network will _____ if _____ on my _____ ?

_____ a _____ in _____ strength be _____ with _____ services on the _____ my _____ ?

Is there _____ possibility of _____ signal when using voice over _____ through the _____ ?

When using an internet _____ provider's modem _____ expect _____ ?

Is it ____ to ____ a weaker ____ on ____ modem?

Does ____ internet ____ provider's provided ____ to a ____ over internet ____?

____ connection ____ there ____ a voice over internet ____ service from my internet ____?

Is ____ that ____ services on ____ modem/router ____ my provider ____ affect ____ strength?

Does the ____ if ____ internet service ____ aRouter and ____ VoIP?

____ possible ____ reduced internet ____ on ____ through ____ supplied device?

____ am wondering ____ I ____ anticipate a ____ strength when ____ VOIP.

____ might ____ to use ____ via the ____ service provider ____ wireless ____?

How ____ choosing ____ voice-over-IP via the internet ____ provider ____ wireless ____?

____ internet service provider's ____ calls, expect a ____ wi-fi.

Do you believe ____ of wi-fi ____ over internet ____ services can ____ affected ____ using ____?

Will my signal strength ____ when ____ use ____ over ____ services ____ provider?

____ it possible ____ my ____ will ____ use VoIP services?

____ the use of ____ internet service provider ____ network capability?

Do ____ think ____ of wi-fi ____ voice over ____ Protocol ____ can be impacted by ____?

____ weaken ____ the internet service provider gives a ____ and ____ to ____ VoIP services?

____ it possible to ____ an internet provider's routers for ____ over ____?

I ____ if the ____ speed ____ be ____ through anISP supplied ____.

____ think ____ the ____ with ____ over ____ protocol can ____ adversely ____ using an internet service provider's routers

Is it possible ____ use ____ Voice ____ Internet Protocol ____ via ____ ISP-supplied routers would ____?

____ possibility of a ____ signal ____ through the internet service provider.

Is ____ anticipate ____ when using ____ service provider-modem?

Can I be ____ for ____ signal ____ from ____ service providers?

____ the internet connection ____ if I ____ a ____ Internet ____ service ____ provider?

____ using ____ internet ____ modem for Voice ____ expect a weaker internet ____.

Is ____ possible to ____ reduced ____ strength ____ using ____ my ____ provider?

____ possible ____ anticipate ____ while using ____ Internet service ____ routers?

There ____ a ____ that ____ signal strength ____ the wireless ____ with voice-over-IPA ____ on my ____.

____ want ____ know ____ I should expect a weaker ____ using ____.

Does the ____ connection weaken if ____ service provider provides a ____?

Is it possible ____ anticipate ____ wi-fi ____ your ____?

Will ____ use ____ Protocol ____ affect the strength ____ my wireless ____?

Is ____ to anticipate ____ using ____ internet service provider's ____?

Will ____ voice over internet ____ affect ____ internet ____ provider's ____ strength?

Is ____ possible that I can ____ strength ____ using ____?

Does the internet ____ weaken ____ the ____ service ____ and modem for ____ over internet ____?

Can ____ be ____ for ____ poor signal ____ an ____ service provider?

____ my wi-fi connection ____ to ____ when ____ use VoIP ____?

Is my wi-fi ____ suffer when I use ____ services ____ service ____?

Does ____ internet connection ____ if I ____ a ____ my ____?

Is it ____ for ____ to anticipate a ____ wi-fi ____?

Will my internet ____ be ____ using VoIP?

____ the ____ services ____ routers affect the strength of my ____?

When using ____ modem ____ Voice ____ Internet ____ expect slower wi-fi.

____ connection affected by ____ internet services with ____ my provider gives ____?

Do ____ service providers provide ____ result ____ weakened wi- ____?

____ the connection adversely affected ____ over ____ same modem ____ by my service provider?

____ that the signal strength ____ the ____ will ____ with voice- over- ____?

How ____ via the Internet service ____ affect the wireless ____?

____ there a ____ a ____ wi-fi signal when using ____ through the ____.

_____ the _____ on _____ wireless network will _____ with _____ services _____ the modem?
 _____ might _____ to _____ voice-over-Internet _____ provider affect _____ overall wireless network?
 Do _____ services _____ provider result in weakened wi- _____?
 Do you _____ reliability _____ wi-fi _____ voice _____ internet _____ can be _____ impacted _____ using an ISPs _____?
 _____ might _____ to use _____ via _____ internet service provider _____ network capability?
 _____ think that _____ wi-fi _____ voice over internet Protocol _____ can be _____ impacted _____ of an ISPs-
 supplied
 Would _____ of voice over internet protocol _____ the internet service _____ availability of _____?
 Is the _____ service _____ for _____ wi-fi for _____?
 Is _____ the _____ of _____ the routers would make _____ to _____ to the internet?
 _____ internet _____ services I use _____ my _____ may _____ my _____ strength.
 Does the _____ connection _____ if the internet _____ a _____ and _____ VoIP?
 How might choosing to _____ via the Internet _____ wireless _____?
 _____ voice _____ cause weakened wi-fi?
 _____ chance _____ a _____ signal when using _____ over internet protocol?
 Do you _____ the reliability of _____ with _____ internet protocol can _____ by _____ routers?
 There _____ a possibility _____ signal _____ using _____ through internet _____ provider.
 Can you _____ me _____ I _____ anticipate _____ wi-fi while _____?
 Will _____ be affected _____ using voice over _____ via my _____ service _____?
 Can _____ anticipate _____ wi-fi strength while using _____?
 _____ it _____ anticipate reduced _____ strength while using _____ my ISP _____?
 _____ wi-fi _____ be impacted _____ service?
 Is _____ to _____ wi-fi while using _____ internet protocol.
 _____ it _____ that _____ wi-fi results _____ VoIP services _____?
 Does _____ weak _____ voice over internet protocol?
 _____ anticipate weaker wi-fi while _____ the internet provider's _____?
 Does it _____ the signal strength _____ the _____ with _____ over- _____ services on the _____?
 _____ the internet _____ use _____ internet service _____ routers for calls?
 Will _____ use of _____ internet _____ wi- fi strength?
 When using _____ modem for _____ over Internet _____ weaker wi-fi.
 Is _____ possible _____ see reduced _____ through _____ supplied device?
 _____ the _____ of VoIP services _____ my _____ of _____ internet service?
 Is _____ service provider _____ weak wi-fi during VoIP _____?
 _____ a connection _____ by _____ internet _____ with _____ modem as my service _____?
 _____ that the reliability _____ wi-fi _____ internet Protocol services can _____ impacted _____ using an _____ routers?
 Is _____ bad _____ using an internet service _____ modem?
 Is it possible that there is a _____ voice _____ protocol _____?
 _____ the connection affected by _____ over _____ services _____ same _____ is provided _____ my _____ provider?
 Does the connection be _____ by _____ over _____ the same _____ by my _____ provider?
 Do you think that the reliability _____ and _____ Protocol _____ can be negatively _____ by _____ service _____
 Do you _____ the reliability of _____ with voice over internet _____ by _____ an _____?
 _____ connection weaken if _____ internet _____ provider provides a _____ Modem _____ VoIP _____?
 Does _____ mean that _____ from the _____ will _____ the _____ strength _____ the _____?
 Does this mean that _____ signal _____ the wireless network _____ with _____ voice-over-IPA services _____?
 _____ internet connection _____ to be weakened if I _____ Protocol?
 _____ I _____ weaker _____ connection when using VoIP services.
 _____ it _____ that _____ services via ISPs result _____?
 _____ might _____ choice _____ use _____ via the internet service _____ influence the performance _____?
 Will my internet _____ my wi-fi strength _____ voice over _____?
 _____ possible _____ wi-fi when _____ an internet service provider's _____ for voice over _____?
 Do you _____ the reliability of _____ voice over internet protocol can be _____ using _____ routers?

