

[Demo] NLP Dataset for Customer Service Automation

| | |
|----------------------|---|
| Company Type | Electricity Suppliers |
| Inquiry Category | Requests for energy-saving tips or recommendations |
| Inquiry Sub-Category | Thermostat settings and programming |
| Description | Customers want guidance on setting and programming their thermostats for optimal energy efficiency. |
| Data Size | 5,888 paraphrases |
| Want to buy data? | Please contact nlp-data@gross.me via your business email address. |

Masked sample paraphrases of one "Electricity Supplier" customer inquiry. (Purchased data will not be masked.)

What ____ of ____ models ____ most significantly ____ power ____ without sacrificing ____?

Can the ____ models keep their ____ reducing ____?

The ____ model ____ minimize power ____ sacrificing ____.

____ can the new ____ reductions in power ____ convenience?

How ____ the latest models ____ ease of use?

____ recent appliances ____ done the most ____ minimize ____ use?

____ newer ____ power waste ____ retaining ____ convenience?

What ____ characteristics of ____ decrease power ____ without ____?

____ the ____ models be able ____ energy usage ____ of use?

What are ____ characteristics ____ recent models ____ save ____?

Are the ____ contemporary devices ____ enhance energy-saving ____?

The latest ____ power ____ without ____ convenience.

Which features ____ the ____ lower ____ and have a high ____?

What ____ the benefits ____ product ____ decrease ____ utilization without ____ user ____?

Do there specific ____ models that ____ power ____?

Which ____ in ____ latest models ____ consumption ____ maintaining high level ____?

How can new ____ losing ____ of use?

____ newer ____ have that decrease power ____ convenience?

____ are ____ that ____ energy usage and ____ provide convenience.

____ in ____ usage can be ____ improvements ____ in ____ models, while still improving ____.

Can newer ____ still ____ convenience ____ reducing ____?

There ____ newer ____ which ____ usage.

Can you tell ____ about ____ latest models ____ power ____ maintaining ____.

Can you ____ the ____ decrease power usage ____ models?

____ features ____ models make a ____ reducing power consumption?

How ____ the ____ models ____ maintain convenience?

____ new ____ qualities ____ consumption?

____ make notable contributions ____ reducing ____ requirements ____ added versatility to consumers?

The ____ the ____ bring ____ significant reductions in ____ without losing ____.

What aspects ____ newer models have the ____ usage?

____ new ____ about significant ____ in power ____ without ____ convenience.

Is ____ any particular ____ in ____ decreases energy usage?

_____ tell us the main _____ that decrease power _____?

_____ newer model attributes _____ energy _____ while _____ giving _____.

_____ energy _____ maintain _____ level of convenience _____ the latest models?

_____ some _____ in _____ models that contribute _____ decreased _____ usage?

_____ newer _____ contributions to reducing _____ still _____ useful to consumers?

_____ innovations do the _____ down _____ while still providing conveniences?

What are _____ in newer _____ that _____ decreased electricity _____?

_____ there _____ feature in newer models that decreases energy _____ without _____?

Which new _____ the most _____?

Can _____ us _____ about _____ models that lower power _____ still maintaining _____?

Which _____ of _____ latest _____ are _____ decreasing energy consumption?

What aspects _____ modern _____ the _____ lower power _____?

_____ features _____ recent models _____ lower _____ usage?

_____ show how the latest _____ lower _____ still have _____?

What features _____ models _____ effect _____ reducing power consumption?

The _____ model bring _____ power usage reductions _____ convenience.

Which of _____ has the _____ power _____ features?

_____ recent models reduce electricity consumption _____?

What _____ been made to _____ product _____ to decrease _____ negatively affecting _____?

Which _____ improvements enable the most recent _____ without compromising _____?

Do the _____ model _____?

Do recent _____ new features that _____ less _____ still _____?

_____ features _____ power use _____ convenience?

New _____ have _____ that reduce _____.

Which _____ diminish power _____?

_____ features _____ latest _____ will _____ lower energy consumption?

_____ you tell _____ story of _____ models _____ power consumption while still _____?

_____ characteristics of _____ models save _____ maintain convenience?

Which _____ in the _____ effectively _____ usage?

New _____ help _____ without sacrificing _____.

_____ newer _____ significant to reducing power consumption?

_____ latest model _____ might minimize _____ compromising _____.

_____ do the features _____ recent models _____ consumption?

_____ characteristics _____ minimize power consumption?

_____ of _____ models are _____ reducing power consumption?

What _____ features _____ newer _____ power _____?

_____ any _____ the newer models _____ decrease _____ usage without _____ ease _____ use?

_____ features _____ models help _____ electricity _____?

Younger _____ can reduce _____ waste _____ convenience.

