

[Demo] NLP Dataset for Customer Service Automation

Company Type	Home Appliance Manufacturers
Inquiry Category	Product performance and efficiency questions
Inquiry Sub-Category	Noise Level
Description	Customers ask about the noise levels generated by our appliances, seeking information on quiet operation and potential vibrations.
Data Size	5,189 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Home Appliance Manufacturer" customer inquiry. (Purchased data will not be masked.)

____ I expect ____ this specific product model?

Is ____ vibrated?

Does ____ deliver ____ vibes?

Could there be ____ chance ____ this product?

Is ____ be low in ____?

____ be little to no ____ this product ____.

This ____ model might ____.

I want to ____ I ____ low oscillations ____ product.

____ this ____ for ____ little ____?

Is ____ a chance of ____ tremors ____?

____ any expectation ____ minimal vibration from ____ particular ____?

Is it possible ____ this ____ will ____ others?

____ impact from this ____?

Is the product ____ the vibrations ____?

____ you think ____ product ____?

____ on ____ shakes ____ usage?

Does ____ model ____ low ____?

____ the model ____ to ____ low ____?

Is ____ possible to ____ using this product?

____ there minimal ____ this product?

____ wonder ____ I can ____ any ____ minimal ____ model I'm using.

____ am ____ sure ____ I ____ low ____ with this ____.

____ expect ____ minimal noise from this ____ product ____?

____ this ____ low vibration?

____ shaking from ____ is expected?

____ this model ____ in ____ resonances?

____ it ____ me ____ minimal vibration levels using this ____?

Count ____ shakes ____ said ____?

Is ____ model ____ to ____ limited ____.

Is _____ going to _____?

The _____ will _____ minimal _____?

I wonder _____ can _____ minimal levels of vibration _____.

_____ this product _____ than others?

_____ there _____ little vibration here?

I _____ can _____ minimal vibrating levels _____ this item.

Do _____ think _____ minimal resonances from _____ model?

Is it _____ can _____ little vibrating _____ here?

_____ model _____ probably produce minimal _____.

_____ this model _____ result _____ vibration?

_____ limit the resonances?

Any chance _____ small movements _____?

Is _____ able _____ low resonances?

_____ I _____ less _____ it?

_____ this model _____ have minimal _____?

Can I _____ on _____ with _____.

_____ be quieter?

_____ possible _____ minimal vibration levels in this _____?

Does _____ model _____ a _____?

_____ of _____ vibrating less?

_____ be _____ version of this model _____ is _____.

_____ this model has a reduced _____?

Does _____ have _____ in vibration?

Is it possible that _____ is few _____?

I _____ if _____ product _____ for minimal _____.

Are _____ to _____ limited vibrations using this _____?

_____ am _____ if I can _____ minimal vibrations _____ product _____.

_____ model offer low _____ noise?

_____ might _____ less than _____.

_____ the product _____ little _____?

_____ this model _____ it _____ in low vibrations?

_____ there any chance I _____ oscillations with _____?

There _____ no shaking with this _____ model.

_____ using this particular _____ anticipate minimal levels _____?

_____ model have _____ vibrates?

Is this _____ minimal vibrations?

_____ this model _____ resonances?

_____ am unsure _____ anticipate _____ oscillations _____ this product.

This _____ result in low _____.

Can _____ on diminished tremors _____?

_____ it a _____ minimal vibration?

Count on _____ for _____?

_____ there seem to be _____ when _____?

_____ it a _____ for _____?

_____ it _____ expect minimal vibrations _____ using _____ model?

Does _____ model _____ vibration _____?

_____ possibility that _____ is a _____ this _____ that is vibration-proof.

_____ possible to _____ least amount of _____ from this _____?

Is there any _____ this _____ product model _____ vibrations?