Is _____ affected by _____ voice _____ internet _____ the _____ by my service provider?
 _____ use _____ via my internet service _____ affect my _____ fi strength.

Is it possible to _____ using an internet _____?
 _____ there _____ a weak wi-fi signal _____ through the internet _____ provider?

Is poor _____ with internet phone _____?

Will _____ use of voice _____ internet protocol services _____ my internet _____ provider _____ internet _____?
 _____ expect poor wi-fi _____ using _____ service provider's _____?

Is it _____ to _____ wi-fi when _____ an _____ modem.
 _____ use of _____ my internet service provider will _____ my wi-fi _____.

_____ the _____ of _____ protocol (VoIP) _____ the internet _____ (ISP) _____ the use of wi-fi connections
 _____ my signal _____ of _____ over internet _____ services i use _____ my provider?

Is it _____ to _____ weaker _____ an internet service _____.

Do _____ the reliability of _____ with _____ over internet Protocol services can be _____ affected _____

Is _____ by using _____ internet services _____ provided by my _____ service?
 _____ I be prepared for a _____ using _____ provided _____ internet service _____?

Do you _____ reliability _____ with voice _____ internet _____ services can _____ affected _____ the _____ of _____ ISP-supplied
 _____?

_____ use _____ Internet _____ (VoIP) _____ by the _____ service provider (ISP) going to affect _____
 _____ the _____ of _____ over _____ (VoIP) _____ by the _____ service _____ (ISP) _____ to affect _____ connections

Will my internet service _____ my _____ over Internet access?

Is _____ internet connection impacted if I _____ Voice over _____ Protocol _____?

Is it normal _____ the _____ service _____ to be _____ VoIP _____?

Is my signal strength going _____ voice _____ protocol _____ from _____ provider?

Will _____ be affected _____ the _____ of voice over _____ access from _____?

_____ is _____ chance _____ a _____ wi-fi _____ when using _____ internet _____ through _____ internet service provider.
 _____ internet service provider-modem _____ voice over internet _____ anticipate poorer _____?

_____ think the _____ of wi-fi with _____ over _____ can _____ adversely impacted by _____ an ISPs-supplied _____?
 _____ of _____ services on _____ router affect _____ of my internet?

Is my _____ impacted if _____ over Internet _____ with _____ and/ _____ a routers?
 _____ to expect poor wi-fi _____ an internet service _____?

Is _____ anticipate _____ wi-fi performance when using the _____ the _____ service provider's _____?
 _____ the connection affected _____ using _____ over _____ services _____ modem _____ my _____ gives _____?

_____ my _____ provider's use of _____ Internet _____ impact my wi-fi _____?

Do you _____ reliability of _____ voice _____ Protocol _____ can be adversely affected _____ the _____ of an _____ ,
 _____ my _____ provider to have _____ when _____ use it for VoIP?

I want _____ know if I _____ using VoIP _____ my _____.

_____ from an _____ provider, expect weaker wi-fi?
 _____ connection be _____ if _____ use voice _____ internet _____ services?

I _____ to _____ if I can anticipate _____ wi-fi _____.

_____ my internet _____ be affected _____ use _____ over Internet _____ services _____ internet service _____?

Will _____ internet _____ provider's _____ internet when I use _____?

Is _____ to anticipate weaker _____ VoIP on the _____?

Is _____ affected by using voice over _____ services _____ or modem _____ provides?

Will my _____ service provider's _____ of voice _____ affect _____ strength?
 _____ possible _____ anticipate _____ wi-fi strength while using _____ device?

Is it possible _____ weaker wi-fi while _____ modem _____?

_____ poor wi-fi probable _____ phone _____ provider?

Is _____ expect _____ wi-fi while using _____ internet _____ router?
 _____ use of _____ my internet _____ provider affect the strength _____ the _____?

_____ service _____ device _____ performance when making calls over the internet.

Is it _____ expect poor _____ when using _____ service _____ routers _____ calls?
 _____ this _____ strength _____ wireless network will decrease with voice over IP services _____ ?

Is _____ anticipate a weaker _____ voice _____ internet protocol?

Will my internet _____ internet _____ affect my wi-fi _____ ?

Is it _____ to _____ poor _____ using _____ service _____ routers?

I _____ wondering _____ anticipate weaker wi-fi while using _____ over _____ .

Will _____ internet _____ affect my wi-fi _____ voice over Internet _____ ?

Is it possible _____ VoIP _____ have _____ an ISP?

Can _____ a bad signal when _____ from an _____ service _____ ?

Is it _____ to anticipate a poorer _____ while _____ service _____ ?

Is it possible to _____ an _____ provider's _____ for voice over _____ protocol?

Is it _____ to _____ wi-fi _____ while _____ internet service _____ device?
 _____ internet _____ using _____ over internet services _____ internet service company?

How might _____ use _____ through _____ service _____ the wireless network?

When using _____ internet _____ provider's modem _____ voice _____ expect _____ wi-fi.
 _____ using _____ service provider's modem/router does _____ stability _____ ?

Is it _____ degraded during router/modem _____ VoIP usage?
 _____ know if I can expect reduced _____ through an ISP _____ device.

Is my _____ strength going to go _____ because _____ over _____ ?
 _____ voice over internet access using my _____ my _____ ?

Is _____ possible to _____ wi-fi when _____ VoIP _____ a _____ ?
 _____ my internet connection affected _____ use Voice _____ with _____ modem or _____ ?
 _____ the _____ down due _____ voice _____ internet protocol services _____ use _____ my provider?

Is _____ possible _____ anticipate _____ wi-fi while _____ an internet _____ ?
 _____ there a _____ of _____ weaker wi-fi signal when using _____ ?

I would _____ if I can _____ weak _____ while _____ internet protocol.

Is my _____ connection impacted _____ use _____ over _____ my _____ and/ or _____ ?

Does this mean _____ signal _____ on the _____ with voice- _____ on the modem?
 _____ there _____ possibility of a weaker _____ when _____ over internet _____ .

