

[Demo] NLP Dataset for Customer Service Automation

Company Type	Internet Service Providers
Inquiry Category	New service inquiries and sign-ups
Inquiry Sub-Category	Equipment and installation
Description	Customers have questions regarding the equipment needed for internet service, such as modems, routers, and installation procedures. This category also covers inquiries about self-installation options and technician visits.
Data Size	5,041 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Internet Service Provider" customer inquiry. (Purchased data will not be masked.)

What alternatives exist besides DSL _____ when _____ to _____ limitations _____ other factors?

What _____ other options _____ the _____ falls _____ due _____ and more?

Is there _____ viable options _____ where the _____ infrastructure _____ of distance _____ and other _____?

_____ any _____ areas where _____ current infrastructure is not _____ to distance constraints _____ other _____?

When _____ due to distance, _____ connections are _____?

When _____ with limited _____ because _____ limitations, what _____ can _____ instead of relying on _____ DSL _____?

_____ inadequate _____ of _____ and similar _____ what other options are _____?

_____ the _____ falls _____ due to distance limitations or _____ what _____ options _____?

_____ inadequate due to distance, _____ else can _____?

_____ is inadequate _____ to _____ and other issues, _____ alternatives _____?

_____ existing _____ hampered by distance _____ are _____ other _____ besides _____?

_____ can't _____ cable _____ of distance, are there other options?

What choices are _____ setup is inadequate _____ of _____ and _____?

_____ the _____ falls short _____ to distance _____ any other options _____?

What options _____ available _____ the current _____ due to _____ limits _____ other _____?

_____ prevent utilization _____ existing system, _____ be alternatives?

_____ what _____ are out _____ when regular _____ isn't good due _____ distance?

_____ the _____ does not suffice _____ to _____ geographical _____ other _____ are there?

_____ any _____ options besides _____ DSL _____ limited infrastructure?

When _____ any _____ choices besides cable or _____?

_____ are viable _____ than using traditional _____ methods if _____ affect the _____ of _____ infrastructural _____.

When it's _____ any other _____ cable _____ DSL?

_____ there _____ other available _____ infrastructure is not _____ due _____?

_____ current infrastructure _____ due _____ and other factors, so _____ options _____?

When _____ and _____ existing infrastructure, should there be _____?

When _____ is inadequate _____ to _____ other options _____?

_____ the _____ infrastructure _____ due to distance _____ what options _____?

When _____ DSL _____ viable due _____ options are there?

Is ____ any ____ option ____ of ____ or cable ____ limited ____?

____ infrastructure ____ due to ____ limitations and more, what ____ available?

____ infrastructure is ____ due to ____ other connections ____ you ____?

What other ____ there ____ infrastructures caused ____ distance ____?

____ a ____ suffice due ____ issues ____ geographical ____ other options ____ there?

If the current ____ doesn't cover ____ needs ____ of ____ could you ____ other ____?

____ choices are there ____ caused ____ distance limits?

When distance ____ difficult ____ use ____ DSL, what options ____ available?

____ option ____ of DSL or ____ for limited ____?

____ impede ____ of cable or DSL, ____ are there?

____ existing ____ insufficient ____ to distance, ____ are there?

____ is not ____ due to distance, ____ there?

____ you have any ____ instead ____ DSL ____ cable ____ infrastructure?

Is ____ available connections when ____ is not ____ to ____?

When ____ falls ____ due ____ distance ____ other ____ cable or DSL?

When ____ of ____ and similar ____ what alternatives ____ there?

When ____ enough due ____ distance, can any ____ connections ____?

____ there any other option for ____ with ____ due ____?

____ need some ____ when the current ____ meet our ____ factors ____ distance limitation.

If ____ are ____ insufficient ____ what ____ be used?

____ have ____ other options ____ the infrastructure ____ due ____ distance limitations?

What ____ are ____ if ____ infrastructure is ____ to distance and ____?

____ alternative internet ____ areas with insufficient infrastructure ____ distances?

Is there ____ from cable ____ distance ____ a ____?

____ inadequate because ____ what alternatives are there?

When distance problems ____ other ____ interfere with ____ infrastructure, ____?

____ is a constraint on existing ____ what ____ be ____?

____ alternative for ____ infrastructure, given distance ____ limits?

____ can be found in ____ where the ____ due ____ distance limits?

When ____ constraints ____ other factors affect the use ____ DSL, what ____?

____ it's too ____ any ____ beside ____ cable or ____?

If ____ infrastructure ____ insufficient ____ to ____ any other ____?

____ cable or ____ don't work because ____ options ____ available?

____ distance is ____ the existing infrastructure, ____ be ____ other methods?

Do we ____ any ____ overcome the limitations ____ by ____ in ____ of infrastructure ____?

____ any alternatives that ____ posed ____ limited distances in ____ of ____ infrastructure availability?

What alternatives can ____ is limited ____ distance?

____ there ____ option for ____ infrastructure, given ____ and ____?

When distance ____ constraint ____ infrastructure, what ____ ways can ____?

When infrastructure isn't ____ which other ____ are ____?

If the ____ can't accommodate either ____ because of distance limitation, ____?

____ there ____ alternatives ____ or DSL systems ____ can ____ the ____ posed by ____?

____ the setup ____ adequate ____ and similar ____ what alternatives ____ there?

If existing setup is inadequate ____ other choices ____?

____ other ____ exist ____ the inadequate infrastructure ____ by ____?

____ challenges prevent ____ utilization ____ the existing system, ____ there ____?

____ there ____ option apart ____ cable ____ distance challenges ____ utilization ____ the ____?

____ is not adequate ____ to ____ and similar ____ what ____ options?

____ the ____ setup doesn't cover ____ factors ____ distance ____ could you ____ some different options?

____ alternatives ____ you consider ____ distances ____ DSL ____ cable from ____?

____ distance ____ on the infrastructure, what possibilities ____ there ____ using ____ ?
 ____ the ____ is ____ to ____ and similar ____ what other ____ exist?
 When ____ a ____ for ____ infrastructure, what ____ found beyond ____ methods?
 ____ the setup ____ not ____ due ____ and similar barriers, ____ are ____ ?
 ____ viable ____ if proximity restrictions ____ adequacy of existing ____ provisions?
 When the ____ infrastructure falls ____ distance limitations, any other ____ than ____ ?
 When ____ problems or ____ infrastructure, ____ there other options?
 ____ the infrastructure ____ inadequate ____ distance ____ what are ____ other options?
 When infrastructure ____ not enough due ____ distance and ____ ?
 Do we ____ a substitute for ____ cable ____ that ____ restrictions posed by ____ ?
 When ____ unable ____ support ____ service ____ to distance limitations, are ____ options?
 Is ____ a ____ beside ____ or ____ when ____ too ____ ?
 ____ there any other ____ than cable for areas ____ the ____ due ____ distance?
 What other options are there ____ the ____ isn't ____ like geographical ____ ?
 If the infrastructure can't accommodate either ____ due ____ limitation, ____ you ____ ?
 When ____ inadequate because of ____ and ____ what ____ the other ____ ?
 ____ cable ____ DSL can't ____ due ____ are ____ other options?
 If ____ accommodate ____ cable ____ distance limitation ____ you suggest alternate solutions?
 ____ infrastructure falls short due ____ distance limitations ____ other ____ there?
 ____ isn't adequate ____ limitations in proximity, ____ alternatives ____ the ____ means ____ cable and DSL?
 ____ there ____ options ____ DSL or ____ can't ____ due ____ distance?
 ____ have a substitute for cable ____ that can ____ imposed by ____ distances?
 ____ existing infrastructure ____ adequate due to limitations ____ proximity, ____ alternatives ____ means of ____ cable?
 ____ option ____ infrastructure is insufficient due to distance?
 When ____ problems ____ other ____ affect ____ existing ____ other options?
 Can you suggest ____ is ____ due ____ or ____ issues?
 ____ it's too ____ any ____ or cable?
 What ____ there for ____ by distance constraints?
 ____ setup is ____ due to ____ and similar ____ available?
 What ____ options ____ be found when ____ is insufficient ____ and other factors?
 ____ isn't enough ____ distance ____ there are any ____ alternatives?
 When ____ problems ____ factors are ____ the ____ there other ____ ?
 ____ there ____ substitute ____ or cable systems that ____ overcome ____ posed ____ distances?
 ____ choices do ____ for ____ infrastructure caused ____ distance limits?
 When ____ system isn't enough ____ like geographical distances, ____ are ____ ?
 ____ distance ____ and other ____ infrastructure, are ____ other ____ besides ____ ?
 ____ for ____ that is inadequate due ____ distance limits?
 What ____ exist ____ not enough due ____ distance limits ____ other factors?
 ____ you know ____ are other ____ with insufficient ____ to ____ and other limitations?
 ____ an alternative internet solution ____ locations with ____ alongside ____ long ____ ?
 ____ the infrastructure can't accommodate ____ DSL ____ cable because ____ distance ____ solutions?
 If ____ distance ____ existing ____ alternatives can ____ consider?
 ____ any other option ____ cable or ____ it's too ____ ?
 ____ cable ____ because ____ distance, there are any ____ alternatives?
 If ____ is ____ to distance and ____ alternatives exist?
 When existing ____ is incapable due ____ limitations, ____ available instead ____ DSL ____ cable?
 ____ inadequate because of ____ what ____ are there?
 For cases ____ isn't enough ____ constraints, is there any ____ besides DSL ____ cable?
 ____ there ____ viable options ____ the current ____ adequate ____ of ____ constraints and other factors?
 ____ there an ____ available for ____ insufficient infrastructure and long ____ ?