_____ a question _____ to _____ model's _____ limited or not.

I _____ if this particular _____ less _____ others.
 I _____ a reduced vibration.
 Is _____ for _____ to _____ minimal vibrations?
 Will _____ model be able _____?
 Expect _____ vibrations from this _____?
 _____ sure if I _____ lot _____ buzz with this product.
 _____ product model _____ vibrations?
 _____ possible to _____ minimal vibrating _____ when using _____?
 _____ product low _____ vibe?
 _____ tremors when using it?
 If _____ use _____ can I anticipate _____ of _____?
 The _____ result in _____ vibrations.
 _____ I able _____ rely _____ tremors with _____?
 _____ model will be _____ to _____.
 Do I _____ frequencies _____ item?
 _____ wonder if I _____ kind _____ minimal _____ with _____ I'm using.
 _____ the _____ capable of producing _____?
 _____ possible to guarantee minimal _____ from _____.
 Will _____ result _____ low _____?
 _____ this _____ model going _____ minimal _____?
 Is _____ possible for _____ to _____ minimal _____ this _____ model?
 _____ this _____ reduce the _____?
 It _____ low _____ this _____?
 _____ from this model?
 Is _____ likely to cause _____ waves _____?
 I _____ know _____ will _____ with this item.
 Will the _____ endure low _____?
 _____ the model _____ to reduce the amount _____?
 _____ I _____ on this _____ to make _____ jittery?
 Shouldn't _____ expect _____ of trembling from this _____?
 The _____ have minimal _____?
 Can I expect _____ this product?
 Can the _____ low levels _____?
 Was there any chance _____ product?
 Is _____ I can _____ on minimal _____ vibration?
 Is _____ particular _____ in _____ vibrations?
 _____ low vibrating?
 _____ would like _____ know if I can _____ minimal _____ using _____.
 _____ this _____ reduce _____ a minimum?
 Will the _____ produce _____?
 Will using this _____ noise _____?
 Is _____ specific _____ model going _____ cause _____?
 _____ I _____ able to anticipate minimal vibrating _____ this _____?
 Is it _____ to _____ on minimal _____ from _____ item?
 Does _____ have _____ levels _____ sound?
 _____ this _____ model _____ users limited vibrations?
 Expect no _____ model?
 Will _____ product _____ the amount _____?
 This model is expected _____?
 Expect not _____ from _____?

Is _____ that there are minimal _____ it?

_____ I expect _____ levels _____ with _____ product?

_____ a chance I _____ feel _____ buzz with _____ product.

Is it _____ that there can be _____ ?

_____ product _____ to _____ the vibrations?

Is _____ safe to _____ this _____ my stuff?

Is this _____ product for _____ ?

_____ this _____ limit the vibrations?

_____ will be little to _____ vibrations _____ model.

_____ on reduced _____ the _____ of _____ prototype?

I wonder if there _____ any _____ tremors _____ product.

_____ will be _____ to _____ rattle experienced with _____.

I want to _____ if _____ can _____ minimal _____ vibration _____ this _____.

Is _____ possible _____ I _____ minimal vibration _____ using _____ product?

_____ think the product _____ the _____ ?

Is _____ model _____ noise?

_____ there any chance of _____ vibrations _____ using _____ ?

_____ you think _____ model _____ minimally?

I _____ wondering if I _____ on _____ with _____.

_____ the _____ of _____ the noise?

I _____ if the _____ I'm using _____ some _____ of _____ vibration.

_____ this _____ low fluctuations?

Is _____ I _____ on minimal _____ from this particular _____ ?

_____ if the _____ model _____ using will _____ some _____ of _____ vibration.

_____ anticipate low _____ with this _____ ?

Will _____ less noisy?

Can I _____ certain _____ rattle me?

_____ this _____ minimize noise?

_____ low vibrate?

Is _____ of little levels of _____ ?

I _____ know _____ can expect some kind of minimal vibrations _____ model _____.

Will this _____ be _____ vibration?

_____ this _____ me _____ get _____ vibrations?

_____ resonances from this particular _____ ?

_____ the product be _____ the _____ ?

_____ model result _____ a low _____ ?

_____ chance of minimal vibrations from _____ this _____ product _____ ?

I _____ if _____ some kind _____ minimal vibrations with _____ I'm _____.

_____ low vibrations _____ model?

Count _____ less _____ that _____ ?

_____ minimal level _____ vibration _____ item?

_____ expect _____ oscillations with this _____.

There _____ minimal _____ from this _____ ?

_____ little _____ from this _____ ?

Will _____ model _____ free?

_____ product _____ able to produce _____ ?

Is _____ likely that _____ will _____ utilizing _____ model?

I don't know if I can _____ any _____ of _____ with _____.

_____ the low _____ model _____ expected?

Will the _____ vibrations _____ minimum?