_____ the _____ usage be attributed _____ changes _____ in newer _____ while improving _____?

Does the new model _____ sacrificing _____?

Which new features _____ use while _____?

_____ the _____ less electricity and be _____?

What _____ models do _____ to maximize energy _____ without _____ user _____?

How do _____ result _____ reductions in power usage?

Which aspects of _____ models has the _____?

What are the _____ that _____ electricity?

Which parts of newer _____ energy _____ without _____?

_____ particular _____ updated versions are useful _____ power _____?

_____ the reduction in _____ be attributed _____ specific improvements made _____ models, while _____ convenience?

What are the _____ qualities _____ newer models?

_____ new features of _____ do to _____ power consumption?

New model features can help _____ consumption, _____.

_____ new models make to minimize _____ consumption.

What _____ the key _____ newer models _____ electricity and _____?

Which _____ of newer _____ impact _____?

_____ parts of _____ have _____ impact on reduced _____ use?

_____ the newer models _____ energy _____ without compromising ease of use?

_____ the _____ factors _____ devices _____ make _____ more energy-saving and user-friendly?

Can you _____ me about _____ elements _____ power usage _____ newer _____?

Does newer _____ to _____ power requirements _____ still providing added _____ consumers?

Do there particular _____ versions that have _____ impact _____ diminished _____ consumption?

Can _____ key factors of contemporary devices that make them _____ user-friendly?

_____ features _____ models _____ to _____ electricity usage?

_____ aspects _____ contribute to lower power _____?

_____ you show _____ new models _____ consumption and _____ convenience?

_____ new _____ power consumption _____ compromising convenience?

_____ improvements allow the _____ model offerings to _____ energy _____ without _____?

_____ model _____ contribute to reducing power consumption, _____ convenient?

Which _____ newer _____ have been most _____ in _____ energy _____?

_____ you highlight _____ benefits _____ the _____ models _____ power consumption?

_____ reduction power _____ in _____ models?

Do newer appliances _____ notable _____ towards _____ power _____ versatility for consumers?

_____ in _____ contributes to decreased electricity _____?

How _____ of the new model _____ without _____ convenience?

What is _____ new _____ that are user-friendly _____ still _____?

How can newer _____ usage _____ still maintaining _____?

There _____ certain _____ newer _____ that will _____ decrease energy _____.

_____ has recent _____ reduce _____ consumption without compromising convenience?

What _____ new _____ make towards _____ power consumption?

_____ updated versions are _____ decreasing power consumption?

_____ are _____ reduce power _____ without sacrificing convenience.

What _____ of _____ help reduce power _____ conveniences?

_____ do _____ model attributes affect _____ convenience?

Will the new _____ save _____ maintain _____?

_____ of _____ models _____ reducing power consumption _____ convenience.

Is _____ anything _____ that _____ decrease _____ usage without _____ of use?

The _____ are _____ lower _____ usage _____ losing _____ of use.

Which key _____ electricity and _____ recent models?

_____ are _____ main _____ that greatly _____ usage in _____ models.

_____ improvements _____ made _____ new models to _____ efficiency _____ affecting user _____?

Can _____ the _____ models that lower _____ while _____ convenience?

_____ of the _____ features _____ decrease energy _____ compromising ease of use?

Which specific _____ of _____ important _____ reducing power consumption?

_____ model features _____ power _____?

What features _____ newer _____ make _____ power consumption?

What _____ of the new model do _____ reduce _____?

_____ do _____ latest _____ enhancements _____ reduce power _____?

_____ notable _____ models make to manage power _____?

How _____ the _____ lower _____ usage without _____ ease of _____?

Is _____ possible to _____ description of the _____ devices _____ energy-saving capabilities while _____ user-friendly experience?

_____ features of newer _____ help _____ consumption without _____ on _____?

_____ do _____ model enhancements reduce _____?

_____ it _____ that _____ model _____ energy usage _____ provide convenience?

_____ new _____ the _____ power-saving features and _____ hassle?

_____ specific improvements _____ the _____ make _____ efficiency without _____ user comfort?

The latest _____ can reduce _____ their ease of _____.

_____ features _____ newest _____ lower energy consumption _____ still maintaining a _____ convenience?

_____ power _____ user-friendly at the same time?

What _____ did the _____ make towards reducing _____?

_____ contributions can _____ appliances make _____ reducing _____ still providing _____ flexibility _____ consumers?

How do the _____ of _____ help _____ without compromising convenience?

Is _____ specific attributes of _____ that _____ effectively?

Which _____ characteristics _____ the most _____?

The new _____ consumption without compromising _____.

_____ latest _____ power consumption without compromising _____.

_____ innovative _____ down on _____ consumption in the _____ convenient _____?

_____ of _____ models _____ power consumption the most?

What _____ of newer _____ reduce _____ consumption _____ most?

