

[Demo] NLP Dataset for Customer Service Automation

Company Type	Natural Gas Companies
Inquiry Category	Assistance with understanding utility rights
Inquiry Sub-Category	Rate structure clarification
Description	Customers require guidance on understanding the different components of their natural gas rates, such as distribution charges, supply costs, and surcharges.
Data Size	5,016 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Natural Gas Company" customer inquiry. (Purchased data will not be masked.)

_____ some months _____ higher _____ prices _____ consistent consumption _____ year?

If _____ consumption pattern remains constant, _____ do _____ energy _____ certain _____?

_____ costs go up _____ months _____ our _____ pattern _____ the same?

_____ do _____ change if you have consistently _____?

_____ monthly energy _____ fluctuate _____ use _____ constant?

Is _____ cost of electricity increases during _____ months while _____ same?

Why _____ energy prices go _____ months _____ consumption _____ the same?

_____ costs _____ at _____ times of the year?

_____ wondered _____ months _____ higher _____ prices without demand variations?

Why do _____ change _____ consistently used energy?

There _____ months that are _____ to _____ despite consistent _____.

_____ do certain _____ have _____ energy _____ usage?

Why _____ prices _____ in _____ times _____ the year?

_____ do higher _____ in _____ while consumption _____ the same?

_____ unchanging demand _____ what _____ rates _____?

_____ do _____ up in _____ even though _____ consumption remains _____ same?

_____ our consumption pattern _____ constant, why _____ energy _____ in _____ months?

_____ come _____ go _____ despite _____ steady usage?

_____ for _____ costs _____ increase during certain months?

Is _____ possible that some _____ are _____ when _____ energy use _____?

_____ come electricity _____ go up during certain periods _____?

_____ energy costs go _____ during _____?

If our consumption pattern _____ energy costs _____ up _____ specific _____?

_____ electricity _____ up in _____ periods _____ demand stays _____ same?

_____ increased monthly utility _____ despite _____ year-long _____.

Do specific _____ experience _____ without changing _____ patterns?

Why _____ occur in _____ seasons when _____ stays the _____?

_____ do _____ prices go up _____ even _____ have not _____ consumption?

Is _____ a _____ for _____ in energy _____ when consumption is _____?

_____ the cost _____ electricity to go _____ in _____ months?
 _____ consistent yearly _____ what _____ high _____?
 _____ rates to go _____ some months?
 When I _____ the _____ why _____ go up at certain times?
 Why _____ we _____ with _____ energy bills _____ months?
 Why do we have to _____ high _____?
 _____ prices fluctuate, _____ though _____ consistent
 Why do monthly _____ vary even _____ use _____?
 I _____ why energy prices _____ in _____ of year.
 _____ a reason for higher-priced _____ energy _____ remains the _____?
 Even _____ consumption is _____ same I _____ energy price _____ during certain _____.
 _____ experience higher _____ while usage stays the same?
 _____ do _____ prices go up at certain _____ the same _____?
 _____ wonder _____ months have higher _____ prices without _____.
 How come _____ can vary _____ month _____ consistent levels of _____?
 _____ prices _____ up at _____ times _____ though I _____ reduced my consumption?
 If our _____ pattern _____ why _____ increase _____ specific months?
 _____ do monthly _____ prices fluctuate _____ consistent?
 _____ can go up _____ certain months _____ usage.
 _____ with _____ consumption, what causes them?
 _____ consumption throughout the year, is there _____ specific reason _____ in _____ month?
 Even _____ my _____ the _____ feel _____ prices _____ up in certain months.
 _____ are _____ bills higher during _____ of the _____?
 _____ do _____ prices _____ in different _____?
 If our consumption _____ is _____ do our _____ costs rise _____?
 _____ costs _____ during _____ periods _____ demand stays constant _____ the _____.
 _____ there _____ electricity _____ to go up _____ months?
 _____ energy prices _____ on a _____ despite _____ usage?
 Despite a constant level _____ consumption throughout _____ prices _____.
 Why _____ energy prices _____ at certain _____ when I use _____?
 _____ do some months have high _____?
 Why _____ prices higher _____ months?
 _____ I use the _____ does energy prices _____ at _____ times?
 Do _____ have increased energy _____ even _____ consumption does _____?
 _____ you _____ energy prices change month-to-month, even though _____?
 Electricity _____ rise _____ times but _____ throughout the year.
 How do some months have _____ while _____ same over the _____ of _____ months?
 There is _____ steady _____ pattern but what _____ energy _____ month?
 _____ do monthly energy _____ though use _____ constant?
 Why _____ costs vary from _____ to _____ maintaining _____ use?
 _____ consumption pattern is _____ then _____ do _____ costs go _____ during certain _____?
 _____ are higher _____ certain _____ consumption stays the same.
 Why _____ prices _____ certain months.
 If _____ are constant, _____ do energy _____ go up _____ certain _____?
 Why _____ to pay more for energy _____ a _____ of _____?
 _____ why do _____ months stick us with high _____?
 _____ is _____ steady _____ pattern, _____ what _____ high energy costs _____ a _____?
 I _____ like energy _____ increases occur in _____ as _____ is _____ same.
 _____ higher energy _____ occur in _____ seasons _____ stays _____ same?
 _____ prices _____ up in certain months _____ stays the same?

Do some months _____ energy prices _____ consumption _____?

Given our _____ pattern, _____ does _____ go _____ certain months?

_____ higher energy costs when _____ consumption pattern?

_____ up in some seasons while consumption stays _____?

Why _____ months have higher energy pricing _____?

_____ do some months have _____ expenses while our _____ over the course _____ months?

_____ do monthly _____ prices vary even though _____?

Is _____ that the _____ of electricity _____ certain months _____ usage _____ same?

_____ energy prices _____ on _____ monthly basis _____ constant _____?

_____ energy expenses _____ certain seasons, while consumption _____.

There is a steady _____ what _____ high _____ during a _____?

Why _____ energy _____ go _____ though _____ have consistently used _____?

When I _____ the same amount every _____ the _____ rates _____?

In _____ months _____ go up, but _____ same.

How _____ the _____ go _____ despite the usage?

_____ there is a steady consumption pattern, _____ specific month?

Energy _____ tend to go up _____ consistent _____.

_____ energy _____ go _____ certain months _____ consumption pattern _____ constant.

Why is _____ pricing higher _____ demand variations?

_____ do _____ have _____ costs _____ our usage stays the _____?

I _____ prices _____ up during certain _____ of year.

Why do _____ some months?

Why does monthly _____ despite a _____ level _____?

Why do _____ energy costs go _____ of the _____?

How do some _____ higher _____ expenses while _____ usage _____ same over the _____ a _____?

Why do monthly _____ though usage is _____?

Why do _____ prices _____ changing even though usage _____?

_____ energy expenses occur during certain _____ of _____ stays _____ same.

Why _____ even despite use being consistent?

