

[Demo] NLP Dataset for Customer Service Automation

Company Type	Mobile Network Operators
Inquiry Category	Caller ID and call forwarding inquiries
Inquiry Sub-Category	Call Forwarding Troubleshooting
Description	Customers encounter problems with call forwarding, such as calls not being forwarded as expected, and require troubleshooting assistance to identify and resolve the issue.
Data Size	5,088 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Mobile Network Operator" customer inquiry. (Purchased data will not be masked.)

Are there _____ software bugs _____ redials _____ numbers _____ networks currently?

Automatic redialing _____ registered _____ be impacted by _____ issues.

Is _____ feature _____ by any _____ non register lines?

Can the auto-redial _____ unauthorized digits _____ affected by any _____ ?

There _____ be software bugs _____ from _____ they are inGSM.

Do _____ bugs _____ auto redials _____ numbers?

There's _____ auto-redial feature _____ unauthorized digits could be _____ bugs.

_____ there _____ existing software glitch _____ automatic redialing _____ unregistered _____?

_____ feature _____ unauthorized _____ is subject _____ software bugs.

There could _____ software _____ that affect redials _____ numbers, now _____ in _____.

Is _____ any known _____ for _____ calls using _____ network?

_____ of _____ redialing from _____ numbers _____ affected by _____ software flaws.

_____ a _____ that might affect the automatic _____ numbers?

Can _____ auto-Redial feature be _____ by known _____ registered _____?

There _____ be _____ in _____ global _____ networks _____ can _____ redials from numbers _____ in the _____ book.

_____ software _____ redial _____ numbers that were _____ registered yet?

_____ known bugs _____ affect _____ feature _____ non- registered _____?

There are _____ software issues _____ affect the _____ unlisted _____ over a _____.

Any _____ affecting the _____ for _____ registered lines?

There _____ software issues that may _____ redials without _____

Is there _____ software _____ that _____ of automatic redialing from _____?

Do _____ know the _____ affect the _____ function in the _____ phone _____?

_____ are _____ software flaws that could _____ the _____ from illegitimate _____

_____ bugs _____ the _____ weren't registered in the current time _____?

Is _____ a _____ software _____ causes automatic _____ unregistered numbers?

_____ possible _____ there _____ defects _____ the software _____ hamper automatic redialing _____ callers?

The _____ networks may _____ bugs _____ redials from _____ are not _____.

_____ are any _____ software defects _____ non- registered number _____?

Are ____ bugs ____ the ____ numbers ____ aren't registered?
 ____ know ____ a software flaw affects ____ function ____ numbers?
 Is ____ any ____ in ____ software ____ can affect ____ registered numbers
 ____ be software ____ that affect redials ____ unregistered ____ they are in ____.
 ____ software bugs ____ could interfere ____ function for non registered ____?
 ____ chance ____ auto-redial feature ____ unauthorized ____ can be affected by the ____ software bugs.
 ____ there ____ issues ____ cause ____ Redials done ____ unregistered digits?
 ____ glitch mess ____ the auto ____ from ____ digits?
 ____ software ____ can ____ the redialing ____ digits on a ____ network.
 There could ____ that ____ redials ____ unregistered numbers ____ that ____ are ____ GSM.
 Automatic ____ phone numbers via mobile phones might ____ software ____.
 ____ there ____ software ____ the automatic redials from ____?
 ____ are ____ software issues ____ can ____ redialing process ____ digits
 Is there a problem ____ software ____ causes ____ are on ____ network?
 ____ bugs ____ the ____ feature on unauthorized digits.
 Automatic ____ may ____ by bugs ____ numbers on the ____.
 Is ____ software glitch ____ affects ____ number redials?
 ____ are certain ____ that ____ affect the process of ____ unlisted ____ a ____.
 Automatic redials from ____ have ____ impacted ____ software ____.
 Automatic ____ for ____ registered ____ by ____ software issues.
 ____ there a ____ glitch affecting ____ non ____ redials?
 ____ a known software glitch ____ registered ____?
 There are any known software ____ redials ____
 ____ there are ____ bugs ____ affect ____ for unregistered numbers to be ____?
 There ____ the auto-redial ____ on ____ digits ____ be affected ____ available software ____.
 Did any software ____ ruin ____ auto ____ from the ____?
 ____ there a software glitch that ____ number's ____?
 ____ of ____ glitch ____ affects the ability ____ back non- registered numbers?
 ____ there any software ____ up ____ auto redials done ____?
 ____ we ____ any ____ the software that ____ automatic call ____ when calling from ____ lines?
 Do you know if ____ automatic ____ unknown digits to ____ messed ____?
 ____ auto-redial feature on unauthorized ____ be affected ____ found within.
 ____ any ____ that messes ____ auto ____ from unlisted digits?
 ____ redial ____ numbers that ____ registered in ____ current period ____ be affected ____.
 A ____ bug ____ affect the ____ on ____ digits.
 ____ auto-redial feature on unauthorized digits ____ affected ____ software ____.
 Can the ____ be affected ____ bugs ____ non ____ lines?
 There are any ____ bugs ____ from ____ numbers?
 ____ there any ____ that ____ up their auto redials done ____?
 ____ software ____ might ____ automatic redials not having ____ on ____ phone ____.
 ____ the auto-redialing ____ lines affected ____ known bugs?
 Certain software issues could affect ____ redialing ____ for unlisted ____.
 Automatic ____ may be ____ bugs on ____ non-registered numbers via ____.
 There ____ are preventing the ____ to automatically redial on ____ numbers ____ GSM networks.
 Is ____ issue ____ redialing on non-registered phone ____?
 There ____ software ____ might ____ redialing of unlisted numbers ____ phones.
 There are software issues ____ affect ____ having registration ____ mobile ____.
 There ____ the global ____ networks that ____ redials from numbers ____ in the phone ____.
 Automatic ____ be ____ on ____ on the cellular messaging platform.
 Is there a ____ with the ____ numbers ____ the gsm network?

Is _____ any software bugs that _____ redials _____?

Is _____ auto- _____ feature _____ by any _____ non- registered lines?

_____ the auto-redial feature _____ digits will be affected _____ latest software bugs?

_____ software bugs that _____ the _____ function _____ non registered _____.

_____ functions _____ redialing from _____ be _____ some software flaws.

The _____ process _____ digits may _____ certain software issues.

_____ there been any _____ automatic redials from unlisted numbers?

There is _____ chance that _____ feature on _____ is _____ by _____ software bug.

_____ possible that the auto-Redial feature is _____ by _____ on _____ registered _____.

_____ on unauthorized _____ is _____ affected by _____ bugs.

Did _____ bugs _____ numbers not _____ in _____ current period?

_____ feature _____ digits could _____ affected by any _____ bugs.

_____ bugs for non- registered _____ that _____ encounter?

Did software bugs _____ the redial _____ aren't _____?

Does the software glitch mess with _____ auto _____?

Automatic _____ in _____ case _____ non- registered _____ by current _____ issues.

_____ you _____ of any software bugs _____ in the _____ numbers?

There is a possibility that _____ auto-redial _____ on unauthorized _____ by _____.

_____ can _____ redialing for non- registered _____ be hampered.

_____ software issues _____ on non- registered phone _____?

Did any _____ mess _____ the _____ done _____ digits?

The _____ from unlisted _____ mobile _____ be affected by software flaws.

_____ software _____ the _____ from _____ that weren't registered during the _____?

_____ may _____ in the _____ mobile _____ which can _____ from numbers _____ registered.

Do _____ the number _____ software bugs _____ affect _____ function _____ unregistered _____

Automatic _____ from _____ via _____ phones _____ affected _____ software flaws.

_____ there a _____ bug that's _____ automatic _____ numbers?

Did _____ bugs _____ the redial _____ not been registered?

Is _____ bug _____ hurt automatic redials _____ non- _____ numbers?

_____ the case of non- registered _____ is impacted _____ issues.

_____ automatic redial affected by software _____?

Automatic redial _____ impacted _____ bugs on _____ numbers.

Some software issues can impact _____ redialing _____ unlisted _____ over _____.

_____ of the auto-redial _____ on unauthorized _____ affected _____ the _____ software bugs.

_____ affect _____ redial from _____ that _____ the current time period?

_____ redials _____ having _____ on _____ networks _____ be due to _____ issues.

Automatic _____ unlisted numbers _____ phones might be affected _____ flaws.

The _____ redialing from _____ numbers _____ by some software flaws.

The _____ feature _____ could _____ be affected by _____ software _____.

Are _____ recognized _____ are preventing _____ automatically redial on unregistered _____ using GSM networks?

_____ redial _____ be affected by bugs _____ in _____ mobile communication _____.

Do _____ current software bugs _____ feature _____ unauthorized _____?

Is _____ a _____ software _____ affect automatic _____ back _____ calling from non-registered _____?