_____ characteristics _____ the new _____ power _____.

_____ the main _____ in _____ energy _____ in contemporary designs _____ compromising _____?

The _____ of _____ devices _____ enhance energy-saving capabilities _____ experience?

Which technological improvements enable _____ offerings _____ without compromising _____?

Which newer _____ the _____ features?

_____ contributions do _____ new models make _____ minimizing _____?

_____ elements of _____ have _____ most _____ at using less _____?

What _____ new features _____ cut power _____ and _____?

Do _____ models _____ usage _____ convenience?

Which _____ of the newer _____ proven _____ effective _____ energy _____?

_____ new models maximize _____ efficiency without _____ comfort.

Which characteristics of updated versions _____ in _____?

_____ newer models _____ reduced _____ usage?

_____ it possible that _____ features _____ power _____ but still _____?

_____ aspects _____ new models _____ the _____ to _____ consumption?

What models contribute _____ most to lower _____?

_____ features of _____ models significantly _____ consumption?

_____ a _____ models _____ usage without compromising on ease of use?

How _____ the newer models _____ convenience?

What _____ the _____ that use less juice and _____?

What _____ factors that make modern _____ more _____ user-friendly?

The latest _____ characteristics _____ power _____ comfort.

What notable _____ are _____ new _____ made _____ power _____?

Does _____ newer models have features _____ energy _____ sacrificing ease of _____?

How has _____ upgrades reduced electricity _____?

There are _____ that _____ power _____ while maintaining _____.

_____ the best _____ features?

_____ are the characteristics _____ newer _____ reduce _____ usage?

_____ new _____ without affecting user comfort?

_____ specific _____ in _____ reduce power _____?

_____ the attributes of the _____ reduce _____ without _____ convenience?

Can _____ and reduce power _____?

_____ technological _____ allow _____ offerings to drastically lower energy _____ without _____?

The _____ features in _____ model?

_____ do the _____ make to minimize _____ consumption _____ convenience?

Is there any _____ in _____ decrease _____ usage without compromising ease _____?

Without _____ of use, _____ latest models reduce energy _____?

_____ newer model attributes that _____ energy _____ but _____ provide _____.

_____ attribute of recent _____ that _____ power usage effectively?

_____ features _____ newer _____ most _____ on power consumption?

What are the _____ newer _____ to _____ electricity and _____?

_____ of _____ help reduce power consumption?

Which new model _____ functions?

_____ do _____ in _____ advanced _____ cut _____ electric needs while _____ practicality?

_____ do the new models _____ efficiency _____ affecting _____?

How _____ electricity consumption without compromising convenience?

_____ the _____ models use less _____ and still _____?

_____ specific _____ of updated _____ reduce _____ consumption?

_____ the latest _____ energy without _____ ease _____ use?

_____ latest _____ characteristics affect _____ comfort.

Which _____ model has _____ greatest _____?

_____ do newer _____ attributes provide _____ energy usage?

_____ features that decrease energy usage _____ convenience?

What features of _____ models _____ most _____ usage?

Do _____ notable _____ reducing _____ requirements while still providing _____ consumers?

_____ specific characteristics _____ updated versions _____ the _____ impact _____ consumption?

Is there _____ explanation of the _____ of _____ devices that _____ energy-saving _____ user-friendly _____?

_____ characteristics can minimize _____ sacrificing comfort.

Do newer _____ have _____ that reduce _____ usage _____ compromising _____?

New _____ in _____ might decrease _____ consumption _____ still _____ convenient.

There are _____ of recent _____ lower _____.

Which _____ cut _____ on power consumption while _____?

There _____ models that _____ less power _____ convenience.

Which _____ newer _____ make _____ of less _____?

_____ features in newer _____ greatly decrease _____ usage.

The _____ use less _____ but are _____?

What _____ in _____ models decrease power use _____?

_____ newer _____ notable contributions to _____ power requirements _____ providing _____ for consumers?

_____ in _____ latest _____ lower energy consumption _____ maintaining high _____ of _____?

_____ upgrades greatly reduce energy _____ it _____ use?

_____ while cutting power use?

There _____ newer models that _____ compromising convenience.

_____ me what the _____ newer models are _____ power usage?

Does _____ any _____ that lower power usage _____ sacrificing _____?

Do the newest models _____ less _____ be _____?

What _____ of _____ are the _____ important _____ power consumption?

Which new _____ on _____ use?

Which _____ cut power _____ and _____?

_____ features _____ save electricity _____ maintain convenience?

_____ appliances _____ notable contributions toward reducing _____ requirements _____ providing _____ flexibility to _____?

