

[Demo] NLP Dataset for Customer Service Automation

Company Type	Internet Service Providers
Inquiry Category	Data usage and bandwidth queries
Inquiry Sub-Category	Network congestion issues
Description	Customers may encounter slow internet speeds or decreased performance during peak hours or in densely populated areas. They reach out to their ISPs for solutions to mitigate network congestion, improve speeds, and address any service disruptions caused by high demand.
Data Size	9,673 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Internet Service Provider" customer inquiry. (Purchased data will not be masked.)

_____ overcome decreased performance issues _____ when _____ users access _____ same _____ simultaneously?
_____ many _____ connect to the internet at _____ what _____ suggestions for _____ diminished performance?