There is a steady _____ pattern _____ causes _____ energy costs?

_____ rates increase despite _____.

_____ don't _____ why the _____ go up _____ months.

_____ energy _____ even though _____ stays the same.

_____ does _____ energy prices change _____ use is _____?

_____ you _____ why energy prices vary _____ even _____ is _____?

_____ know _____ prices vary month-to-month _____ usage _____ consistent?

"Why do energy _____ times even though _____ the same _____"

_____ steady _____ what causes _____ costs _____ specific months?

Explanation _____ utility rates despite _____ yearlong _____.

If _____ pattern stays _____ why _____ costs go _____ certain months?

_____ a reason for higher priced _____ when _____ remains _____?

_____ our _____ go _____ when _____ is constant?

It's silly _____ some months _____ more _____ my energy _____.

In _____ are higher but consumption _____ same.

_____ monthly _____ change _____ though _____ consistently use energy?

Why does the power _____ go _____?

What causes _____ costs during _____ times _____ year?

Even _____ my _____ the same, _____ energy _____ up in _____ months.

_____ do certain months _____ higher _____ prices _____ consumption?

_____ it _____ for some _____ have _____ our usage remains the same?

_____ same _____ every month, why are _____ energy rates high?
 _____ costs during certain times of the _____ related _____ consumption _____.
 There is _____ steady _____ pattern, but _____ causes high _____ during _____?
 _____ does energy prices go _____ in _____ when my consumption _____?
 How _____ go up _____ our _____ stays _____ the year?
 Why do the _____ energy prices _____ when _____ usage _____?
 _____ months _____ the year _____ higher _____ prices _____ consistent _____.
 _____ my usage remains _____ energy _____ go up _____ certain _____.
 Even though there is _____ have _____ rates.
 Is there _____ the _____ electricity _____ during _____ months?
 _____ do _____ have _____ rates despite regular usage?
 _____ do _____ have high _____ rates despite _____?
 How do _____ up _____ certain months?
 _____ certain _____ energy prices _____ changing consumption?
 _____ is _____ steady _____ pattern, _____ what causes high _____?
 _____ monthly energy _____ change, despite use _____?
 During certain times _____ year, _____ energy _____ to _____ continuous consumption _____.
 _____ subject to higher _____ despite consistent usage.
 _____ prices change _____ when they _____ the same amount _____ energy?
 _____ increase _____ though usage is _____.
 _____ is a _____ pattern on our _____ high energy costs during _____ month?
 _____ do _____ months _____ higher _____ pricing with _____ demand _____?
 How _____ electricity costs go _____ certain periods _____ same?
 What _____ energy _____ to _____ months?
 Do _____ months _____ increased _____ prices _____ consumption _____ constant?
 Is _____ a _____ specific months experience _____ pricing _____ variations?
 Why do you see _____ energy _____?
 Is it possible _____ are _____ expensive _____ my energy consumption _____?
 Even though my consumption _____ price increases occur _____ months.
 Even _____ I still _____ same consumption, I _____ like _____ go up _____.
 Why do _____ even _____ you have consistently _____ energy?
 _____ energy _____ change on a _____ continuous usage?
 _____ reason for _____ power _____ in some months?
 _____ that some months are more _____ my _____ changed.
 What causes _____ energy costs _____ is a steady _____?
 _____ can _____ up in some seasons _____ stays _____ same.
 If _____ pattern _____ constant, why do _____ costs go up _____?
 Why _____ power _____ up in certain _____ the _____?
 If consumption stays the _____ months, _____ prices higher?
 _____ prices higher in _____ months?
 _____ constant _____ energy prices changing?
 Why _____ our _____ during _____ months?
 Despite consistent usage, certain months are _____.
 _____ monthly energy _____ fluctuate despite the _____ consistent?
 If _____ pattern is constant, _____ our _____ increase during certain _____?
 _____ there _____ explanation _____ the _____ electricity costs in _____?
 Higher _____ expenses _____ during certain seasons _____ consumption _____.
 Why _____ prices up _____ certain times _____ I _____ not _____ consumption?
 Why does monthly _____ fluctuate _____ consistent?
 Despite my consumption being _____ same, _____ like _____ happen _____ months.

____ do energy ____ up ____ certain times ____ the same amount ____ energy?
 How do ____ have ____ energy ____ while usage stays ____?
 Is it ____ for ____ months ____ energy expenses ____ our usage ____ the ____?
 How ____ months ____ more energy ____ usage ____ the same?
 ____ are power bills higher ____?
 How ____ have higher energy costs, while ____ stays ____?
 ____ we ____ consumption pattern, ____ causes higher energy costs ____ months?
 Higher ____ months ____ related ____ the same usage ____ year.
 ____ do monthly ____ prices change ____ being ____?
 Higher ____ in ____ months with ____ usage ____ the year.
 ____ my ____ the ____ feel like ____ increases occur during certain ____.
 ____ usage ____ constant ____ the year ____ how ____ bills go ____?
 ____ power bills in some ____ with the ____ of ____.
 Is it ____ of electricity increases during certain ____ while ____ the ____?
 ____ consistent ____ months have ____ rates.
 ____ monthly ____ prices vary ____ usage is consistent?
 Why ____ energy prices ____ I have not changed my ____?
 Is there ____ reason for ____ certain months?
 Is ____ reason ____ higher ____ costs ____ times of year?
 Why ____ prices fluctuate despite being consistent ____?
 ____ we ____ a constant ____ pattern, ____ do energy ____ up during ____?
 Do ____ energy ____ month-to-month even though ____ is consistent?
 ____ come the ____ up during certain ____ the year?
 How come certain ____ prices without ____ variations?
 If ____ pattern ____ do energy ____ rise during ____ months?
 Some ____ have higher power ____ the ____.
 Given ____ pattern, why do ____ certain months?
 There ____ steady consumption pattern ____ what ____ the ____ energy ____?
 ____ ridiculous that some months ____ my ____ consumption hasn't ____ all.
 ____ have high energy rates?
 ____ electricity costs ____ during ____ times of ____ while demand ____ constant?
 ____ energy costs ____ certain times of ____ related ____ continuous ____.
 ____ you ____ months have higher ____ prices without demand ____?
 ____ energy prices go up in ____ even though ____ consumption ____ same.
 There is a ____ why monthly ____ despite ____ consistently used ____.
 ____ energy ____ rise at certain times even ____ I ____ amount?
 ____ is ____ pattern, ____ high energy costs for a particular ____?
 ____ do our ____ costs ____ during different ____?
 ____ feel like energy price ____ happen during ____ consumption ____ still the ____.
 What factors ____ the cost ____ electricity during ____ usage ____ the ____?
 ____ the ____ that energy price ____ occur during certain months.
 Do ____ higher energy prices ____ consumption stays ____ same?
 ____ energy rates go up ____ usage ____.
 ____ go up at ____ times of the ____?
 If our ____ pattern remains constant, ____ go ____ during ____ months.
 ____ the ____ go up in ____ months?
 Why ____ electricity costs ____ certain months, while consumption ____?
 Why ____ prices go up at certain ____ the ____ amount?
 ____ do we see energy ____ go ____ certain ____?
 ____ do ____ months have higher ____ but ____ stays ____ same over the course ____ a ____?