When cable or DSL _____ of distance limitations, _____?

_____ infrastructure is insufficient due to _____ other connections _____?

_____ is a constraint _____ existing _____ possibilities can _____ found?

When _____ inadequate _____ and _____ issues, what alternative _____ there?

If existing _____ is not _____ distance and _____ barriers, _____ exist?

_____ with _____ what _____ can be considered _____ of _____ on _____ cable or DSL?

In cases where existing _____ can't support _____ are _____ alternatives?

When _____ inadequate _____ to _____ are alternatives?

What _____ are present _____ DSL _____ options _____ due to proximity _____?

_____ because of _____ what choices are there?

Is _____ substitute _____ insufficient infrastructure, given _____ and _____?

If _____ is inadequate _____ to _____ what choices _____?

What _____ alternatives _____ distance _____ availability?

_____ the current infrastructure is insufficient _____ distance _____ available?

When _____ present _____ not _____ due _____ issues like _____ what possibilities are _____?

Does _____ know if there _____ other _____ for areas _____ due _____ distance?

_____ if _____ current infrastructure _____ insufficient due to distance _____?

_____ utilization of existing _____ are there any other _____?

_____ alternatives besides DSL and _____ in _____ with _____.

Do _____ other options _____ limited _____ that _____ enough distance?

There _____ areas where _____ due to distance, _____ are _____ other _____?

When _____ current _____ enough due _____ like geographical _____ what other options _____?

_____ the present system _____ issues _____ geographic distances, _____ alternatives _____ there?

When _____ problems and other _____ existing _____ difficult _____ maintain, _____ options?

_____ cable _____ aren't _____ limitations, what options are there?

When the infrastructure _____ short due _____ limitations _____ what _____ are _____ there?

When _____ reach due to distance _____ alternatives _____ be considered _____ of relying _____ DSL _____ connection

We need _____ different _____ when the _____ setup _____ our _____ of factors like _____

If _____ not adequate due _____ and similar _____ what _____ there?

_____ constraints _____ use of _____ DSL, what options _____ available?

_____ the current _____ doesn't _____ because of factors _____ distance _____ could _____ us _____ different options?

If _____ get _____ or cable _____ are there other _____?

_____ an _____ internet solution _____ in locations _____ insufficient _____ long distances?

Obstacles _____ distance _____ existing _____ other alternatives can be _____?

_____ can _____ if the effectiveness of infrastructure _____ distances?

What _____ are _____ situations _____ the current _____ is insufficient because of _____ and _____?

When _____ setup isn't covering our _____ factors like distance limitation, could _____ some _____?

_____ is not _____ due to distance _____ similar _____ what choices _____?

_____ the _____ isn't _____ due to issues _____ geographical _____ what are _____ other _____?

_____ due to _____ and similar issues, what _____ do _____ have?

When it is _____ far, _____ options _____ cable _____?

When infrastructure is _____ enough _____ to _____ are available?

_____ the _____ other limits, are there other options _____?

_____ infrastructure _____ due to distance or _____ what _____ exist?

Are there _____ options _____ isn't _____ due to distance?

_____ there a _____ cable or _____ systems _____ overcome _____ restrictions posed _____ limited distances?

_____ distance _____ and _____ infrastructure are there other options besides _____?

Obstacles like distance can _____ existing _____ alternatives _____ be _____?

In _____ limited _____ be used other than DSL and _____?

When _____ with limited _____ can _____ considered instead _____ relying _____ or _____ connections.

What are _____ situations _____ current infrastructure _____ insufficient due to _____ limits _____ factors?

Is _____ option _____ cable _____ DSL for limited _____?

_____ setup is _____ because _____ and _____ barriers, what alternatives are _____?

_____ as a substitute if _____ limits availability?

_____ obstacles _____ distance _____ what alternatives are there?

_____ with limited reach, which _____ considered besides _____ and _____?

_____ existing infrastructure is _____ due _____ limitations in _____ there _____ other _____ means of DSL _____ cable?

_____ there a _____ for _____ or DSL system that can overcome _____ restrictions _____?

_____ infrastructure _____ inadequate due _____ distance _____ similar issues, _____ exist?

_____ like distance limits existing _____ what _____ be _____?

_____ it's _____ there _____ any _____ options _____ cable or DSL?

For _____ existing _____ what alternatives can be considered?

What _____ options are _____ when _____ to issues like geographical distances?

_____ options are _____ for the _____ caused by _____ limits?

_____ inadequate infrastructure _____ is caused by distance limits?

_____ alternative internet _____ available _____ locations _____ insufficient _____ and long distances?

_____ the _____ infrastructure isn't _____ due to _____ constraints and other _____ are _____ viable _____?

_____ there any other _____ for _____ that don't have _____ to _____?

_____ challenges _____ utilization of _____ system, _____ there another _____?

Where existing _____ enough because _____ distance _____ factors, are _____ any _____ alternatives _____ or cable?

_____ due to distance _____ what other options _____ be found?

_____ other choices _____ be made _____ infrastructure _____ of distance _____?

Obstacles like _____ limit _____ so _____ alternative can _____?

When the _____ doesn't suffice _____ of issues _____ distances, what _____?

_____ infrastructure _____ adequate due to distance and similar issues, _____?

_____ there for situations where the _____ insufficient due _____ distance limits _____ other _____?

If _____ setup is inadequate _____ the other options?

What _____ consider if distances hinder _____ effectiveness _____ like _____?

_____ infrastructure _____ to distance, are _____ any other _____?

_____ distances _____ other limits, _____ there other _____ insufficient infrastructure?

_____ a _____ or DSL systems _____ can _____ the limitations _____ by _____ distances?

If existing _____ is _____ due _____ distance, _____ there?

If distance _____ usage of _____ effectively, are there _____?

Where existing infrastructure _____ enough because _____ distance _____ or similar factors, _____?

_____ we _____ a substitute for DSL or _____ systems _____ overcome _____ in terms _____?

When _____ with _____ be considered _____ relying on either DSL or _____ connections?

_____ distance and _____ limits, are _____ alternatives _____ cable _____?

When _____ is a _____ infrastructure suitability, are there any _____ one _____?

_____ substitute for DSL or _____ systems _____ can _____ restrictions _____ are posed _____ distances?

_____ cases _____ infrastructure _____ enough _____ distance constraints, are _____ any _____ alternatives _____ cable?

_____ areas with _____ reach, which alternative _____ DSL and _____?

What options _____ if existing setup is _____?

Is there a _____ option _____ areas _____ the _____ isn't adequate _____ distance constraints _____ factors.

When infrastructure _____ to _____ what _____ other options?

Is _____ possible to suggest _____ if the infrastructure _____ accommodate _____ cable because _____ distance _____?

When _____ current _____ due _____ limits, what other options _____ there?

_____ faced with limited reach due to distance limitations _____ instead _____ or cable connections

_____ are out there _____ situations where the current _____ distance limits?

When _____ falls _____ what _____ options are there _____ cable _____ DSL?

When ____ present system doesn't ____ such ____ geographical distances, ____ are there?

Do we have ____ cable or ____ can ____ restrictions imposed by ____?

Is there any alternative for ____ given ____?

There are ____ the ____ infrastructure isn't ____ due to ____ limiting factors

If the infrastructure ____ insufficient due ____ connections ____ available?

In ____ with ____ alternatives ____ be ____ than cable and DSL?

____ is a ____ what possibilities ____ beyond traditional methods?

When distance ____ constraint ____ what other ways ____ be ____?

____ there ____ for ____ with insufficient ____ along with issues like long ____?

When distance ____ and other ____ there be other ____?

____ utilization of the existing system, are ____?

When ____ current ____ suffice due ____ such as ____ what alternatives ____ there?

When ____ too ____ any ____ cable or DSL?

Obstacles ____ as distance ____ alternatives can be considered?

____ faced with limited reach due to distance ____ alternatives ____ be considered ____ than ____ either ____

____ other options can we ____ availability?

When distances ____ other factors affect infrastructure, ____ cable?

____ are available if ____ options aren't viable due ____ infrastructure ____?

If the ____ setup doesn't cover our ____ due to factors ____ could ____ a ____?

When ____ to distance ____ alternatives can be considered instead ____ relying on ____ or ____ connections

When ____ limited ____ to distance ____ alternatives ____ considered instead ____ relying ____ either DSL ____ cable connections

____ is ____ distance and similar ____ what other options ____ there?

____ prevent ____ of ____ system effectively ____ there other options?

____ any other option ____ the ____ is not ____ to distance?

____ or cable can't ____ due to ____ are there ____?

When the infrastructure ____ due to ____ and ____ what other ____?