_____ possible that _____ affected _____ known bugs on non register _____?

Do you know _____ software _____ that _____ function in _____ unregistered _____?

_____ feature _____ by any known bugs on _____ lines?

_____ you aware of _____ automatic _____ from unknown _____ via _____ systems?

Is _____ any software _____ that could affect _____ automatic redialing _____ numbers _____?

_____ software bugs affect the redial _____ that _____ in the _____?

Do _____ know _____ known software bugs that affect the automatic _____ non- _____?

_____ are _____ software issues that _____ affect _____ having mobile _____ network _____.

_____ software _____ the work of _____ unlisted numbers _____ mobile _____.

There _____ software flaws that could _____ functions _____ unregistered _____

Automatic _____ be impacted _____ bugs on _____ numbers _____ the _____ communication _____.

Automatic redialing for _____ digits will _____ by current _____.

Are there any _____ occurring software bugs _____ feature on _____?

Automatic redial can _____ software _____ non- registered _____.

_____ it _____ that _____ feature on _____ affected by the latest software _____?

_____ auto-redial _____ digits might be affected _____ latest software _____.

Is there a problem _____ software that _____ auto _____ digits?

Automatic _____ numbers via _____ phone _____ might be affected by some _____.

Is it possible _____ there _____ defects _____ redialing for unregistered _____?

Is there _____ known _____ bug _____ redials from _____?

_____ you know _____ number _____ that _____ redial function _____ the unregistered numbers?

The redialing process _____ digits _____ a cellular _____ can be impacted _____.

_____ are _____ bugs _____ can affect the _____ feature _____ digits.

Automatic _____ from unlisted numbers _____ may be _____ certain _____ flaws.

_____ a _____ that _____ auto-redial feature on _____ digits can _____ by _____ bugs.

_____ software issues may _____ the redialing _____ unlisted _____ cellular network.

_____ is a possibility that _____ can _____ redials when _____ are _____ numbers _____ phone _____.

_____ possible that the auto-Redial feature _____ by _____ non- _____ lines.

_____ are software issues that could _____ to _____ for _____ networks.

The auto-redial feature on unauthorized _____ could _____ be _____ bugs.

_____ software _____ mess _____ auto redials done from unregistered _____?

_____ some _____ flaws that could affect _____ of automatic redialing from _____ via _____.

Is _____ problem with the _____ that could _____ redials _____ are unlisted _____ phone network?

The redialing _____ digits _____ phone provider can _____ affected by _____ issues.

Are _____ redials _____ software _____ for _____ calls?

_____ redialing _____ unlisted numbers via mobile _____ networks _____ affected by _____.

_____ are _____ software _____ from unregistered numbers?

_____ impacted by software bugs on non _____.

_____ software _____ can _____ the _____ for _____ digits _____ a cellular _____ network.

There are _____ software bugs that _____ affect the ability _____ unregistered _____ using _____ networks.

Can auto-redial functions on _____ affected by _____?

Is it possible _____ the _____ is affected _____ any _____ on _____ non _____?

_____ affected _____ bugs _____ numbers through the mobile messaging platform.

_____ any _____ bugs _____ auto-redial feature on unauthorized _____?

_____ any _____ that impact non- registered number _____?

Is _____ any software glitch _____ could _____ auto redials _____?

The auto-redial feature _____ potentially affected _____ currently _____ bugs.

Some software issues can _____ redialing _____ digits over _____ cellular _____.

Is _____ a software _____ that _____ affect automatic _____ when you _____ from _____ mobile network?

_____ there any glitch in _____ causes redialing of _____ registered _____?

Is _____ the software that _____ redials when _____ unlisted _____ the mobile networks?

_____ the case of _____ digits _____ by the _____ software issues.

_____ auto-redial feature on _____ digits could _____ by _____ bugs.

_____ of automatic redialing from _____ affected _____ the software flaws.

_____ any confirmed _____ affect non- _____ redials?

_____ there _____ flaws with _____ for _____ calls _____ the GSM network?

_____ there any software _____ that _____ with the auto redial _____?

_____ are software bugs that can _____ function _____ non _____.

_____ are software _____ could affect the _____ function _____ calls.

Is _____ a _____ with _____ automatic redial on non- _____ thegsm network?

_____ the _____ from numbers that weren't recorded?

_____ possible _____ there are defects _____ the software _____ redialing for unregistered _____?

_____ you _____ anything about software _____ redial function _____ unregistered numbers?

_____ auto-redial _____ on unauthorized digits _____ risk of being affected by _____.

Is _____ issues with _____ software _____ affect redials from _____ numbers?

_____ auto-redial _____ for unauthorized _____ could be _____ by the _____.

_____ there _____ software bug that _____ the _____ for _____ registered calls?

Is _____ affected by software _____ non registered _____?

There is a chance _____ the auto-redial _____ on _____ be _____ software bugs.

Automatic _____ be affected by bugs on _____ non- registered _____ platform.

_____ any software _____ affect _____ unregistered numbers _____?

_____ auto-redialing _____ unauthorized digits affected _____ any _____?

Is there a _____ redials?

_____ by _____ on non- registered numbers?

_____ it possible for _____ on _____ be affected by current _____?

The auto-Redial _____ may _____ known _____ on non- registered _____.

_____ software _____ that could affect _____ redials _____ registration in mobile _____.

Did software _____ affect _____ redial _____ registered yet?

Automatic redialing _____ be affected _____ some _____ flaws.

Some software _____ could affect theautomatic _____ illegitimate numbers _____.

_____ affected by bugs on _____ registered _____ via the _____ platform.

There _____ in _____ global mobile _____ redials from _____ not _____ the phone _____.

Is there _____ software _____ may _____ the _____ redialing _____ numbers?

_____ software glitch _____ can affect automatic call _____ when _____ from non _____?

Any confirmed software _____ non _____?

It is possible that _____ Redial feature _____ bugs _____ non- _____ lines.

Did software _____ redial from Numbers that _____ in the _____?

_____ it possible that _____ are defects _____ software that affect _____ for _____ not registered?

Do you know about _____ redial _____ unregistered numbers?

_____ work of redialing _____ unlisted numbers _____ phone _____ affected _____ software flaws.

Is there a _____ in _____ unlisted _____ using _____ network?

Is _____ by the _____ bugs _____ non- _____ numbers?

_____ there _____ flaw in auto-redialing _____ unlisted _____ using _____?

Did software _____ affect redial _____ that _____ registered _____ current time _____?

The auto-redial feature _____ unauthorized _____ be _____ software _____.

_____ auto-redialing _____ unauthorized _____ affected by _____ bugs in _____ system?

_____ are _____ issues _____ affect _____ for _____ digits over a cellular phone provider.

_____ on unauthorized _____ be _____ by _____ software bugs?

Do _____ bugsaffect _____ without _____?

The function _____ from unregistered numbers could _____ software _____.

_____ know _____ there is a software glitch affecting the _____?

_____ if there _____ any issues with the _____ unknown digits via _____ systems?

Is _____ any problem _____ the _____ that _____ from un registered _____?

_____ there _____ bug that _____ auto _____ non-registered numbers?

Do automated redials _____ registered calls?

Are _____ bugs encountered _____ automated redials _____ calls?

Some _____ work _____ automatic _____ from unlisted numbers via _____ phone networks.

Automatic redialing can be affected _____ case of _____ registered _____.

_____ there any _____ with auto _____ numbers on the _____?

_____ unauthorized digits _____ possibly affected by _____ latest _____ bugs.

_____ redial impacted by _____ bugs on _____ phones?

_____ we _____ of any _____ software _____ automatic call back when calling _____ lines?

_____ the auto-redialing feature _____ unauthorized _____ by _____ bugs?

_____ software bugs for non-registered calls?

Is there _____ might affect the function _____ redialing from _____?

_____ software bugs affect the redial _____ weren't _____?

It _____ possible _____ the _____ feature _____ unauthorized digits _____ the latest software _____.

_____ be bugs in _____ that affect redials _____ in the phone book.

_____ be bugs in _____ mobile _____ the _____ numbers from un-registered numbers

There _____ a chance _____ auto-redial feature on _____ be _____ latest software bugs.

_____ a software bug _____ registered number redials?

_____ it _____ that there _____ defects _____ software that affects _____ automatic _____ function _____ unregistered _____?

There _____ software _____ that affect _____ redials _____ having _____ registration _____ mobile _____ networks.

_____ bugs that affect _____ unregistered numbers now that they _____ in a mobile _____.

Is automated _____ by software defects _____ non _____?

The _____ from _____ may be affected by some _____ flaws.

Did _____ redial from _____ were _____ in the current period?

_____ software flaws _____ the _____ unlisted numbers from mobile _____.

Automatic redialing from unlisted numbers via _____ could _____ software _____.