Is _____ internet connection going to weaken _____ ?

Is _____ connection going _____ if I _____ Voice _____ Internet Protocol?
 _____ internet service provider cause weakened _____ voice _____ ?

Is _____ the use _____ VoIP _____ via the router _____ make it _____ to _____ Internet?

When using _____ internet _____ for _____ over _____ protocol, expect _____ .

I'm wondering if I _____ expect _____ wi-fi _____ protocol services.

I _____ like to know if I _____ expect _____ wi-fi connection _____ using _____ internet _____ .
 _____ use _____ via _____ internet _____ provider affect overall wireless _____ capability?

Will the signal _____ on _____ wireless network decrease _____ from _____ ?
 _____ the _____ voice _____ access have an _____ on _____ fi strength?

Is it possible that _____ my _____ be _____ when using _____ via _____ ?
 _____ going to be weakened if I use _____ protocol?
 _____ there a possibility of a _____ when using VoIP _____ service _____ .
 _____ the _____ wi-fi _____ over internet protocol can be adversely impacted _____ an _____ service
 provider's supplied
 _____ it possible _____ poorer _____ using _____ and _____ over internet protocol?

Does the internet connection _____ if _____ provider gives _____ Router _____ for _____ ?

Is _____ by _____ voice over _____ with the _____ modem as _____ provider
 _____ weakened if the _____ service _____ a router _____ modem for _____ services?
 _____ the _____ weaker if we _____ internet service provider's _____ ?
 _____ the _____ connection _____ if _____ internet _____ for voice over internet protocol?

Can I _____ using _____ from _____ internet service provider?

If _____ use an _____ service _____ modem _____ VoIP, you _____ expect _____.

Is the _____ by using _____ over _____ services _____ the router or modem _____ my _____?

Does _____ service provider gives a _____ for _____ over internet protocol?

_____ service provider's modem, expect _____ wi-fi?

_____ an internet service _____ routers _____ calls, _____ it always _____?

How _____ to _____ voice-over-IP _____ ISP's router affect _____ network capability?

_____ I _____ prepared _____ a bad _____ when _____ an _____ equipment?

_____ it _____ to _____ a _____ wi-fi when using _____ provider _____.

I _____ can anticipate _____ weaker _____ while _____ VoIP _____ my modem.

_____ a modem/router with _____ internet _____ provider, does _____ diminish?

_____ that the use _____ Voice _____ Internet _____ (VoIP) services _____ routers _____ affect wireless connections?

Is _____ VOIP to have reduced _____ speed _____ an _____?

_____ the _____ using a voice _____ internet _____ with _____ modem _____ by my network _____?

_____ use of voice _____ services by _____ internet service provider (ISP) _____ quality of the _____

Do _____ the reliability of wi-fi and _____ internet _____ can _____ affected by _____ an _____?

_____ the signal _____ the _____ network _____ go _____ with _____ services on my modem

_____ I _____ anticipate _____ weaker wi-fi while using voice _____ protocol.

_____ reliability _____ wi-fi _____ protocol can be adversely impacted by _____ an _____ provider's routers.

_____ my internet provider's _____ of _____ over _____ my wi-fi _____?

_____ know _____ can anticipate _____ while _____ voice over internet protocol.

Does _____ internet connection weaken _____ service _____ a _____ modem for VoIP?

Is it _____ to _____ weaker wi-fi using _____ internet _____?

Is the _____ affected by _____ of _____ with the _____ modem _____ my service provider?

Is there a _____ of a weaker wi-fi signal _____?

Is _____ possible to anticipate _____ an _____ service _____ router?

Do _____ internet _____ services _____ weakened wi-fi?

Is _____ impacted if I use Voice _____ Protocol _____ my modem _____?

Will the use of _____ service _____ the strength _____ internet service?

Do _____ the reliability _____ and voice _____ internet _____ can be adversely impacted _____ routers?

Is _____ possible that the _____ of my _____ be _____ if _____ use _____?

_____ I _____ decrease in signal _____ with _____ on the _____ from my _____?

_____ it possible _____ anticipate _____ while _____ routers from the _____ provider.

When using _____ internet _____ modem, _____ wi-fi?

_____ strength of my _____ network _____ affected by _____ of _____ over internet _____?

_____ that _____ the signal strength on _____ network _____ down with voice-over-IP a _____ modem?

_____ the _____ my wi-fi impacted _____ use of _____ over _____ access?

_____ reliability _____ wi-fi with _____ protocol can be _____ impacted _____ you use _____ routers.

Is _____ possible _____ anticipate reduced _____ using VoIP over _____ internet _____?

Is _____ possible _____ the use of _____ services via _____ would make _____ the internet?

Is it possible for _____ using gear from _____ Internet service _____?

Is it _____ the _____ over _____ services via the _____ router _____ hard to connect _____ the internet

_____ a chance _____ reduced _____ speed _____ VOIP through _____ ISPs _____ device?

_____ it _____ for a _____ wi-fi signal _____ using _____ through the _____ provider?

_____ you think that the reliability of wi-fi _____ voice _____ protocol _____ using an _____ routers?

_____ wi-fi be expected _____ internet service provider's _____?

Is it possible _____ weaker _____ when _____ on your _____?

Is it _____ anticipate weaker wi-fi _____ your _____ combo.

_____ the reliability _____ wi-fi _____ voice over _____ can _____ adversely impacted _____ the use _____ an internet _____ provider's

Is it possible _____ the use of Voice over _____ services _____ ISP-supplied _____ connections?

Do _____ believe _____ reliability _____ with voice _____ protocol can be adversely impacted _____ use an _____ service

Is _____ my wi-fi strength will _____ reduced _____ VOIP?

Voicing services via _____ can _____ in weak _____.

_____ the _____ when using an _____ service provider's _____ calls?

_____ over internet _____ services result _____ weakened wi _____?

_____ my internet _____ provider _____ weaker _____ connection _____ I _____ my phone?

_____ you _____ the _____ voice _____ internet protocol can _____ by using an internet _____ provider's routers?

Is _____ a _____ wi-fi _____ while using _____ service provider's modem.

_____ an internet _____ company's modem _____ voice _____ protocol, expect _____ wi-fi.

The _____ of _____ internet access _____ internet _____ might _____ my internet _____.

Does this mean _____ signal _____ on the wireless _____ decrease _____ services on the _____?

_____ you think _____ of _____ over internet _____ services _____ be _____ impacted by using an internet service _____

Is my _____ connection _____ if _____ use _____ Protocol with _____ and/or router?

Can I _____ poor _____ service provider's modem?

_____ there always a _____ connection when _____ provider's routers for _____?

Will my _____ affect _____ strength by using _____ over _____?

Does _____ weaken if _____ internet _____ provider _____ and modem _____ VoIP services?

The signal strength _____ wireless _____ could _____ with voice-over-IPA _____ modem.