_____ power bills go _____ in some months with _____ usage _____.

_____ energy _____ happen _____ some seasons, _____ stays the _____.

_____ consumption _____ makes some months more _____ than others?

_____ there _____ for _____ when energy _____ is not changing?

_____ come _____ costs go up during _____ periods _____ remains _____ throughout the _____?

Is _____ any _____ higher-priced months _____ usage _____ change?

_____ do _____ energy costs _____ in _____?

When energy _____ remains _____ are _____ any _____ for _____ months?

Why _____ specific months have _____ pricing without _____?

_____ have _____ increased _____ rates despite consistent _____ demand.

_____ do energy prices go up _____ times _____ me _____ my _____?

_____ energy costs _____ despite consistent _____ usage?

_____ come _____ go up during specific periods _____ constant?

Why _____ the monthly _____ change _____ though usage _____ same?

_____ some months experience _____ prices when consumption _____ constant?

_____ months are _____ to _____ energy _____ even _____ use _____ same amount.

_____ does consumption remain _____ prices _____ fluctuated?

Some months have increased _____ prices _____ consumption _____.

_____ the monthly _____ price _____ despite _____ constant _____ of consumption?

_____ energy rates _____ usage.

How come _____ rates go _____ even _____ stays _____?

If _____ the same _____ every month, _____ are the _____ going _____?

Why _____ power bill _____ in _____ months with the _____?

Is _____ a _____ for higher _____ months when energy _____?

_____ our consumption _____ energy _____ go _____ during certain months?

If _____ consumption pattern _____ constant, _____ do energy _____ up _____ months?

If _____ consumption _____ remains constant, _____ why _____ costs _____ up in _____?

_____ consuming the same amount _____ why are the _____?

_____ increase during certain times of the _____?

Why _____ monthly energy prices _____ using _____?

_____ energy expenses are _____ while _____ the same.

_____ it _____ electricity costs _____ go _____ certain _____ while consumption remains _____ same?

Why _____ get _____ with high _____ bills?

_____ do _____ bills _____ higher _____ months?

_____ prices are higher _____ months _____ consumption _____ the _____.

We have _____ steady consumption _____ causes higher _____ costs _____ certain _____?

There _____ priced _____ when _____ is stable.

Why _____ monthly _____ prices _____ being consistent _____ use?

How _____ months _____ higher _____ costs, while _____ remains _____ same?

_____ there any _____ for _____ when energy _____ stays _____ same?

How do some _____ higher energy _____ our _____ the same _____ of the year?

Do some months _____ prices go up _____ consumption _____?

_____ consuming _____ amount every _____ are the energy _____ going up?

If our _____ remains _____ why do _____ see _____ costs _____?

Do some _____ energy _____ when consumption _____ constant?

_____ do some _____ higher energy _____ while _____ usage _____ same?

_____ do _____ energy _____ change even _____ use has the _____?

If _____ why do the energy _____ increase _____ certain months?

_____ energy _____ month to _____ while maintaining a consistent _____ use?

_____ months are _____ to _____ despite consistent usage.

When _____ why _____ energy costs go _____ during specific months?
 _____ prices go up _____ certain months when my consumption _____?
 _____ causes _____ energy _____ fluctuate despite consistent _____?
 Even _____ is _____ same, _____ feel _____ price increases happen during _____ months.
 _____ do _____ bills get _____ some _____?
 _____ my _____ is the _____ I feel like _____ up in certain months.
 _____ we _____ up paying a higher _____ energy _____ certain _____?
 Even though _____ the _____ I _____ like _____ price _____ in certain months.
 _____ are subject _____ higher energy costs _____ consistent usage?
 Are there _____ for higher _____ months?
 Is there _____ for higher-priced _____ when _____ the _____?
 How _____ tend to go _____?
 There is _____ consumption pattern, _____ what causes _____ energy _____ specific _____?
 _____ go up _____ certain months.
 Why _____ energy costs _____ month _____ while _____ a consistent _____ use?
 _____ do _____ go _____ certain _____ even though _____ consume the _____ amount?
 If our consumption pattern _____ constant, why _____ energy _____ in _____?
 _____ us to _____ more _____ energy _____ certain months?
 _____ higher energy costs _____ certain _____ because _____ consistent _____.
 Why _____ monthly energy prices change _____ use _____?
 Why does _____ up _____ certain times even _____ consume _____ same _____?
 _____ do some months have _____ rates _____ consistent?
 How _____ the _____ go _____ our usage is _____?
 _____ causes some _____ to cost _____?
 My _____ the _____ why do _____ up during certain _____?
 _____ there a reason _____ cost of electricity _____ during _____ the same?
 Why _____ energy _____ even though usage is _____?
 How do some _____ increase _____ energy expenses _____ our _____ stays _____ course of a year?
 _____ energy _____ times _____ year are _____ to constant consumption.
 _____ prices _____ up in certain _____ but _____ stays the _____?
 I _____ the same _____ every _____ energy rates high?
 _____ there any _____ for higher-priced _____ energy _____ steady?
 _____ there _____ for electricity _____ up _____ certain months?
 There is a steady consumption _____ but what _____ the high _____?
 _____ consumption _____ the _____ higher _____ expenses occur in some _____.
 _____ monthly energy prices change _____ regularly _____?
 _____ do _____ months come _____ higher _____?
 _____ there a _____ reason for _____ disparity _____ energy _____ steady _____ throughout _____ year?
 Are _____ reasons _____ higher _____ in _____ months?
 There is a _____ but _____ causes high _____ a particular _____.
 _____ costs go _____ during _____ periods _____ the year?
 Why do _____ prices go up _____ times when _____ still _____?
 _____ higher power bills _____ some months with _____ same usage _____?
 If _____ is _____ do energy costs change during _____?
 _____ is _____ why _____ go up during _____ months?
 I _____ energy _____ go _____ certain times of _____ year.
 _____ consumption pattern remains _____ do _____ costs _____ up in different _____?
 _____ do _____ monthly energy _____ change _____ use _____ consistent?
 Is _____ any reason _____ higher-priced _____ when _____ constant?
 If _____ pattern is constant, why _____ costs _____ up _____?

_____ our consumption _____ unchanging, why do _____ energy costs _____ specific _____?

Given _____ steady consumption _____ what _____ during certain months?

_____ go up _____ certain _____ even though I _____ the _____ amount?

_____ with the same usage for the year.

_____ rates go _____ regular usage.

I _____ know why _____ costs _____ up during _____.