____ challenges ____ utilization of existing system, ____ there ____ options?

____ is ____ to distance and ____ issues, ____ do you have?

____ exist ____ situations where ____ current ____ not sufficient ____ distance limits and other ____?

What options are available ____ where ____ due to distance ____ or ____ factors?

When ____ doesn't ____ of ____ like geographical distances, what other ____?

When ____ system does not suffice ____ to ____ distances, ____ possibilities ____ there?

____ there ____ other ____ besides ____ or cable for ____ where ____ insufficient ____ of distance?

Is there ____ viable ____ distance ____ a limiting factor in current ____?

When distance constraints ____ use ____ DSL, ____ are available?

____ with limited ____ due ____ distance limitations, ____ alternatives can be ____ of relying ____ or ____?

If the setup is inadequate ____ to ____ what ____ options ____?

____ have any suggestions for ____ when internet is ____?

When ____ too ____ you have ____ options besides ____ cable?

____ existing infrastructure isn't ____ of ____ similar ____ are ____ any other options?

Is ____ option ____ than ____ DSL ____ a limited infrastructure?

When ____ with limited reach, ____ alternatives ____ used ____ of ____ on ____ or ____?

____ insufficient ____ to distance and other ____ other options ____?

When distance ____ it ____ to ____ cable, what ____ are available?

____ falls short ____ to distance limitations ____ reasons, what ____ choices ____ there?

When ____ insufficient due to distance, ____ options can ____?

____ faced ____ to ____ what alternatives ____ considered instead of using either DSL ____ cable.

____ are ____ when the ____ infrastructure ____ due to ____ limits ____ other factors?

____ other ____ used if existing infrastructure cannot support them ____ to ____?

_____ other options _____ with _____ due _____ distance and other limitations?
 When existing _____ isn't enough _____ to _____ can _____ be _____ means _____ cable _____ DSL?
 _____ inadequate infrastructure caused by distances?
 What _____ if the _____ infrastructure _____ insufficient because _____ distance limits _____ other _____?
 _____ existing _____ is not adequate _____ to distance, _____ available?
 _____ know _____ there are any other _____ for areas _____ is _____ enough due to _____?
 When infrastructure _____ due _____ distance, is _____ any other _____?
 If existing setup is _____ good _____ to distance, _____?
 _____ problems _____ other factors deter _____ infrastructure, _____ there _____ options?
 What _____ the alternatives _____ infrastructure is _____ to distance _____?
 When _____ problems _____ other factors _____ help existing _____ are _____?
 _____ constraints affect the use of DSL _____ there?
 When _____ short due to _____ limitations _____ other things, _____ you _____ options?
 _____ the _____ does not suffice _____ issues _____ distances, _____ possibilities are there?
 _____ prevent utilization _____ existing system, are _____ alternatives?
 _____ options are _____ if the current infrastructure is _____ distance limits _____ other _____?
 When _____ to distance, which _____ are available?
 When faced _____ limited reach, what _____ considered _____ relying on _____ DSL.
 If the _____ not _____ distance, any _____ connections?
 When facing _____ due _____ what alternatives _____ considered instead of _____ on either DSL _____ connections.
 _____ limitations like _____ what _____ could be _____?
 For cases where existing _____ enough _____ distance _____ are _____ any other _____ or cable?
 _____ far, any _____ besides _____ cable or DSL?
 _____ faced with _____ reach due _____ limitations, what alternatives _____ be considered instead of _____ on _____ cable _____
 If _____ is _____ due _____ distance and similar barriers, _____?
 When distance _____ affect _____ of cable _____ DSL, what _____?
 When distance problems _____ other _____ hamper _____ are _____ other _____?
 _____ distance and _____ restrictions, _____ to cable?
 _____ it's _____ have any other options besides _____ DSL?
 When distance _____ infrastructure, _____ other options besides _____?
 When faced _____ can be considered, instead of _____ on _____ cable _____ DSL _____.
 _____ the _____ infrastructure _____ accommodate either DSL or _____ because of factors such _____ you _____ solutions?
 _____ any _____ for _____ where existing infrastructure _____ distance constraints or similar _____?
 If an _____ setup _____ due _____ distance, what alternatives _____?
 If distance challenges _____ of _____ existing _____ other options?
 _____ the infrastructure _____ insufficient due to _____ are _____ any other _____ cable?
 If the infrastructure can't _____ both DSL and _____ can _____ suggest alternate _____?
 Is _____ viable _____ for _____ where the current _____ due to _____ and other factors?
 If _____ broadband connections _____ DSL aren't feasible _____ long _____ what _____ alternatives?
 If _____ limit _____ infrastructure, what alternatives are _____?
 _____ or cable _____ the only options for inadequate _____ distance _____.
 _____ falls _____ to _____ and other things, do you have any _____ options?
 _____ due to _____ which other connections are _____?
 Can _____ up with _____ when internet _____ limited, such _____?
 _____ there any other option _____ with _____ due _____ distance _____ other _____?
 _____ distance is a constraint for _____ existing _____ what _____ elsewhere?
 _____ the _____ short _____ to distance limitations and _____ other _____ are _____?
 _____ challenges prevent the utilization _____ the existing _____ other _____?

When it _____ too far, _____ alternatives _____ cable _____ ?

Is _____ another option _____ or cable _____ areas _____ infrastructure _____ insufficient due _____ ?

What options can be found _____ the current infrastructure is _____ limits _____ other _____ ?

_____ option other than cable _____ where _____ infrastructure _____ not sufficient due to _____ ?

If distance _____ use of _____ system, are _____ ?

When _____ is not enough _____ distance, which _____ connections _____ ?

_____ cover our needs _____ to factors _____ distance limitation, can _____ some other options?

In areas with limited _____ be _____ from cable and _____ ?

If existing infrastructure can't support cable and _____ to _____ ?

_____ distance constraints _____ of _____ or DSL, what choices _____ ?

_____ limited reach _____ distance _____ alternatives can _____ instead _____ relying _____ either DSL or _____ connections?

Is there any other _____ other than cable _____ where _____ is _____ ?

What _____ can _____ the effectiveness _____ DSL _____ hampered by distances?

_____ possible to get _____ if I _____ get _____ to distance?

When distance _____ make _____ less reliable, are there _____ options?

_____ substitute _____ DSL system _____ can overcome the restrictions _____ by limited distances?

_____ the existing infrastructure falls short due _____ other _____ other than _____ ?

_____ is insufficient _____ distance, what _____ options exist?

What are the _____ infrastructure is _____ because _____ distance _____ and other _____ ?

_____ other _____ do _____ have _____ inadequate infrastructure _____ of _____ limits?

_____ we _____ can overcome the restrictions posed _____ distances in _____ infrastructure _____ ?

When _____ infrastructure _____ short because of _____ are any _____ ?

When _____ due _____ in proximity, can there _____ alternatives other _____ the conventional _____ DSL and _____ ?

Is there a _____ for cable or _____ overcome the _____ distances?

What _____ other alternatives _____ infrastructure caused _____ distance _____ ?

What options _____ out there for _____ the current _____ is insufficient due to _____ ?

_____ doesn't _____ due to issues like _____ distances, what _____ are _____ ?

_____ is _____ due to distance, can there _____ connections?

_____ alternatives can _____ obstacles like _____ limit infrastructure?

What _____ alternatives _____ be utilized _____ limits _____ ?

When existing _____ isn't _____ limitations _____ proximity, can _____ alternatives _____ than _____ means of cable _____ DSL?

What other _____ exist _____ inadequate _____ caused _____ limits?

When _____ isn't _____ because of _____ like _____ what _____ are there?

_____ DSL or _____ be used _____ distance, are there _____ ?

Is _____ alternative _____ given distances and limits?

What options are _____ if the _____ not enough _____ to _____ ?

_____ current _____ isn't _____ due to distance constraints _____ other _____ there any _____ ?

When _____ is _____ due _____ options are available?

When the existing _____ to distance limitations or _____ issues, _____ ?

If _____ setup is inadequate _____ other options are _____ ?

What options _____ if _____ infrastructure _____ to distance limits and other _____ ?

Do _____ have a substitute _____ that can _____ restrictions posed by _____ ?

_____ existing _____ support DSL and cable due _____ distance, are _____ ?

_____ the system _____ due _____ issues such _____ distances, what _____ options are _____ ?

When _____ with _____ reach due to distance _____ alternatives _____ of relying on _____ or cable _____ .

When the _____ short _____ to _____ limitations _____ reasons, what _____ options _____ available?

_____ reach due _____ distance limitations, _____ alternatives can be _____ instead of _____ or DSL.

Is _____ option _____ or _____ for limited infrastructure.

_____ is _____ for inadequate _____ caused _____ distance limits?

When existing infrastructure _____ incapable _____ to distance limitations, any _____ or _____ are _____?
 _____ existing _____ short due _____ distance limitations and other things, what _____?
 _____ there a _____ insufficient _____ distance and other _____?

