

[Demo] NLP Dataset for Customer Service Automation

Company Type	Water and Wastewater Utility Companies
Inquiry Category	Emergency response and assistance requests
Inquiry Sub-Category	Flooding in the vicinity
Description	Customers alerting the utility company about flooding in their neighborhood, either due to heavy rain or a faulty water management system, necessitating immediate action to alleviate the situation and prevent further damage.
Data Size	12,166 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Water and Wastewater Utility Company" customer inquiry. (Purchased data will not be masked.)

_____ pumps be _____ promptly _____ excessive rainfall causing rising waters that _____ a threat _____ city?

_____ you quickly _____ pumps if the water _____ too _____?

Is _____ possible to _____ action with _____ water _____ homes?

_____ quickly do _____ up _____ for homeowner _____ there is excess _____?

Can _____ on you rushing over _____ get us _____ the flooding?

Will emergency _____ begin without _____ when the risks _____ properties _____ region?

_____ there _____ swift _____ pumps _____ combat flooding?

When you receive reports _____ the threat of _____ by excessive rain, _____ systems _____ deploy _____?

_____ pumps _____ quickly _____ city _____ when _____ heavy rain?

_____ to quickly deploy _____ if _____ about rising waters _____ endanger residential _____?

Once excessive rainfall _____ threaten _____ dwellings, can residents _____ response?

Is _____ ok for pumps _____ be _____ promptly _____?

How quickly _____ expect to deploy _____ when _____?

_____ we deploy pumps _____ upon learning about _____ waters _____ threaten _____?

Are pumps dispatched _____ reports _____ excess _____ water _____ to _____ and pose a _____ to _____?

_____ pumps _____ place for _____ after a _____ rain?

Will the _____ be _____ delay _____ they receive warnings about the increased water _____?

_____ begin when the risks _____ in _____ urban region increases?

_____ excessive _____ causes _____ threatening our _____ are the _____ ready to be _____?

There have been reports _____ heavy _____ threat _____ city _____.

Will the pumps _____ in _____ if there _____ heavy _____?

Should _____ action quickly _____ there's too much _____?

_____ quickly should _____ for _____ protection _____ there is _____ rain?

How _____ is your _____ with pumping _____ when _____ about _____ waters _____ heavy _____?

Should _____ units _____ into _____ immediately _____ a _____ rain?

If _____ water _____ and homes _____ at risk, _____ go into action?

Do you have systems in place to _____ reports about _____?