Is _____ any current _____ glitch that _____ the _____ automatically call back _____?

Automatic _____ on some non _____ numbers on _____ mobile messaging platform.

_____ have any _____ on the software _____ impacting _____ redial _____ numbers?

Could _____ be affected by _____ on the _____ register lines?

There are some _____ issues _____ affect _____ process for unlisted digits _____.

_____ the auto-redial feature _____ unauthorized digits _____ by _____ bugs?

There _____ software flaws that could _____ functions of automatic _____ illegitimate _____ the _____.

_____ affected _____ any known bugs on non register _____?

The _____ redialing from _____ numbers _____ phone _____ could be _____ software flaws.

There are software problems that _____ affect _____ from _____ are _____ registered.

Is there _____ software glitch _____ affects _____ non _____?

Do _____ affect automatic _____ on _____ numbers?

The auto-redial _____ unauthorized _____ by any software bugs found _____.

What _____ the _____ that the auto-redial feature on _____ affected _____ available _____?

Some software _____ affect the functions _____ redialing _____

_____ software glitch affecting the _____ number Redial?

Is automatic _____ impacted by _____ on non _____?

Automatic _____ in _____ case of _____ registered _____ can _____ affected _____ current _____.

_____ redial can _____ affected by bugs _____ non-registered _____ on the _____.

_____ any _____ that could _____ the redialing _____ unregistered numbers?

_____ are _____ software issues _____ can impact _____ a phone number

_____ redialing in the case of non-registered _____ software _____.

_____ we _____ of any software glitch that _____ back when _____ non-registered _____?

_____ redialing _____ non registered digits can _____ by _____

_____ feature _____ on the _____ network _____ be ruined by _____ problems.

Automatic _____ from unlisted _____ via mobile phones _____ software flaws.

_____ bugs on _____ auto redials _____ the GSM network?

_____ there a known software _____ automatic redials _____ numbers?

Is _____ software glitch that might affect _____ numbers?
_____ bugs _____ the _____ from _____ that are not registered _____?

Is there _____ chance _____ auto-Redial _____ is affected _____ known _____ on _____ non register _____?
_____ software _____ the redialing process _____ over a cellular network.

There _____ recognized _____ bugs _____ may impede the ability _____ redial on _____ numbers using _____.

Is _____ bugs that are _____ ability to _____ unregistered numbers?

There _____ certain _____ issues that affect the _____ process _____ phone provider
_____ there _____ known _____ with _____ software that _____ from _____ registered numbers?
_____ any _____ that can cause redials _____ there are unlisted _____ on the _____?

Can auto-redial on unauthorized _____ affected _____ bugs?
_____ there _____ defects in the _____ affects _____ redialing for unregistered callers?
_____ a problem with the _____ affects redials _____ un _____?

Does current software issues _____ non- _____ digits?

There _____ some _____ flaws _____ could _____ function _____ from unregistered numbers
_____ there _____ problem _____ the software _____ cause _____ unlisted numbers on the GSM networks?
_____ there _____ can affect the _____ function for _____ registered calls?
_____ redials not having registration _____ mobile _____ may have _____.
_____ there a _____ with _____ interfering with the redialing _____ phone network?

Do you have _____ information _____ affect the redial function _____?

Is _____ any known problems _____ software that _____ redials _____ numbers?

There may be _____ in _____ global _____ which _____ not registered.

Is there _____ known problem _____ that _____ affect redials from _____?
_____ automatic redial effected by software _____ non- _____?
_____ feature on unauthorized digits is _____ by currently occurring _____ bugs?
_____ there _____ with software _____ can cause redials when _____ the mobile phone network.
_____ are _____ software flaws _____ affect the work _____ redialing _____ numbers via _____.
_____ there _____ might affect _____ function _____ redialing from unregistered numbers?
_____ there _____ software glitch _____ might _____ the function of _____ from _____ numbers?

Do you _____ the software bugs affecting _____ for _____ numbers?

Automatic _____ case of not _____ is _____ by current _____ issues.

Is _____ auto-redialing function on _____ software bugs?

It _____ that _____ auto-redial _____ unauthorized _____ by current software bugs.

The _____ of _____ from unlisted _____ mobile _____ may be _____ by some _____ flaws.
_____ issues can _____ redialing process for _____ digits _____ cellular _____ provider.

Is there _____ known _____ in _____ that _____ redials from un _____?

The auto-Redial feature _____ be impacted _____ known _____ non- _____.

Automatic _____ from _____ numbers may _____ some software _____
_____ auto-redial feature on unauthorized digits _____ possibly _____ software bugs.

The functions _____ redialing from _____ numbers _____ some software _____.
_____ are any _____ bugs impacting redials from _____?
_____ it _____ the auto-Redial _____ can be _____ by _____ non _____ lines?

Is _____ software issues _____ automatic _____ from _____ numbers?
_____ there any software _____ that messes _____ done from _____?
_____ from unlisted _____ phones may be _____ by software _____

Are _____ recognized software _____ that are _____ to _____ redial _____ unregistered numbers?

There are some _____ bugs that _____ affect _____ to _____ unregistered _____ using _____ GSM networks.

The _____ that _____ registered in the current _____ have _____ affected by the software _____.
_____ automatic _____ for _____ registered digits affected by _____?

Are the _____ functions _____ unauthorized _____ the current software _____?
_____ a chance _____ the _____ on _____ digits is damaged by _____.

_____ there _____ known _____ in auto-redialing _____ using _____ GSM network right _____?
 Is _____ a problem with _____ that can _____ redials _____ un _____?
 Are _____ bugs encountered in _____ non- registered _____?
 There are _____ issues that _____ the _____ process for _____ phone provider.
 Is there any _____ the _____ done from unregistered numbers?
 _____ software problems that _____ automatic _____ back when _____ non-registered _____ over a mobile phone network?
 Do we _____ of any _____ problems _____ the _____ back _____ calling _____ non- _____ lines?
 _____ a chance that _____ auto-redial _____ unauthorized digits is _____ by _____ bugs _____ inside.
 There are _____ issues that _____ without _____ a GSM network.
 _____ software bugs _____ the _____ from _____ not _____ in the _____ time period?
 _____ could _____ in _____ networks that affect the _____ of numbers _____ un- registered _____
 Did software _____ numbers that _____ registered in _____ time period?
 _____ automatic redial _____ software bugs _____ numbers?
 Are the _____ software bugs for _____ calls?
 _____ you know how _____ software bugs affect _____ the unregistered _____ the _____ phone _____?
 Do _____ know if there _____ a _____ that causes automatic _____ calling _____ non-registered _____?
 _____ software bug _____ auto redials from _____ numbers?
 _____ software _____ redials from unregistered _____?
 _____ you _____ there are _____ bugs that affect _____ function _____ unregistered _____?
 _____ there _____ software glitch that affects _____ you _____ from non- registered _____ over _____ phone _____?
 The _____ could affect the auto-redial feature _____.
 _____ process for unlisted _____ may be affected _____ issues.
 _____ known _____ with the software _____ the redials _____ un registered numbers?
 Is _____ problem _____ software _____ affect redials _____ un _____ through the GSM networks?
 _____ bug that causes _____ redials from _____ numbers?
 Do you know if _____ that affect _____ functionality _____ unregistered _____?
 Do you know _____ number _____ that affect redial _____ in unregistered _____ cellular phone _____?
 _____ redialing for _____ is _____ by current _____ problems.
 _____ the automated redials _____ bugs _____ registered calls?
 _____ redial can _____ impacted _____ numbers on the mobile _____ network.
 Any _____ bugs _____ affect redials from _____?
 _____ there a software _____ with automatic redialing _____?
 Automatic redialing from _____ via mobile _____ networks _____ be _____ some software _____.
 Is _____ impacted _____ bugs on _____ numbers?
 There _____ a chance _____ auto-redial feature on unauthorized _____ by _____.
 _____ the _____ mobile networks _____ the redial of numbers _____ un- _____
 _____ a _____ which _____ automatic _____ from non registered numbers?
 _____ software _____ the redialing _____ for _____ digits over a _____ phone _____.
 _____ there _____ flaw in the auto-redialing for _____ the GSM _____?
 _____ you know if _____ are _____ software _____ number redials?
 Does _____ bugs _____ numbers that _____ not registered yet?
 _____ bugs that affect the _____ redials from non-registered _____ GSM networks.
 _____ feature _____ digits _____ affected _____ a currently occurring software bug.
 Do you know if _____ are _____ bugs _____ redial _____ for _____?
 What is the _____ the _____ on _____ affected by _____ software bugs?
 Do _____ know the _____ flaws _____ redial function _____ numbers?
 _____ are software _____ that affect _____ redial function for unregistered _____?
 Automatic _____ non- registered _____ may _____ by _____ issues.
 Is the _____ on _____ digits _____ current software _____?
 The _____ feature _____ may be impacted by _____.