____ you ____ a chance of ____ this product?
 Will ____ result ____ low ____?
 Will ____ product model ____?
 ____ know if I ____ minimal levels ____ vibration ____ using this ____.
 Is it ____ to reduce ____ a minimum level ____?
 Count ____ shakes through the ____ prototype?
 Count ____ reduced shakes when ____?
 Does ____ minimal ____?
 ____ this ____ able to ____ vibration?
 Is ____ model going ____ noises?
 ____ will ____ minimal ____ from ____ model?
 Will this product ____ a ____?
 ____ there less ____ from ____?
 Is ____ any ____ little vibration ____?
 ____ expected to ____ low ____ using it?
 Expect ____ noise ____ model?
 ____ reduced shakes from ____?
 ____ low frequencies with ____ thing?
 Is ____ capable of ____?
 ____ product be less ____ than ____ products?
 ____ wonder ____ the product model ____ me some ____ of minimal ____.
 Is ____ of producing ____ vibration?
 ____ possible for this ____ minimal vibration?
 ____ I ____ low fluctuations ____ product?
 Can you assure ____ shakes ____ it's use?
 I ____ wondering if ____ am ____ have some kind of minimal ____.
 ____ to know if I can count on ____ levels ____.
 Do ____ will be minimal ____ from ____ model?
 Is it ____ will ____ minimal vibrations ____ it?
 ____ possible I ____ on ____ levels ____ this particular item?
 ____ the ____ for ____ vibration?
 ____ product ____ vibes?
 ____ this ____ model ____ to ____ limited ____?
 Is ____ anticipate minimal ____ levels ____ this product?
 Can ____ expect ____ noise from ____ particular ____?
 ____ this model ____ low ____?
 ____ to experience limited vibration ____ this specific ____?
 ____ model result ____ vibrations?
 ____ model have reduced ____?
 I am ____ if I ____ vibration levels ____ product.
 I ____ the product ____ using ____ have some ____ of ____ vibrations.
 I ____ if I ____ count ____ low levels ____ vibration ____.
 Is this ____ to limit ____ vibrations?
 Will ____ the vibration?
 ____ model reduce the ____?
 I ____ if ____ much buzz with this ____.
 ____ there any ____ of low ____ on ____?
 I bet I won't ____ a ____ of ____.
 There will be little ____ noises ____ particular ____ model.
 Can this ____ for ____ vibrations?

_____ on a _____ amount of _____ from _____ item?

Will this _____ have _____?

Is _____ product for _____?

_____ low _____ expected to _____?

_____ specific _____ may have _____.

I would like to _____ if _____ this item.

_____ it possible to _____ levels using _____ product.

_____ am _____ expect some _____ minimal vibration _____ the product _____ I'm using.

_____ vibrate less than _____ products?

_____ the _____ model _____?

Will _____ product _____ produce _____?

Is this _____ product going _____ vibrate less _____?

_____ want to know _____ I _____ expect some kind _____ product I'm _____.

_____ it _____ relied _____ for reduced _____?

This _____ supposed _____ result _____ vibrations.

_____ this _____ vibrate less?

Is _____ possible there are _____ it.

_____ the _____ reduced in _____?

Will _____ not vibrate _____?

Will this _____ low vibes?

There will _____ from this _____?

_____ product is _____ minimal vibration?

_____ vibrate less _____ others?

_____ this _____ capable _____ vibration?

_____ see low oscillations with _____?

There will be little _____ particular model.

_____ able _____ the level of vibration?

Is _____ limited vibrations using _____ model?

_____ is it for _____ vibrations?

_____ to know if _____ can _____ low oscillations _____ product.

_____ it _____ have low vibration?

Is this _____ of _____ low _____?

Is _____ model _____ cause limited _____?

_____ this _____ endure low vibrations?

_____ there _____ reduction _____ the _____ in this _____ model?

Is it _____ less vibrations?

_____ there be _____ from _____ specific model?

There is _____ chance that this _____ a _____.

Can _____ product _____ have _____?

Does _____ vibes _____?

_____ a low noise level?

_____ there be minimal _____ model?

I _____ if _____ for _____ vibration?

_____ product good for _____?

_____ it _____ to _____ to reduce vibrations?

_____ product model _____ minimal _____?

Is it _____ to _____ levels of vibration _____?

Is this _____ supposed _____ result _____?

Does this particular model _____ a _____?

Count _____ less shakes _____ usage _____?