Can you suggest alternate _____ infrastructure can't _____ because of distance limitation?

When the infrastructure _____ distance limitations and other _____ other options _____?

When _____ incapable _____ to distance limitations, _____ be _____ services other than traditional _____ or _____?

For _____ where _____ infrastructure isn't enough because _____ distance constraints and _____ are _____ any _____?
 _____ options _____ available if _____ or _____ options _____ due to infrastructure _____?

When distance _____ impede _____ there other alternatives?

_____ infrastructure _____ insufficient _____ to constraints such as _____ other connections _____?

What options _____ the _____ is _____ due to _____ limits?

Is there _____ when _____ distance limitations?

_____ regular broadband connections _____ DSL or _____ to _____ distances, what _____ options?

What _____ are _____ the _____ falls _____ to distance limitations?

_____ there other _____ when there are distance _____?

_____ distance _____ of existing system, _____ there _____ options?

If the _____ is _____ due to _____ and _____ what _____ are _____?

Do you _____ any _____ options _____ DSL for limited _____?

_____ are available if existing setup _____ due _____?

_____ cable doesn't _____ due _____ distance, _____ are _____ other alternatives?

Is _____ besides _____ cable for _____ existing infrastructure _____ enough _____ of distances?
 _____ broadband _____ through cable _____ DSL _____ feasible _____ distances, what _____ are there?

If existing _____ not _____ to distance _____ barriers, _____ alternatives _____ there?

Can you _____ alternate solutions _____ current infrastructure can't handle _____ DSL _____ to _____?

_____ we have when the current _____ insufficient due _____ limits?

_____ distance _____ and other factors _____ existing infrastructure _____ options?

When the _____ falls _____ due to _____ limitations _____ things, what _____ are _____?

In _____ limited _____ which _____ can you _____ than DSL _____ cable?

What _____ be considered _____ distance limit existing infrastructure?

Can you _____ out there, _____ internet is _____ due to issues such as distance?

When infrastructure _____ insufficient _____ to distances, _____ connections can _____?

If the infrastructure _____ distance _____ are alternatives?

_____ and other _____ interfere with _____ are there other _____?

If _____ is _____ due to distance, any _____ are _____?

When the infrastructure _____ due to _____ limitations _____ what _____ are _____?
 _____ and other _____ affect _____ infrastructure, _____ there other _____ other than _____?

When the infrastructure _____ inadequate due to distance _____ what _____?

Is _____ other options for _____ where _____ infrastructure _____ enough _____ to _____?

What alternatives can _____ relying _____ DSL when _____ with limited reach?

_____ are there _____ infrastructure is _____ and similar issues?

_____ you suggest alternate _____ infrastructure _____ cable and DSL because _____ limitations?

_____ it's _____ far, _____ any _____ options beside _____ DSL?

_____ distance problems _____ factors _____ existing infrastructure, do there _____?

_____ is not the _____ issues _____ as _____ can you tell _____ what _____ are _____ there?

_____ infrastructure falls short _____ to _____ limitations or _____ other options other than cable _____?

_____ alternatives _____ considered in situations where _____ limit existing _____?

_____ there _____ option _____ for areas _____ the _____ is insufficient due to _____?

_____ distance challenges prevent _____ the _____ system, _____ any other _____?

When _____ not _____ due to _____ other possible _____?

Do _____ have a _____ the _____ cable _____ that _____ overcome _____ restrictions _____ by limited distances?

When _____ because of distance and similar _____ are _____?

What _____ alternatives if _____ limits _____?

_____ there _____ viable _____ areas where _____ infrastructure _____ to distance _____ and other limiting factors?

Is _____ an _____ internet solution for _____ issues such as _____ distances?

What other options are _____ there _____ to _____ limits?

_____ there any _____ that _____ used when infrastructure _____ due _____ distance?

When _____ problems hinder existing _____ other _____?

When _____ insufficient due to _____ other _____ can _____ had?

When _____ current system _____ to _____ like geographical _____ other alternatives are _____?

_____ there any other _____ if the infrastructure falls _____?

When _____ limited reach due to distances, _____ considered _____ relying on _____ DSL connections?

_____ isn't viable _____ to distance _____ what options _____ available?

Is there any alternative _____ for _____ where _____ infrastructure isn't _____ because _____?

When infrastructure _____ due to _____ connections that are _____?

_____ infrastructure is _____ to _____ and _____ issues, _____ can _____ done?

Is _____ I could get _____ restricts DSL/cable?

With limitations _____ of _____ else _____ be used?

_____ insufficient infrastructure given _____ and other limitations?

_____ the present system _____ suffice _____ issues like _____ options _____ there?

When _____ infrastructure fails _____ to distance _____ or _____ what other _____?

If _____ setup is inadequate _____ to distance _____ are left?

_____ are the alternatives _____ infrastructure _____ inadequate due to _____?

What _____ can you _____ if _____ diminish _____ infrastructure?

What alternatives can _____ if _____ effectiveness of _____ infrastructure?

_____ alternative _____ if _____ effectiveness _____ infrastructure is hampered by distances?

_____ the _____ is _____ due _____ distance _____ similar _____ options exist?

Do we _____ a _____ for DSL or cable systems _____ can _____?

Are _____ any alternatives _____ systems that can _____ the _____ of _____ distances?

_____ is insufficient _____ are _____ other available connections?

What _____ the _____ the _____ infrastructure _____ due to distance limits _____ factors?

When it's too _____ alternative _____ or _____?

_____ are _____ for inadequate infrastructure caused by _____?

_____ and _____ hamper the existing infrastructure, are there _____?

What _____ options _____ there _____ infrastructure due to _____?

_____ there anything _____ I _____ get _____ limits cable/DSL?

When _____ present _____ enough because of issues _____ distances, _____ are _____?

There _____ options other _____ and cable in _____ limited _____.

_____ have alternatives _____ given distance and other _____?

_____ alternatives _____ consider if distances prevent _____ the infrastructure?

What _____ exist for _____ current infrastructure is insufficient _____ to _____?

When the _____ short due _____ limitations _____ options are there?

When _____ infrastructure falls short _____ to _____ limitations or _____ there _____?

Should _____ be _____ for insufficient infrastructure, _____ distance _____?

_____ present _____ sufficient due _____ like geographical _____ what _____ are there?

_____ the _____ falls _____ due to _____ other _____ than _____ or DSL exist?

_____ the current system doesn't _____ because of _____ options _____ there?

_____ cable or DSL _____ not _____ distance constraints, what _____ available?

_____ distance challenges prevent utilization _____ existing system _____ other _____?

When _____ is not adequate _____ distance _____ issues, what _____ exist?

Is there _____ other _____ if distance _____ DSL/cable?

existing infrastructure is not adequate _____ limitations _____ proximity, are _____ than _____ traditional _____ of _____ and _____?

existing _____ isn't enough _____ of distance _____ similar factors _____ there _____ alternatives?

distance _____ prevent the utilization of existing _____ alternatives?

alternatives are available _____ options _____ not viable due _____ challenges?

there anything else I can _____ restricts _____?

If the _____ insufficient _____ what other _____ can _____ found?

If _____ of existing _____ effectively, do there any _____?

infrastructure is not sufficient _____ to _____ such _____ connections?

When _____ infrastructure _____ adequate due _____ in proximity, _____ there _____ besides _____ means _____ cable _____ DSL?

When distance _____ infrastructure, are there _____?

infrastructure is _____ to _____ what alternatives exist?

distance is _____ the _____ infrastructure, what _____ possibilities exist?

If the _____ due _____ limitations _____ more, what other _____ are _____?

the setup is _____ due _____ are available?

_____ suggest alternate solutions _____ current _____ can't accommodate _____ DSL _____ cable because of _____?

If distance challenges prevent _____ of the _____ any _____?

Can you _____ us _____ alternatives are _____ not _____ because of distance?

If obstacles _____ distance _____ what _____ could be _____?

_____ system doesn't suffice due _____ what possibilities are available?

When _____ infrastructure falls short _____ other options?

Do we have a substitute for cable _____ systems _____ can _____ distances?

_____ DSL or cable, _____ be considered for inadequate _____?

When infrastructure is insufficient _____ distance, _____ connections can _____?

What options exist if _____ current _____ isn't _____ other factors?

Is _____ another option _____ cable _____ can't _____ due _____?

If _____ because of _____ what _____ options are there?

Do _____ any _____ options _____ not covering _____ distance?

If _____ DSL can't _____ to distance, are _____ options?

_____ DSL is _____ due _____ distance _____ what are the alternatives?

When _____ infrastructure _____ due _____ distance and _____ options are available?

What _____ alternatives can we _____ if _____?

When _____ current _____ suffice due _____ issues like _____ what _____ options _____ there?

_____ consider if distances _____ conventional infrastructure _____ effective?

Is there anything else I _____ if _____?

When existing _____ isn't adequate due _____ proximity, _____ besides _____ of cable and DSL?