Automatic _____ impacted by _____ on _____ non-registered _____ the cellular platform

Automatic _____ be _____ by _____ on some _____ via the mobile _____ platform.

_____ there _____ software glitch _____ affect _____ of _____ that are not registered?

What _____ of the auto-redial feature on unauthorized digits _____ the _____?

_____ software flaws _____ affect _____ redialing _____ illegitimate _____ via the network.

The auto-Redial feature _____ be _____ by _____ bugs on _____.

_____ there a _____ that hurts _____ redials _____ registered numbers?

Certain _____ issues can affect the _____ for _____ over _____ phone _____.

_____ any _____ bugs _____ the automatic redials from non-registered numbers?

_____ the auto-redialing _____ affected by software _____?

_____ there any _____ in _____ software that can _____ from _____ phone numbers?

_____ the auto-redial capability on _____ digits _____ any _____ software _____?

_____ mean any _____ on the non- _____ redials on _____ network?

_____ the software bugs _____ the _____ from numbers _____?

Did _____ bugs affect _____ redial _____ that were not registered _____ the _____?

Do software _____ from _____ now?

Automatic _____ might be _____ by _____ some non- _____ numbers on _____.

Is _____ flaw _____ auto-redialing _____ calls using _____ GSM network?

_____ the auto-redial functions on _____ affected by _____ bugs?

There _____ auto-redial _____ on unauthorized digits _____ be affected by _____ currently occurring _____ bug.

There _____ chance _____ the auto-redial _____ on unauthorized digits may _____ current _____.

Automatic _____ non registered _____ be _____ by current _____ issues.

Automatic redialing from unlisted numbers _____ by certain _____ flaws.

There _____ any _____ issues affecting _____ number redials?

Is _____ automatic redialing _____ is hampered by software defects?

_____ from unlisted numbers _____ mobile phones _____ some software flaws.

_____ of unlisted numbers _____ phones _____ affected by _____ flaws.

There _____ be _____ the global mobile networks, _____ affect _____ not in the _____.

Is there _____ known _____ affecting non registered _____?

_____ is _____ chance that _____ on _____ digits may be _____ by currently _____ bugs.

_____ it possible that _____ feature _____ affected by bugs on the _____?

Is there _____ software issue _____ redialing _____ non- _____ lines?

Is automatic _____ impacted by _____ non _____ numbers

_____ messing up _____ from unknown numbers _____ the GSM networks?

_____ known _____ issues _____ automatic _____ from unregistered numbers?

Automatic _____ numbers _____ phone networks _____ be affected _____ software flaws.

_____ can affect _____ process for unlisted digits _____ a _____ network.

_____ redial may _____ bugs on _____ registered numbers via _____ messaging _____.

_____ redialing _____ case _____ non- _____ digits, _____ affected by _____ software issues.

The _____ that _____ registered _____ be _____ by software bugs.

Is _____ problem with the _____ un registered _____ through the GSM _____?

Automatic redialing _____ numbers _____ networks is _____ certain software flaws.

_____ for _____ digits could be _____ by current _____ issues.

Automatic _____ impacted by any _____ bugs _____ outside _____ numbers

_____ there _____ the software that _____ when unlisted numbers _____ on the _____?

Is _____ auto-Redial _____ impacted _____ on non register _____?

Automatic redialing _____ numbers via _____ phone _____ be _____ by _____ flaws.

Automatic _____ may be impacted _____ bugs on _____ via _____ mobile communication _____.

_____ known software bugs that _____ of auto-redials _____ registered calls.

There _____ a chance _____ on _____ being affected by currently _____ bugs.

_____ functions _____ redialing _____ illegitimate _____ can _____ some software flaws.
 The _____ feature _____ unauthorized _____ could _____ affected _____ latest _____ bugs.
 Will _____ auto-redial feature on unauthorized _____ be _____ software _____?
 There is _____ chance that _____ digits _____ affected by _____ software bugs.
 Do you _____ bugs _____ ability _____ unregistered numbers to _____ used on _____ GSM?
 Is _____ unauthorized digits affected by _____ software bugs _____ system?
 Is _____ software _____ that _____ redials from _____ numbers?
 Is _____ the software that can _____ redials _____ are unlisted numbers _____ GSM networks?
 _____ there _____ with the _____ causes redialing _____ non registered phone _____?
 Is _____ that _____ mess up auto redials _____ from unregistered _____?
 _____ software problems _____ from unregistered _____?
 _____ a problem with _____ non-reg _____?
 Is _____ any _____ to _____ for unlisted _____ on _____ GSM network?
 _____ software _____ can _____ the _____ for _____ over _____ cellular phone provider.
 _____ you _____ about the _____ bugs affecting _____ for _____ numbers?
 _____ be bugs in the global _____ networks that _____ not _____ the phone _____.
 Some software issues _____ affect _____ process for unlisted _____ network.
 _____ function of automatic _____ from unregistered _____ any _____ software flaws?
 _____ software _____ affect the redial _____ that aren't _____?
 Automatic _____ in _____ registered _____ are _____ by current software issues.
 Is there _____ the software _____ when _____ unlisted _____ on the GSM network?
 _____ redial _____ be _____ by bugs on non- _____ mobile messaging _____ of the _____
 _____ could be _____ the global _____ networks that _____ from _____ in the _____ book.
 Automatic _____ unlisted numbers via mobile phones might be _____.
 Certain _____ problems can impact the redialing _____ cellular network.
 There are _____ that _____ redialing _____ for unlisted _____ over a _____ network.
 _____ there _____ problem with _____ that can _____ when _____ are _____ numbers on _____ phone networks?
 Is _____ glitch _____ affects the non _____ redials?
 Did _____ glitch _____ the auto _____ from _____ digits?
 _____ possible _____ the _____ feature is affected by any _____ bugs on _____?
 Do _____ bugs affect the redial _____ numbers _____?
 Do _____ have any _____ that _____ function for unregistered numbers?
 Automatic callbacks for _____ numbers via _____ GSM networks _____ problems.
 _____ redialing from _____ mobile phones _____ affected _____ software flaws.
 There _____ software bugs _____ redials _____ numbers, now _____ they're _____ GSM.
 Any known _____ can _____ attempting _____ numbers in the GSM system.
 There might be bugs _____ the global _____ affect redials from _____ aren't in _____.
 _____ there _____ automated _____ for non- _____ calls?
 Automatic redialing may _____ affected _____ software _____ the case of _____.
 Are _____ on _____ digits _____ by software bugs?
 Do automated redials _____ software _____ non- _____?
 There's a _____ the _____ unauthorized _____ might be affected _____ bugs.
 Do _____ know _____ any software _____ can affect the _____ call _____ non- _____ numbers?
 Is _____ feature impacted _____ any known bugs _____ registered _____?
 _____ auto-redial _____ on _____ affected _____ any current software bugs?
 Automatic redialing _____ registered _____ may be _____ software issues.
 Automatic redialing from unlisted numbers _____ mobile _____ by _____ software _____.
 _____ are some software _____ that can affect the automatic _____ registered _____
 _____ there _____ software _____ that hurts _____ from non- registered _____?
 _____ auto-redial on _____ by current software bugs _____ system?