_____ be weak for VoIP with the _____ provider?

_____ internet service provider's _____ the _____ when _____ VoIP?

The _____ provider's device could _____ a drop _____ performance _____ calls over _____.

Does the internet connection _____ if _____ provider provides _____ modem _____?

Is there _____ of _____ speed _____ VOiP _____ an ISP _____ device?

_____ my signal _____ go down due to _____ voice _____ services that _____ from _____ provider?

Would _____ use _____ voice over internet _____ (VoIP) _____ by _____ (ISP) _____ the availability of _____ fi _____?

_____ anticipate poorer wi-fi when _____ ISPs-modem and _____.

Does _____ connection affect by _____ with the _____ as my service _____?

_____ there a _____ weaker _____ signal _____ using VoIP _____ service providers?

Is it possible for _____ poor _____ when _____ my internet _____?

_____ the _____ connection affected if _____ a _____ my ISP?

Is _____ to _____ wi-fi using voice _____ internet protocol _____ combo?

Will the wireless _____ by _____ provider's _____ during _____?

Will _____ decline _____ of my _____ voice over internet _____?

Is there _____ chance _____ weak _____ for using voice over internet _____ internet _____ provider?

Will _____ internet _____ plan use _____ internet _____ affect _____ wi-fi _____?

Do _____ think the reliability of _____ and _____ internet _____ can be _____ by using _____ provider's _____?

_____ of voice-over-ip via the internet _____ provider affect the overall _____?

_____ anticipate a _____ wi-fi while _____ over _____ protocol?

_____ you _____ that _____ reliability of wi-fi with voice _____ internet Protocol _____ can be _____ by _____ an _____

_____ is a _____ of _____ weaker _____ using _____ over internet _____ a internet service provider.

Can _____ for a _____ signal when using _____ provided by an _____?

Is the _____ weakened if the internet _____ provides _____ for _____ over internet protocol?

_____ the _____ using voice _____ internet services with _____ modem _____ by _____ service provider?

Do you believe _____ the _____ of wi-fi _____ over _____ services _____ impacted by using _____ routers?

Do you _____ the _____ of _____ voice _____ internet protocol can _____ affected _____ use of _____ internet service _____

_____ possible _____ expect poor internet _____ using _____ internet service provider's _____?

Is _____ connection affected _____ I _____ a voice _____ service _____ the _____ as my _____ provider?

_____ you think _____ of wi-fi _____ voice over internet Protocol _____ by _____ an internet service provider's _____

Is _____ connection affected by using voice _____ internet services _____ provided _____?

_____ it _____ that the use _____ Internet _____ the _____ routers would interfere with wi-fi _____?

Is ____ possible ____ weaker ____ while using ____ over internet ____ on ____?

____ use of voice ____ via my internet ____ will ____ my ____ strength

Do you believe that ____ wi-fi and ____ over internet ____ services can be adversely impacted ____

____ possible that ____ use of Voice ____ Protocol ____ via the ____ would affect the ____?

____ you ____ that the reliability ____ wi-fi with ____ internet ____ can ____ by using an internet service ____

Does this ____ the ____ will decrease with ____ over-IPA ____ from my modem?

Do you believe that the reliability of ____ voice ____ protocol can be ____ by ____ provider's
____ a weaker ____ when using VoIP on ____?

Is ____ possible ____ the use of Voice ____ services ____ the ____ router ____ make ____ difficult to ____ internet

Do VoIP ____ the internet ____ provider cause ____?

Is my ____ connection going to weaken ____ I ____ voice ____?

____ wi-fi ____ using an internet service ____ router?

Will the use ____ over Internet Protocol services ____ my ____ strength ____ my ____ connection?

____ possible ____ weaker wi-fi ____ using ____ on your router/modem ____?

____ the ____ weaken if the ____ service provider ____ Router ____ for voice ____ internet protocol ____?

Does the internet connection ____ internet ____ provider ____ a router ____ voice over internet ____?

____ the provided ____ going to ____ quality ____ VoIP ____?

The connection will be affected ____ I ____ internet ____ with the same ____ provider.

Is it ____ to anticipate a ____ wi-fi ____ an ____ service ____.

Is ____ anticipate weaker wi-fi ____ the ISP's ____?

Do you believe ____ reliability of ____ Protocol services can be affected ____ the ____ of ____ service ____

Does this ____ signal ____ on ____ wireless ____ decline ____ of voice-over-IPA ____ on ____ modem?

Is ____ possible ____ wi-fi ____ using ____ on a modem?

____ the connection ____ using ____ internet ____ with ____ same modem as ____ service provider?

When using an ____ routers ____ is ____ always weak?

____ affected ____ voice ____ services with the modem provided ____ my ISPs?

Will my ____ go ____ voice ____ protocol from my provider?

____ to get ____ lousy ____ using gear ____ the internet service ____?

____ am ____ anticipate reduced wi-fi ____ while using ____ through ____ service provider.

____ using ____ modem ____ voice ____ internet protocol, expect weaker ____ fidelity.

Will ____ use ____ services via my internet service ____ impact ____ of ____?

____ signal strength on the ____ decrease ____ voice-over-IPA ____ on my ____?

____ internet service ____ may ____ a ____ wi-fi ____ using VoIP.

Do I ____ how bad ____ will ____ ISP-modem ____ VoIP?

When using ____ internet ____ modem ____ expect weak wi-fi.

____ over ____ protocol (VoIP) ____ result ____ weakened wi- ____?

Is ____ internet connection ____ if I ____ over ____ with my modem ____?

Is the ____ connection weakened if ____ internet ____ Router ____ Modem ____ services?

I ____ to ____ if I ____ weaker wi-fi connection when ____ service.

____ was ____ I could anticipate weaker ____ using ____ on my ____.

Does ____ mean that the ____ on the ____ will ____ down with voice-over-IPA ____ modem?

How might choosing to ____ voice-over-IP ____ the Internet ____ provider ____?

Do ____ think that the reliability of ____ over ____ Protocol services can be ____ impacted ____ provider-supplied

Will ____ voice ____ internet ____ affect ____ wi fi strength?

Is my ____ provider ____ my wi-fi ____ using ____ internet access?

Will ____ internet ____ plan's use of ____ access affect my ____?

____ using an internet service provider's ____ and ____.

Can ____ be ____ for ____ poor ____ service provider gear?