I ____ to know ____ you ____ guarantee ____ vibrations from ____ ____ .
 ____ ____ ____ produce less noise.
 ____ it ____ ____ anticipate ____ fluctuations with this product?
 Count on ____ ____ the ____ ____ said prototype?
 ____ I ____ ____ not to vibrate?
 ____ ____ possible to count ____ minimal ____ from this ____ ____ .
 Is ____ possible ____ ____ model to have ____ ____ ?
 How ____ the model result ____ ____ ?
 Will ____ ____ result in ____ ____ expected?
 Is ____ likely ____ users ____ ____ limited vibrations with ____ ____ model?
 I'm wondering ____ the ____ model ____ using ____ ____ me ____ kind ____ ____ vibrations.
 Will ____ model not suffer ____ ____ ?
 I am ____ ____ I can ____ some kind ____ ____ vibration ____ the product ____ ____ ____ using.
 Can I ____ ____ a ____ ____ from this ____ ?
 The ____ model will ____ ____ ____ .
 ____ the model ____ ____ noise ____ ?
 Does ____ ____ bring ____ vibrations?
 ____ this model be ____ to ____ ____ of sound?
 Is it ____ that ____ ____ ____ using this version?
 There will be little ____ ____ resonance ____ ____ ____ model.
 ____ the ____ reduce ____ vibrations?
 ____ ____ product model have ____ ____ ?
 I would ____ to know if ____ ____ ____ have minimal ____ .
 ____ product ____ will ____ less
 Using ____ model, will it ____ ____ ____ noise?
 Can ____ ____ minimal noise ____ using ____ model?
 Is ____ particular product for ____ ____ ?
 Is ____ product ____ a ____ ____ ?
 ____ there a ____ ____ will ____ vibrations to ____ minimum?
 ____ it ____ to count ____ ____ vibration ____ ____ this item?
 Will ____ ____ product ____ ____ ____ than others?
 Will ____ have only a ____ ____ ?
 Is this product ____ ____ ____ ?
 ____ this ____ ____ vibrations ____ a minimum?
 ____ the ____ ____ produce less ____ ?
 Is ____ ____ model ____ to have ____ ____ ?
 Is the ____ ____ ____ vibration?
 Expect ____ sound from ____ ____ ?
 ____ there any chance ____ ____ ____ this ____ product model?
 ____ this model deliver ____ ____ noise ____ ?
 ____ ____ ____ this ____ not to make me jittery?
 ____ using this ____ limit ____ ____ ?
 Is it guaranteed that there ____ ____ ____ using ____ ?
 Will ____ particular product ____ ____ vibrating ____ ____ ?
 Will ____ ____ reduce ____ vibrations?
 Will this model ____ ____ ____ vibrations?
 Can ____ ____ ____ levels when using this ____ ?
 ____ ____ particular ____ have ____ levels of ____ ?
 ____ ____ ____ to ____ a low oscillations with this ____ ?
 ____ ____ less shakes ____ said ____ ?

_____ we expect _____ from this _____?
 Is _____ a chance that _____ will _____ using this _____?
 Will _____ only _____ vibrating sensation?
 _____ model _____ vibrate less?
 _____ model reduce _____ to a _____?
 _____ I could anticipate _____ oscillations with this _____.
 Is _____ to _____ minimal noise?
 Does _____ model _____ low _____?
 Do _____ get low energy _____?
 _____ the _____ model likely to _____?
 Do _____ this _____ model will _____?
 _____ shaking _____ this model?
 _____ it _____ to anticipate _____ of vibration here?
 Is there _____ vibration levels when I use _____?
 _____ on _____ when _____ it?
 _____ a _____ that is _____ minimal _____?
 _____ is a chance of some minor _____.
 _____ product model vibrates less.
 _____ on _____ tremors with this?
 Is _____ I can expect minimal vibration _____ using _____?
 _____ it _____ I won't _____ the buzz with _____?
 _____ know if _____ feel much of _____ with this _____.
 Is this product's _____ vibrations?
 _____ the _____ reduce _____ of vibrations?
 _____ possible that there are fewer _____ when _____?
 _____ possible to _____ on only _____ from _____ item?
 _____ product, can I _____ low _____?
 _____ this model likely _____ cause _____ vibrates _____?
 _____ the _____ reduce _____?
 _____ wonder _____ product model _____ vibrate _____?
 _____ it possible I can anticipate _____ vibration _____ this _____?
 Is _____ chance _____ small _____ using _____ product?
 _____ this _____ model likely _____ cause _____?
 _____ I _____ rumbles _____ this item?
 _____ this model be _____ the _____ of noise?
 _____ this _____ have low _____ resonance?
 Is _____ reduce the amount of _____?
 The _____ will _____ less vibrate _____.
 Will _____ product model _____?
 Is it possible that _____ of _____ with _____ product?
 Is there _____ little _____ levels _____?
 I _____ if _____ noticeable _____ if using this version.
 I wonder if there _____ using this product.
 Will _____ model _____ amount _____ vibrations?
 Is it _____ I _____ count _____ vibration _____ from this _____?
 Is _____ possible _____ limited vibrations using _____ model?
 Does _____ the amount _____ noises?
 Is there a _____ that _____ will be _____ if _____?
 _____ you _____ this model _____ low _____?
 What if _____ than others?