_____ decrease in _____ be _____ to improvements in newer _____ while _____ convenience?

____ latest model ____ decreased energy ____ but ____ ____ ____ for users?
 More ____ models ____ electricity ____ maintain ____
 ____ it ____ that newer ____ contributions towards ____ power requirements while still ____ added ____ ____ ____?
 What ____ ____ ____ in new ____ that save electricity?
 ____ new features have the ____ ____ ____ use?
 What changes have been made ____ newer ____ to ____ power ____ ____ user ____?
 Which particular features ____ the greatest ____ on ____ power ____?
 What ____ the new ____ use ____ and ____ life easy?
 ____ about the new ____ less ____ and ____ make life ____?
 Which model characteristics ____ consumption ____?
 ____ technological improvements ____ most ____ models ____ dramatically ____ ____ without compromising user-friendliness?
 ____ newer appliances make ____ contributions to reducing ____ providing ____ versatility ____ consumers?
 ____ features in ____ latest ____ can be ____ energy consumption.
 What contributions can newer ____ make ____ requirements while ____ providing ____ for ____?
 ____ new ____ cut ____ power use?
 The ____ model characteristics ____ affect ____ sacrificing ____.
 How ____ models keep ____ usage low ____ ease of ____?
 What ____ contemporary models contribute most ____ consumption?
 ____ power consumption ____ compromising convenience?
 Which new ____ cut power ____?
 How ____ models conserve ____ while being ____ same time?
 How have ____ reduced ____ usage without compromising ____?
 ____ updated versions ____ important for reducing ____ consumption?
 ____ can diminish energy ____ still providing convenience.
 What noteworthy contributions the ____ models make ____ convenience?
 Which innovative ____ do the ____ cut ____ consumption while ____?
 How ____ model attributes ____ usage ____ still provide ____?
 ____ features ____ usage without compromising ease of use.
 ____ features of ____ models most ____ reducing power ____?
 How ____ more advanced versions ____ needs and ensure practicality?
 ____ features ____ energy ____ while maintaining a ____ level of convenience?
 Which technological ____ allow ____ to ____ energy use ____ compromising ____?
 Is it ____ to ____ features ____ that ____ energy usage without compromising ____ ____?
 The ____ models ____ electricity, ____ still be convenient?
 ____ features ____ models effectively ____ consumption and maintain high ____ of ____?
 Power ____ be reduced while ____ convenience in ____.
 ____ models may be ____ power waste while ____.
 ____ features ____ models ____ lower energy consumption.
 ____ latest ____ be able ____ lower energy usage without ____ of ____.
 ____ are ____ features in ____ that significantly ____ usage.
 ____ tell me about ____ latest ____ that ____ power ____ convenience?
 ____ contemporary devices that enhance ____ capabilities ____ ensuring user-friendly experience is ____ ____ could ____.
 Is it possible to highlight ____ new ____ that ____ maintaining ____?
 ____ certain attributes of ____ models ____ decrease ____ usage.
 What ____ upgraded ____ done to ____ without compromising convenience?
 ____ model's attributes bring significant ____ in ____ without ____ convenience.
 Will the decrease ____ usage be ____ improvements ____ newer ____ while ____ improving convenience?
 Is ____ to ____ how ____ latest models lower ____ maintaining convenience?
 What ____ of ____ help reduce ____.
 Do ____ latest models ____ electricity, and ____ convenient?

How _____ model bring about _____ in _____ without sacrificing _____?

Can _____ models _____ power _____ without _____ convenience?

What _____ models _____ power use?

_____ modern _____ have _____ features that significantly _____ energy _____?

Which aspects of newer _____ greatest _____ on _____ use?

Which _____ model characteristics help _____?

_____ of _____ have proven the _____ effective in reducing _____?

_____ recent _____ reduce _____ retaining convenience.

Which technological improvements allow _____ model _____ significantly _____ use?

_____ models _____ decrease _____ use _____ compromising convenience?

_____ there certain attributes found in recent _____ have _____ consumption?

What _____ contributions _____ the new _____ reducing power _____?

Can the _____ power _____ changes made _____ newer _____ while still improving _____?

The latest models _____ energy usage, _____ ease _____.

Which _____ newer _____ contributes to _____ usage?

There are some features _____ newer _____ that _____ usage _____ of _____.

_____ new _____ in recent models _____ can _____ consumption.

What _____ newer models make a noticeable _____ consumption?

There are certain _____ models that _____ usage.

Which _____ has the best power saving _____?

_____ do the new model's attributes _____ power _____ up _____?

_____ that _____ model attributes diminish _____ and still provide _____?

How _____ modern _____ while being easy to _____?

_____ it _____ highlight the new _____ power consumption while _____ convenience?

New _____ diminish energy _____ but _____.

_____ newest _____ lower energy consumption and maintain a high _____ of _____?

Do newer appliances offer _____ contributions _____ requirements while _____ added _____ consumers?

Which technological _____ model offerings to _____ energy use _____?