____ it ____ anticipate a weaker ____ while ____ on ____ modem?

I wonder _____ use of voice _____ access _____ my internet service provider _____ strength.
 Is the _____ by _____ a voice _____ internet _____ same modem as my service _____?
 _____ it possible _____ expect _____ wi-fi _____ VoIP on _____ combo?
 Does _____ provider provide _____ that _____ over internet _____ (VoIP) connection?
 I am wondering if _____ is _____ to anticipate reduced _____ protocol.
 Will _____ use _____ over internet access affect _____ wi-fi _____?
 Is _____ connection _____ if I use voice _____ internet _____ the same modem _____ service _____?
 _____ my internet _____ provider's _____ weaken _____ wi-fi when _____?
 Is _____ affected when I use voice over _____ with _____?
 _____ I expect a _____ an _____ service provider's routers?
 _____ it _____ that _____ anticipate _____ strength _____ VOIP through my internet _____ provider?
 Does this _____ signal strength _____ wireless network _____ go down _____ my modem?
 Is _____ internet connection _____ to _____ if I _____ a _____ with my _____?
 _____ a _____ of a weaker _____ over _____ protocol through the internet service provider.
 Is it possible _____ weaker wi-fi _____ my _____ service _____ router?
 The internet connection _____ gives a _____ and Modem _____ VoIP services.
 Is _____ expected _____ wi-fi _____ be _____ while _____ VoIP?
 When using _____ internet _____ provider's _____ for _____ expect _____?
 _____ the _____ of _____ with voice _____ internet protocol _____ negatively affected by _____ an ISP-supplied _____?
 _____ is a _____ of _____ weaker wi-fi signal when using _____ through _____ provider.
 _____ it _____ the signal strength _____ wireless network _____ decrease _____ services from _____?
 Will my wi-fi strength _____ impacted by _____ voice _____?
 _____ a possibility of a weaker _____ when using _____ the _____.
 Will _____ weaken if _____ use aVoIP _____?
 _____ it possible _____ when using _____ internet service provider's _____ connection?
 _____ connection _____ when using _____ over internet _____ with _____ ormodem provided _____ network _____?
 _____ possible _____ anticipate weaker internet while _____ service provider's _____?
 _____ possible _____ my _____ connection _____ if I use a VoIP _____?
 _____ there _____ a _____ wi-fi signal _____ using VoIP _____ internet service provider?
 _____ my internet _____ provider's use of _____ access impacting my _____?
 I don't know _____ I can anticipate _____ when _____ protocol.
 Do VoIP _____ internet _____ providers _____ weakened wi-fi?
 _____ signal strength going down _____ I use the voice _____ internet _____?
 _____ there _____ internet _____ on VOiP through anISP _____?
 Is _____ connection _____ over _____ the same modem provided by my service _____
 _____ is a _____ wi-fi signal when using Voice _____ Internet _____.
 _____ connection _____ by using voice _____ internet _____ same _____ provided by my service provider?
 Does _____ that the _____ strength _____ wireless _____ will diminish _____ services from my _____?
 _____ internet _____ might _____ a weakness _____ the wi-fi _____ when using _____.
 _____ the signal _____ the _____ network will decrease when _____ voice-over-IPA services _____ modem?
 _____ internet service _____ modem for _____ expect weak _____.
 Will my _____ cause _____ wi-fi _____ phone calls?
 _____ making _____ over _____ internet _____ internet service provider's device _____ drop in _____?
 With voice-over-IP services _____ from _____ can _____ expect _____ the signal strength on the
 Is _____ affected _____ using _____ internet _____ with _____ ormodem, that my service _____?
 Should I expect _____ weaker _____ when using _____ service _____ routers _____?
 _____ anticipate _____ performance when using my _____ routers?
 Do you _____ the reliability _____ over _____ Protocol services _____ negatively impacted by the _____ of an _____
 _____ believe _____ the reliability _____ and voice _____ internet _____ can be adversely _____ using an internet _____
 provider's

____ I anticipate a ____ performance ____ my internet service ____ ?
 There ____ a ____ of a weaker ____ signal ____ through ____ service ____ .
 Is ____ the weaker wi-fi while using ____ internet service ____ ?
 Can the ____ connection be ____ my provider's ____ ?
 Is it possible ____ a reduced ____ on VOiP ____ device?
 ____ you ____ the reliability ____ wi-fi with ____ internet ____ can ____ adversely affected ____ ISP-supplied router?
 ____ it possible ____ anticipate weaker ____ using an internet ____ ?
 ____ chance ____ a ____ wi-fi signal when using Voice over ____ Protocol ____ the ____ provider?
 Can ____ poor ____ using ____ internet service provider's gear?
 ____ the connection ____ weaker ____ we ____ the ____ modem ____ the internet ____ ?
 ____ using ____ internet service ____ calls, is it ____ weak?
 Will ____ go ____ because ____ the voice ____ internet protocol ____ ?
 ____ expect a ____ wi-fi ____ using voice ____ protocol?
 Is ____ possible ____ anticipate weaker wi-fi ____ voice ____ internet ____ on ____ ?
 Is ____ possible to anticipate the ____ while using ____ routers?
 Is it possible ____ the performance ____ be ____ I ____ ISP supplied modem?
 ____ the ____ of VoIP ____ my ____ affect the strength of ____ internet?
 ____ the ____ affected when ____ voice ____ internet ____ with therouter?
 ____ weaken ____ I use ____ voice over internet protocol service ____ service provider?
 The ____ of ____ with ____ over ____ Protocol ____ adversely impacted by using ____ ISP-supplied ____ .
 ____ weaken when ____ internet service provider ____ routers ____ for VoIP services?
 Does this ____ signal ____ wireless network is going ____ with ____ services ____ my modem?
 ____ you think ____ the reliability of wi-fi with ____ internet Protocol ____ adversely ____ using ____ supplied routers?
 Should I ____ a ____ when using ____ ?
 Is ____ to anticipate ____ wi-fi ____ using ____ internet service plan?
 There's a possibility ____ a ____ performance ____ voice over ____ protocol ____ .
 Is ____ a chance ____ a ____ wi-fi ____ through the internet ____ provider?
 Is the connection ____ over internet ____ with the same modem as ____ ?
 ____ possible ____ anticipate ____ using internet ____ providers ____ voice ____ internet protocol?
 Does ____ my ____ service provider provides a voice ____ protocol service?
 ____ is ____ of a weak wi-fi ____ when using ____ over ____ .
 ____ of ____ access via my internet service ____ could ____ my ____ fi ____ .
 ____ by using ____ over internet ____ with ____ that my service provider ____
 ____ services ____ the ____ service ____ can ____ in weakened ____ .
 Is it ____ me to expect ____ using ____ service ____ routers?
 Does it ____ on the wireless ____ voice-over-IPA ____ on my modem?
 ____ possible that I can ____ a ____ strength ____ using VOIP?
 ____ it ____ to ____ wi-fi ____ the Internet service ____ routers?
 ____ that the use of VoIP services ____ the ____ routers would ____ difficult to ____ to ____ ?
 Will ____ of Voip services via my ____ the ____ of my ____ ?
 Will the ____ provider's ____ weaken ____ wi-fi ____ VoIP?
 ____ my ____ going to ____ if ____ use voice over internet protocol ____ provider?
 Will ____ internet ____ be ____ use ____ over internet protocol ____ with my ____ ?
 Is ____ to ____ wi-fi ____ I use VOIP through my ____ provider?
 ____ internet service ____ can lead ____ weakened wi-fi.
 ____ expect reduced ____ using my ____ provider's routers?
 ____ possible to ____ using an ____ service provider's modem?
 Can a ____ signal ____ be ____ with voice-over-IP services ____ modem/router ____ provider?
 ____ voice over internet protocol services ____ use ____ affect my ____ .
 Will ____ strength ____ voice over ____ protocol services ____ from my provider?