_____ reduce _____ levels of vibration?

_____ wondering if _____ some kind of _____ vibrations _____ the _____ model I'm _____.

_____ the _____ I'm using _____ have some kind of _____.

_____ product model likely _____ minimal _____?

_____ to _____ if I get low vibrations _____ item.

_____ can _____ the least trembling from _____ one?

Is there a chance _____ slight _____?

Will _____ be able _____ reduce the levels _____?

_____ this _____ model likely _____ result in limited _____?

Do _____ know if _____ vibration is _____ in _____?

Will the _____ be _____ reduce the _____ vibrations?

_____ this specific _____ encounter _____ vibrations?

_____ on _____ levels of vibration _____ this item?

Is _____ cause _____ limited vibrations?

This _____ model _____ likely _____ minimal _____.

_____ model likely to cause _____?

I'm wondering _____ be any _____ of _____ with the product _____.

_____ shakes from _____ model?

_____ model _____ reduction _____ the vibration?

When _____ product, _____ minimal noise?

_____ it, are _____ tremors?

_____ likely to cause limited _____?

Is _____ to expect _____ using this product _____?

_____ is a _____ that is _____.

I _____ there _____ kind of minimal vibrating with the product _____.

I _____ will _____ of minimal vibrations with the product _____ I'm _____.

_____ model _____ any low _____?

_____ reduce vibrates?

Can I _____ to be _____ free?

_____ possible that _____ specific product model _____ have _____?

Is _____ particular product _____?

_____ this _____ going to produce _____?

_____ is _____ chance of _____ using _____ product.

_____ this model _____ vibrations?

Is _____ product for very _____?

_____ the product model _____?

_____ it _____ to expect _____ vibrations _____ the _____ model?

_____ it _____ to _____ minimal vibration _____ this _____ product?

Is it _____ to anticipate minimal _____ levels _____?

Can I count on _____ of _____ item?

Is there _____ from this _____?

_____ model able to _____?

_____ one has _____?

_____ from this particular _____?

_____ possible that users might _____ vibrations using _____?

There will _____ vibrations experienced with this specific _____.

Will the _____ result _____?

_____ this model _____ low _____?

I don't _____ if I can _____ product.

_____ expect minimal vibrations _____ this model?

I don't know if _____ vibrate _____ than _____.
 _____ low vibrating with _____ item?
 _____ on _____ shakes _____ use?
 _____ it _____ that _____ will encounter _____ vibrations _____ model.
 Is _____ that it _____ minimal _____?
 Will the _____ reduce the _____?
 _____ this product _____ amount of _____?
 _____ this _____ reduce the _____ vibrates?
 _____ won't feel much of a _____ this product.
 This _____ will _____.
 _____ possible to _____ frequencies from this item?
 Is _____ model likely _____ cause a limited _____?
 Is _____ product _____ feeling?
 Will _____ model be _____ reduce the _____ noises?
 I don't know _____ low _____ with _____ item.
 _____ that _____ will _____ limited vibrations using _____ model?
 _____ be able to _____ from this item?
 _____ count on _____ from this item?
 Can _____ on _____ tremors _____ it.
 Is _____ particular model _____ vibrations?
 Will _____ model _____ reduce _____ resonances?
 Does this _____ model _____?
 _____ this model _____ reduce the levels _____?
 _____ the _____ model _____ to _____ less?
 I'm _____ if I can _____ minimal _____ levels from _____.
 _____ to _____ minimal vibration _____ this particular product?
 I _____ know if this _____ surprise _____ being _____.
 I'm _____ sure if I _____ feel _____ of _____ product.
 _____ don't know _____ I'll _____ a lot of _____ with _____.
 Is _____ vibration _____ this _____?
 _____ shakes through the _____ of _____ prototype?
 _____ this _____ model be _____?
 Is _____ to have _____?
 Any chance of small _____?
 _____ result in low _____ as _____?
 _____ item _____ me feel low _____?
 Is _____ possible to _____ levels when using _____?
 Is _____ to reduce _____ to a _____?
 _____ this product going _____ vibrate less _____?
 _____ that there _____ tremors when you _____ it?
 Is _____ going to _____ frequencies?
 _____ to expect _____ of trembling from this _____?
 Is _____ possible _____ count on _____ levels _____ this _____?
 Should I _____ trembling _____ one?
 _____ the model _____ noise?
 _____ movements from this _____?
 _____ tremors using this product?
 _____ the product _____ little?
 Can I expect minimal _____ product?
 Can _____ be sure _____ won't feel _____ this _____?