Why are _____ energy costs despite consistent _____?

_____ come electricity _____ during specific times _____ year?

_____ our consumption pattern is _____ does _____ cost _____ certain months?

Is _____ a _____ for the higher-priced months _____ stays _____?

_____ is it that _____ months have _____?

_____ do _____ go up in certain _____ despite _____ being _____ same?

Is _____ reason for the _____ prices _____ usage _____ same?

_____ energy _____ go _____ usage _____ steady.

There is a steady _____ pattern but _____ high _____ certain _____?

_____ some months _____ higher _____ costs while our usage stays _____ over _____ a year?

What _____ the _____ energy costs to _____ during _____ months?

_____ explain _____ months _____ higher energy prices without demand _____?

Energy prices _____ up _____ certain months _____ consumption remains _____.

Higher _____ costs _____ during _____ while _____ stays _____ same.

_____ energy prices are higher _____ consumption _____ same.

How _____ monthly _____ up despite steady _____?

_____ is constant, _____ our _____ costs go up during different _____?

How do _____ have _____ energy _____ while _____ usage _____ the same over _____ course of _____?

Energy prices are higher _____ remains _____ same.

How _____ costs _____ up while demand stays the _____?

Electricity _____ rise during _____ while demand _____ throughout the _____.

_____ wondering _____ energy prices go _____ times _____ I consume the _____ amount.

Why do _____ us _____ energy _____?

Why _____ certain _____ higher energy prices _____ demand _____?

Increased _____ costs occur _____ some _____ while _____ stays _____.

If _____ is _____ why do energy _____ specific months?

_____ energy _____ increase despite _____ usage.

There _____ in _____ while consumption stays the same.

_____ factors _____ to increased cost of _____ while _____ stays _____ same?

_____ do we have _____ pay _____ for months?

_____ do _____ go up in _____ with _____ same usage _____ year?

Higher energy _____ occur during _____ times of _____ year _____ stays _____.

Is _____ a _____ for _____ to be higher _____ certain _____?

_____ some _____ have increased _____ prices even _____ consumption stays _____?

_____ have _____ energy prices without demand _____?

_____ energy expenses _____ while consumption stays the same?

_____ which _____ to _____ cost _____ during certain _____ while usage stays the _____?

Despite my consumption _____ feel _____ energy _____ increases occur during _____.

Monthly energy rates go _____ even though _____.

_____ do _____ up paying more _____ use _____ certain times?

_____ the _____ rates _____ up when I _____ same _____ every month?

Despite _____ use, _____ months _____ subject _____ higher _____ costs.

_____ months _____ rates when usage is consistent?

There is _____ constant _____ of _____ throughout the _____ does _____ energy prices _____?

Why _____ expenses higher _____ some seasons while consumption _____?

What causes monthly energy prices to _____ despite _____?

With _____ steady consumption pattern, what causes _____ in _____?

_____ do certain _____ have _____ energy _____ and consistent _____?

_____ for the higher electricity costs _____ months?

Is _____ months have _____ energy pricing without _____ variations?

_____ costs _____ times while demand stays constant _____ year.

_____ though _____ consumption _____ the _____ I _____ like energy price increases _____ certain _____.

Higher energy _____ can _____ certain months despite _____.

_____ get _____ why do we have high _____ bills _____?

_____ energy costs during a _____ when there is _____ steady _____?

_____ during certain times, _____ demand remains _____ throughout the _____.

_____ a _____ pattern of _____ what causes _____ costs?

_____ do energy _____ go _____ certain _____ when _____ consumption remains _____ same?

_____ is an explanation _____ monthly utility rates _____ year-long _____.

Why _____ prices _____ on a _____ basis _____ usage?

_____ which factors increase _____ cost of electricity _____ months _____ same?

_____ some _____ experience higher energy _____ while our _____ the _____?

I want to _____ the energy costs _____ up _____.

_____ come _____ energy rates _____ up when _____ the _____?

Even though _____ consumption is _____ same, _____ like energy _____ in _____ months.

_____ consumption _____ constant, why do our _____ costs go up _____?

_____ consumption _____ stays the same, _____ does _____ energy _____ during certain months?

Why do consumption stay the _____ up?

_____ you _____ why energy prices _____ month-to-month _____ though usage _____?

Certain months _____ subject to _____ costs _____ with usage.

_____ there a reason for _____ prices _____ usage _____?

Why are several _____ costs?

How _____ electricity costs rise and _____ stays _____ during _____?

How _____ go up?

_____ is _____ what causes the high energy _____ of _____ specific month?

_____ it any _____ that some months are _____ expensive _____ consumption _____ not _____?

What causes _____ go _____ specific months?

_____ don't understand why _____ are more _____ energy consumption _____ change.

_____ pattern remains _____ why _____ costs _____ up in certain months?

_____ months _____ higher _____ prices _____ to consistent consumption throughout _____.

_____ utility rates _____ year-long demand.

_____ feel like energy price increases _____ even though _____ consumption remains _____.

Why _____ stable _____ energy prices _____?

_____ energy _____ consumption is constant?

Why _____ energy _____ even when use is _____?

Despite unchanging demand _____ rates _____ certain times?

Our usage is _____ throughout the _____ up?

Why do _____ energy _____ change even _____ use _____?

Explanation _____ to _____ despite having consistently used energy?

_____ there _____ for electricity costs to _____ certain months?

_____ do power bills _____ up in some _____ use all _____?

How come electricity costs _____ up in _____ constant?

How do _____ months have higher _____ while our _____ over the _____ the year?

Even though my consumption _____ same, I _____ like _____ price increases occur _____ year.

Why the power ____ go up in ____ same ____ year?

____ our ____ is ____ why do energy ____ go ____ certain periods?

I am ____ why energy ____ go ____ at certain ____ same amount.

I wonder why ____ go up ____.

____ it weird that ____ of ____ increases during certain months ____ same?

Why does ____ up in some ____ same ____ year after year?

Why do ____ prices ____ when ____ is ____?

____ bills ____ up in ____ with ____ same usage.

What is ____ reason for higher ____ certain ____?

____ causes ____ costs when consumption ____?

____ monthly ____ prices fluctuate even ____ use ____ consistent?

If our consumption ____ is constant, ____ do ____ up ____ specific ____?

____ change despite a constant level of ____?

When ____ the ____ month the ____ rates go ____ why?

I feel ____ energy prices go up ____ the same.

Why does ____ costs ____ certain ____?

____ been ____ utility rates ____ year long demand.

____ consumption ____ cause higher ____ costs ____ times of ____.

Why is ____ costs ____ certain ____?

____ bills ____ certain ____ the same usage all ____ why?

____ there ____ the difference in ____ pricing ____ despite steady consumption?

____ maintain our ____ pattern, why do ____ costs go ____ certain ____?

Why do ____ months ____ energy pricing ____ demand ____?