Is _____ using my service provider's _____ internet services?

Is it _____ weaker wi-fi _____ using _____ over internet _____?

_____ my _____ strength go down _____ use a _____ over _____ protocol service _____?

Do _____ that _____ of wi-fi with _____ internet protocol can be adversely impacted by _____ an _____ service _____

_____ signal strength on _____ network will go down _____ voice-over-IPA _____ on _____ modem?

When using _____ internet _____ the same modem as _____ service provider, _____?

_____ it mean the signal _____ network _____ with _____ services _____ the provider?

Do _____ think the _____ voice _____ internet Protocol _____ can be _____ affected _____ the _____ an internet service provider _____

_____ know if _____ should expect _____ weaker _____ connection with _____ VoIP _____.

How might _____ to _____ voice-over-IP via the Internet _____ wireless _____ capability?

Is it possible _____ wi-fi _____ using _____ your modem.

_____ it possible to anticipate _____ weaker _____ voice over _____?

When _____ an _____ service _____ modem for _____ over _____ expect it _____ be _____.

_____ it _____ to anticipate _____ wi-fi performance _____ my _____ service _____ network?

Do voice over _____ protocol services _____ in _____?

Do you believe that _____ wi-fi _____ internet protocol can _____ by _____ an ISP-supplied routers?

_____ would _____ to know if _____ anticipate _____ wi-fi performance when using _____ protocol.

Is _____ for me to anticipate _____ using _____ internet service _____ network?

Is _____ possible to _____ using an internet service _____?

_____ internet speed on _____ reduced through an ISP _____?

Is _____ wi-fi _____ with internet _____ the _____ provider?

_____ it _____ poorer _____ when _____ protocol and voice over internet protocol?

_____ this _____ the signal _____ wireless _____ with voice-over-SIP _____ on the modem

_____ you _____ the _____ and voice over _____ Protocol services _____ impacted _____ using an ISPs-supplied routers?

Is voice over _____ going _____ wi- _____ strength?

The _____ of voice _____ my _____ provider will _____ an affect on my _____ strength.

_____ it _____ to anticipate _____ while _____ voice over internet _____?

Is _____ using VoIP?

_____ possible to _____ internet performance _____ using voice _____ protocol?

The internet _____ device might _____ drop _____ performance when _____ calls _____ the _____.

Is it _____ that I _____ decrease _____ performance _____ my wi-fi _____ using _____?

_____ the internet less reliable _____ an _____ service _____ for _____?

Do you believe that the _____ wi-fi _____ voice _____ internet Protocol _____ can be _____ impacted _____ the use _____

Will the _____ provider's router weaken _____ internet _____ using _____ over _____?

_____ possible _____ me to anticipate _____ wi-fi _____ the _____ service provider's _____?

Will the use _____ VoIP _____ by _____ provider affect _____ strength _____?

_____ an internet service _____ modem, expect _____?

_____ internet connection weaken if I _____ protocol _____ from my service _____?

Do _____ think that the _____ wi-fi with voice over _____ services can _____ by _____ an _____?

_____ should expect _____ weaker _____ an _____ service provider's modem.

_____ it _____ to _____ weaker _____ using the _____ provider's _____?

_____ to expect weaker wi-fi _____ VoIP _____ modem combo?

Can I _____ a poor internet _____ using _____ service _____?

_____ the internet connection weaken if _____ provides _____ and modem _____ VoIP services?

Is it _____ reduced wi-fi strength when _____ through my _____?

_____ the _____ using voice _____ on the same modem _____ my _____ provider?

_____ connection weak if the internet _____ a routers and modem _____?

How might choosing to use voice-over-IP _____ service provider _____ network _____?

Is _____ on _____ wireless _____ going to go _____ voice-over-IP _____ my modem?

Is _____ internet _____ provider's _____ bad _____ wi-fi _____ usage?

Is _____ internet connection _____ to _____ if I _____ services?

Does _____ mean _____ signal strength on _____ wireless network _____ with voice-over-IP _____ provider?

Is _____ possible to expect _____ when _____ voice _____ services?

_____ signal strength _____ down because _____ the voice _____ protocol services I use _____ ?

_____ possible to _____ weaker _____ while _____ internet service _____ modem?

Will my _____ service _____ cause weakened _____ during _____ ?

_____ it possible _____ use of _____ via _____ ISP-supplied _____ would make it hard to _____ internet.

When _____ an _____ provider's modem for _____ over internet _____ should _____ wi-fi.

_____ it possible that _____ degrade _____ VoIP usage?

Is _____ possible that _____ connection _____ when I _____ a _____ service?

_____ it possible that _____ performance of my wireless _____ will be _____ the _____ ?

_____ it possible _____ anticipate _____ weaker _____ when _____ an internet service _____ ?

Is _____ possible for _____ get _____ signal _____ using internet service _____ ?

Would the _____ internet protocol services _____ the internet _____ of wi-fi connections?

Is _____ me _____ experience _____ internet speed on _____ ?

Is _____ strength going _____ because I _____ over _____ protocol?

Do VoIP _____ via internet _____ weakened wi- _____ ?

The use _____ access via my internet _____ affect my _____ strength.

Can I _____ signal _____ using an _____ service _____ equipment?

Is _____ internet less _____ using _____ routers for calls?

Is there _____ performance when _____ voice over _____ services?

Do _____ think the reliability _____ internet Protocol _____ can be affected _____ the use of an _____

_____ using _____ internet protocol over my internet service _____ can _____ reduced _____ ?

Will _____ connection _____ affected _____ I use _____ internet protocol services _____ internet _____ ?

_____ weaken _____ the _____ provider provides a _____ for voice over _____ Protocol?

_____ a _____ wi-fi strength when using _____ ?

_____ the _____ affected _____ voice over _____ the _____ modem as my _____ provider?

_____ the connection _____ by _____ with _____ modem provided by my internet _____ ?

Is _____ to adversely _____ wi-fi _____ with voice _____ Protocol _____ if you use _____ ISPs-supplied _____ ?

_____ an internet service _____ modem for phone _____ wi-fi.

How _____ choosing _____ use _____ the internet _____ provider _____ network capabilities?

Will my _____ provider cause a _____ wi-fi _____ ?

_____ possible to anticipate weaker _____ Voice _____ internet protocol?

_____ to anticipate weaker _____ using the internet _____ provider's _____ ?

Is it possible _____ wi-fi using the _____ provider's _____ VoIP?

_____ mean _____ signal _____ on the wireless _____ will _____ with _____ services _____ my _____ ?

I _____ know _____ can anticipate reduced _____ performance when using voice _____ .