I _____ if _____ can _____ minimal vibration levels _____ product.

_____ any _____ of low _____ with this _____?

I want _____ know if _____ minimal vibration _____ with _____.

_____ users _____ to experience limited _____ model?

Is it possible for me _____ levels _____ particular _____?

_____ it likely that _____ have _____ vibrations?

_____ be less trembling from this one?

Do I have _____ minimal vibration _____ item?

_____ this _____ any chance _____ slight tremors?

Does _____ item _____ levels of _____?

I'm _____ if _____ product model _____ will _____ minimal _____.

_____ reduce _____ a minimum level?

_____ reducing _____ be possible?

I wonder if _____ vibration.

Does the _____ vibration?

_____ I trust _____ it?

Is it _____ product _____ vibrations?

_____ there _____ minimal _____ of vibration _____ item?

Is it _____ to _____ little vibration _____?

_____ product not _____ much as _____ products?

Is _____ to expect minimal _____ this particular _____?

_____ if _____ get low _____ with it.

Will _____ limit _____ amount of _____?

Is there a _____ that this _____ slight _____?

_____ this product _____ not vibrate _____?

_____ mild tremors using this _____.

Is _____ I _____ feel _____ buzz with this _____?

Does this _____?

_____ product _____ vibrate less?

_____ there any minimal levels of _____?

Does _____ product model _____ vibrations?

Will this _____?

_____ you think _____ tremors when using _____?

_____ product _____ in vibes?

_____ shaking from this model?

Expect _____ thumps from _____?

Do _____ sound with this _____?

_____ the _____ model _____ using will cause _____ of minimal vibration.

Is it _____ only _____ vibrations?

_____ expected to _____ low frequencies?

_____ this _____ going _____ minimal vibration?

Do _____ get _____ vibes from _____?

_____ it _____ anticipate _____ vibrations _____ using this _____ product?

_____ low levels of _____ this product?

_____ using this _____ model are _____ to _____ limited _____.

_____ less vibrate?

Is it _____ for _____ product _____ to _____ minimal _____?

_____ think this is a _____ vibrations?

_____ wonder if I _____ get _____ vibration with the _____ model _____ using.

_____ this _____ of product _____?

____ product model might _____.
 Can ____ be sure that _____ won't _____ bones?
 _____ expect _____ from this model?
 I ____ if _____ anticipate minimal vibration _____ product.
 _____ a product _____ resonance?
 _____ to use _____ minimal vibrations?
 Do ____ think there's ____ chance of ____ tremors _____?
 _____ this product designed _____?
 Is ____ a chance ____ this product ____ have _____?
 _____ wondering _____ get low vibes with _____.
 Can this ____ be _____ reduce ____ levels of ____?
 Is ____ possible to ____ minimal _____ with ____ product?
 This product _____ able to _____ amount of ____.
 _____ I'll feel any buzz with ____ product.
 _____ anticipate _____ levels when using ____ product?
 This ____ product may ____ less _____.
 _____ model ____ vibration?
 _____ expect ____ vibrations from this _____?
 Will _____ little noise?
 Does the _____ a minimum ____?
 _____ possible to get ____ vibrations _____ model?
 _____ be _____ vibrates less than others?
 Is it ____ that ____ version ____ this model _____?
 Is it likely _____ experience _____ this model?
 _____ if ____ product ____ I'm using will _____ free.
 I want to _____ can _____ minimal ____ levels _____ particular item.
 _____ to know _____ low vibrations with this _____.
 _____ low vibration expected?
 _____ possible ____ count on ____ minimal levels ____ vibration from _____?
 _____ don't know if I can ____ on minimal _____ this _____.
 _____ possible that I can count _____ levels of ____ from _____?
 Does the _____ amount ____ sound?
 _____ it possible to predict minimal ____ levels _____ particular ____?
 There is ____ possibility of _____ this _____.
 I wonder _____ using _____ some kind of minimal vibrations.
 _____ tremors can ____ rely _____ it?
 _____ the _____ vibration effectively?
 _____ I see ____ fluctuations with _____?
 _____ the model going _____ of noise?
 _____ possible for _____ expect minimal vibrations ____ using this ____?
 _____ this product be less _____?
 _____ a ____ version of _____ a ____?
 Can _____ the reduced _____ this?
 Is _____ give minimal vibrations?
 _____ would _____ I ____ expect minimal vibrations from using ____ model.
 _____ product ____ able to _____ ripples?
 Does it _____?
 _____ product used for ____ noise?
 Can I ____ it _____?
 I _____ model _____ low vibrations.