_____ the present _____ isn't _____ issues _____ geographical distances, what other _____ there?

What _____ are _____ if the _____ is insufficient _____ to _____?

_____ such _____ limit existing infrastructure, what alternatives _____?

_____ setup is _____ due to distance, _____ are _____?

What alternatives can be _____ instead _____ either DSL _____ cable connections _____ faced _____ limited reach _____ limitations?

Where cable or DSL _____ cut _____ of _____ there _____?

If the setup _____ inadequate because _____ and _____ barriers, what _____?

Is there _____ areas where _____ infrastructure _____ enough _____ to distance?

If existing infrastructure _____ them due to _____ there _____?

_____ choices do _____ have for inadequate _____ due _____ limits?

_____ infrastructure can't handle DSL or cable because _____ limitation, _____ solutions?

When _____ problems and _____ affect the _____ existing _____ are _____ options?

For _____ by distance limits, _____ other _____ exist?

Is _____ another _____ for _____ given distance and _____?

_____ there _____ solutions _____ found in _____ with insufficient infrastructure and long _____?
 _____ options _____ there _____ is inadequate _____ to _____ and similar issues?
 When the _____ setup doesn't _____ our _____ because _____ factors like _____ you recommend _____ setup?
 _____ the infrastructure _____ due to distance, are there _____ than _____?
 _____ proximity _____ affect the adequacy of _____ infrastructural provisions, _____ be _____?
 If existing _____ isn't _____ because _____ distance _____ there _____ alternatives besides _____ or _____?
 Can you tell us _____ out _____ good due to distance?
 _____ a substitute _____ or cable _____ can _____ constraints of limited distances?
 When _____ insufficient due _____ distance, _____ you get any _____?
 Can you _____ solutions if _____ current infrastructure can't accommodate _____ DSL _____ limitation?
 _____ where existing infrastructure _____ because _____ constraints, are there _____ alternatives _____ cable?
 When it's too _____ any other _____ ADSL?
 _____ distance _____ and other _____ difficult to use cable or _____ choices _____?
 _____ inadequate because _____ distance _____ what other options are there?
 _____ cases where existing infrastructure _____ not _____ because _____ distance _____ factors, are _____ other alternatives?
 _____ alternatives can _____ if _____ the effectiveness _____ infrastructure?
 _____ faced _____ limited _____ due _____ limits, _____ alternatives _____ be considered _____ of _____ either DSL _____ cable
 connections
 _____ adequate due to limitations in _____ other than the conventional _____ of _____ cable?
 _____ infrastructure is _____ distance and similar _____ alternatives are there?
 If _____ existing setup _____ inadequate _____ to distance, what _____?
 _____ present system doesn't _____ due _____ issues _____ geographical _____ options _____ left?
 _____ limited _____ do you _____ options besides cable _____ DSL?
 When infrastructure _____ due to distance, can _____ be _____?
 Is _____ when _____ infrastructure _____ short due _____ distance limitations?
 Do _____ know _____ any _____ options _____ infrastructure that _____ stretching _____?
 _____ is insufficient because of _____ available connections?
 When _____ system _____ suffice because of issues _____ distances, what other _____?
 When _____ infrastructure _____ due _____ limitations _____ things, _____ you have _____ other options?
 _____ the infrastructure is not _____ due to _____ there?
 When faced _____ limited _____ limitations, _____ alternatives can _____ considered instead _____ relying on _____
 or DSL.
 When _____ and _____ factors affect _____ are there _____ alternatives?
 When infrastructure is not _____ due to _____?
 When infrastructure is not sufficient due _____ similar _____?
 When _____ falls _____ due _____ distance limitations, _____ any other alternatives?
 When _____ limited _____ what alternatives can be considered instead _____ on either _____ DSL?
 _____ with _____ reach due _____ limitations, what _____ can be _____ instead _____ relying on cable _____
 _____ suggest _____ solutions if _____ can't _____ and cable because of _____ limitation?
 When _____ insufficient due _____ any _____ available connections?
 _____ can _____ if the current infrastructure _____ to _____ limits and other factors?
 _____ a _____ for _____ what other methods are there?
 _____ any _____ options _____ can explore _____ is a _____ factor in current _____?
 _____ not enough _____ to _____ what _____ connections are there?
 _____ the _____ enough due to issues like geographic distances, what _____?
 Is _____ other option besides _____ or _____ for _____ with insufficient _____ due _____?
 _____ or _____ isn't viable due _____ options are there?
 _____ options do _____ have _____ the current _____ distance _____ and other factors?
 If DSL _____ cable _____ are not viable _____ infrastructure _____ are _____?
 _____ existing _____ isn't _____ to _____ proximity, are there _____ other _____ the _____ means of _____ and DSL?
 _____ due to distance, _____ other _____ are there?

____ distance and limitations, are ____ insufficient infrastructure?
 ____ infrastructure ____ insufficient ____ distance, ____ there be other ____ connections?
 Considering ____ there are ____ insufficient ____ else could be ____?
 ____ there any ____ besides ____ or DSL for ____ infrastructure?
 When ____ infrastructure falls ____ to ____ and more, ____ other ____ are ____?
 The current ____ insufficient ____ to distance ____ factors so ____ are there?
 Is there ____ else ____ can ____ distance limits ____?
 If it's too ____ other options ____ cable ____?
 What options ____ available ____ the ____ infrastructure ____ due ____ limits or other ____?
 When ____ any other alternatives ____ cable ____?
 I want to know if ____ are other ____ for ____ the ____ not enough ____.
 ____ distance ____ there alternatives to ____ insufficient infrastructure?
 ____ limited reach due ____ limitations, ____ be considered instead of relying on either ____ connections
 There are ____ where the current ____ isn't ____ are other options.
 ____ cable ____ DSL ____ work due ____ distance, what other ____?
 ____ any other option ____ the infrastructure falls ____ to ____ or ____?
 Is there ____ alternative ____ available ____ infrastructure and long distances?
 Is there ____ option besides DSL ____ for ____ limited ____?
 What ____ can be ____ substitute if ____ limit ____?
 ____ infrastructure ____ enough due to ____ do ____ other ____ exist?
 Is there anything ____ I ____ distances restrict ____?
 When ____ not ____ to distance, ____ other connections ____ you ____?
 When ____ distance ____ existing ____ alternatives are available?
 ____ have ____ alternatives ____ cases where ____ infrastructure ____ enough ____ of distance ____ similar factors?
 Is ____ alternatives when internet ____ limited by ____ or ____?
 Is there ____ other ____ infrastructure can't support ____ to ____?
 ____ infrastructure isn't ____ due ____ in proximity, are there other ____ to use ____?
 In ____ can ____ consider ____ other ____ cable and DSL?
 ____ like insufficient ____ what else ____ be used?
 ____ the existing ____ falls ____ to ____ or other ____ what ____ options ____ there?
 If distance ____ prevent ____ the existing system, is ____?
 For ____ the infrastructure is ____ due to ____ options other than ____?
 When distance restrictions affect the ____ options are ____?
 ____ current ____ doesn't ____ needs ____ of ____ like distance limitation, ____ you suggest some ____ options?
 When ____ current system is ____ due to ____ like ____ distances, ____ there?
 ____ get DSL ____ cable due ____ distance, ____ there other ____?
 ____ falls ____ due to distance ____ or other problems, ____ other options ____ cable or ____?
 Can ____ us ____ alternatives are ____ isn't ____ because of distance?
 For cases where ____ infrastructure ____ enough ____ similar factors, are there any ____ besides DSL ____?
 ____ can be considered when ____ distance ____ existing ____?
 ____ hinder ____ effectiveness of infrastructure such as ____ what alternatives ____?
 When distance is a ____ for the ____ conventional methods?
 What ____ you ____ if ____ affect the effectiveness of ____?
 ____ options are there if the current ____ to distance ____ and ____?
 ____ current setup doesn't cover ____ needs ____ factors ____ distance ____ you recommend ____ different options?
 ____ any other option ____ than cable ____ for ____ infrastructure?
 Is there ____ alternative for ____ and limits?
 ____ other connections ____ when infrastructure ____ due to ____?
 Is ____ where the ____ isn't adequate ____ to distance constraints?

If _____ is inadequate because of _____ are _____?

_____ alternative _____ cases _____ existing infrastructure _____ enough because of distance _____?

When _____ doesn't _____ our _____ because of factors _____ distance limitation, _____ you _____ another _____?

Can you suggest _____ current infrastructure _____ accommodate _____ or cable _____ distance _____?

_____ infrastructure _____ due to _____ and similar _____ what _____ options do _____?

_____ other _____ available _____ current _____ insufficient due to distance limits?

_____ distances and other factors affect _____ or DSL, _____ are _____?

_____ or _____ is not _____ due to _____ what options _____ available?

When _____ is _____ enough due _____ constraints such _____ distance, _____?

_____ distance _____ the utilization of _____ existing _____ are _____ alternatives?

_____ setup is inadequate _____ to _____ similar barriers, what _____?

What alternatives can be considered _____ like _____?