_____ is the _____ feature in _____ new _____?

_____ latest models use _____ electricity and still _____?

Can _____ point _____ key _____ the latest models _____ lower _____ consumption?

_____ contemporary models help _____ consumption?

_____ are the _____ to models that maximize energy _____?

Which models _____ power _____ compromising _____?

_____ new model characteristics _____ power _____ compromising _____.

_____ features _____ recent _____ electricity?

_____ features _____ the _____ lower energy _____ and maintain _____ level _____ convenience?

_____ new _____ cut _____ and _____ convenient?

_____ characteristics _____ versions play a role _____ reducing _____ consumption?

_____ the latest _____ in decreasing energy _____ still being _____ for _____?

_____ does _____ model _____ do to _____ use?

The _____ model characteristics minimize _____.

Which _____ characteristics _____ versions _____ impact _____ reducing power consumption?

_____ specific characteristics _____ updated versions _____ in _____ consumption?

_____ about the key factors _____ contemporary _____ energy-saving _____ user-friendly experience?

What _____ contributions _____ new _____ to minimize power _____?

Which one of _____ models has _____ features?

What parts of _____ to _____ power consumption?

_____ possible _____ tell _____ the key factors of contemporary devices _____ enhance _____ ensuring user-friendly _____?

Do newer appliances have _____ contributions _____ added convenience to consumers?

____ hassle, ____ new model ____ the best ____ ?
 ____ model ____ energy ____ but still provide ____ .
 New ____ features ____ consumption, yet ____ their convenience?
 ____ it possible to explain ____ factors of contemporary ____ that ____ capabilities ____ assuring ____ ?
 Do ____ models ____ features ____ lower ____ compromising ____ of use?
 Which new ____ minimize power ____ convenience?
 ____ me which ____ newer models help decrease electricity ____ ?
 Which ____ of ____ appliances have proven most ____ use?
 ____ you know the ____ elements that ____ power ____ newer ____ ?
 The ____ new ____ bring about ____ power usage ____ sacrificing convenience.
 ____ saves energy ____ making ____ easy?
 ____ features decrease ____ and still provide ____ ?
 ____ differences between ____ models ____ maximize energy efficiency without ____ user ____ ?
 ____ the latest ____ save energy without losing ____ ease ____ ?
 ____ anything that ____ decrease power usage ____ newer ____ while ____ ease ____ ?
 Which new product ____ substantial ____ power ____ without ____ impacting user ____ ?
 Is ____ any specific features ____ newer models ____ decrease ____ without ____ use?
 ____ it ____ highlight the latest models that ____ power ____ convenience.
 What features ____ are most ____ in ____ consumption?
 Do ____ models ____ features that ____ decrease energy ____ compromising ease ____ ?
 ____ features of ____ make them ____ power?
 Do newer appliances give notable ____ reducing ____ requirements ____ still ____ consumers?
 ____ features in newer ____ help ____ electricity ____ while ____ convenience?
 How do ____ maximize ____ without ____ user comfort and ease ____ ?
 Do newer ____ offer ____ still providing added versatility for consumers?
 I want to know if the ____ model ____ .
 ____ notable ____ do the new ____ make to ____ ?
 ____ of ____ contribute ____ lower power use?
 The ____ of ____ energy-saving capabilities while ensuring user-friendly ____ ?
 What changes ____ been made ____ newer ____ lines ____ without ____ user experience?
 Features ____ newer ____ consumption without ____ convenience.
 ____ the new model bring ____ in power usage ____ sacrificing ____ ?
 ____ features ____ the ____ models lower energy ____ while ____ of convenience?
 Do modern ____ lower ____ sacrificing ____ ?
 ____ of updated ____ role in reducing power consumption?
 ____ latest ____ minimize power?
 Which ____ the ____ have ____ important roles in ____ consumption?
 ____ do ____ new features of ____ models ____ consumption?
 The characteristics ____ newer ____ power usage without ____ .
 ____ model's ____ down power ____ without sacrificing convenience.
 ____ new model's attributes can ____ power usage ____ convenience.
 ____ models have specific features ____ reduce ____ ?
 ____ reduce power consumption without ____ convenience.
 There ____ features ____ recent models that ____ decrease ____ .
 There ____ in newer ____ that decrease ____ without compromising ____ use.
 ____ the ____ power usage ____ to ____ improvements made ____ newer models ____ still ____ convenience?
 ____ of ____ play a vital ____ in ____ power use?
 ____ energy and make it ____ ?
 ____ the ____ decrease in power usage be attributed ____ made ____ models, ____ improving convenience?
 ____ contributions ____ the new ____ make ____ minimize ____ consumption?

There _____ newer models that lower power _____ for _____.

Do newer _____ that _____ usage without compromising ease of _____?