_____ there a _____ response _____ city _____ in _____ event of _____ rain?

____ pumps be placed quickly ____ ____ ____ ?
 When ____ ____ ____ floods ____ ____ do you deploy ____ fast?
 Is it possible to quickly ____ pumping ____ ____ ____ ____ areas?
 ____ ____ pumps work when it rains heavily ____ the ____ in ____ ____ ____ ?
 How fast should ____ ____ ____ for ____ protection ____ ____ water ____ rising?
 ____ pumps go fast ____ reports ____ ____ rain ____ rising ____ threat ____ made?
 When ____ precipitation ____ ____ ____ ____ flood risks, ____ it ensured that efficient deployment ____ ?
 Do you immediately ____ ____ if ____ ____ ____ warning?
 ____ quickly do you install ____ ____ homeowner ____ ____ there ____ excess ____ ?
 ____ ____ possible ____ mobilize pump ____ when ____ ____ ____ rising in the city?
 Should ____ deploy ____ immediately ____ ____ ____ waters ____ could threaten residential areas?
 Do you make it ____ ____ to quickly ____ pumping ____ ____ ____ ?
 ____ ____ ____ and ____ waters ____ homes in ____ ____ ____ long will ____ take for pumps to ____ used?
 ____ rapid ____ of pumps ____ ____ stop house ____ ?
 Will you put ____ in ____ when ____ ____ in the ____ ____ a ____ ?
 Do you ____ systems ____ place to ____ pumps quickly after receiving ____ about ____ ____ ____ ____ ?
 ____ the pumps be ____ to ____ ____ there ____ too much ____ ?
 ____ water levels threaten ____ dwellings ____ ____ expect ____ ____ response?
 ____ ____ do you ____ ____ for homeowner ____ if ____ ____ excess water?
 ____ quickly ____ ____ expect ____ to be deployed when ____ ____ flooding?
 Can we rely on ____ swift response ____ reports of ____ rain ____ rising ____ ____ so that ____ ____ be ____ ____ ____ ____ our ____
 Is it possible to ____ ____ ____ deployment ____ reports of ____ ____ home ____ ?
 Should action be taken without ____ when ____ ____ ____ ____ near ____ ?
 Is it possible ____ ____ on ____ pumps ____ rising ____ ?
 ____ heavy ____ ____ rising waters ____ ____ homes in the ____ ____ pump deployment ____ ?
 ____ ____ ____ pumps ____ reports of heavy rain lead to ____ waters ____ endanger ____ ?
 ____ ____ help if ____ ____ flood because of ____ heavy rain?
 Will your ____ ____ quickly ____ they hear about ____ ____ ____ areas?
 ____ ____ me when you'll ____ ____ pumps ____ the water ____ our homes?
 Is ____ ____ ____ immediate pump deployment ____ reports ____ home ____ ?
 Will ____ ____ ____ when ____ is ____ increase ____ housing risks?
 After ____ cause high-water levels ____ ____ ____ taken ____ delay?
 Should you deploy ____ immediately ____ ____ rain ____ ____ ____ residences?
 When ____ rain causes ____ ____ that pose ____ threat ____ homes, will ____ ____ deployed ____ ?
 ____ ____ come ____ ____ the water is close ____ ____ homes?
 ____ ____ act quickly when ____ ____ reports ____ heavy ____ causing floods?
 ____ ____ deploy pumps in ____ ____ the ____ warnings?
 If ____ ____ ____ ____ levels ____ residences in the city, ____ prompt ____ be taken?
 If ____ ____ ____ ____ rain will pumps be quickly ____ in ____ ?
 Can ____ depend ____ ____ ____ response to ____ of heavy rain causing rising ____ levels, ____ ____ pumps are deployed swiftly ____
 ____ ____ ?
 The ____ ____ ____ quickly to ____ the city ____ .
 Will the pumps ____ ____ ____ fight ____ ____ ?
 Does ____ ____ of pump ____ ____ ____ of ____ levels of water ____ the ____ ?
 ____ ____ ____ homes in our ____ ____ pump deployment kick-start?
 Do you have the systems ____ place to ____ pumps ____ ____ ____ of ____ ____ ____ ?
 When ____ waters rise, ____ ____ count on ____ pump ____ ?
 ____ ____ rains excessively, are pumps ____ ____ ?
 ____ there's too ____ precipitation, are ____ ____ ready to ____ ?
 ____ receiving reports of excess ____ causing ____ ____ ____ and pose ____ ____ to urban ____ ____ pumps dispatched quickly?
 ____ you ____ to deploy ____ when ____ ____ a heavy ____ ?

When the ____ will ____ sent ____ we ____?

____ excessive rains ____ water ____ to threaten ____ residents ____ an immediate ____?

If ____ excessive ____ and ____ endanger homes ____ our ____ how long ____ it ____ to ____ pumps?
____ waters can ____ prompt pump ____?

____ the ____ rise close to ____ will the ____ quickly?

When heavy ____ waters ____ endanger ____ pump deployment start?

When the ____ makes the ____ to ____ will the ____ fast?

As ____ as excessive rainfall causes ____ waters ____ are ____ to ____?

____ pumps ready ____ deployment as soon as we ____?

____ the pumps be ____ water threatens ____?

____ soon ____ excessive ____ causes rising ____ threatening ____ homes, are ____ in ____?

____ pumps be deployed ____ excessive rain cause rising waters ____ homes ____ the ____?

____ units go into action ____ a ____ of rain?

When ____ rain ____ flooding, ____ you ____ pumps ____?

____ depend on your prompt response ____ reports ____ heavy ____ water ____ that ____ are ____ swiftly
and protect ____ city

____ is flooding, will you ____?

Will you ____ to pump ____ the ____ in ____ city if ____?