Some ____ have ____ energy ____ of a ____ consumption.

____ possible for electricity costs ____ while ____ stays the same?

____ consumption pattern, ____ causes ____ energy ____ during the specific ____?

____ do ____ prices ____ continuously using energy?

____ causes ____ energy costs ____ certain ____?

Why do ____ go up at ____ when I ____ consuming ____?

How ____ some ____ have increased ____ expenses, ____ stays the same ____ of a year?

____ it ____ that some months are ____ my ____ consumption isn't ____?

Some ____ subject ____ energy ____ despite ____ consistently used.

____ experience increased energy ____ our usage ____ the same?

There ____ increased monthly ____ rates despite ____ demand.

Is it ____ the ____ of ____ increases during ____ while ____ remains the ____?

____ are we ____ each ____ when usage ____ stable?

I feel ____ price increases ____ despite my consumption ____ same.

Why do ____ at certain ____ even ____ I ____ changed ____ consumption?

Is ____ reason ____ high ____ costs despite ____ usage?

How ____ some months ____ increase in ____ while ____ usage stays ____?

How ____ go up despite usage?

Explanation ____ increased ____ consistent year long demand.

Higher ____ at certain ____ of year are ____ to ____ continuous ____.

____ do ____ months have ____ without demand ____ throughout ____ year?

____ my ____ changed one bit, what ____ of ____ causes some ____ to ____ expensive?

____ do ____ costs ____ up in ____ months ____ stays the ____?

____ there ____ reason why ____ subject ____ higher energy costs?

Even though ____ is ____ same I feel like ____ energy ____ certain ____.

Is ____ any ____ when energy ____ stays steady?

Energy prices ____ in some months ____ consumption ____.

How ____ monthly energy ____ despite ____ level of ____?

How do the months change with ____ energy expenses ____?

____ our consumption ____ then why do ____ energy costs ____ up during ____?

Why ____ we ____ costs go ____ specific months?

Some ____ prices even when consumption stays ____.

____ power bills ____ up in ____?

____ do ____ months ____ more energy expenses while ____ usage ____ the same over ____ a ____?

Why ____ go up at ____ times when ____ same amount of ____

Are there reasons ____ costs ____ certain months?

____ is constant ____ year, how come bills ____?

____ energy costs rise ____ months?

____ months have ____ rates despite a ____.

____ consumption ____ steady but what ____ energy costs during a ____?

____ do some ____ expenses ____ usage ____ the same ____ the course of a year?

____ causes ____ energy ____ use ____ consistent?

Why power bills go ____ certain months ____ the ____?

____ pattern ____ to ____ energy costs ____ times of year.

During ____ of ____ energy ____ related ____ continuous consumption patterns.

Why ____ pay ____ energy ____ in certain months?

Higher energy costs ____ times of ____ year are ____.

Electricity costs ____ certain ____ but ____ throughout the year.

Monthly ____ increase ____ usage ____ steady.

____ prices go up ____ certain times ____ though ____ consume ____ amount?

Do you have ____ why ____ go up ____ to ____?

Even ____ is ____ same, I feel ____ prices go up ____ certain ____.

Why ____ electricity ____ up during ____ times while ____ stays the same ____?

____ there a reason ____ prices when energy usage ____?

____ months have ____ energy prices ____ consumption ____ constant?

Why ____ energy ____ go ____ at certain ____ consuming the ____?

What ____ the reason ____ energy ____ to ____ up ____ months?

There ____ a consistent ____ but what ____ high ____ costs?

____ consumption pattern but what ____ energy costs ____ a ____ month?

____ pattern ____ why ____ the energy costs go ____ during ____ months?

Given a ____ pattern on ____ part, ____ higher energy ____ months?

Higher ____ costs ____ times of year ____ related ____ continuous ____ pattern.

____ come electricity costs rise ____ certain periods ____ demand ____ year?

Why do monthly ____ prices ____ usage ____ the ____?

____ have expensive ____ rates despite ____.

There's ____ steady consumption pattern ____ what ____ high energy costs ____ specific ____?

____ a ____ consumption pattern but ____ causes ____ energy ____ in ____ month?

Is there ____ months when ____ isn't changing?

Why do monthly energy ____ you have ____ used ____?

____ like energy ____ certain months ____ though my ____ remains the ____.

____ we end ____ more ____ energy at certain ____?

Why ____ a ____ stick ____ with high ____ bills?

____ consumption ____ still the same, ____ feel ____ energy prices ____ in ____ months.

I feel ____ increases happen ____ even though my consumption remains ____.

____ do we end ____ paying more ____ energy ____ we ____ a ____ of ____?

I wonder why specific ____ energy ____ demand ____.

Explanation for ____ utility rates ____ consistent ____

Do ____ months have ____ energy ____ ____ ____ remains constant?

Why ____ energy ____ change even ____ use ____ consistent?

Why do ____ costs ____ to ____ up during ____?

Is ____ any ____ that some ____ are ____ expensive when my ____ ____ ____?

____ rates increase despite use?

Electricity costs go up ____ periods ____ demand stays ____ ____ ____ year.

____ energy expenses ____ some seasons ____ consumption ____ the ____.

Which ____ cost ____ electricity ____ months while usage remains the ____?

How ____ change despite a ____ level ____ consumption?

____ don't understand why ____ up ____ certain months ____ my consumption ____ same.

____ costs can ____ some ____ consumption stays the same.

Why ____ energy ____ go ____ in ____ months?

____ does energy prices increase ____?

____ some months ____ us with ____ energy bills?

____ reason ____ of electricity ____ in certain months while usage stays ____?

____ don't ____ why energy ____ up ____ specific months.

Why does power bills go ____ with ____ same ____ all ____?

____ some ____ an increase ____ energy ____ our usage remains the ____?

Higher ____ times of the year are ____ to ____ consumption ____.

Is there any reason ____ costs to go ____?

Electricity costs ____ certain ____ demand stays ____ the year.

If ____ pattern ____ why ____ energy costs ____ up during ____?

Monthly energy rates ____ usage is ____.

Is ____ a ____ the cost ____ electricity ____ in ____ months ____ usage stays the ____?

If ____ consumption ____ constant, why ____ the ____ increase during ____ months?

____ do ____ costs go up ____ certain months?

How come energy prices go up in ____ same?

____ is ____ consumption pattern, ____ causes high energy ____ a ____ month?

Despite ____ being the ____ I feel like energy ____ increase ____.

How ____ monthly ____ rates ____ despite using the ____ energy?

____ a ____ the ____ energy prices every month, ____ with steady consumption?

What causes ____ costs ____ go ____ certain ____?

How ____ during ____ times of year?

Despite ____ consumption ____ I feel ____ increases ____ during certain months.

What ____ the reason ____ costs ____ up ____ certain months?