____ this product ____ produce ____ vibrations?
 ____ the ____ I'm ____ will provide me with ____ kind of ____ vibrations.
 Expect ____ frequencies ____ this ____?
 ____ expect ____ product to ____ low ____?
 ____ wondered if ____ expect ____ kind ____ minimal ____ the ____ model I'm using.
 Can ____ noise from ____ particular product?
 Will the ____ be ____?
 ____ I ____ a ____ vibrating ____?
 Do you think there will be ____?
 This ____ the amount ____ vibrations.
 Is this specific model ____?
 Will ____ product ____ have ____?
 ____ have ____ tremors ____ it?
 Is this model ____ reduce ____ of ____?
 Is ____ model ____ to ____?
 ____ to know if you guarantee ____ using it.
 ____ I count on ____ not ____ distress?
 ____ the ____ model less ____?
 Count on ____ coming ____ prototype?
 ____ I ____ low noise from ____?
 ____ have a reduction ____ vibration?
 ____ will be ____ no rattle experienced ____ product ____.
 Does this ____ reduced ____?
 ____ a product ____ movements?
 Will the ____ able ____ vibration?
 I don't know ____ minimal vibrations ____ this ____ model.
 Is ____ to ____ minimal ripples ____ this ____?
 There is ____ question ____ vibes are ____ or not.
 ____ only have ____ slight ____ sensation?
 I am wondering ____ anticipate minimal vibration levels ____.
 ____ don't know ____ I get low ____ with ____.
 ____ know if ____ get low ____ with ____ item.
 I ____ if this ____ is for ____.
 ____ wonder if ____ expect ____ product ____ I'm ____ have some ____ of minimal ____.
 Is ____ product model ____ to ____?
 ____ a lower ____ than others?
 ____ possible to predict minimal ____ levels with ____?
 ____ the product ____ less?
 ____ if ____ can expect ____ vibrations ____ the ____ model I'm ____.
 ____ possible ____ less trembling from this ____?
 Are ____ experience ____ vibrating?
 Will ____ product ____ less ____?
 Is ____ specific model more ____ limited ____?
 ____ a chance of small ____ product?
 Is ____ possible that I will ____ little ____?
 Do ____ get ____ vibes ____ item?
 Is the model ____ cause ____ to encounter ____?
 ____ this particular model ____ users to ____?
 Do ____ funky ____ with its ____?
 ____ no shake from ____?

This product may vibrate _____.

Is it _____ can _____ low _____ with _____ product?

_____ product cause _____ oscillations?

_____ it guaranteed _____ there _____ minimal _____ using it?

Count _____ fewer _____ the prototype?

_____ can I _____ with this _____?

_____ possible _____ least _____ of trembling _____ come from this _____?

_____ possible _____ see low oscillations with _____ product?

Does the item have _____?

_____ this _____ model _____ to produce limited _____ users?

I _____ I can _____ minimal levels _____ using _____ product.

_____ count on _____ vibration _____ item?

_____ count on a minimal _____ of _____ from _____?

_____ will be _____ to _____ with this specific _____.

_____ I expect it _____ least trembling _____ one?

Is _____ a _____ vibes _____?

_____ this product won't _____ my materials?

_____ model _____ in low vibrations?

_____ it possible to anticipate _____ here?

_____ product able to limit _____?

Is _____ low _____?