_____ models can _____ power waste _____.

Which features _____ the latest _____ lower energy _____?

_____ the _____ of updated _____ that _____ reduce power _____?

Do newer model _____ reduce _____?

_____ newer models _____ their _____ and _____ power _____?

_____ tell us _____ in _____ models contribute to decreased _____?

_____ of recent models play _____ decreasing _____ consumption.

_____ features _____ the latest models _____ energy _____?

_____ you _____ the main _____ are _____ power usage _____ newer models?

_____ information about recently _____ products that _____ energy _____ but _____ practicality?

_____ technological improvements _____ models to _____ without compromising user-friendliness?

_____ could _____ features in _____ models _____ decrease _____ usage _____ ease of _____.

Which newer models significantly _____ compromising _____?

_____ newer _____ help to decrease _____ usage while _____ convenience?

_____ product _____ enable significant _____ power utilization _____ affecting user _____?

Do _____ appliances _____ contributions to reducing _____ while still _____ flexibility to _____?

_____ models may _____ able to _____ while retaining _____ convenience.

Are there _____ attributes found _____ recent versions _____ a _____ on diminished _____?

What _____ key trait _____ models that save _____?

What technological _____ recent _____ drastically lower energy use _____ user-friendliness?

_____ newer models will _____ power _____?

_____ aspects _____ newer _____ reduced energy _____ without _____ ease-of-use?

Do _____ appliances have notable _____ toward _____ still providing additional _____ consumers?

_____ newer models do _____ have _____ decrease _____ usage?

_____ newer appliances _____ notable contributions toward _____ power _____ while _____ flexibility to _____?

_____ new model's _____ power usage without _____ convenience.

_____ possible that the latest model _____ decreased _____ but _____ for users?

_____ new model _____ use?

Which _____ of the newer models _____ impact _____ usage?

Recent _____ while still _____ convenience.

_____ in power usage _____ attributed _____ improvements made _____ models, _____ improving convenience?

What _____ the biggest factor in _____ newer _____?

What features save _____ in _____ models?

_____ do to reduce energy use?

_____ helps to _____ energy _____ models?

_____ have recent model _____ to reduce _____ compromising convenience?

Which _____ saves _____ making it _____?

_____ models can _____ power _____ still _____ convenient.

How _____ newer models lower _____ usage _____ ease _____ use?

_____ did _____ upgrades reduce electricity _____ without _____?

Which new features cut _____ are _____?

_____ features _____ power _____ and conveniences?

What aspects _____ profoundly _____ reduced energy _____?

Can _____ tell _____ models _____ lower _____ consumption and still offer _____?

Is power minimized without _____ comfort _____ model _____?

_____ features of _____ a role in _____ power _____?

_____ you tell me _____ the _____ that use _____ power _____?

What _____ of contemporary _____ lower _____ use?

Does newer models _____ without _____?

Is newer _____ keep _____ convenience _____ reducing power _____?

What _____ to new _____ that _____ energy _____ without affecting user _____?

There are _____ use _____ electricity and _____ be _____.

_____ models help reduce _____ consumption _____ convenience.

What _____ models _____ power usage?

Which _____ zap less _____ keeping _____ with the pace of _____?

_____ about the _____ contemporary _____ that make them more energy-saving _____ user-friendly?

_____ newer models have characteristics _____ compromising convenience?

_____ do new features _____ use _____?

_____ really use less electricity and _____ be _____?

_____ notable contributions _____ the new models make _____ and minimize _____?

_____ recent model upgrades reduce electricity _____?

_____ certain innovations _____ more advanced _____ ensure practicality _____ cutting _____ electric _____?

Can _____ their convenience while cutting _____?

What _____ improvements are made _____ maximize _____ affecting user comfort?

_____ you tell _____ about the _____ models _____ less power _____ more _____?

_____ you tell us _____ latest models that _____ maintaining convenience?

Which characteristics _____ power consumption?

Which technological improvements _____ recent _____ to lower energy _____?

_____ the latest _____ less _____ still be convenient?

_____ newer _____ features help reduce _____ consumption and _____ their _____?

Do _____ models have any _____ lower _____ usage without _____?

_____ features in newer models _____ electricity _____.

How _____ newer _____ benefit from less _____?

_____ characteristics _____ greatly decrease _____ usage?

_____ anything _____ could tell me _____ key factors _____ contemporary _____ enhance _____ capabilities _____ ensuring user-friendly experience?

_____ new model have _____ best _____?

Which new _____ you cut _____?

_____ are the _____ recent _____ that reduce power _____?

How _____ the _____ models _____ reduce _____?

New _____ recent models _____ decrease power _____ and _____ convenient.

_____ new _____ saves _____ and _____ easier?

_____ the key _____ that _____ electricity _____ recent models?

Is _____ appliances _____ notable contributions to reducing power _____ while still _____ added _____ consumers?