____ certain ____ prices ____ but consumption stays the ____.

Higher power ____ some ____ the same usage ____ the ____.

Is ____ why cost of ____ increases ____ months while usage stays ____?

What causes increased ____ of ____ months ____ the same?

Is ____ reason for higher-priced months when ____?

____ a steady consumption ____ part, ____ causes higher ____ during specific ____?

Why does ____ months ____ higher energy ____ demand ____?

I wonder ____ have higher energy ____ demand ____.

____ causes high ____ costs during ____ specific ____ there ____ steady consumption ____?

Is it ____ wonder ____ the ____ of electricity increases ____ usage stays ____?

How ____ months have increased ____ our ____ the same?

____ do ____ energy ____ change even though the ____ the ____?

____ bills ____ up ____ some months with ____ all year.

____ the ____ of ____ up during certain ____ of the ____?

There ____ higher-priced ____ energy usage ____ the ____.

____ feel ____ price ____ in certain ____ despite my ____ the same.
 ____ constant level ____ consumption ____ the year, ____ the monthly energy ____ fluctuate?
 Why can ____ from month to ____ while ____ amount of ____?
 ____ though ____ the same, ____ like energy prices ____ up ____ certain ____ of year.
 Why ____ monthly ____ vary despite ____ same amount?
 ____ a steady consumption ____ what is ____ costs during certain ____?
 How come ____ have ____ energy prices without ____?
 ____ energy rates ____ up despite steady ____.
 Higher energy expenses happen ____ certain seasons ____.
 Why ____ you ____ energy pricing in certain months ____?
 If ____ pattern is constant, ____ do ____ costs ____ up during ____.
 Higher ____ occur ____ some months while ____ the ____.
 ____ like energy ____ up in ____ months ____ my consumption ____ the same.
 Why ____ energy prices go ____ certain ____ though I ____ my consumption?
 Even ____ my consumption ____ the ____ feel ____ prices tend ____ in certain ____.
 ____ certain months energy ____ consumption stays the ____
 Why do specific ____ have ____ energy ____ when ____ demand ____ the year?
 ____ energy ____ using the same amount ____ energy every month?
 Why ____ monthly ____ despite ____ using energy?
 ____ higher ____ costs occur ____ stays the same.
 Higher ____ costs ____ times ____ are related ____ consumption patterns.
 ____ though ____ consumption ____ same energy ____ in certain months.
 ____ a ____ consumption pattern but ____ causes ____ energy ____ in a ____?
 ____ feel ____ prices ____ in certain months even though my ____ the ____.
 ____ wonder ____ certain ____ pricing without demand variations?
 Why are ____ expensive ____ certain ____?
 ____ is a steady ____ but ____ is ____ cause ____ high ____ during a ____ month?
 Continuous ____ pattern causes ____ energy ____ during certain ____ year.
 Why ____ have higher energy ____?
 ____ have a consumption ____ why do ____ go up ____ months?
 ____ energy expenses higher in some seasons ____?
 If our consumption ____ is ____ energy ____ increase during ____?
 ____ there a ____ higher ____ when ____ remains the same?
 ____ prices ____ go up ____ certain ____ but ____ the same.
 ____ consumption is the ____ I ____ that energy price increases ____ months.
 ____ a steady consumption pattern but ____ high ____?
 ____ my consumption still being ____ like energy ____ certain months.
 If our consumption ____ is constant, ____ do ____ costs ____ up ____?
 ____ - why do some ____ stick us ____ bills?
 I ____ the same ____ every month, ____ energy rates going ____?
 Monthly ____ of ____ despite ____ power demands, ____?
 ____ do ____ bills ____ up ____ months with the ____ usage all ____?
 Why is consumption still ____?
 ____ months have ____ energy ____ and consistent consumption?
 ____ you ____ months ____ high energy rates?
 Why do ____ end ____ more ____ at ____ times?
 ____ is a ____ consumption ____ causes ____ energy costs?
 Higher energy ____ the ____ are related ____ a continuous ____ pattern.
 ____ do some ____ have higher ____ expenses, ____ usage remains ____?
 Have ____ ever wondered ____ certain ____ higher ____ prices without ____?

How do ____ months have higher energy expenses ____ ____ ____ ____ ____ ?

____ do ____ costs vary from ____ to month while ____ ____ ____ level ____ ____ ?

____ electricity ____ increase ____ certain times ____ ____ remains constant?

Why ____ energy ____ go ____ ____ certain ____ when I use ____ ____ quantity?

____ do energy ____ change ____ ____ being ____ ?

____ months ____ ____ ____ when my energy consumption hasn't ____ what ____ ____ magic?

Is there ____ reason ____ the ____ ____ electricity ____ ____ ____ certain months while usage stays ____ ____ ?

Energy ____ ____ in some ____ while ____ stays the ____ .

What causes ____ energy ____ ____ ____ despite ____ same usage?

____ energy ____ ____ the ____ are ____ any ____ for higher-priced months?

____ it any ____ ____ ____ months ____ more ____ when my energy consumption ____ ____ same?

____ consuming ____ same amount ____ month, ____ is the ____ ____ high?

Our usage doesn't ____ monthly, ____ ____ ____ costs ____ sometimes?

____ ____ ____ ____ certain periods while demand remains constant ____ ____ year.

Some ____ have higher energy ____ ____ ____ as consistent ____ .

____ I'm ____ ____ ____ same ____ ____ ____ why do the energy ____ increase?

____ do energy prices ____ ____ ____ ____ times of the ____ ?

____ ____ have ____ power ____ with ____ same usage ____ year.

Why ____ specific months ____ ____ energy ____ with ____ demand variations throughout ____ ____ ?

If the ____ ____ ____ ____ constant, ____ do energy ____ go up in ____ ____ ?

Why ____ the months ____ us with ____ ____ ____ ?

____ do ____ ____ get higher energy prices ____ demand ____ ?

Why ____ ____ prices ____ ____ during certain times ____ I ____ ____ my consumption?

____ ____ ____ steady consumption pattern, but what causes ____ energy ____ ____ ____ ____ month?

Why ____ you see higher ____ ____ ____ ____ seasons while consumption ____ ____ same?

Why does monthly ____ prices ____ even ____ ____ is ____ ?

____ ____ ____ energy rates ____ up ____ use?

____ is ____ steady ____ pattern but ____ ____ the ____ energy ____ ____ a specific month?

____ are ____ ____ when ____ ____ remains steady.

____ I'm ____ ____ ____ same amount each ____ why ____ the ____ rates going ____ ?

How ____ monthly energy ____ ____ ____ despite usage ____ steady?

____ do consumption ____ steady ____ ____ energy ____ change?

____ ____ ____ consumption is ____ the same, ____ ____ ____ energy prices go ____ at ____ times ____ the year.

Why do energy ____ ____ ____ ____ to ____ despite consistent ____ ?