____ fast can ____ expect ____ there's flooding?

____ actions taken ____ storms cause high water levels ____?

____ excessive rains ____ home threats, ____ we expect ____ pump deployment?

____ place quickly for ____ when ____ an increased chance of ____?

____ there are ____ flooding in ____ pumps be ____ immediately?

____ it ____ to ____ deploy pumps if ____ about rising ____ that ____ potentially ____?

____ quickly to floods?

Will ____ when the risks ____ properties increase?

____ the ____ for ____ as soon as the ____ causes ____ to ____ homes?

____ you ____ pumps ____ after ____ of heavy ____ that ____ flooding?

____ reports ____ heavy rain ____ rising water threats ____ homes.

____ rainfall causes rising ____ threatening ____ homes, ____ the ____ be used?

____ the ____ go ____ there is too ____ rain?

____ floods homes, ____ the pumps ____?

____ the water ____ to homes, ____ come quickly?

Do pump ____ go ____ quickly ____ precipitation?

____ deployment of ____ floods?

If ____ are ____ of hazardous ____ levels ____ the ____ prompt action be taken ____?

Do you deploy ____ for ____ that can ____ at ____?

Do you ____ pumps ____ warning?

When it ____ heavily ____ the ____ poses a danger, will ____ the pumps ____ work?

Is it ____ to ____ deploy ____ to combat ____?

____ can homes expect ____ pumps to ____ when ____ flooding?

Is ____ to ____ when ____ too much rain?

____ the ____ ready for deployment as ____ as ____ causes ____ our homes?

How soon will you ____ action ____ our ____ by ____?

____ flooding, do pump deployment ____?

Will ____ to get ____ to ____ when the water in the ____?

____ efficient deployment ____ when excess ____ structures with flood ____?

Is there gonna be ____ you know ____ pouring?

Do we ____ pumps ____ after learning of ____ waters ____ residential ____?

____ quickly ____ pumps if there's ____ rain?

____ you ____ for homeowner protection ____ excess rain?
 ____ deploy ____ as soon ____ reports ____ heavy ____ come in?
 Is it possible ____ pump deployment ____ reports of ____ home threats?
 ____ there is excess ____ levels increase, and ____ are pumps ____ go ____ action?
 When ____ rains ____ rising waters that ____ deployment kick-start?
 ____ action ____ after storms cause ____ levels ____ residences?
 ____ are reports of ____ floodwater near ____ city, will prompt ____ to deploy pumps?
 Will ____ in ____ the ____ in ____ city is dangerous?
 Will swift action ____ taken to ____ pumps ____ reports ____ levels ____ homes?
 ____ the utility company be ____ pumps ____ once ____ are warned about the ____ of ____?
 Does ____ quick ____ of ____ systems ____ reports ____ high ____ rain?
 If there's ____ will pumps ____?
 ____ water levels threaten ____ can ____ pump ____ immediately?
 Do you ____ immediately ____ flood ____?
 When heavy rain ____ floods, ____ you going ____?
 ____ timely deployment of ____ equipment when ____ rises in the ____?
 Is it ____ to ____ pumping ____ during ____ at homes?
 Can ____ quickly to reports of heavy ____?
 Do we ____ immediately ____ rising ____ that ____ threaten residential areas?
 Is it possible for us to count ____ risks ____ areas?
 ____ are ____ the city ____ may be threatened by ____.
 When ____ should the pumps be ready?
 Can ____ expect ____ the ____ of reports of threats ____?
 ____ possible for immediate ____ reports of excessive rain ____ home ____?
 When the water in the ____ a ____ will ____ pumps ____?
 ____ emergency pumping ____ without delay when the risk ____ flooding ____?
 Do ____ when ____ excessive rain?
 ____ are reports ____ rainfall and ____.
 ____ immediately ____ pumps if there is ____ of ____ levels?
 Do you deploy ____ for ____?
 Upon ____ of ____ rain ____ water levels ____ rise, ____ pumps swiftly ____?
 What is the ____ frame ____ deployment ____ of excessive rainfall and ____ endanger homes?
 ____ rain causes dangerous ____ in ____ do you ____ quickly?
 ____ you start to pump ____ water if it ____ our ____?
 ____ have ____ systems ____ to ensure a ____ deployment of pumps when reports ____ received?
 ____ fast ____ expect to ____ pumps out ____ there ____ flooding?
 Is ____ pumps to ____ to mitigate ____ threats?
 Will you ____ pumps ____ is heavy ____?
 ____ you ____ use ____ if ____ is a lot ____ in ____?
 How ____ deploy pumps for ____ if there ____ a ____?
 ____ excessive rainfall causes ____ threatening our ____ are pumps ____ for ____?
 Will pumps ____ deployed if ____ reports ____ residences?
 Can pumps ____ quickly ____ reports of ____ the ____?
 ____ units go into action ____ excessive ____?
 Can ____ that will help if ____ houses ____?
 ____ you deploy pumps ____ for excess ____ at homes?
 ____ a ____ of ____ when rising water ____ a danger ____ urban households?
 Is ____ possible ____ deployment ____ of ____ rains and home threats?
 Are the ____ for ____ as ____ the water starts ____ in ____?
 ____ there ____ dispatch of ____ safeguard city homes?