The _____ recent models _____ use _____ features reduced power _____ in _____?

Which _____ recent _____ decrease power _____?

_____ new _____ in saving _____ but _____ to use?

Which _____ characteristics _____ power _____?

The _____ models _____ use _____ convenience.

_____ characteristics of newer _____ that _____ power _____.

How _____ newer model attributes _____ while _____ energy _____?

There _____ newer _____ that _____ less power but _____ convenience.

How _____ the _____ models reduce energy _____ without _____ ease _____?

New _____ in _____ models _____ consumption _____ retain convenience.

_____ models use less _____ and still _____ convenient?

The recent _____ reduce power _____ while maintaining _____.

_____ new _____ energy _____ without losing ease of _____?

_____ newer _____ will zap less _____ keeping _____?

Is it _____ in newer _____ usage _____ maintaining convenience?

Can _____ power _____ be _____ to _____ improvements made in _____ models, _____ convenience _____ the same time?

New models _____ power _____ convenience.

_____ less electricity and be convenient?

Which _____ in _____ models _____ to decreased _____?

What _____ latest _____ do to _____ use?

_____ notable contributions _____ make _____ minimize power consumption?

Can the _____ in _____ usage _____ result _____ made _____ newer models, _____ still improving convenience?

Do _____ have specific _____ that _____ consumption?

There _____ of recent models _____ usage effectively.

What _____ model attributes _____ to _____ the _____ of _____?

_____ the latest _____ help cut _____?

_____ technological improvements enable the _____ recent _____ to _____ lower energy _____?

Which features _____ the _____ models _____ most _____ reducing energy _____?

_____ features _____ help _____ electricity usage?

_____ models _____ reduce power use.

_____ fresh models _____ while being _____?

The _____ features of _____ models _____ role _____ power consumption.

How do _____ model's _____ help _____ without losing convenience?

_____ you _____ me _____ elements that reduce power _____ newer _____?

_____ decrease in power use be attributed to _____ in newer _____ improving _____?

Which _____ model _____ energy?

_____ features _____ newer _____ help _____ electricity _____?

_____ the _____ in _____ to _____ improvements _____ in newer models, while still improving _____?

Is _____ specific features _____ models that _____ usage without _____ ease _____ use?

_____ models _____ and _____ less electricity?

Does _____ appliances _____ notable contributions toward reducing power requirements _____ added _____?

_____ new _____ saves energy and _____?

_____ are _____ specific _____ decrease power usage in _____?

Which features _____ newer models _____ most _____ consumption?

Which _____ of updated _____ help _____ power _____ still _____ convenience?

_____ would like _____ know _____ recently-launched _____ that _____ energy _____ but _____ practicality.

Which _____ decrease power _____ without compromising _____?

_____ models _____ lower power consumption while maintaining _____?

_____ appliances _____ notable contributions toward reducing power requirements?

Is _____ that _____ contributions toward reducing power _____ while still _____ flexibility _____ consumers?

_____ do newer model _____ decrease _____?

What important contributions _____ the _____ towards reducing _____?

How _____ models _____ power consumption _____ sacrificing _____?

_____ features _____ models _____ the biggest _____ on reducing _____ consumption?

_____ attributes _____ models _____ can lower power usage.

_____ newer model _____ diminish _____ still provide convenience.

Can you _____ the _____ that _____ power _____ and _____ have convenience?

_____ can _____ latest _____ power _____ without compromising convenience?

How _____ fresh models _____ being _____?

Is _____ a _____ explain the _____ of modern _____ that enhance _____ capabilities while ensuring _____?

What _____ the _____ that maximize energy efficiency _____ affecting _____ comfort _____ of _____?

Is _____ that _____ models contribute _____ electricity usage by _____?

_____ reduce power consumption _____ maintain convenience?

_____ new features decrease power consumption _____?

How were _____ upgrades able to reduce _____ compromising _____?

What _____ in _____ models that save electricity?

Can _____ tell _____ public _____ the _____ models that lower _____ consumption _____ still _____?

_____ you _____ out _____ latest models _____ power while maintaining _____?

How _____ the latest _____ usage while retaining _____ of _____?

_____ of recent _____ decrease _____ consumption?

Which new model _____ power _____?

Can you tell me _____ modern _____ more _____ and user-friendly?

_____ the _____ models _____ efficiency without affecting _____ comfort?

_____ features of updated _____ important _____ in reducing _____ consumption?

Which features _____ newer models _____ most _____ consumption?

_____ in _____ effective in reducing energy consumption?

_____ in recent models reduce _____?

_____ contribute _____ less _____ newer models?

The newest _____ can help _____ compromising convenience.

What can the newest _____ usage _____ losing _____ of use?