Is there _____ of a _____ when _____ through _____ internet service provider?

_____ it possible to _____ weaker _____ Voip _____ your modem _____ ?

_____ possible to _____ reduced internet speed _____ VOIP through _____ ?

When _____ an internet service _____ routers _____ VoIP, _____ degraded _____ .

_____ I be _____ for _____ bad _____ my internet service _____ gear?

_____ weaken if the internet service _____ aRouter _____ Modem forVoIP?

Is _____ possible for _____ to _____ reduced _____ strength _____ using VOIP _____ ?

Is it _____ to anticipate reduced _____ performance _____ VoIP _____ service _____ router?

Will _____ of _____ router affect the _____ my internet service?

_____ voice-over-ip services on _____ modem/router _____ provider, can _____ decrease in the signal _____ my

Does the _____ connection _____ if _____ internet _____ aRouter _____ for VoIP?

____ want to ____ I can anticipate a ____ while ____ VOIP.
 ____ signal ____ because of ____ voice over internet ____ I use ____ my ____?
 ____ you ____ the reliability ____ wi-fi ____ voice ____ internet Protocol ____ can ____ by the use of ____ internet service ____
 Is ____ signal strength on ____ network going ____ decrease ____ the provider?
 ____ signal strength on the ____ go down ____ on the modem?
 ____ is a possibility ____ a ____ in ____ during voice over ____.
 ____ I ____ a bad signal ____ equipment ____ the internet ____?
 Is it possible ____ weaker internet ____ using ____ internet ____ provider's ____?
 I want ____ if ____ can ____ wi-fi while using ____ protocol.
 ____ it possible ____ internet service ____ provide weaker ____ when ____ voice ____ internet protocol ____?
 ____ my ____ provider's ____ of ____ over ____ access ____ wi-fi strength?
 ____ the ____ connection weaken if ____ internet service ____ Modem specifically for ____?
 Do ____ the reliability of ____ voice over ____ can be affected by using an ____?
 ____ be prepared for a ____ gear ____ the ISPs?
 How ____ to ____ the internet service ____ influence ____ overall ____ of the wireless ____?
 ____ it possible that ____ calling ____ suffer ____ my ____ provided ____?
 ____ a ____ of a weaker ____ signal when using Voice ____ internet service provider.
 There's a ____ a ____ using voice over internet ____.
 Voicing ____ internet ____ can cause ____ wi-fi.
 ____ be prepared for ____ signal when using an ____ gear?
 There is ____ possibility ____ weaker wi-fi ____ for ____ over internet ____.
 ____ wondering ____ I should ____ weaker ____ when ____ VoIP service.
 When ____ internet service provider's ____ voice ____ expect ____ slower wi-fi.
 When using ____ internet service ____ and ____ wi-fi?
 ____ possible ____ anticipate ____ poorer wi-fi performance ____ a modem?
 ____ using ____ service ____ for VoIP, ____ a weaker wi-fi.
 Will ____ service provider's ____ voice ____ internet access affect my ____?
 Will ____ be ____ by ____ over internet access?
 Does the internet ____ service provider ____ a routers ____ modem specifically ____ over internet ____?
 Does ____ internet ____ internet ____ with a voice ____ internet protocol service from ____ ISP?
 ____ you believe the reliability of wi-fi ____ over ____ protocol ____ by ____ an ____ routers?
 ____ you ____ that ____ of ____ voice over internet ____ can be ____ impacted by the use ____ Service Provider
 Using voice over ____ the ____ modem provided by ____ provider ____ the ____.
 How might ____ to use ____ through the ____ provider ____ the ____?
 ____ you ____ that ____ reliability ____ wi-fi ____ over ____ services can ____ adversely impacted by ____ an internet service ____
 ____ might choosing ____ use voice-over-IP ____ provider influence the ____ the wireless ____?
 ____ it ____ to anticipate ____ wi-fi performance ____ Voice over ____?
 ____ believe ____ of wi-fi ____ voice over internet protocol ____ be ____ impacted by the use ____ an ____
 Is ____ to expect poor ____ using an internet ____?
 ____ mean ____ signal strength on the ____ will ____ with ____ over-IPA services ____ modem?
 ____ think ____ reliability of wi-fi ____ voice ____ internet protocol ____ be ____ using ____ internet ____ provider's routers?
 Do you ____ the ____ of wi-fi ____ voice ____ adversely ____ by using an internet ____ supplied
 Will ____ strength ____ I use the ____ over ____ protocol ____ my provider?
 Will ____ via my internet service provider affect ____ strength of ____?
 Is ____ that ____ use of ____ services ____ router ____ make it ____ to ____ to ____ internet.
 ____ the internet service ____ weakened wi-fi ____ internet protocol?
 Do you ____ that the ____ internet protocol services ____ be adversely impacted by the ____ service provider
 ____ is ____ by ____ voice over ____ therouter ormodem provided ____ my Internet _____.

Do _____ that the _____ wi-fi _____ voice over internet _____ can be adversely _____ Internet service provider's _____ the _____ voice over Internet access impact _____?

Is it _____ utilization _____ VoIP _____ the ISP-supplied _____ would _____ it difficult _____ connect to _____ internet? _____ my internet _____ going _____ be weakened if _____ VoIP _____ on _____ service _____?

Is _____ to _____ wi-fi _____ when _____ internet service provider's route _____? _____ the use _____ (VoIP) services by _____ internet service _____ affect _____ availability of wi fi _____?

Do _____ have _____ about _____ internet _____ weakened _____ I use _____ services?

When using _____ my internet service _____ network _____ performance?

There _____ a possibility _____ wi-fi _____ when using _____ over internet protocol through the _____.

I would like _____ know if _____ can anticipate _____ wi-fi _____.

_____ you believe that the reliability of _____ Protocol services _____ be negatively _____ of an ISP-supplied _____ the _____ voice-over-IP via _____ internet service provider _____ wireless network _____?

Do you _____ of _____ voice over _____ Protocol services _____ be _____ by the _____ of an _____? _____ use _____ over internet access via my internet service _____ my _____.

_____ it possible _____ anticipate _____ wi-fi when using _____ service providers and _____?

Will the _____ of voice over _____ protocol services _____ my internet _____ strength _____ my _____?

Is _____ a possibility _____ wi-fi _____ Voice over Internet Protocol?

Does the _____ connection weaken if the internet _____ gives _____ and _____ for _____ services? _____ internet _____ make my wi-fi weak _____ I _____ VoIP?

_____ the _____ if _____ internet _____ gives _____ modem for VoIP services? _____ the use of _____ via my _____ affect the strength _____ connection?

Is _____ internet _____ be _____ when _____ use VoIP _____ with _____ internet service _____?

Does _____ internet _____ if the internet is _____ for _____ over _____ protocol _____ from _____ provider?

Is _____ internet _____ weakened _____ the internet _____ gives _____ Router _____ specifically _____ VoIP services?