When _____ problems _____ factors _____ are there other options _____ than _____?

_____ there _____ connection that can _____ infrastructure is insufficient because _____?

_____ infrastructure _____ enough _____ distance then what are _____?

_____ due _____ distances and similar issues, _____ options exist?

If _____ setup _____ inadequate due _____ what _____ choices are _____?

_____ there any _____ options if _____ can't _____ due to _____?

_____ there _____ option _____ areas _____ infrastructure is _____ enough _____ to distance?

What _____ can be _____ in _____ where _____ as _____ limit _____ infrastructure?

Given distance and _____ are _____ alternatives _____ insufficient infrastructure?

If _____ infrastructure isn't adequate _____ in proximity, are _____ other _____ and _____?

_____ setup is _____ due _____ distance _____ similar _____ choices are there?

_____ are _____ inadequate infrastructure caused by distance _____?

Is there _____ get if distance _____ DSL/cable?

Considering _____ of range _____ other _____ else _____ used in _____?

When _____ system isn't enough _____ to _____ like _____ distances, _____ there?

_____ there _____ limitations _____ range, what _____ could _____ used?

_____ know if there _____ options _____ areas where _____ infrastructure _____ due to distance?

_____ we _____ cable or _____ that _____ overcome restrictions _____ by _____ distances?

_____ internet isn't _____ best _____ to issues such as _____ us _____ are out there?

What alternatives _____ think _____ distances _____ effectiveness of cable or _____?

When _____ is _____ current infrastructure _____ making choices like cable _____ there any viable _____?

_____ it possible to _____ other _____ distance _____ cable/DSL?

_____ present infrastructure can't _____ or DSL due to _____ limitations, can _____ suggest _____?

If DSL _____ cable can't work _____ to _____ options?

_____ there _____ viable _____ for areas where the _____ infrastructure _____ due to distance _____ and _____?

When _____ enough due to limitations _____ proximity, are there alternatives other _____ means _____?

DSL?

Should _____ be other _____ for areas _____ the _____ is _____ distance?

If _____ is _____ good because _____ what alternatives _____ there?

Can you _____ what alternatives are _____ there when regular internet _____ such as distance?

_____ constraints impede _____ use of _____ or _____ are _____ choices?

_____ setup is not adequate _____ distance _____ similar _____ are there?

Do _____ have any _____ that aren't _____ DSL for _____?

_____ existing infrastructure isn't enough _____ of distance _____ alternatives besides _____ or _____?

_____ infrastructure is _____ distance and similar issues, _____ are there?

_____ cable or DSL isn't _____ due to _____ what _____ available?

If _____ insufficient due _____ distance limits _____ other factors, what other _____?

_____ any _____ can explore when distance _____ a _____ factor in infrastructure _____?

If _____ current infrastructure can't accommodate either DSL or _____ can _____ alternate _____?

When infrastructure is not adequate due to _____?

_____ can you _____ if distances _____ the _____ infrastructure?

What options _____ there _____ is inadequate _____ distance and similar _____?

_____ the infrastructure is _____ due _____ other _____ that are _____?

_____ distance is affecting _____ and making _____ like _____ or cable infeasible, _____ there _____ one can _____?

_____ DSL can't _____ to _____ there are other options?

_____ there another _____ if _____ or _____ work _____ of distance?

Where _____ doesn't _____ it _____ of _____ are there _____?

_____ there _____ for areas where _____ current _____ not adequate due _____ constraints and _____ factors?

Is _____ other way _____ go if _____ infrastructure isn't _____ distance constraints _____ factors?

_____ the _____ due to distance, _____ other options _____ there?

_____ any other options besides DSL _____ for areas _____ is _____ to distance?

If _____ setup is _____ and other _____ what choices _____ there?

_____ the _____ is insufficient due to _____ connections are _____?

_____ is _____ factor, _____ alternatives _____ besides _____ or DSL?

What _____ there if _____ setup is _____ to distance _____ barriers?

_____ impede existing infrastructure, are _____ other _____?

What are _____ for _____ because _____ distance limits?

Are there alternatives _____ insufficient _____ other limits?

When infrastructure _____ inadequate _____ distance, _____ other options _____ found?

What _____ be _____ instead _____ cable or DSL when _____ reach due to distance limitations?

_____ the _____ isn't _____ to _____ such _____ geographical distances, what possibilities are _____?

When existing infrastructure _____ due to _____ in proximity, are _____ alternatives _____ and cable?

When _____ infrastructure, what _____ can be considered?

_____ there another thing _____ if distance restricts _____?

If setup is not adequate because of _____ similar _____?

What _____ can be _____ is _____ constraint for the _____?

_____ the current _____ DSL _____ because _____ limitation, can you suggest _____ solutions?

_____ distance is _____ the _____ what _____ exist _____ conventional methods?

_____ there be _____ other than using DSL _____ affect the adequacy of _____ infrastructural _____?

_____ prevents use, _____ alternatives _____ cable or DSL?

When _____ falls _____ to _____ limitations _____ more, _____ options are available?

_____ is inadequate because _____ distance and similar issues, _____?

When _____ infrastructure _____ due _____ distance limitations _____ other issues, _____ options _____ there?

When obstacles such _____ distance limit _____ what _____ considered?

_____ broadband _____ through _____ are not feasible due _____ the other options?

When distance _____ limiting _____ current _____ are there _____ options one can _____ into?

_____ can _____ distances affect the effectiveness of _____ or _____?

_____ any viable alternatives one can explore _____ a _____?

_____ the infrastructure _____ insufficient _____ distance, can there be _____ connections?

When _____ problems and other _____ from _____ infrastructure, are _____?

When the _____ infrastructure _____ due to _____ limitations, _____ than cable _____ DSL?

_____ incapable _____ distance limitations, which _____ are available _____ traditional cable or _____?

What _____ can be _____ for situations _____ distance _____ existing _____?

_____ cable isn't _____ distance constraints, what other options _____?

The current _____ doesn't cover our _____ of factors like distance _____ so _____ options?

What _____ present if DSL _____ cable options _____ not _____ of _____?

When existing _____ due _____ in proximity, are there _____ other _____ the _____ means of cable _____?

If regular _____ cable _____ DSL _____ feasible _____ to long _____ what are _____?

_____ distance challenges _____ utilization of _____ are _____ other options?

_____ can _____ for inadequate infrastructure _____ distance limits?

When existing _____ isn't sufficient due to limitations _____ are _____ alternatives _____ than _____ means _____ DSL _____?

Can you suggest _____ the _____ infrastructure _____ accommodate either cable or _____ limitations?

_____ be other options for _____ the _____ is insufficient _____ distance?

_____ present system doesn't _____ of _____ geographical _____ what _____ are available?

When existing _____ enough _____ limitations in proximity, _____ there alternatives other _____ traditional _____ and _____?

_____ can be _____ when faced with limited reach _____ to _____ limitations _____?

_____ is insufficient because of _____ other available _____?

_____ and _____ factors hinder existing infrastructure _____ there other _____?

_____ alternatives _____ inadequate infrastructure caused _____ limits?

_____ infrastructure _____ insufficient due to _____ similar issues, what _____?

_____ any other options instead of _____ or _____?

When _____ is _____ sufficient due _____ distance, _____ other _____ are _____?

_____ not good _____ distance and _____ barriers, what alternatives _____ there?

_____ substitute _____ DSL _____ that can overcome restrictions on infrastructure _____?

_____ for DSL or cable _____ that _____ overcome the _____ of limited _____?

When the _____ infrastructure _____ to _____ limitations, there _____ other options?

What _____ options _____ have _____ inadequate infrastructure _____ by distance _____?

When _____ with _____ to distance _____ alternatives _____ considered instead of using cable _____ DSL

Is there _____ viable _____ areas where the current _____ enough _____ to _____ constraints _____ other _____?

_____ distance _____ existing system, _____ there be other options?

_____ existing infrastructure _____ due to _____ in proximity, are _____ besides the conventional _____ of DSL _____?

If _____ isn't enough because _____ constraints _____ similar _____ there any _____ alternative?

When infrastructure _____ of _____ what other options _____?

_____ are _____ for inadequate _____ caused _____ distance limits?

_____ present _____ isn't enough because of _____ like _____ distances, what _____ options _____?

When the current _____ doesn't suffice _____ geographical distances, _____ are _____?

When the _____ short _____ distance limitations _____ other _____ any _____ options?

_____ faced with limited _____ distance limitations, _____ alternatives _____ considered _____ of relying _____ either _____ or DSL _____.

Is there another option _____ cable _____ for _____?

_____ present system doesn't _____ due _____ issues _____ what are there other _____?

What _____ are available _____ current infrastructure _____ distance limits and _____ factors?

If the current setup _____ covering our _____ because _____ factors _____ distance limitation, _____ other _____?

_____ like distance limit _____ infrastructure, what _____ be _____?

Is _____ another option _____ DSL _____ cable _____ limited _____?

When distance _____ and other factors _____ existing infrastructure, _____ other _____?

