

[Demo] NLP Dataset for Customer Service Automation

Company Type	Mobile Network Operators
Inquiry Category	VoIP (Voice over IP) compatibility and setup
Inquiry Sub-Category	VoIP call quality issues
Description	Customers report poor call quality during VoIP calls, seeking troubleshooting assistance to identify and resolve the underlying causes, such as network congestion, packet loss, or low bandwidth.
Data Size	5,011 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Mobile Network Operator" customer inquiry. (Purchased data will not be masked.)

_____ be taken _____ prevent dropped _____ while _____ Voice _____ calls through your _____?
 _____ that voice over internet _____ are _____?
 _____ voice _____ calls, what _____ steps to take to _____ dropped connections?
 How _____ you _____ network _____ dropped _____ when _____ use it to _____?
 _____ we _____ dropped _____ when using the network _____ make _____ internet _____ calls?
 Is _____ way _____ prevent _____ VoIP _____.
 Is _____ possible _____ avoid _____ connections during _____ over _____?
 _____ it _____ to offer some _____ for avoiding call drops _____ over _____?
 How can _____ prevent _____ in _____?
 _____ are _____ you can _____ to prevent _____ connections when _____ over _____ calls.
 _____ do we keep _____ connection _____ using _____ internet _____ in _____ networks?
 Do _____ know how _____ call _____ during _____ voice over _____ protocol _____?
 What should _____ do to _____ dropped _____ I _____ your _____ to _____?
 _____ calls may be _____?
 _____ best practices _____ downtime _____ making voice over _____?
 _____ call dropouts during VoIP _____.
 What _____ to decrease _____ inVoIP exchanges?
 How _____ make sure _____ calls _____ dropped while _____ network?
 What must be _____ minimize _____ exchanges?
 How _____ we _____ stable when we _____ over Internet _____?
 _____ using _____ network _____ what _____ be done to prevent dropped _____?
 There is a _____ to _____ voice _____ protocol calls _____.
 What _____ to avoid dropped _____ make calls through your _____?
 There _____ measures that can be taken _____ calls _____ being _____ over internet protocol _____.
 _____ you _____ me _____ there _____ measures in _____ prevent _____ when using _____ over internet _____ calls?
 _____ know _____ to _____ dropped connections _____ using your _____ make calls?
 _____ you _____ network to make voice over _____ protocol calls, _____ do to _____ connections?
 _____ have any _____ for avoiding call _____ voice over _____ protocol _____?

_____ can _____ avoid _____ connections in calls?

Is _____ measures _____ stable _____ connections?

Is there _____ I _____ do _____ a consistent _____ for my _____ internet _____?

_____ can _____ deal with the _____ while _____ VOIP calls?

_____ there _____ to avoid _____ during calls?

Do you _____ how _____ can _____ dropped _____ using your _____?

_____ there anything you _____ do _____ prevent dropped _____ you _____ your _____ to _____?

What _____ steps _____ should take _____ during voice _____ internet protocol calls?

There is an _____ course _____ action that needs _____ be taken _____ continuous access _____ during VoIP _____.

What _____ do _____ there _____ no instances of connection _____ while _____ are on _____ phone?

_____ do _____ keep _____ stable when _____ Voice _____ internet Protocol?

_____ minimize call dropouts during _____ use.

Do _____ VoIP calls from _____ dropped?

What _____ the steps to prevent _____ when _____ make a voice _____?

There are _____ prevent connection drops _____.

_____ your _____ measures in _____ to prevent Voice over internet _____ calls _____?

_____ you _____ any tips _____ avoiding call drops while _____ over _____?

Is _____ voice _____ internet protocol calls _____ drop out frequently?

_____ are steps to take _____ connections _____ you _____ voice over _____ calls.

How can _____ dropped _____ using _____ over Internet protocol calls?

_____ I _____ to take any _____ to avoid dropped _____ during voice _____?

_____ it possible _____ VoIP connections?

What _____ be _____ to _____ dropped _____ using the network to _____?

Is _____ can tell me about avoiding _____ while _____ internet protocol _____?

Is there _____ to _____ in your VoIP _____?

VoIP _____ troubles can _____.

_____ should _____ stopped?

_____ one deal _____ the _____ disconnections while making VOIP _____?

Is _____ a _____ to prevent voice _____ internet protocol _____?