What parts _____ modern models _____ the _____ power _____?

_____ specific features _____ models _____ decrease _____ without _____ ease of use?

Which of the _____ cut _____ most?

I _____ know about _____ recently _____ that _____ waste but retain _____.

Is the _____ models _____ reduce _____ consumption _____ convenience?

Which features of _____ models _____ power _____ reduction?

Which features lower energy consumption _____ high _____ convenience _____ newer _____?

Can you _____ more _____ the key factors _____ that _____ capabilities _____ ensuring user-friendly experience?

_____ tell _____ the _____ decrease _____ use in newer models?

_____ save _____ and still be easy to _____?

_____ are the main _____ that _____ recent models?

_____ do _____ newer _____ energy use?

Do _____ notable _____ toward _____ power requirements while _____ providing added flexibility _____?

New _____ recent _____ decrease power _____.

_____ conserve power yet are user-friendly?

_____ feature in newer models that decreases energy _____ without _____ the _____?

Which characteristics _____ difference in reducing _____ consumption?

_____ new model _____ less _____?

_____ in _____ models reduce _____

_____ contributions _____ the _____ to reducing _____ consumption _____ maintaining user convenience?

_____ appliances offer notable _____ reducing power _____ still _____ added flexibility for _____?

Can you tell us about _____ new _____ power consumption _____?

_____ specific _____ of _____ major _____ in reducing power consumption?

Can _____ us about _____ latest models _____ use _____ power _____ still _____?

_____ new models _____ energy efficiency _____ user _____?

How _____ upgraded _____ electricity consumption _____ compromising convenience?

Which particular _____ of updated _____ role _____ reducing power _____

_____ stuff _____ energy _____ is easy to use?

Does _____ model have _____ improvements _____ lower _____ without sacrificing _____?

What are the _____ models that _____ power _____?

What _____ features help _____ and _____?

Does newer _____ features contribute to _____ consumption _____ retaining _____?

Which _____ models lower energy _____ while _____ a _____ level _____ convenience?

_____ tell me about _____ new models _____ lower power _____ convenience?

_____ the _____ trait _____ newer models that _____ electricity?
 _____ improvements _____ new models maximize _____ efficiency without affecting _____?
 _____ the specific characteristics of _____ that _____ power _____?
 _____ changes are _____ newer designs to _____ requirements?
 What contributions _____ newer _____ towards _____ requirements while _____ providing _____ flexibility for _____?
 _____ features _____ updated _____ in reducing power consumption?
 What _____ made _____ to maximize energy efficiency without affecting _____?
 _____ do _____ energy usage while still _____ convenience?
 _____ it possible to _____ that _____ power usage in _____ while _____ ease _____?
 What _____ of contemporary models help _____ losing _____?
 How _____ upgrades _____ electricity use _____ compromising convenience?
 Is there _____ in _____ models that _____ energy usage _____ compromising _____ use?
 _____ fresh models that conserve _____ are _____ at the _____?
 _____ newer _____ reduce power _____ while _____ being _____?
 The newer model _____ diminish _____ but _____ provide _____.
 Do _____ models _____ that significantly reduce _____ consumption?
 _____ characteristics _____ models decrease power _____ without _____ convenience?
 _____ do the _____ cut down on power consumption _____ convenient?
 Which _____ more _____ proven to be _____ effective at using _____ energy?
 _____ of updated _____ play _____ crucial _____ reducing power consumption?
 Which technological _____ allow _____ to _____ energy use without _____?
 Is _____ possible that newer appliances _____ contributions toward _____ requirements _____ providing _____ to consumers?
 _____ features of _____ to reduce power _____ the _____?
 _____ newer models _____ have lower _____ without _____ convenience.
 _____ new _____ cut _____ use.
 _____ it _____ that _____ are _____ power requirements while still _____ consumers _____ flexibility?
 _____ model attributes diminish energy _____ still providing _____.
 Is _____ to _____ key factors of modern _____ that enhance energy-saving capabilities _____?
 Why have _____ upgrades _____ consumption without compromising _____?
 _____ ensuring user _____ unrestricted, what _____ the latest _____ advancements _____ to _____ power _____?
 _____ features in the _____ models _____ energy _____ while maintaining _____ high level _____?
 _____ new gadgets _____ zap less _____ inoud?
 _____ attributes bring _____ substantial _____ in power usage _____ convenience.
 _____ there _____ feature _____ significantly decreases energy usage without compromising _____ of _____?
 Is there _____ attributes of _____ models _____ usage _____?
 Can _____ decrease _____ power _____ be attributed _____ improvements made in newer models, while _____ convenience _____?
 What features _____ newer _____ the _____ impact _____ power consumption?
 Which _____ model _____ power consumption?
 _____ characteristics limit _____ without sacrificing comfort?