_____ there any _____ in cases _____ existing infrastructure _____ support _____ distance?

_____ there be alternatives _____ or DSL _____ insufficient _____?

Do _____ have any other _____ for _____ where the _____ or other limitations?

What options _____ setup is inadequate _____ distance _____ similar barriers?

If _____ enough because _____ distance constraints _____ similar _____ there _____ other alternatives?

When infrastructure is inadequate due _____ issues, _____ left?

_____ existing _____ not adequate due _____ distance _____ similar _____ are there?

Is there _____ inadequate infrastructure _____ by _____ limits?

What _____ are there _____ the infrastructure _____ short due _____ limitations _____?

_____ present system _____ enough due to _____ and what _____ possibilities are _____?

_____ with _____ reach, _____ can be considered _____ than _____ and cable?

What options can _____ infrastructure is insufficient due to _____ other _____?

When infrastructure _____ due to _____ available connections _____ available?

If _____ can't get _____ due to distance, _____ there other _____?
 _____ distance problems _____ factors _____ infrastructure, are there other _____?
 Is there any _____ distance _____ utilization of _____ system?
 Do _____ think _____ are _____ options _____ cable cannot work _____?
 _____ too _____ choices besides _____ or DSL?
 _____ the infrastructure _____ handle either DSL _____ distance _____ you suggest _____ solutions?
 _____ there any alternatives that can _____ posed by _____ in terms _____?
 Do you _____ if there _____ other options for _____ where _____ is _____ due _____?
 Is there a substitute _____ cable or _____ can _____ restrictions _____ limited _____?
 _____ distance problems _____ other factors _____ existing _____ be other _____?
 When _____ infrastructure falls short _____ distance _____ any alternatives other than _____?
 _____ we _____ substitute _____ or _____ that can _____ imposed by limited distances?
 Given the _____ limitations, are _____ cable for _____ infrastructure?
 What options _____ available _____ situations _____ infrastructure _____ enough due to _____ limits and _____ factors?
 When _____ with limited reach, what _____ can be _____ instead _____ on either _____.
 If the _____ setup doesn't _____ our needs _____ like distance _____ could _____ recommend _____?
 _____ faced with limited _____ due _____ can we consider instead _____ on cable _____ DSL?
 Considering limitations such as _____ what else _____ in _____?
 When _____ with limited _____ due to distance _____ can be _____ relying on _____ DSL?
 _____ different _____ the current _____ doesn't cover our _____ because _____ factors _____ limitation.
 _____ existing infrastructure falls short _____ to _____ any _____ cable or DSL?
 What alternatives _____ you consider if the effectiveness _____ distances?
 _____ due _____ distance, can any _____ connections be found?
 What _____ if _____ arises from living far away or _____?
 Are _____ any other _____ for areas where the _____ is _____?
 _____ the _____ short _____ limitations _____ more what _____ choices are there?
 _____ cases where _____ infrastructure _____ of distance _____ factors, are there _____ alternatives other _____ or
 cable?
 If the setup _____ not _____ to _____ are there?
 _____ infrastructure is inadequate _____ of _____ and similar _____ options _____?
 _____ there _____ alternatives if proximity _____ affect _____ existing provisions?
 If _____ not _____ distance, what choices _____ there?
 Is _____ a _____ cable _____ systems _____ overcome _____ limitations of limited distances?
 _____ can you consider _____ make _____ or cable less _____?
 In _____ infrastructure isn't _____ because _____ distance constraints, _____ there any _____ besides cable or _____?
 When _____ inadequate _____ to distance _____ similar issues, _____ alternatives _____?
 _____ broadband _____ aren't feasible due to _____ distances, what other _____?
 If obstacles _____ distance _____ existing _____ alternatives _____ available?
 _____ it's _____ feasible to make choices like _____ or _____ distance, are _____ other viable _____?
 _____ cable _____ DSL don't work because _____ distance, what other _____?
 _____ and other factors affect _____ are _____ other _____ besides _____ DSL?
 _____ exist for _____ infrastructure _____ of distance limits?
 Is _____ if distance _____ prevent utilization _____ existing system?
 Do _____ have any _____ if existing _____ them due _____ distance?
 What alternatives can _____ consider _____ the _____ conventional _____ is _____ by _____?
 When faced _____ limited _____ to _____ limitations, _____ alternatives can be considered _____ relying on either DSL _____
 _____?
 Under current infrastructural _____ can _____ suggest _____ using either cable _____?
 If _____ a constraint _____ the _____ infrastructure, what _____ found?
 _____ there be alternatives _____ given distance and _____?
 _____ isn't adequate due _____ and similar _____ options exist?

____ current setup doesn't ____ our ____ due ____ factors like ____ could you suggest some ____ ?
 ____ infrastructure falls short ____ distance limitations, ____ other ____ or DSL?
 Do ____ any ____ for cable ____ that can overcome ____ imposed by ____ ?
 ____ distance ____ prevent use ____ system, are ____ options?
 ____ have ____ other options ____ than ____ or ____ limited infrastructure?
 ____ or cable ____ work because ____ distance, ____ options?
 ____ alternate ____ if ____ infrastructure ____ accommodate ____ DSL and cable because ____ distance limitation?
 ____ options exist ____ infrastructure ____ by distances?
 Are ____ alternative ____ can ____ in locations ____ insufficient infrastructure and long ____ ?
 When the present ____ is ____ such ____ geographical distances, ____ options are there?
 What alternatives are ____ instead ____ DSL ____ cable ____ ?
 Is ____ substitute for ____ or DSL ____ can ____ the ____ imposed ____ limited ____ ?
 ____ reach ____ distance ____ what alternatives ____ be considered instead ____ relying on DSL ____ cable
 ____ with limited ____ what alternatives ____ be considered, ____ relying ____ either DSL or ____
 ____ distance ____ and other factors ____ existing ____ other alternatives?
 ____ areas ____ limited reach, what ____ can be ____ apart from ____ ?
 ____ a substitute ____ or ____ systems that can overcome the ____ by ____ ?
 If ____ prevent utilization ____ there any other option?
 When ____ is ____ due ____ what ____ do we have?
 ____ are the options ____ the ____ infrastructure ____ insufficient because of ____ factors?
 When ____ too far, ____ besides cable ____ ?
 Given ____ other ____ are there alternatives ____ DSL?
 When ____ infrastructure falls ____ to distance ____ and more, ____ choices ____ there?
 Can you suggest ____ if the ____ infrastructure can't ____ cable ____ DSL ____ limitation?
 Are ____ any viable ____ one ____ explore ____ a limiting ____ ?
 ____ alternatives ____ if ____ setup ____ due ____ distance and similar barriers?
 ____ you have ____ options ____ DSL or ____ limited ____ ?
 ____ choices do ____ have ____ infrastructure caused ____ distance ____ ?
 When ____ with ____ due to ____ what ____ considered instead of relying ____ cable connections?
 ____ if infrastructure ____ to distance ____ other constraints?
 ____ DSL aren't ____ due to distance limitations, ____ are ____ ?
 ____ distance challenges ____ of ____ existing system, are any ____ ?
 ____ regular ____ connection through cable ____ to ____ distances, what ____ other options?
 ____ isn't adequate ____ limitations in proximity, ____ apart ____ conventional means of DSL and ____ ?
 When the ____ suffice due ____ like geographical distances, ____ are there?
 Do you have ____ for ____ where ____ because ____ distance?
 When infrastructure is ____ adequate ____ and ____ issues, ____ options ____ ?
 What ____ for infrastructure that ____ inadequate because ____ limits?
 ____ areas with limited ____ which alternatives ____ from cable and ____ ?
 ____ options are out there if ____ is ____ sufficient ____ to ____ limits ____ other ____ ?
 ____ alternatives can you ____ distances reduce ____ of ____ infrastructure?
 ____ the current infrastructure is ____ due to distance ____ and ____ factors?
 ____ cable or DSL ____ to ____ are there ____ options?
 ____ are ____ if ____ not enough due to ____ limits or ____ factors?
 When ____ makes ____ difficult ____ make ____ like cable ____ DSL, are ____ any ____ ?
 ____ is ____ to distance or other ____ which ____ connections ____ available?
 If distance ____ the ____ of existing system, ____ any ____ ?
 ____ infrastructure ____ insufficient due to distance ____ and other ____ so ____ are ____ ?
 ____ options can ____ if the current ____ is ____ due ____ limits?
 What ____ out ____ if ____ isn't ____ due to distance ____ and other ____ ?

_____ as _____ limit existing infrastructure, _____ options can be _____?

What _____ out there _____ inadequate infrastructure _____ of distance _____?

When the _____ due _____ distance limitations _____ options are left?

If existing _____ isn't enough because _____ factors, are _____ other alternatives?

_____ there if the _____ is inadequate _____ of _____?

Are _____ alternatives for insufficient _____ distance _____?

Can _____ alternate solutions _____ current _____ can't accommodate _____ cable _____ DSL due to _____?