Energy ____ go up in ____ ____ ____ ____ ____ the same.

____ come ____ ____ ____ ____ up during certain times of ____ year while ____ ____ ____ ____ same ____ the year?

Even ____ ____ ____ keep ____ consumption ____ ____ ____ prices go up ____ certain months.

There's higher power bills ____ ____ ____ ____ the ____ usage.

Given our ____ ____ ____ why ____ ____ ____ go up in ____ months?

If ____ ____ ____ ____ ____ constant, why ____ ____ ____ costs ____ up in specific months?

____ ____ ____ ____ constant throughout the ____ how ____ bills ____ up?

How do ____ go ____ ____ ____ ____ ____ constant?

Power bills go ____ ____ ____ some ____ because ____ the ____ ____ ____ all ____ .

Higher ____ ____ ____ ____ occur ____ ____ ____ ____ certain seasons ____ ____ ____ stays the same.

In ____ seasons, ____ expenses go ____ while ____ ____ ____ the ____ .

____ ____ ____ ____ ____ costs go up ____ certain months?

Why ____ energy costs go ____ ____ ____ ____ ____ ?

____ ____ ____ ____ a ____ ____ ____ why ____ prices ____ up month after month?

____ is ____ energy costs ____ certain ____ despite consistent ____ .

_____ some _____ sticking _____ with high _____ bills?
 _____ bills _____ up _____ certain _____ with the same use _____ year?
 Energy _____ certain months, but _____ stays the _____.
 _____ energy prices fluctuate, _____ use being _____?
 Why do _____ change even _____ use _____?
 _____ increase the _____ of _____ in certain _____ while usage _____ the _____?
 _____ wonder why energy _____ go up _____ I _____ same amount.
 I _____ like _____ know _____ energy costs vary from _____ maintaining _____ levels _____ use.
 How _____ months _____ an increase in energy costs _____ same?
 Why does _____ vary _____ usage?
 _____ possible for electricity costs to _____ during _____ stays the same?
 There _____ expensive energy _____ some _____ consistent usage.
 How come _____ costs _____ when _____ throughout the year?
 Which factors lead _____ an _____ in _____ costs _____ usage _____ the same?
 Why _____ months _____ energy pricing _____ the year?
 _____ reason for higher energy _____ because of _____ consumption.
 Why _____ costs go _____ in certain _____?
 How can energy _____ vary _____?
 Why is there expensive _____?
 Higher _____ times of year _____ continuous consumption patterns
 Why _____ consumption stay the same _____ expenses _____ some _____?
 Why _____ energy _____ vary from _____ while _____ a consistent _____ of _____?
 _____ do _____ costs _____ during certain _____ demand _____ throughout the year?
 What _____ some months _____ have _____?
 Why do energy prices _____ at _____ times _____?
 _____ throughout _____ is there _____ for _____ disparity in energy pricing every _____?
 Why _____ costs vary _____ to _____ while maintaining _____ same amount _____?
 Why _____ we _____ high energy _____ months?
 Why is _____ costs changed _____?
 We use the _____ year, how come _____ go _____?
 _____ certain _____ prices _____ up while _____ stays the _____.
 Why is energy _____ seasons and _____ same _____ others?
 Why _____ monthly _____ despite _____ being consistent?
 _____ our consumption _____ is _____ why _____ costs increase _____ specific _____?
 How come _____ costs rise _____ certain _____ constant?
 Why do _____ prices _____ though _____ consistent?
 There is a steady consumption pattern _____ but what _____ during a _____?
 Energy expenses _____ in _____ while consumption _____ the _____.
 Do some _____ energy _____ when _____ the same?
 Higher _____ in _____ months with _____ use _____ year.
 Is _____ a specific reason _____ difference in _____ even with _____ consumption?
 _____ there _____ reason for higher _____ when energy _____?
 Is there _____ reason _____ energy _____ is stable?
 In _____ months, energy prices _____ higher, _____ consumption _____.
 Have _____ certain months _____ higher _____ prices without _____ variations?
 _____ is it _____ we're _____ more _____ month _____ the same?
 Do some months experience _____ in _____ consumption _____ constant?
 Why _____ energy prices _____ up _____ times _____ I consume _____ amount?
 Despite _____ constant _____ throughout the year, monthly _____ prices _____.
 How come electricity costs _____ of _____ year?

_____ expensive energy _____ some months?

Energy prices go _____ in certain _____ being the _____.

_____ energy _____ vary from month _____ month, _____ maintaining a _____ of _____?

_____ do we _____ an increase _____ our usage stays the same?

_____ do _____ energy rates _____ usage?

If our _____ pattern _____ constant then _____ energy _____ go up _____?

_____ come energy _____ month _____ while maintaining _____ consistent use?

There _____ a constant level _____ consumption throughout _____ causes _____ in monthly energy _____?

_____ some _____ experience increased _____ even _____ stays constant?

Is _____ the cost of electricity increases during certain _____ the _____?

Why _____ paying _____ month _____ our usage _____ steady?

_____ do energy prices _____ up _____ certain times _____ have _____ my consumption?

What is _____ reason for _____ pricing _____ the same _____ levels?

_____ my _____ I feel _____ energy _____ increases take place in certain _____.

Why do energy _____ in _____ months _____ consumption _____ the _____?

_____ to _____ month to month while maintaining consistent _____?

_____ there a reason for _____ when energy _____ same?

There is _____ increased _____ utility rates _____ consistent _____.

Do some seasons register _____ tariffs even _____?

_____ the _____ but I feel _____ energy _____ occur in certain _____.

_____ is _____ steady _____ pattern, but _____ causes high energy _____ a _____.

Higher energy costs _____ certain _____ the _____ are _____ continuous _____ pattern.

_____ months _____ more _____ costs while usage remains _____ same?

Given a _____ higher energy _____ in specific months?

How do monthly _____ go up _____ steady _____?

_____ are subject to higher energy _____ despite _____ being _____.

If _____ consumption _____ do energy _____ increase during specific _____?

Why _____ certain months _____ higher _____ prices _____ demand _____?

How _____ months have more _____ costs while our _____ the _____ course _____ the year?

_____ come _____ end _____ more for _____ certain times?

_____ higher-priced months when _____ usage remains the same.

_____ monthly _____ prices change _____ consistent _____?

Higher _____ costs during times of _____ are _____ consumption _____.

_____ is a constant _____ consumption throughout the year so _____ causes _____ prices _____?

Given the steady consumption _____ causes higher energy _____?

_____ energy prices in certain months?

_____ pattern is constant, why _____ our _____ rise during specific _____?

_____ do _____ despite consistent usage?

_____ costs happen in _____ seasons while _____ stays _____.

_____ energy _____ when used consistently?

How come _____ rates _____ even though _____ the _____?

I _____ that energy price _____ occur _____ though _____ is still _____ same.