Is _____ possible _____ see _____ vibration _____?

_____ model _____ in vibration?

_____ it possible that this _____ minimal _____?

Is _____ that this model _____?

_____ are _____ about the product _____ minimal _____.

Is this _____ reduce _____ resonances?

Is _____ possible _____ the _____ have _____ shaking?

_____ for me _____ minimal vibrations from this _____ product _____?

_____ this model, will _____ result _____?

_____ it possible _____ can anticipate _____ vibration _____?

_____ is _____ small _____ using this product?

Is there _____ that users will _____ this model?

Is _____ expected to _____ low _____ using _____?

I would like _____ if _____ can get low _____.

_____ minimal _____ levels from this _____?

Can _____ on _____ product _____ to _____?

I am _____ count on minimal levels _____ from _____ item.

Will _____ result _____ low vibrations?

_____ this _____ limit the vibration?

_____ there any _____ that _____ will _____ vibration _____ here?

_____ this _____ able _____ the amount of _____?

_____ the _____ capable of reducing the _____?

_____ wonder _____ will _____ kind of minimal _____ with _____ product I _____ using.

Count _____ shakes _____ said _____ usage?

I wonder if this is _____.

_____ product _____ the amount _____ vibrating?

Does _____ make low _____?

Expect _____ this model?

This _____ could _____ less.

I don't _____ if _____ can _____ low _____ with _____.
 _____ this _____ going _____ reduce _____?
 _____ wonder if there _____ minimal vibrations with _____ product _____.
 I _____ to know _____ has _____ vibrations.
 _____ product vibrate less _____ products?
 Is _____ that _____ anticipate minimal vibration _____ using _____ product?
 _____ it _____ see low oscillations _____ this _____?
 _____ know if I _____ expect any _____ vibrations with the product _____.
 The _____ minimal vibration.
 Is it possible _____ expect _____ from _____ particular product _____?
 _____ there any _____ minimal _____ levels with _____ product?
 _____ it feasible that _____ provides _____?
 Is _____ possible _____ expect _____ vibrations _____ this particular _____?
 _____ this product will vibrate _____?
 _____ using _____ limit the _____ of _____?
 _____ reduced in vibration?
 Will _____ be able to reduce _____ level _____?
 _____ it possible _____ me _____ minimal levels _____ vibration _____ this product?
 I _____ low vibrating with this item.
 Is _____ less _____ others?
 _____ product have _____ chance of _____ slight _____?
 _____ funky _____ accompany its _____?
 Does _____ mean that _____ lot of _____ with this _____?
 _____ item have _____ level of _____?
 _____ possibly a chance _____ slight _____ this product.
 _____ model _____ in _____ vibrations?
 Will _____ product model _____?
 _____ model _____ result in low _____.
 _____ I _____ with this product?
 _____ model _____ vibration?
 _____ if I can _____ low oscillations with _____.
 Is it _____ to _____ on minimal levels _____ from _____.
 _____ model likely to cause _____?
 _____ this _____ cause limited noise?
 Does _____ model _____ amount of _____?
 _____ the product _____ levels of vibration?
 _____ I have _____ shivers _____ one?
 _____ wonder if _____ contraption will surprise _____ vibrate-free.
 _____ model _____ able _____ reduce vibrations.
 Will there be _____ shaking _____?
 Do _____ model will result in _____?
 Is it _____ can anticipate low _____ with _____?
 _____ this product model _____ noise?
 _____ there _____ of small _____ using _____ product.
 Is _____ a _____ noise?
 Will _____ the amount of _____?
 _____ you think _____ minimal shaking?
 I would _____ know _____ I _____ anticipate minimal vibrating _____ when _____.
 I would like _____ if _____ can count _____ vibration from this _____.
 Is _____ only has minimal _____?

Is the _____ limited vibrating?

I would _____ know if _____ little _____ levels here.

_____ this product model not _____?

_____ I _____ minimal levels of vibration with this _____?

_____ product _____ the _____ of resonance?

_____ the _____ result in _____ low _____?

_____ item _____ less?

Is _____ for _____ shaking?

_____ model _____ low resonances?

_____ this _____ likely to _____ limited _____?

Is it possible _____ vibration to _____ minimum level _____?

Is _____ possible that this model _____ vibrations _____?

This product _____ than _____ products.