_____ regular broadband connections through _____ aren't _____ due to _____ are _____ other options?

Is _____ a _____ option when _____ current _____ doesn't cover _____ of _____ such as distance _____?

Do _____ options for infrastructure that _____ stretching _____?

Do we _____ a substitute _____ or DSL that _____ the _____ distances?

_____ the _____ system _____ not sufficient due to _____ geographical _____ what _____ there?

If _____ challenges prevent _____ existing _____ what _____ are _____?

When _____ other _____ don't _____ with existing _____ are there _____ options?

When the _____ cover our _____ because _____ such _____ distance limitation, _____ recommend _____ different setup?

_____ other _____ have for inadequate _____ because of distance _____?

_____ would like to know if _____ are _____ options for areas _____ the _____ is _____.

Do _____ there _____ other options _____ where _____ insufficient due to distance.

_____ the present system _____ due to issues _____ distances, _____ options are _____?

What _____ options are _____ for inadequate infrastructure _____ caused _____?

What _____ the alternatives if _____ current _____ due _____ limits and other _____?

_____ infrastructure _____ due to distance _____ similar issues, _____ the _____?

_____ any other _____ besides cable or _____ it _____ too _____?

_____ choices _____ for _____ infrastructure because _____ distance limits?

When _____ infrastructure is _____ other connections can be found?

_____ there any other _____ for limited infrastructure?

_____ there another option _____ insufficient infrastructure _____ and _____?

When distance issues and _____ are there other _____?

What _____ options exist for _____ current _____ is _____ due _____ distance _____ and _____ factors?

What options _____ we have if the _____ is _____ distance limits _____?

_____ setup is _____ adequate due _____ distance _____ what alternatives exist?

_____ cable _____ cannot work due to _____ other options?

When _____ infrastructure is incapable _____ distance _____ is there _____ alternative _____ DSL?

_____ it's _____ any _____ alternatives besides cable or _____?

Does anyone know _____ there _____ options _____ cable _____ work due _____?

When _____ adequate _____ limitations in proximity, _____ there _____ to use DSL and _____?

_____ affect the _____ of _____ DSL, what _____ are available?

When _____ too _____ other _____ besides _____ or cable?

When _____ constraint _____ possibilities exist beyond traditional methods?

_____ we have alternatives that can _____ the _____ in terms of _____ infrastructure _____?

Do we have _____ substitute for cable or _____ can _____ imposed _____?

If _____ infrastructure isn't _____ because of distance _____ factors, _____ any _____ besides DSL or _____?

When _____ by distance _____ issues, can _____ suggest alternatives?

Is _____ option _____ where the current infrastructure isn't _____ due _____ distance _____ other limiting _____?

Are there any _____ options for _____ that _____?

Is there a substitute _____ cable _____ that can overcome _____ limitations _____?

_____ there another option for _____ and limits?

_____ infrastructure isn't enough due to _____ connections _____?

_____ regular internet _____ the best due _____ issues _____ can _____ provide _____ with _____?

If existing infrastructure _____ enough _____ and similar factors, can _____?

When _____ is not _____ distance _____ similar issues, what other _____?

_____ can you consider _____ distances stop _____ infrastructure?

_____ distance problems _____ factors don't help existing _____ there _____?

_____ alternative _____ solution _____ locations with insufficient _____ as _____ as _____ distances?

What _____ can you consider if _____ limiting _____ of _____?

_____ with limited _____ distance limitations, _____ alternatives can be considered instead _____ using _____ cable?

When faced with _____ due to distance _____ alternatives _____ be considered _____ of _____ on _____?

Is _____ alternative for _____ infrastructure _____ distance _____ limits?

_____ for infrastructure that is _____ stretching enough distance?

When the _____ isn't _____ due to _____ like _____ distances, what other _____?

When distance restrictions impede _____ use of _____ DSL, _____?

When it's _____ there _____ other _____ besides DSL _____ cable?

Obstacles like _____ limit _____ what _____ are available?

What alternatives _____ available _____ options are _____ viable due _____ infrastructure _____?

Do we _____ for DSL _____ systems that can overcome _____ that _____ limited distances?

Is _____ any _____ options _____ areas _____ infrastructure due _____ or _____ limitations?

If _____ challenges _____ use _____ existing system _____ are _____ any _____?

When _____ limited reach due _____ what _____ can _____ of relying on cable or _____?

_____ like distance _____ limit _____ infrastructure, _____ what _____ can be _____?

For _____ any _____ besides _____ or DSL?

Is there an _____ solution _____ locations _____ infrastructure along _____ like long _____?

_____ the _____ short _____ to _____ and more, what _____ are there?

Where cable or _____ doesn't work _____ are any _____?

When _____ system _____ suffice due _____ as geographical _____ what other _____ are _____?

_____ the _____ suffice due _____ geographical distances, what other _____ are _____?

_____ existing _____ isn't _____ to limitations _____ proximity, can there _____ than cable _____ DSL?

_____ any alternative _____ DSL _____ cable if _____ isn't enough _____ of _____ constraints?

When _____ because _____ and similar _____ other _____ can be found?

_____ any other option _____ cable and DSL for _____?

_____ the current setup _____ meet _____ needs due _____ distance limitation, _____ you _____ some other _____?

What alternatives _____ you consider _____ the _____ conventional infrastructure?

_____ the _____ infrastructure falls short _____ of distance limitations, _____ other _____ than _____?

_____ is a constraint for _____ what other _____ be _____?

_____ you suggest alternates _____ is _____ distance?

Given _____ other _____ there alternatives _____ cable _____ DSL?

When infrastructure is _____ to _____ connections?

If cable _____ work _____ to _____ are other options?

_____ is _____ enough because of _____ other available _____?

_____ the current _____ cover _____ due _____ factors such as distance _____ you _____ different setup?

_____ faced _____ limited reach, _____ can _____ instead _____ relying _____ DSL or cable.

_____ an _____ internet _____ with _____ infrastructure along with long distances?

When distance problems _____ other _____ infrastructure, _____ there _____ options?

When _____ is insufficient due to _____ connections?

_____ DSL or _____ not viable because of proximity challenges?

_____ distance challenges _____ system effectively are there _____ other _____?

_____ the _____ system _____ enough _____ geographical distances, what _____ options exist?

What _____ be considered other _____ areas with _____ reach?

_____ doesn't _____ due to _____ like geographic distances, what _____ are _____?

_____ alternatives _____ there if DSL or _____ options aren't viable _____ limitations?

_____ other options _____ you use if _____?

____ the ____ system doesn't ____ due ____ ____ geographical distances, ____ are there?
 Do you have ____ options ____ cable and ____ limited ____?
 ____ cases where ____ infrastructure ____ them due to ____ are ____ choices?
 ____ need ____ different options if ____ setup ____ cover ____ needs because ____ ____ distance limitation.
 ____ areas ____ reach, which alternatives can ____ considered apart from ____ ____?
 ____ present ____ enough due ____ ____ like geographical ____ what else can be ____?
 For ____ current infrastructure ____ due ____ constraints ____ other limiting factors ____ there ____ viable options?
 ____ infrastructure ____ not sufficient due ____ distance, what ____ ____?
 Do ____ have any ____ for ____ is not enough ____?
 ____ it's too ____ any ____ than cable ____ DSL?
 When the ____ isn't enough ____ ____ other connections?
 ____ distance ____ limits, ____ be alternatives to cable or ____?
 ____ the present ____ suffice due to ____ geographical distances, what ____ are ____?
 If ____ cable ____ work due ____ distance ____ what other ____ there?
 ____ suggest ____ if the ____ can't accommodate ____ and DSL ____ to ____ limitation?
 ____ is a ____ the ____ infrastructure, ____ possibilities exist?
 When the ____ doesn't cover our ____ because of factors ____ as ____ ____ recommend ____ different ____?
 When faced with ____ to distance ____ what ____ be ____ than relying ____ DSL or cable ____
 ____ existing infrastructure can't support ____ due to distance, ____ ____?
 ____ distance ____ of the existing ____ can there be ____?
 Do ____ have any alternatives for ____ DSL systems ____ can ____ ____ by limited ____?
 When ____ problems ____ other factors ____ infrastructure, are ____ other ____?
 When ____ constraints impede the ____ of ____ or ____ choices ____ made?
 ____ the ____ infrastructure can't ____ both ____ and ____ because ____ distance limitation, can you ____ ____?
 ____ DSL or ____ aren't viable ____ distance ____ what ____ there?
 ____ current setup doesn't ____ our needs ____ of factors ____ limitation, could ____ suggest ____?
 ____ options are available if ____ ____ due ____ distance limitations or ____?
 When infrastructure ____ adequate ____ to ____ and ____ issues, ____ options exist?
 When ____ system ____ because of issues ____ ____ what possibilities are ____?
 ____ there ____ other options ____ the ____ infrastructure can't ____ them ____ to ____?
 If the ____ can't ____ or DSL ____ to factors such ____ can ____ alternate solutions?
 ____ alternatives ____ ____ diminish the effectiveness of conventional infrastructure?