_____ you tell me _____ there are any measures _____ to prevent _____ over _____ being _____?

_____ you prevent dropped _____ use _____ network to make _____?

_____ can you _____ connections during _____?

There are _____ be taken to _____ disconnects when _____ protocol.

_____ can I secure reliable Voice _____?

What can your _____ to _____ dropped _____ making _____?

I need some advice on _____ drops _____ a voice _____ protocol _____.

_____ there a _____ lost _____ during phone calls?

_____ there a way _____ calls _____ dropping out frequently?

What can _____ to _____ dropped connections _____ using _____ make calls?

_____ should _____ prevent dropped _____ while _____ my _____ to _____ calls?

_____ can you _____ dropped connections while _____ your _____?

_____ it possible to _____ call _____ linked _____ network _____?

Is it _____ to _____ while using your _____ to _____?

_____ prevent dropped connections when _____ your network _____ voice-over-Internet calls?

_____ for avoiding _____ making voice over internet _____ calls with your _____?

_____ can we _____ during VoIP _____ on the _____?

_____ do I _____ sure my VoIP _____ get _____?

_____ you can do to _____ dropped connections _____ network for _____?

How can _____ prevent _____ inVoIP _____?

_____ steps should I take to avoid _____ when making _____?

How ____ avoid lost ____ during ____ protocol?

What are ____ things you can ____ to prevent ____ connections when ____?

Is ____ a ____ sure ____ disconnections in VoIP ____?

Is there ____ protect ongoing ____ over ____ Protocol ____?

Is it possible to ____ using ____ to make ____?

____ can ____ dropped connections ____ using voice ____ internet ____?

____ about ____ for ____ drops while making ____ over ____ protocol calls?

____ there are measures ____ place ____ prevent disconnections ____ using voice over ____ protocol?

Do you ____ a way to ____ internet ____ dropping ____ frequently?

How can I deal ____ dropped ____ making calls ____?

How to ____ VoIP ____ happening?

____ course ____ action ____ needs to ____ to guarantee ____ connection ____ our telecommunications infrastructure during VoIP calls.

____ you ____ to stop dropped ____ while ____ your network to ____?

Can ____ me ____ to ____ calls ____ getting cut ____ when ____ voice ____ internet ____?

____ ensure ____ voice over internet protocol calls ____ disrupted?

Is ____ anything you can ____ to ____ during ____ internet protocol ____?

How ____ to ____ stupid ____ connections from ____ voice over ____ protocol experience?

____ there anything ____ can do to avoid ____ voice ____ protocol calls?

Any ____ for ____ during VoIP?

When making ____ calls, what ____ done ____ stop dropped ____?

____ you tell me if ____ are ____ measures ____ place to prevent disconnects ____ Protocol ____?

How ____ prevent ____ on VoIP ____?

What ____ be ____ to prevent ____ connections ____ your network to ____ voice ____?

How ____ prevent ____ in ____ network?

During VoIP ____ there ____ ways ____ drops.

____ there be ____ to keep ____?

____ you maintain ____ stability when ____ internet protocol?

What ____ done to prevent ____ connections when ____ to ____ calls?

Is there ____ way ____ voice ____ calls ____ dropping out?

How ____ maintain ____ connections when ____ voice over ____?

When ____ the ____ to make calls, ____ done to ____ dropped ____?

How ____ prevent dropped ____ you use ____ for ____ over internet protocol ____?

How to ____ downtime ____ making voice ____ protocol ____?

What ____ you ____ to make ____ protocol ____ having dropped connections?

How ____ prevent ____ connections when you ____ Voice ____ protocol ____?

There ____ can ____ to prevent ____ connections ____ your ____ to make calls.

____ do we make ____ voice over ____ calls ____ interrupted?

How do ____ keep the ____ using ____ IP?

____ you ____ dropouts during ____ use?

How ____ you ____ connections while you ____ using your network ____?

____ there ____ I can do to ____ over ____ calls flowing?

____ can ____ ensure that Voice over ____ not disrupted?

How to ____ lost ____ calls?

____ can ____ done ____ prevent ____ connections ____ using your network ____ make ____ over ____?

____ do ____ keep ____ stable when using Voice ____?

How ____ you prevent dropped connections while ____ internet ____?

How can ____ dropped connections ____ using ____ over ____ calls?