There _____ the _____ mobile networks _____ can affect redials from _____ not in _____ book.
 Is _____ related to auto-redial _____ unlisted calls on _____ GSM network _____?
 Automatic _____ numbers _____ mobile phones will be _____ by _____ flaws.
 Do software _____ affect _____ redial _____ weren't _____ in the current _____?
 Is _____ the _____ that causes _____ when there is _____ number on _____ network?
 _____ auto-Redial _____ by bugs on non- registered _____?
 Is the _____ on unauthorized digits _____?
 _____ feature impacted by _____ known bugs _____ register lines?
 _____ specific software glitch that _____ call back _____ you _____ non- registered lines _____ mobile phone _____?
 Is _____ feature _____ by bugs _____ non- _____ lines?
 Is _____ the software that causes _____ non- registered _____ numbers?
 Do _____ bugs affect _____ redial _____ that _____ registered?
 Do _____ know _____ there _____ bugs that affect _____ redials _____ non-registered numbers?
 Is _____ possible _____ there _____ with the _____ that _____ redialing work _____ callers?
 _____ a _____ the _____ feature _____ unauthorized _____ could be _____ by software _____.
 The functions _____ from unregistered _____ be affected by _____.
 What _____ chances that _____ auto-redial feature on _____ by these _____ bugs?
 _____ a _____ the auto-redial feature on _____ digits could _____ by _____ bugs.
 _____ you know _____ the software _____ that _____ function _____ unregistered numbers?
 _____ a _____ the _____ on _____ would be affected _____ a software bug.
 _____ auto-Redial feature affected _____ there _____ known _____ on _____ register lines?
 _____ on unauthorized _____ at risk of being affected by _____.
 _____ there _____ known problems _____ the _____ can affect _____ from un _____ through _____ GSM networks?
 _____ auto-redial _____ on unauthorized _____ be _____ by any _____ bugs?
 _____ redialing _____ non-registered digits may _____ impacted _____ the _____ software _____.
 Did any _____ up the _____ done _____ digits?
 _____ are software bugs that _____ affect _____ ability _____ automatically redial on _____ the _____.
 _____ are some software _____ might _____ redials _____ having registration _____ phone networks.
 Are _____ confirmed software defects affecting non- _____?
 There _____ software issues _____ redials not having registration _____ phone _____.
 Automatic _____ in the case of non-registration digits _____.
 _____ is a chance _____ auto-redial feature _____ affected by the currently available software _____.
 _____ it _____ there _____ in the _____ affect automatic redialing for unregistered _____?
 There is _____ chance that the _____ digits _____ affected by _____ bugs.
 There _____ flaws _____ might affect _____ of redialing unlisted _____ via _____.
 _____ know how _____ affect redial _____ in _____ through the cellular _____ network?
 _____ feature _____ unauthorized digits can potentially be _____ latest software _____.
 _____ is affected _____ any software bugs _____ on non- _____.
 Is there _____ flaws _____ with _____ unlisted calls _____ the GSM _____?
 Is _____ impacted _____ bugs on non- _____ numbers?
 Any _____ that _____ registered number redials?
 Is _____ known flaws _____ unlisted _____ the GSM network right now?
 Some software _____ redialing _____ numbers via mobile _____.
 _____ automatic _____ affected _____ software bugs on non- _____?
 _____ are _____ problems _____ affect the function _____ automatic redialing _____ via _____ networks.
 _____ glitch in _____ might affect _____ redialing function from unregistered _____?
 Are there any software _____ that messes _____ the _____ redials _____?
 Is there a _____ the redial _____ the gsm network?
 There is a _____ feature on unauthorized _____ by any currently _____ software _____.
 Is _____ software _____ that _____ redial _____ non registered _____?

_____ is a chance _____ auto-redial feature on unauthorized digits will _____ latest _____.

_____ any confirmed _____ defects _____ affect non- registered _____?

Do _____ the software _____ impacting _____ function _____ unregistered numbers?

_____ is _____ chance that the auto-redial _____ on _____ digits _____ be _____ bugs.

There _____ a _____ that the auto-redial feature _____ affected by _____ software _____.

Automatic _____ for non-registered digits can be _____.

Is _____ software bugs _____ numbers?

Is there _____ known _____ for unlisted calls on _____ right now?

Automatic _____ may be _____ by _____ on _____ through _____ messaging platform.

Is _____ a _____ the auto-redial _____ on _____ digits _____ affected by _____ bugs?

_____ numbers _____ mobile phones _____ affected by some software flaws.

_____ there a known software bug _____ non _____ numbers?

_____ the _____ feature affected _____ bugs on non- registered _____?

_____ issues _____ affect _____ for unlisted _____ over _____ cellular _____ provider.

_____ there any _____ with the auto-redial _____ unlisted calls _____ the _____ network _____?

Certain software issues _____ redialing process _____ a cellular phone _____

_____ the ability to _____ redial on _____ by _____ bugs?

_____ a known _____ with the software that _____ registered numbers?

Automatic _____ from unlisted _____ using _____ phone _____ be _____ some software _____.

Are _____ redials facing software _____ for _____?

_____ functions on unauthorized digits be _____ current software _____?

_____ unlisted _____ via _____ phone networks may be affected _____ flaws.

Is _____ anything wrong with _____ causes _____ Redials done _____ unregistered _____?

_____ there _____ that are causing redials _____ unregistered _____?

Is _____ the software _____ can _____ un registered numbers through the _____ networks?

_____ auto- _____ feature may _____ known _____ non- registered lines.

There are _____ software issues _____ can _____ automatic _____ without a registered _____

Is _____ any _____ the software _____ can affect the _____ from un _____?

Automatic _____ for non _____ may _____ by _____ software issues.

_____ bugs affecting the redial from _____ that _____ registered _____?

Are _____ any _____ software _____ that affect _____ registered _____?

_____ auto-Redial feature be _____ bugs on _____ registered _____?

_____ are some _____ flaws _____ the functions _____ redialing from unregistered _____.

_____ redialing process _____ unlisted _____ be impacted by certain _____

Is there _____ tell me about the _____ for unregistered numbers?

There _____ any _____ defects _____ registered number redials?

_____ the chance that _____ unauthorized digits is affected _____ software _____?

There _____ software bugs _____ redials _____ numbers now that _____ inGSM.

_____ about software bugs impacting redial function _____ numbers?

The _____ feature on _____ could be affected _____ bug.

Automatic redial could be _____ software _____ registered _____.

_____ known flaw relating _____ auto-redialing _____ unlisted _____ using the _____ right now?

_____ redial _____ by softwarebugs on _____?

_____ software glitch messing with _____ redials done _____ digits?

_____ is a chance _____ software bug _____ the auto-redial _____ digits.

There _____ any _____ affect _____ from non- registered numbers through the _____ networks.

There _____ that _____ ability to automatically _____ that are not registered.

Does current software _____ affect automatic _____ non- _____?

Are there _____ problems _____ redialing _____ non-registered phone numbers?

Do software _____ the _____ from _____ were not registered in _____ current _____?

_____ any _____ the software that _____ the redials _____ un registered numbers?
 _____ possible _____ auto-redial feature _____ digits could be _____ by _____ software _____.
 _____ may _____ issues that affect _____ not _____ mobile phone networks.
 _____ feature on _____ digits is affected by any _____ occurring _____ bugs.
 _____ feature on unauthorized digits _____ risk of _____ currently _____ software bugs.
 _____ is a chance _____ auto-redial _____ on _____ digits _____ currently occurring software _____.
 _____ redial _____ impacted _____ some non- _____ numbers _____ the mobile communication network.
 There _____ Software defects _____ can impact _____ phone calls
 _____ there a _____ software that _____ when there are _____ mobile _____ numbers?
 Automatic _____ unlisted numbers _____ phone _____ might _____ affected by _____ flaws.
 _____ there _____ known flaw in auto-redialing _____ on _____ network?
 _____ there a _____ glitch that _____ affect the _____ of _____ from _____?
 There are _____ software flaws _____ affect _____ functions _____ automatic _____ from _____.
 Is _____ software glitch _____ affect automatic _____ you dial _____ non-registered _____ over a _____ network?
 The functions of automatic redialing from _____ may be affected _____ flaws.
 Any _____ can cause problems _____ to _____ registered numbers in the _____.
 Is the _____ capability on unauthorized _____ current _____ bugs?
 _____ software bugs _____ the redial from numbers _____ be _____?
 Is _____ a software bug that _____ auto-redialing _____ registered calls?
 _____ could be _____ issues that _____ affect _____ redials not _____ mobile _____ networks.
 Automatic _____ be impacted by _____ on some _____ numbers _____ messaging platform.
 There _____ a chance that _____ is affected by currently _____ software _____.
 There are _____ the _____ process _____ unlisted digits over _____ cellular phone network.
 _____ redialing _____ unlisted _____ via mobile phones _____ impacted _____ some software _____.
 Do you know the _____ of _____ bugs _____ function _____ the unregistered numbers _____ phone _____?
 _____ auto-Redial feature _____ impacted by known _____ non _____ lines?
 Automatic _____ impacted by bugs _____ non-registered _____ the cellular messaging _____.
 _____ are certain software _____ can _____ redialing process _____ unlisted digits on _____.
 _____ issues that _____ affect the _____ process for _____ digits over _____ cellular phone _____.
 There are software _____ might _____ the _____ on unregistered _____ using the GSM networks.
 _____ affect the redial from _____ registered?
 _____ from unlisted _____ via mobile _____ could be _____ by _____ flaws.
 Is _____ impacted by _____ on non-registered _____?
 _____ redial _____ impacted _____ any _____ bugs on non-registered _____.
 Automatic redialing from _____ numbers _____ phone _____ by some _____ flaws.
 _____ there _____ that _____ auto redials _____ unregistered digits?
 _____ there _____ glitch that _____ the automatic _____ back when _____ from non-registered lines over _____?
 Is _____ known _____ the software _____ cause redials _____ un registered _____?
 Automatic _____ unauthorized phone _____ are being _____ by _____?
 Is there _____ known _____ could affect _____ from un registered _____?
 Is _____ known _____ that could cause auto-redial _____ unlisted _____ GSM _____?
 _____ redialing _____ digits over _____ networks _____ by current software _____.
 Do _____ if _____ any problems with the _____ from _____ digits via _____ right now?
 _____ software glitch that _____ the _____ call _____ when calling _____ lines over _____ phone network?
 _____ registered digits can _____ affected by _____ current _____ issues.
 Does current software _____ redialing _____?
 Can the _____ unauthorized digits _____ the software bugs?
 Is _____ impacted by _____ software defects _____ registration numbers?
 _____ software _____ may _____ the redialing process _____ over _____ cellular phone _____.
 Do _____ anything _____ the _____ bugs _____ are affecting redial _____ numbers?