_____ there _____ of pumps when _____ rain floods _____?
 If _____ increase _____ water levels, are _____ ready _____?

 _____ is heavy _____ will pumps be _____?
 If _____ houses _____ due to _____ can _____ pumps _____?
 _____ _____ deployed _____ there _____ reports of flooding in the _____?
 Is there _____ plan _____ rapid _____ deployment when _____ flood _____?
 _____ the _____ quickly to protect _____?
 _____ it _____ to quickly deploy _____ _____ learn about rising _____ in _____?
 _____ the _____ use _____ follow reports of high _____ of _____?
 _____ _____ to expect immediate _____ deployment _____ reports of excessive _____?
 If the _____ poses _____ risks _____ residences, _____ measures _____ for swift _____?
 _____ reports of _____ rain _____ levels to _____ can _____ be _____ swiftly?
 _____ _____ quickly use pumps if there is _____?
 _____ possible _____ rapid deployment _____ to combat house _____?
 _____ use pumps if _____ levels in homes _____ dangerous?
 How quickly _____ deploy _____ there is _____?
 Is _____ possible _____ will help _____ our _____ flood?
 _____ you use _____ if there _____ heavy _____?
 _____ sure _____ is rapid deployment _____ pumping equipment _____ floods?
 _____ rising waters _____ homes _____ our _____ do pump deployment kick-start?
 Is it _____ to rely on your _____ response to _____ of _____ rain _____ levels, _____ that _____ deployed _____ and
 When _____ is an _____ chance _____ flooding _____ residential _____ are pumps put _____?
 When _____ risk, do you have _____ for quick _____ deployment?
 Do _____ use pumps if _____ is _____ home?
 Will emergency _____ when _____ housing properties in the _____ region _____?
 Is there _____ deployment of _____ when _____ are _____?
 _____ the _____ activated quickly if _____ is heavy?
 _____ houses _____ threatened by excessive _____ pumps be put _____?
 _____ you _____ pumps soon _____ a heavy _____ causes _____ residences?
 _____ in _____ when the _____ in the _____ is dangerous?
 _____ pumps go fast on _____ of heavy _____ water?
 _____ can homeowners _____ deploy their _____ there is flooding?
 _____ pumps _____ promptly when _____ excessive rainfall cause _____ waters that pose a _____ to _____ the _____?
 _____ as soon as excessive rain causes flooding?
 _____ when _____ increase on housing properties?
 _____ you _____ the systems in place _____ a rapid deployment of pumps _____ threat _____?
 We wonder if we can _____ pump _____ waters.
 When excess rain causes _____ to _____ should pumps _____?
 _____ excess _____ levels _____ and _____ risk, are pumps ready to act?
 Is it _____ quickly _____ pumps after learning about rising _____ might _____?
 Will there be plans for _____ deployment when _____?
 _____ the _____ be used promptly _____?
 _____ pumps be _____ on quickly _____ there _____ housing _____?
 After receiving reports _____ levels to rise, _____ pumps dispatched _____?
 Will the pumps _____ if _____ flooded _____ are _____ rains?
 When there's _____ risk, are there _____ quick _____ deployment?
 _____ in the _____ response if flooding threatens _____?
 _____ the _____ of pump _____ follow a report _____ high _____ rain?
 _____ have any _____ for _____ pump deployment when _____ is a _____?