_____ do the _____ go up when _____ the same amount _____?

Is there a _____ reason _____ the difference _____ energy _____ every month _____?

_____ do energy _____ rise _____ specific _____?

Continuous _____ pattern _____ to higher _____ during _____ of _____ year.

Why _____ energy _____ go _____ certain _____?

How _____ go up even _____ use stays _____ same?

_____ consumption _____ stays constant, _____ does our _____ costs _____ specific months?

So _____ certain months subject _____ energy _____?

_____ come _____ during certain times while demand remains _____?

_____ do _____ go _____ and consumption stay the _____?

How _____ months have increased _____ while _____ usage stays the same _____ of _____ year?

How _____ energy expenses _____ in _____ stays the same?

_____ monthly energy _____ fluctuate despite _____ constant _____ use?

Why do monthly energy _____ change, _____ consistent?

There _____ a _____ what causes high _____ costs for _____ month?

_____ our consumption _____ do our energy _____ up _____ months?

_____ is _____ pattern _____ what causes high energy _____ in _____ particular month?

Why does _____ prices go _____ times _____ I _____ not changed _____?

Is _____ possible _____ some _____ experience _____ energy prices _____ consumption remains _____?

_____ energy expenses _____ in some seasons, _____ same.

Why _____ we _____ paying _____ for _____ at certain _____ if _____ follow a pattern _____?

_____ consumption pattern remains _____ why _____ go up _____ months?

Some months are subject _____ higher _____ costs _____

How come electricity _____ rise during _____ demand _____ the same _____?

_____ months _____ higher _____ prices _____ consistent _____ why?

Even though _____ like energy prices increase during _____ of the year.

_____ do _____ up in the _____ months?

Why are _____ high _____ with the _____ usage _____ year?

_____ do energy _____ go up in _____ months?

Some _____ expensive energy rates despite _____ in _____.

_____ it possible that _____ months _____ increased _____ our _____ remains _____ same?

_____ wonder _____ certain _____ higher _____ pricing without demand _____.

Why do energy _____ even _____ is _____?

_____ certain _____ demand stays the same _____ the year.

_____ does energy _____ go up _____ a _____?

_____ paying more _____ when we follow _____ pattern of consuming?

How _____ high energy costs _____ consistent _____?

Our _____ change monthly _____ is energy _____ raised _____?

Even though _____ consumption stays the same, _____ go _____ certain months.

_____ go up at certain _____ when _____ same amount of energy?

_____ does high _____ costs differ _____ usage?

_____ increased _____ utility rates despite consistent demand.

_____ do monthly energy _____ usage _____ the same?

Despite consistent _____ there are _____ that _____ rates.

_____ remains _____ throughout _____ year _____ costs rise _____ certain times.

Why do certain months have _____ energy _____?

_____ do some _____ stick _____ with _____ energy _____?

Higher power _____ in _____ same usage.

There _____ steady pattern _____ consumption but _____ energy _____ a specific month?

_____ certain months have higher _____ demand variations _____ the year?

Why do _____ energy prices _____ when _____ consistent?

_____ is _____ consumption _____ causes high _____ when there is a specific _____?

How _____ go up during specific _____?

_____ energy expenses go _____ in _____ while consumption _____ same?

_____ pattern is constant, _____ do our _____ costs increase _____ specific _____?

Even though _____ remains the _____ my _____ up _____ certain months.

_____ our consumption _____ is constant _____ energy costs go _____ specific months?

_____ monthly _____ change _____ being used up?

If our _____ doesn't change, _____ energy _____ go _____ during specific _____?

How _____ some _____ energy expenses _____ our usage _____ the _____?

_____ bills in some _____ usage all year.

If _____ consumption pattern _____ why _____ go _____ during _____ months?

Some _____ have higher _____ due to _____ consumption.

If our _____ pattern _____ constant, _____ do _____ see energy costs _____ certain _____?

Why _____ prices go _____ at certain times even _____ am not _____?

_____ is a _____ pattern _____ what _____ cause of _____ energy costs?

Explanation for _____ monthly _____ rates _____ demand.

_____ months have increased energy expenses while _____ usage stays _____ same over _____ course _____?

The cost _____ go up _____ usage stays the same.

_____ that energy _____ go up in certain _____ my consumption _____?

_____ prices change despite having used _____?

_____ it _____ my _____ remains _____ that energy prices _____ up _____ months?

_____ energy expenses occur in _____ seasons, _____ stays _____.

How do _____ energy _____ while _____ usage _____ the same?

_____ do you _____ expensive energy _____ months?

Increasing _____ occur in _____ seasons _____ stays _____ same.

Is _____ cost of electricity increases _____ certain months _____ usage _____?

_____ prices go _____ at _____ times when I use _____ of energy?

Why do _____ up despite _____ same amount _____ energy?

_____ our consumption _____ stays _____ why does the _____ go _____ specific _____?

Why _____ the _____ prices _____ a constant _____ of consumption?

I _____ like energy price _____ occur in _____ even _____ consumption _____ same.

_____ our _____ is _____ why does our _____ in certain months?

The cost _____ electricity _____ certain months, _____ usage _____ the _____?

How come electricity _____ in certain _____ while demand _____ throughout _____?

How _____ monthly _____ go up _____ after steady _____?

_____ though my _____ the same, I _____ like _____ costs go _____ months.

If _____ pattern is _____ why do our _____ costs _____ certain _____?

Is _____ higher-priced months _____ energy use remains _____?

Why do certain _____ pricing without demand _____?

Why _____ have higher energy costs despite _____?

There is _____ consumption _____ what causes high _____ during _____ months?

_____ get high energy _____ certain months?

Wondering _____ lead to _____ of electricity during _____ while _____ remains _____ same?

_____ do _____ months have higher _____ expenses, _____ our _____ the _____?

_____ does _____ energy expenses occur _____ while _____ stays _____ same?

Why _____ energy _____ go up at certain _____ when _____ amount?

Is _____ for _____ months _____ more _____ when my energy consumption _____?

_____ energy expenses occur in _____ consumption _____ the _____

Do _____ know _____ prices _____ month-to-month _____ usage is the _____?

_____ are _____ months subject to _____ energy costs _____ being _____?

_____ our _____ stays constant, why _____ energy _____ go up _____ specific _____?

What _____ a _____ cost _____ months?

Why do energy prices _____ up during _____ consumption _____ the _____?

The _____ electricity can increase during _____ but _____ remains _____.

Energy _____ in _____ months _____ consumption stays _____ same.

While demand is constant _____ costs _____ during certain _____.

Even _____ my consumption _____ I feel _____ price _____ occur _____ certain _____.

If our consumption _____ remains _____ do _____ rise during _____?
 _____ remains constant, _____ why do _____ go _____ during specific months?
 Why do _____ energy prices with no demand _____ the _____?
 _____ causes some months _____ have _____?
 What causes monthly _____ prices _____ unchanged _____?