_____ you know the number _____ bugs _____ affect _____ function _____ the _____ the cellular _____ network?

Did _____ bugs affect the redial _____ numbers _____ registered _____ the _____?

Is _____ that messes up auto redials _____ from _____?

_____ of any software bugs _____ redial _____ for unregistered _____?

The _____ of _____ redialing from _____ numbers _____ affected by _____ flaws.

Is _____ messing _____ from _____ numbers on the _____ networks?

Any _____ bugs _____ can affect redials _____?

_____ software _____ the redialing _____ of unlisted _____ over _____ cellular phone _____.

Automatic _____ impacted _____ bugs _____ non- registered _____ the mobile messaging _____.

_____ there _____ the auto-redial _____ on unauthorized _____ is affected _____ bugs?

_____ bugs that _____ the _____ to redial on _____ numbers.

_____ there _____ known problems with the _____ on _____ numbers _____ GSM network?

_____ that the auto-redial feature on unauthorized _____ affected by _____ bugs.

Automatic _____ mobile phone _____ might be affected by _____ software flaws.

_____ are software _____ impact _____ redialing process for _____ digits on _____ cellular _____.

_____ affecting non- _____ number redials?

Are _____ software _____ that cause _____ from unregistered _____?

There _____ a chance _____ auto-redial feature on _____ could _____ affected _____ software _____.

Automatic redial _____ be impacted _____ bugs _____ numbers.

_____ automatic redial affected _____ on non _____ numbers?

Do you know _____ are _____ problems _____ the automatic redialing _____ GSM _____?

Is automatic redial impacted _____ software issues _____?

Automatic redialing _____ numbers _____ mobile _____ networks _____ be affected by _____ the _____.

There _____ a chance that _____ feature on _____ be _____ by a current _____.

Are _____ software _____ messing _____ the auto redials done _____?

There may _____ software bugs that affect redials from _____ numbers, _____.

Do _____ bugs affect redial from _____ registered _____?

Do _____ know if there _____ glitch _____ the _____ redials?

_____ you _____ of _____ bugs _____ affect redial function at the _____?

_____ auto-redial feature on _____ chance of _____ affected _____ currently available software _____.

_____ redialing for non- _____ is _____ by _____ software _____.

There _____ software bugs _____ could affect the _____ for _____ registered _____.

_____ the auto-redial _____ digits affected by _____ latest software _____?

_____ there _____ problems that _____ with _____ done _____ unregistered digits?

_____ redials _____ numbers via _____ GSM networks _____ software bugs.

Can any currently occurring _____ auto-redial _____ unauthorized digits?

Automatic _____ the case _____ registered _____ be affected by _____ issues.

_____ there _____ in _____ software _____ affect the redialing from _____ numbers?

_____ there any glitchy _____ non- registered auto redials _____ GSM _____?

_____ is _____ chances _____ on unauthorized digits will be affected by _____?

Any bugs _____ for non-registered _____?

_____ flaws _____ could _____ the functions of redialing _____ via _____ network.

Is _____ software _____ that _____ redials _____ unregistered numbers?

_____ know of any software bugs that _____ auto-redialing function _____ registered _____?

_____ process _____ over _____ cellular phone network is affected _____ certain _____ issues.

_____ redial _____ impacted _____ bugs _____ non-registered numbers _____ mobile _____ platform of the cellular

_____ there _____ bugs _____ for non registered calls?

_____ software bugs _____ the ability to automatically redial on _____?

Is _____ any _____ glitch that might _____ from unregistered _____?

_____ redialing for non- registered _____ affected _____ issues.

_____ problems _____ the _____ on non- registered _____ when _____ the GSM network?

The _____ on _____ could be _____ the latest _____ bugs.

Do you _____ software bugs _____ redial _____ for _____ numbers?

Are the auto-redialing features on _____ digits _____?

_____ known _____ the auto-redialing _____ for non-registered _____?

_____ about the software bugs _____ impacting redial functions for unregistered _____?

_____ software _____ automatic redialing for _____ digits?

_____ for non-registered _____ is _____ by _____ current _____ issues.

_____ there _____ flaw _____ the _____ auto-redialing for _____ calls using _____ network?

_____ a _____ auto-redial feature on unauthorized digits _____ affected _____ software _____.

_____ redialing for non- registered digits _____ by _____ issues.

_____ redial _____ be _____ on _____ non-registered numbers _____ the _____ messaging platform.

_____ there be any _____ Software _____ redials from non-registered numbers?

Is _____ known _____ auto-redialing _____ unlisted calls _____ the GSM network?

_____ in the case _____ might _____ affected _____ current software issues.

Is the _____ that the _____ on unauthorized _____ is _____ currently _____ software _____?

Is _____ a software glitch _____ number's redials?

Any known _____ that _____ for non-registered lines?

The auto-redial feature on _____ digits could _____ software _____.

_____ auto-redial _____ on _____ could be _____ by software _____.

There are any software _____ could _____ automatic _____ for _____ phone networks?

bugs _____ redial of numbers from un- registered numbers

There _____ chance that the _____ on _____ affected _____ some _____ occurring software bugs.

The _____ of automatic _____ from _____ numbers may _____ software flaws.

There may be bugs in _____ networks which _____ that aren't _____.

The auto-redial _____ on unauthorized _____ occurring software bugs.

Are _____ affecting the redial _____ numbers _____ registered?

_____ any _____ relating to _____ for _____ on the GSM network?

The auto-redial _____ unauthorized _____ be affected _____ software bugs found _____.

_____ that _____ is _____ by any _____ on the non register lines.

_____ from unlisted _____ through mobile _____ affected _____ some software flaws.

Is _____ are _____ prevent the automatic redialing function _____ unregistered callers?

Any _____ bugs _____ auto-redialing feature _____ non- _____ lines?

_____ there _____ software _____ causing automatic _____ for _____ numbers?

In the current _____ software bugs affect _____ weren't registered?

_____ redialing _____ case of non-registered _____ by the _____ software issues.

_____ is _____ software bugs on non _____ numbers

Automatic _____ may be _____ by some software _____.

There was _____ that the _____ feature _____ was _____ by _____ bugs.

Is there any _____ problems which _____ auto Redials _____?

_____ are _____ that _____ the auto-redial function for non _____ calls.

_____ any _____ glitch that _____ auto redials done _____ unknown _____?

Is there _____ the software that _____ redials _____ unlisted number _____ the mobile _____ network?

_____ by _____ bugs on unlisted numbers?

Automatic redialing from _____ numbers on mobile _____ might _____.

_____ software _____ messes _____ the _____ redials done from unregistered digits?

_____ there software bugs _____ that _____ redials encounter?

There may be _____ global mobile networks that _____ from _____ registered.

Do _____ of _____ glitch that _____ affect automatic _____ back _____ from non-registered _____?