When _____ is _____ potential for flooding _____ the area, _____ the _____ in _____?

Will _____ team act _____ reports of _____ rains _____ hazardous floods?

_____ a timely _____ of pump equipment _____ poses _____ to households?

_____ to reports of flooding in _____ residential areas?

_____ we be able _____ count on prompt pump _____?

Should _____ quickly _____ when there _____ excessive _____?

Do _____ enough pumping _____ to deal _____ the residential areas?

Do _____ respond quickly _____ excessive _____?

_____ flood _____ due to heavy showers, _____ quick _____ deployment?

Will _____ deployed if the _____ the _____?

I wonder _____ pumps _____ deployed when _____ homes.

Can _____ depend on _____ to reports _____ water levels, ensuring pumps are _____ swiftly _____ our city's

_____ you _____ pumps _____ after heavy _____ causes floods near _____?

_____ rain causes _____ rise close _____ homes, will the _____?

_____ you have _____ plans for _____ pump _____ when _____ a _____ risk?

Do _____ deploy the pumps _____ soon _____ the _____ heavy _____ come _____?

Will _____ team _____ quickly _____ receiving reports of heavy _____?

_____ you deploy _____ for excess rainfall _____ could _____?

_____ quickly _____ if the water _____ high in homes?

_____ to be put _____ as soon as _____ rains start?

Do _____ have _____ ability to rapidly _____ floods _____ residential areas?

_____ there is excess _____ water _____ and homes _____ risk, _____ pumps _____ to _____ into action?

If heavy _____ causes _____ will _____ quickly _____ deploy _____?

_____ reports of excessive _____ endanger homes, _____ long will _____ for pumps to be _____?

_____ the _____ to _____ the _____ pumping equipment _____ a threatening flood?

_____ reports _____ excessive rain _____ in the city, _____ be deployed _____?

_____ possible to _____ equipment during _____ of _____ at residential areas?

_____ is an _____ chance of flooding in _____ areas, are pumps _____?

_____ action _____ if there are _____ of _____ in _____ city?

_____ water rises dangerously close _____ homes, will _____ pumps _____?

_____ you deploy pumps _____ rainfall _____ could cause _____?

Will _____ rapid _____ help _____ house flooding?

How _____ do _____ to _____ waters _____ rain with pumping _____?

Will _____ pumping commence _____ there is an _____?

_____ flooding occurs _____ rain, will you deploy _____?

Do you _____ systems in place _____ quickly deploy pumps _____ threat of _____ excessive rainfall?

How _____ use _____ if _____ waters threaten our _____?

_____ the _____ dispatched _____ there is _____ rain?

_____ it possible for _____ to _____ pumping _____ quickly during _____ residential _____?

_____ dispatched quickly after reports of _____ rain that _____ levels _____ rise _____ pose _____ dwellings?

_____ combat flooding?

_____ timely deployment of _____ pump equipment when the _____?

_____ the _____ company deploy pumps if _____ receive warnings _____ levels _____ areas?

If _____ is _____ will _____ be _____ quickly?

How long _____ take for the _____ of excessive rainfall _____ rising waters _____ homes?

Is _____ quickly _____ protect city _____?

Will _____ use the pumps when _____ the water _____ is dangerous?

Will the pumps _____ if _____ are reports _____ in _____?

When will _____ pumps be sent _____ the _____ flooding?

Do you _____ systems _____ place _____ deploy _____ after receiving reports _____ threat?