Is _____ to _____ internet when _____ ISP-modem and _____?

Is it possible _____ the performance _____ my _____ worse when using _____ via _____ service _____?

_____ you _____ the _____ wi-fi with voice over internet _____ can _____ impacted _____ using an ISP _____?

Can _____ be _____ for _____ signal when _____ provided _____ the internet _____ providers?

The _____ may _____ weakened if _____ internet service _____ and Modem _____ VoIP.

Is _____ for _____ to _____ while using VoIP?

Does _____ mean the signal strength _____ will _____ voice-over-SIP service _____ the modem? _____ you believe _____ wi-fi with voice over _____ be _____ by _____ an internet service provider-supplied _____?

Does _____ the _____ strength on the wireless network _____ voice over internet _____ on _____? _____ it possible to _____ wi-fi _____ internet protocol _____ and voice _____?

I would _____ know if _____ can anticipate _____ wi-fi _____ using _____ on _____.

_____ it _____ to expect _____ wi-fi when _____ internet _____ routers?

Do you believe _____ with voice over _____ Protocol _____ can _____ affected _____ an internet service provider-supplied _____ the _____ with _____ over internet _____ can be negatively _____ the use of an internet _____ provider's

When making calls _____ internet _____ provider's device cause _____ drop in _____? _____ use of _____ via my internet service _____ may affect _____ wi-fi _____.

_____ the use of _____ over Internet Protocol _____ affect _____ strength _____ internet connection? _____ reliability _____ wi-fi _____ voice _____ services can be adversely impacted by using an _____ router?

Is the _____ of voice over Internet _____ going _____ affect _____?

Will _____ voice over internet protocol _____ affect _____ strength _____ the _____? _____ use _____ access _____ internet service plan could affect my _____ strength.

I _____ like to _____ if I _____ anticipate reduced _____ while _____.

Is it _____ internet _____ to _____ on VOiP _____ anISP _____ device?

Is _____ to _____ reduced wi-fi performance _____ using my _____ service _____?

Do _____ via ISPs cause _____?

Will my internet service _____ internet when _____ over _____ protocol?

Is _____ possible that I can _____ weaker wi-fi _____?

Is _____ a _____ wi-fi signal _____ using VoIP?

_____ believe _____ of _____ voice _____ internet Protocol services can be _____ by _____ use of an internet service _____

Is it possible _____ my internet _____ if _____ Voice over _____ Protocol _____?

How _____ choosing to _____ voice-over-IP _____ the _____ provider influence _____ network?

Is my _____ service _____ going _____ impact _____ wi-fi _____ using voice _____ access?

Is _____ a _____ with the _____ for voice over _____ protocol?

_____ connection _____ be _____ if _____ a Router and Modem for VoIP.

Is _____ affected by _____ over _____ services with the _____ by my _____?

_____ would _____ know if I _____ anticipate reduced _____ strength _____ VOIP.

Can _____ a poor wi-fi when using _____ service _____?

Voicing services _____ the _____ service _____ can _____ wi- _____.

_____ would like _____ know _____ I _____ anticipate reduced _____ when using VOIP _____ service provider.

_____ use of voice over internet access _____ to affect _____?

Is my _____ affected _____ I use _____ over Internet Protocol _____ my _____ or _____?

_____ the connection _____ internet _____ with the same modem _____ my service _____?

Will _____ internet service _____ weaken the _____ using _____ internet protocol?

_____ strength go down because _____ the _____ internet protocol _____ I use _____ provider?

_____ it possible that the _____ of VoIP _____ via the ISP-supplied _____ hard _____ connect to _____?

_____ possible _____ anticipate reduced wi-fi _____ using _____ internet service _____ routing _____?

Does this _____ the _____ on the _____ network will decrease _____ voice-over-IPA _____?

I would like to _____ if _____ anticipate weaker _____ internet _____.

Do I have to _____ poor _____ using an _____ provider's _____?

_____ you _____ the reliability _____ wi-fi with _____ internet _____ services _____ affected by using an _____ routers?

The _____ of _____ internet access _____ service provider will _____ my _____ strength.

_____ it _____ internet connection _____ impacted _____ I use _____ over Internet _____ my modem.

_____ to _____ using an internet service provider's Router _____ VoIP?

_____ it expected that there will _____ diminished _____ utilizing _____ via an _____?

_____ my _____ service _____ be _____ cause weaker _____ during _____ use?

Will the use of VoIP _____ strength _____ my internet?

_____ using _____ service provider _____ over _____ protocol, expect a _____ wi-fi.

_____ a chance _____ reduced _____ speed on _____ with an ISP _____?

Does the internet _____ if the _____ is _____ a _____ service _____ my _____?

Do you think _____ reliability _____ with voice over _____ Protocol services _____ be affected by _____ of _____ internet _____

_____ that _____ reliability of _____ and _____ over internet Protocol _____ can be adversely impacted by _____ internet _____

Should I expect _____ slower _____ when _____ VoIP _____?

_____ strength go down due to _____ internet _____ I use from _____ provider?

_____ chance of a _____ wi-fi signal when _____ through the _____.

There is _____ of _____ weaker wi-fi _____ using _____.

_____ services _____ providers result in weakened _____ fi?

Does the internet _____ use _____ over _____ protocol service from my _____?

Does _____ connection weaken if _____ internet _____ provider gives a Router and _____ Internet _____?

_____ the _____ Voip services via _____ service provider _____ wi-fi strength?

Voicing services _____ service _____ can _____ weakened wi-fi.

_____ use voice-over-IP _____ the internet service provider _____ the overall _____?

_____ possible _____ expect a _____ while _____ on your modem combo?

When using an internet _____ provider's modem for _____ weak _____.

Is it _____ expect poor _____ using _____ provider's router?

_____ possible to anticipate a _____ while _____ VoIP _____ your _____.

Is _____ possibility _____ wi-fi signal when using a _____ over _____ device?

Is _____ internet connection impacted if I use _____ Protocol _____ modem _____?

_____ use _____ protocol services _____ provider, will _____ signal strength _____ down?

Is _____ possible _____ me to _____ wi-fi when using _____?

_____ it possible that _____ VoIP services via _____ ISP-supplied router _____ affect _____ to the _____?

_____ opting _____ the internet service _____ influence the wireless network?

_____ possible _____ a _____ when using voice over _____ protocol?

_____ you think _____ with voice over _____ protocol _____ affected _____ using an internet service provider's _____?

_____ I _____ voice over _____ protocol services from _____ my signal strength _____?

_____ think the _____ of wi-fi with _____ over _____ Protocol services can be _____ impacted by using _____

_____ it _____ to expect _____ wi-fi when _____ an _____ routers

Will my internet _____ provider _____ wi-fi _____ using voice over _____?

_____ there always a weaker _____ when _____ internet _____ provider's routers _____?

Does _____ mean _____ from my modem _____ signal strength _____ the _____ network?

_____ wi-fi connection going _____ when I _____ services?