_____ you _____ many software bugs _____ redial function _____ the _____ via the _____?

Is ____ automatic ____ by software ____ registration numbers?
____ a software glitch ____ could ____ back when you ____ non-registered ____ a mobile phone network?
____ a problem ____ software that causes ____ redialing of calls ____ GSM ____?
There is a question ____ there ____ software defects interfering ____ the redialing ____
____ redialing ____ unlisted ____ on ____ phone networks might ____ affected ____ software ____.
Did software ____ from numbers ____ were not ____?
The ____ on ____ digits ____ possibly ____ affected by software ____.
Is there ____ specific ____ that affects ____ automatic call ____ when ____ lines?
____ softwarebugs ____ redials from unregistered numbers?
Is ____ problem ____ the ____ that ____ redials from un registered ____ throughGSM ____?
____ may ____ that ____ redials ____ having registration for ____ phone networks.
____ auto-redial feature on ____ be ____ the current software ____?
Automatic ____ be impacted ____ non- registered numbers via ____ network.
Do ____ issues ____ non-registered digits?
Automatic redialing ____ non registered ____ affected by ____
There are ____ software ____ that ____ redialing of digits without ____ phone ____
____ a ____ up redials from ____ the GSM networks?
____ a software ____ that affects ____ non- ____ number ____?
There ____ software issues that ____ impact ____ redialing ____ for ____ over ____ cellular ____ provider
The auto-redial feature on unauthorized ____ be ____ software ____.
____ is a chance ____ auto-redial ____ on ____ could be ____ by ____ software ____.
Are automated ____ getting ____ bugs ____ calls?
____ software bugs ____ affect ____ numbers now?
Automatic ____ may be impacted by ____ some ____ numbers on the ____.
____ auto- Redial feature ____ by ____ known bugs ____ non ____ lines?
Certain software issues ____ the ____ process ____ over ____ cellular phone ____.
Automatic ____ be affected ____ on some non- registered numbers ____ communication ____.
There ____ in ____ mobile ____ affect redials of numbers not in the ____.
The auto-redial ____ on ____ digits ____ by these ____ bugs.
Did ____ bugs affect ____ redial from numbers ____?
____ numbers via ____ phone networks may be ____ software flaws.
____ auto-redial feature ____ could ____ by the ____ software flaws.
____ the ____ have ____ automatic redialing from unregistered ____?
Is there any known ____ to ____ for ____ network ____ now?
____ redials have software ____ non- registered ____?
Is ____ software ____ that ____ affect the function ____ from unregistered ____ numbers?
____ glitch that causes ____ redials ____ from unregistered digits?
Is there a ____ software ____ to ____ from unregistered digits?
The ____ from ____ numbers could ____ a few software flaws.
____ redialing ____ unlisted ____ via ____ might ____ by some software defects.
Did software bugs ____ redial from numbers ____ in ____ period?
____ there ____ software bug that ____ the automatic redials from ____?
____ affect the redial ____ numbers that weren't registered in ____?
____ be bugs ____ the ____ mobile networks that affect ____ un- ____ numbers.
Are there ____ bugs in the ____ non-registered ____?
____ on unauthorized digits ____ by the ____ bugs ____ the ____?
Do we ____ if there ____ a software ____ that ____ call ____ when ____ from ____ lines?
Is there ____ glitch ____ affects ____ call ____ when calling from ____ lines?
Is ____ software glitch ____ the function ____ redialing from ____ numbers?
The work of ____ numbers ____ may be affected ____ flaws.

Is there a _____ software _____ can affect redials _____ numbers through _____?

Is _____ glitch messing _____ redials _____ unregistered digits?

_____ there _____ that affect the redial _____ numbers?

Does current software _____ redialing for non _____?

_____ by bugs on non- _____ numbers _____ the _____ messaging platform.

Is _____ redialing _____ registered digits impacted _____ issues?

_____ issues _____ affect _____ redialing for non- _____.

_____ software bugs _____ may affect _____ to _____ redial _____ unregistered numbers _____ the GSM _____.

There are _____ software defects that are _____ non- _____?

Did _____ bugs _____ numbers that _____ registered in the _____ period?

Is _____ anything you _____ tell _____ software bugs _____ redial _____ for _____ numbers?

_____ it possible _____ the auto-Redial feature _____ by _____ on _____ non _____ lines?

_____ the chance that _____ feature on unauthorized digits _____ these software _____?

There _____ some software _____ affect the functions _____ from unregistered _____

_____ there _____ in _____ for non- registered calls?

Did _____ mess up _____ auto _____ unregistered digits?

_____ you know _____ there are any problems _____ the automatic redialing _____ GSM _____?

The _____ digits can be _____ by these software _____.

_____ there _____ known flaws in _____ auto-redial _____ unlisted calls _____ GSM _____?

Automatic redialing _____ digits is _____ by _____ software _____.

_____ feature _____ digits might _____ affected _____ current software bugs.

Automatic redial may _____ bugs on some _____ the mobile messaging platform _____ the _____.

_____ of _____ numbers from _____ phone _____ might be _____ some software _____.

Do _____ have _____ that affect the redial function for _____?

Is _____ problems in _____ software _____ redials from un _____?

_____ redialing _____ unlisted numbers is _____ some software _____.

There are _____ could _____ automatic _____ not _____ registration _____ mobile phones.

_____ is _____ chance the auto-redial feature on _____ by the _____ bugs.

There is a _____ that the _____ on _____ numbers _____ affected _____.

_____ a _____ with _____ software _____ to redial from unregistered digits?

Is _____ a _____ could _____ the auto redials _____ from unregistered _____?

Did _____ software _____ affect _____ from _____ that weren't _____ the current time _____?

_____ known _____ glitch that _____ registered number _____?

_____ with the software _____ can cause _____ there are _____ numbers on _____ network?

Can _____ auto-redial functions on _____ digits be _____?

The _____ feature _____ unauthorized _____ could _____ affected _____ the current _____.

Is _____ bugs affecting the _____ numbers _____ weren't _____?

_____ work of _____ from unlisted numbers _____ mobile phones could _____ flaws.

Automatic redial _____ be affected _____ on _____ registered _____ via the _____ platform.

Did _____ the redial _____ numbers that _____ registered

_____ chance that _____ auto-redial feature on _____ affected by _____ bugs.

_____ there a known software bug _____ non registered _____?

_____ there _____ software glitch that could _____ the _____ numbers?

_____ redials _____ on non- registered calls?

_____ any _____ bugs affect _____ without registered _____?

There are _____ software _____ can _____ process for unlisted _____

_____ that the _____ feature on unauthorized _____ affected _____ the currently occurring software _____.

_____ software _____ from numbers _____ were not registered?

_____ redials _____ having registration _____ mobile _____ might be _____ by software _____.

There are software _____ the _____ redialing _____ digits _____ a registered _____

There _____ software _____ that could _____ function of automatic _____ from unregistered _____.
 There _____ certain _____ issues _____ can impact _____ process for _____.
 Is there any _____ problem which _____ auto Redials _____?
 _____ software _____ affect the _____ numbers that _____ not _____?
 _____ process for _____ on a _____ phone network _____ by _____ software issues.
 Certain _____ issues _____ the redialing _____ unlisted digits _____ a _____ phone _____.
 _____ for _____ numbers may _____ affected by _____ glitch.
 There are _____ issues _____ can impact _____ redialing _____ digits _____ a _____ network.
 What _____ chance of _____ auto-redial _____ on _____ affected by _____ software bugs?
 Automatic redialing _____ phone networks might _____ affected _____ flaws.
 _____ the _____ lines affected _____ any known bugs?
 _____ are _____ issues _____ affect _____ redialing _____ digits over a cellular phone _____.
 _____ affect the redial _____ numbers that _____ yet?
 Are _____ the redial from _____ weren't _____ yet?
 Some _____ could affect _____ redialing from _____ numbers in the _____.
 _____ software _____ affect _____ numbers that _____ not registered?
 Is _____ possible _____ there _____ problems with _____ software _____ makes _____ possible _____ callers?
 _____ there _____ known _____ auto-redial _____ unlisted calls on _____ GSM network?
 Do current _____ issues _____ redialing _____ digits?
 _____ there a software glitch that _____ up the auto _____.
 _____ the software _____ affect _____ redial _____ numbers that _____ not _____ in the _____?
 The _____ may _____ impacted by known bugs _____ lines.
 _____ there _____ affecting auto _____ non registered numbers?
 _____ is possible _____ the _____ feature is impacted _____ bugs _____ the _____ register _____.
 Automatic _____ unlisted numbers _____ mobile phones _____ hampered by _____ software _____.
 Is _____ a _____ problem that _____ affect redials from _____?
 Automatic redialing _____ registered _____ can be _____ by _____ issues.
 Is _____ known _____ auto-redialing _____ unlisted calls on _____ network.
 _____ software _____ the _____ for _____ digits on a cellular network.
 The auto-redialing on _____ digits _____ be _____ bugs.
 _____ the auto-redial _____ digits affected by recent _____?
 _____ know about _____ software _____ that affect the _____ function in _____ numbers?
 _____ redialing process _____ a cellular phone provider can be _____ software _____.
 _____ is _____ auto-redial _____ unauthorized digits is affected by current software _____.
 Are the auto-redial _____ on _____ affected by _____?
 Is there a _____ that _____ up _____ redial _____ from unregistered _____?
 The auto-redial _____ on unauthorized digits is _____ from _____ occurring _____.
 Are _____ software problems _____ with _____ redials _____ from _____?
 The _____ redialing unlisted _____ from _____ phones might be _____ flaws.
 _____ possible that the _____ is affected by _____ on _____ lines?
 Are there software _____ automated _____ for _____ calls?
 _____ is a _____ that _____ auto-redial _____ on _____ digits _____ by _____ software bug.
 _____ on unauthorized _____ by any current software bugs?
 _____ any problem _____ the _____ redials _____ un registered numbers?
 Does the _____ issues _____ automatic _____ non-registered digits?
 _____ feature on unauthorized _____ affected by the software bugs?
 _____ problem with software that _____ cause _____ are unlisted _____ on the GSM _____?
 _____ auto-redial _____ digits affected by _____ bugs?
 _____ known _____ with the _____ that can _____ the redials _____ un _____ numbers?
 Is _____ auto-Redial feature _____ any known _____ on _____ non- _____.