_____ count on you _____ the _____ the flooding _____ operate pumps?
 If _____ see _____ you _____ fast?
 _____ action be taken _____ if there are reports of _____ city?
 _____ pumps _____ if _____ rains _____ much?
 Will your _____ after receiving _____ of heavy _____ floods?
 _____ of pumps _____ house flooding?
 Is there _____ timely response to _____ the _____?
 Can _____ fast _____ reports _____ rain and rising _____ threat?
 _____ deployed quickly if _____ excessive rainfall cause _____ threaten homes in _____ city?
 _____ pumps be _____ combat flooding?
 _____ excess _____ domestic structures _____ flood risks, _____ that _____ deployment occurs?
 _____ there a timely _____ of pump _____ poses a _____?
 Will _____ pumping _____ without delay when the _____ increase _____ risks _____?
 When there's a flooding _____ plans for _____?
 Will _____ used _____ to _____ flooding?
 _____ able to _____ without _____ when they get warnings about high water _____?
 Does _____ use _____ systems promptly follow _____ high _____ of rain _____ city?
 As reports _____ heavy _____ lead _____ rising _____ that endanger _____ you _____ pumps _____?
 If there is _____ will the _____ be _____ quickly?
 Will _____ utility _____ deploy _____ without delay _____ get warnings about the _____?
 Is _____ made _____ occurs when excess _____ domestic structures with _____ risks?
 _____ will it take _____ pumps _____ be _____ if there are _____ excessive _____ and rising _____ area?
 _____ you have systems _____ place _____ quickly _____ receive reports _____ flooding?
 _____ receiving reports _____ excessive rainfall causing rising _____ pose _____ threat to homes in the _____
 _____?
 _____ quickly _____ you _____ pumps for _____ protection _____ is _____ precipitation?
 When water levels _____ dwellings, can _____ expect _____?
 How _____ will pumps be deployed _____?
 Is it _____ for _____ respond _____ reports of _____ rain _____ rising water _____?
 Will your _____ quickly _____ receive _____ of flooding from _____?
 If _____ are _____ hazardous floodwater levels near _____ the city, _____ be _____ to _____ pumps?
 When _____ come _____ quickly can pumps _____ deployed?
 If our houses _____ by heavy rain, _____?
 Is there _____ of pump _____ when _____ levels are _____?
 Do _____ immediately _____ pumps when _____ come in?
 _____ immediately use pumps _____ get the _____ of _____ houses?
 _____ we _____ prompt _____ to the _____ of heavy _____ causing rising _____ levels, so _____ pumps _____ quickly deployed _____
 protect _____
 _____ rising _____ homes _____ our _____ do _____ deployment kick-start?
 Do _____ deploy pumps quickly _____ that _____ cause flooding?
 _____ the utility _____ be able to _____ without _____ is _____ warning _____ increasing water levels?

 Once storms _____ levels near _____ are _____ taken _____ delay?
 Are you going _____ pumps _____ there is _____?
 _____ pumps _____ quickly if there is an _____ rain?
 Do you _____ on taking _____ pumps _____ water _____ our _____?
 _____ learning _____ that could _____ areas, should we quickly _____ pumps?
 When there is a _____ the _____ quickly?
 Will pumps _____ quickly _____ of excessive _____ cause rising _____ that pose a _____ to homes _____?
 Do _____ we _____ of rising waters that _____ potentially _____ residential areas?
 Is _____ possible _____ can _____ fast _____ of heavy rain and _____ threat?

Do pump units go _____ after _____?

Do _____ immediately deploy _____ reports of heavy _____ to _____ waters _____ endanger _____?

_____ pumps _____ time _____ the water is _____ homes?

_____ reports of excessive _____ homes _____ our _____ how long will it take _____ deployed?

Is it possible _____ are quickly _____ fight _____?

_____ rain _____ risks _____ there measures in place for _____ responses?

Will your team _____ they receive _____ of heavy _____ hazardous _____?

_____ you able to _____ pumps _____ flooding _____ homes?

When excess _____ threatens _____ structures with flood _____ sure _____ deployment happens?

_____ deployment of pumps _____ flooding?

How long _____ it take for pumps _____ be _____ of excessive _____ endanger _____ in our _____?

Do _____ quickly mobilize pumping _____ during floods?

Will pumps _____ if _____ rains?

_____ pumps _____ when _____ rises _____ to homes?

Does _____ use _____ pump systems _____ high _____ high levels _____ rain?

_____ system in place _____ a rapid _____ of pumps _____ receiving _____ about _____ threat of _____?

When will _____ be sent if _____ our _____?

_____ it possible that _____ can count _____ scene of _____ with pumps?

_____ be used _____ to mitigate _____ flooding?

Do _____ have _____ place to _____ deploy pumps when _____ reports _____ flooding?

_____ pumps _____ used quickly?

Do _____ deployment begin _____ flooding threatens homes _____?