____ do you ____ you use your network ____ Voice over ____ Protocol ____?

____ are ____ things you can ____ dropped ____ while ____ your ____ to ____ calls?

_____ can one address _____ issue of frequent _____ making _____?

How do _____ Internet Protocol _____?

_____ we _____ instances _____ and ensure that voice over internet _____ calls _____ not _____?

How do _____ keep the connection _____ when _____ protocol?

Do _____ way to _____ connections _____ using _____ network _____ voice over _____ protocol calls?

How can you keep _____ dropping _____ while you _____?

Is _____ a way _____ avoid dropped connections _____?

What _____ be _____ dropped _____ while _____ over Internet Protocol calls?

_____ can your _____ prevent _____ connections _____ calls?

What _____ need _____ be _____ minimize dropped connections and ensure voice _____ internet protocol _____?

What _____ be done to _____ dropped _____ when _____ the _____ to _____ calls?

_____ a way to prevent dropped connections _____ using _____ network _____?

_____ the network to _____ over InternetProtocol _____ be _____ to _____ dropped connections?

How _____ we make _____ Voice _____ IP _____ not interrupted?

_____ do we keep the connection stable _____ Voice _____?

_____ to stop _____ dropped connections from _____ voice _____ internet protocol experience?

_____ are your _____ for _____ these dropped _____ from _____ voice _____ internet _____ experience?

_____ to _____ taken to make sure _____ is _____ dropped connections and _____ interruption _____ voice _____ calls?

Suggestions on _____ connections during _____.

How _____ make _____ are no _____ connection drops _____ there _____ Voice _____ IP calls?

How can _____ sure my _____ not go _____ calls?

_____ possible fixes _____ voip _____?

_____ are the best ways _____ minimize _____ during _____?

How _____ my _____ do not go _____ when using your _____?

_____ should we _____ the number of _____ exchanges?

_____ to prevent getting cut _____ during a _____ conversation?

_____ do you _____ dropped connections when _____ use _____ network _____?

_____ prevent dropped _____ while _____ your network to _____ calls?

Is there _____ lost connections during _____?

_____ to _____ dropped connections while _____?

_____ you _____ give guidance on preventing call _____ voice over _____ communication?

What are the _____ be taken _____ sure voice over internet _____ calls _____ not _____?

_____ I _____ avoid dropped _____ making calls _____ your network?

_____ any tips for avoiding _____ while _____ voice over internetProtocol _____ service?

Do you _____ stopping these dropped connections _____ ruining my _____ over _____?

What can _____ to _____ dropped _____ when using _____ for voice _____?

_____ give us _____ on _____ to prevent _____ during our _____ protocol communication?

_____ prevent dropped _____ voice over internet protocol _____?

_____ to _____ sure _____ VoIP connections _____ not _____?

What are _____ things you _____ do to _____ connections _____ voice _____ internet _____?

Dropping _____ can occur when _____ make voice over _____ protocol _____.

How _____ prevent dropped connections when using your _____ voice _____ internet _____?

_____ recommendations _____ how _____ fix sudden _____?

_____ stable VoIP connections?

What _____ can _____ to prevent dropped _____ you make a voice over _____ protocol _____?

_____ you ensure that Voice _____ not interrupted?

Can you tell us how _____ can _____ call _____ our voice _____?

What _____ should be _____ minimize dropped _____ exchanges?

Is _____ connections during voice over _____ protocol calls with _____?

How _____ VoIP _____ of dropped _____.

How can _____ prevent dropped _____ you make voice _____ calls?
 _____ anything you can do to _____ being _____ using _____ over Internet _____ calls?
 _____ there anything _____ do _____ voice over internet _____ calls from _____?
 The best practices _____ preventing _____ internet protocol calls?
 Can _____ VoIP connections?
 Is there _____ way to _____ voice over _____ calls from _____?
 How do _____ keep _____ networks _____ voice over _____?
 _____ ensure that voice over internet _____ calls _____?
 _____ you know what _____ can _____ to _____ dropped connections _____ you use _____ make _____?
 There are things _____ done _____ prevent dropped connections _____ making _____ internet _____.
 What can you _____ to _____ make _____ internet protocol calls.
 _____ any _____ actions _____ can _____ reduce the _____ disconnected VoIP calls?
 Does your network _____ place _____ prevent _____ over _____ from being disconnected?
 How _____ we _____ our _____ stable _____ over IP technology?
 _____ ensure that voice over _____ protocol _____ are not _____?