_____ there anything _____ can tell _____ about _____ software _____ for unregistered _____?
 _____ redialing for non _____ affected by _____ software issues.
 _____ a _____ that _____ feature on unauthorized digits _____ impacted by _____ bugs.
 _____ a software bug in _____ registered calls?
 Is it possible _____ the _____ Redial _____ is _____ by _____ on _____ registered _____?
 Is there _____ known flaws relating _____ for _____ the _____ network?
 There is _____ chance that _____ feature _____ unauthorized digits _____ be _____ by _____.
 Is there _____ software glitch _____ affects automatic call _____ non-registered lines _____ a _____ phone network?
 _____ software bug _____ affects _____ redials from _____ numbers?
 The _____ on _____ digits could _____ affected _____ the _____ bugs.
 Is auto-redialing _____ digits affected _____ bugs?
 _____ of redialing _____ illegitimate numbers _____ network could _____ by _____ software flaws.
 There's a chance _____ the auto-redial _____ unauthorized digits could be _____.
 _____ any software glitch that _____ affect _____ of _____ redialing from _____ numbers?
 Do we know _____ is a software glitch that _____ the automatic _____ when _____?
 Did software _____ affect _____ which weren't _____ in _____ current _____ period?
 _____ redial from numbers _____ weren't registered _____ the current _____ period _____ by _____?
 _____ bugs _____ the redial for numbers that _____?
 _____ unauthorized phone calls are _____ affected _____ software _____?
 Is _____ impacted _____ software bugs on _____ numbers
 _____ automatic _____ by software _____ on _____ numbers?
 The _____ unauthorized _____ may _____ affected _____ software bugs.
 The _____ feature _____ unauthorized _____ could _____ impacted _____ bugs.
 There _____ a chance that _____ on unauthorized digits is _____ available _____.
 _____ redialing _____ via mobile _____ networks may be affected _____ in the _____.
 _____ functions of redialing from _____ numbers are _____ flaws.
 There _____ be bugs _____ the global _____ which affect _____ from numbers _____ in the _____.
 Is it possible _____ are _____ preventing the _____ to _____ on _____ numbers?
 _____ software glitch ruin _____ redials _____ from unregistered _____?
 Do we _____ of _____ issues _____ affect _____ back when _____ from non-registered _____?
 _____ redialing from _____ mobile phone _____ by software flaws.
 _____ any _____ bugs that _____ redials from unregistered _____?
 _____ auto-redial _____ on unauthorized _____ is possible _____ by the _____ bugs.
 _____ software issues could affect _____ for _____ digits _____ cellular network.
 _____ are software flaws that _____ of automatic redialing from illegitimate _____ via _____.
 _____ a _____ the auto-redial _____ on unauthorized digits _____ by currently _____ bugs.
 _____ you _____ any _____ bugs _____ the _____ affect redial functions for unregistered _____?
 _____ software _____ the _____ that _____ registered within the _____ time period?
 There are any _____ defects _____ non _____ number _____?
 Do _____ know if _____ any software bugs that _____ the redial _____?
 _____ software bugs affect the _____ numbers _____ weren't registered _____ current _____?
 _____ redialing in the case _____ non-registered _____ can _____ affected _____ current _____.
 _____ affect the _____ numbers _____ weren't registered currently?
 _____ there _____ that can cause redials when unlisted _____ are on _____?
 The _____ feature on unauthorized _____ affected by _____ bugs.
 Is there a _____ glitch _____ affect the _____ automatic redialing _____.
 There are _____ might _____ the _____ of _____ redialing from unlisted _____ via _____.
 Is _____ redial _____ bugs _____ non- _____ phone numbers?
 The auto-redial _____ on unauthorized digits _____ be affected _____ software _____.
 Is there _____ bugs impacting _____ auto-redialing _____ for _____ lines?

_____ a software _____ redials from unrecognized numbers?

Does the software _____ from _____ registered numbers?

There _____ software _____ affect automatic redials not _____ for _____ phone networks?

There is _____ chance _____ the _____ digits is affected by _____ software _____.

Automatic redialing _____ unlisted _____ phones _____ be affected by some _____.

Is _____ auto-Redial _____ by a _____ bug _____ the _____ lines?

_____ on unauthorized _____ affected by _____ software _____ in _____ system?

_____ in _____ mobile _____ affect redials _____ numbers not _____ phone book

Is _____ redial impacted _____ using non- _____ numbers?

Do you know _____ flaw _____ affects the _____ function _____ unregistered numbers?

There are certain _____ issues that _____ affect _____ process for _____ cellular _____

Is _____ a _____ with _____ software that causes auto _____ from _____?

Is _____ ability _____ unauthorized digits affected by _____ current _____?

Automatic _____ may _____ impacted by bugs _____ non- _____ through _____ communication network.

_____ issues can _____ process of redialing unlisted digits _____ a _____.

Is there _____ software _____ that _____ numbers now?

Is _____ software _____ redials from _____ numbers?

_____ it _____ that there _____ software defects _____ prevent automatic redialing _____?

Are auto-redialing on _____ digits affected _____ bugs?

_____ there a _____ the _____ that _____ redials _____ unlisted numbers on _____ networks?

Do _____ of _____ that affect redial function in the _____ numbers in _____ cellular _____?

_____ software issues _____ affect _____ redialing process _____ over a cellular phone _____.

Is _____ problem with software that _____ when there _____ numbers _____ GSM _____?

_____ the auto-Redial feature impacted _____ bugs _____ non- _____?

There _____ certain software issues _____ affect the _____ of digits _____

_____ issues that can affect _____ process for _____ digits _____ cellular phone _____

_____ redial may _____ by bugs _____ registered numbers _____ mobile communication _____.

Do you _____ if _____ is _____ software _____ affecting _____ ability _____ back _____ registered _____?

Do you _____ are _____ software bugs that affect _____ ability _____ unregistered _____?

_____ software _____ that messes up the _____ redials done _____ unlisted _____?

_____ there _____ bug in _____ software that hurts _____ from non _____?

Is _____ issues _____ redialing for non-registered _____?

There are any _____ redials from _____ numbers _____?

There _____ the _____ feature on _____ affected by software bugs.

Do _____ of _____ software problems _____ could affect _____ ability to _____ non- registered _____?

Did software bugs affect the _____ from _____?

There _____ bugs _____ global mobile _____ that can affect redials from _____ not _____ book.

_____ redialing _____ digits is impacted by _____ issues.

Did _____ the _____ from numbers _____ weren't _____ in the _____ period?

_____ software bugs affect _____ redial from _____ that _____ during _____ time _____?

There _____ glitch that screw up _____ from _____ digits via GSM _____?

Is _____ software _____ that _____ number redials?

_____ non- registered _____ subject to current _____ issues.

_____ there _____ problem with the software _____ redials _____ un _____ numbers _____ the _____?

Does any _____ glitch ruin the _____ from _____?

_____ auto-redial function on _____ affected _____ current software bugs?

There are _____ issues _____ affect automatic _____ having _____ on _____ phone networks.

Certain _____ can impact the _____ process for unlisted _____ phone _____

Is _____ problem _____ the automatic _____ on non registered _____ numbers _____ using _____?

It's possible that the auto-Redial feature is _____ any _____ bugs _____.

Automatic redials _____ unlisted numbers via _____ networks _____ affected _____ bugs.

Automatic redial may _____ bugs _____ non- _____ using the mobile _____.

_____ redialing from _____ via _____ can be _____ by _____ software flaws.

Are _____ software _____ that affect automatic redials _____ the _____ networks?

Are the _____ on unauthorized _____ affected _____ software bugs?

There are _____ can impact the _____ redialing _____ digits _____ a _____ phone _____

Is the _____ affected by _____ non- registered lines?

The auto-redial feature _____ unauthorized digits _____ possible _____ by _____ software _____.

The _____ digits _____ be affected _____ the latest software _____.

_____ automatic _____ by _____ problems on non- _____ numbers?

_____ the _____ be impacted _____ any known bugs _____ non register _____?

Is _____ possible that _____ is affected by _____ bugs?

_____ recognized _____ that could _____ ability to redial on unregistered _____.

The _____ feature on unauthorized _____ affected _____ current software _____.

_____ possible that there are _____ can affect automatic _____ callers?

_____ problem _____ the _____ on _____ phone numbers when using _____ network?

_____ there _____ affecting the _____ registered Redial?

_____ the ability _____ automatically _____ unregistered _____ hindered by _____ bugs?

Is _____ feature _____ any known _____ that _____ the non register _____?

Certain software _____ impact _____ redialing _____ unlisted digits _____ cellular network.

_____ of _____ auto-redial feature _____ unauthorized digits _____ the currently _____ software bugs?

It _____ possible that the _____ is _____ known bugs on _____.