_____ it rains _____ and _____ water in _____ poses _____ danger will _____ to work?

Will _____ pumps _____ quickly when the _____?

Can we expect _____ deployment _____ amid _____ of threats _____?

_____ pumps dispatched _____ to _____ city _____?

_____ there is heavy rain, _____?

Can _____ depend on _____ prompt response _____ rain _____ rising water levels, _____ pumps _____ deployed quickly and _____ our _____

Can _____ there is _____ rain in _____ city?

Is it possible for _____ amidst _____ and excessive rain?

When _____ the pumps _____ when _____ are threatened _____ flooding?

How quickly do _____ deploy _____ for homeowner _____ too _____ water?

_____ to _____ rains heavily _____ the water _____ the city is dangerous?

If the _____ will the _____ used?

_____ there is excessive rain, _____ in _____ fast?

Do the _____ of _____ follow reports of high _____ rain _____?

Is it possible that _____ to protect _____ homes?

_____ pumps _____ quickly if there _____ excessive rain?

If heavy _____ make _____ houses _____ the _____ help?

_____ the pumps help _____ our _____ flood _____ rain?

_____ excessive rain _____ endanger homes in our area, _____ it take to _____?

When _____ close to homes, _____ pumps come _____?

During rising waters, _____ pump activity?

Does pump _____ action _____ excessive rains?

Do _____ use pumps _____ rain _____ water levels in _____?

Is _____ pumps when the rain _____ homes?

When reports _____ cause rising waters _____ homes in _____ be deployed promptly?

_____ the pumps _____ quickly when the _____ is too _____?

_____ reported _____ risks to residences, are _____ in place _____ prompt _____?

_____ are swiftly deployed during floods?

_____ are _____ by excessive _____ will _____ be quickly _____?

_____ rising water poses _____ homes, is _____ timely mobilize of _____ equipment?

_____ there _____ rainfall, _____ rise, and homes _____ risk, are pumps ready _____?

_____ the utility _____ they receive warnings _____ flooding?

_____ rising water _____ a danger to urban _____ is _____ a _____ the _____?

_____ storms cause _____ levels near residences, will _____ delay?

Is _____ to the rising water that _____ a _____ to _____?

Water _____ rise and _____ a _____ to _____ dwellings if pumps are not _____ dispatched _____ excess _____.

_____ will the _____ sent to _____ with _____ the city?

_____ reports _____ excess _____ cause water _____ rise, can _____ be dispatched _____?

_____ water in the city _____ a _____ will _____ put pumps _____?

_____ the pumps _____ in _____ there is an _____ likelihood of _____?

Will _____ reports of excessive rain _____ to rise _____ in the city?

Is there a timely _____ of _____ when _____ water _____ households?

Do _____ systems in _____ to deploy pumps quickly after receiving _____?

Will _____ pumping commence when there _____ of _____ in _____?

Is it possible to quickly deploy _____ excessive _____ that could lead _____?

If reports of excessive _____ rising _____ endanger homes in _____ area, _____ is _____ sending _____?

_____ is heavy, will _____ activated quickly?

Can we _____ on you rushing over _____ operating _____ get _____ flood?

_____ be _____ when _____ excessive _____ cause flooding in the city?

Will _____ come soon _____ is close to _____?

_____ reported precipitation poses flood _____ residences, are _____ place _____ quick _____?

Does the prompt _____ pump _____ reports _____ amount of rain?

_____ rains _____ rising _____ threatening our homes, are the _____ be _____?

_____ your team respond _____ when _____ receive reports _____ areas?

_____ poses _____ housing _____ the pumps be activated quickly?

_____ deploy _____ as soon _____ flood _____ come in?

_____ pumps come to _____ rescue when _____ much _____?

_____ rain _____ you deploy pumps quickly?

_____ excessive rain _____ threaten city _____ residents expect pump deployment?

_____ the prompt _____ pump systems _____ to _____ high levels of _____?

Are _____ in _____ there is _____ increased likelihood of flooding _____ residential _____?

_____ you deploy _____ quickly for rain _____ cause _____ at _____?

If _____ to _____ the measures in place to respond _____?

Should _____ units _____ into _____ quickly _____ houses are _____ danger?

_____ to _____ pumps for homeowner protection quickly _____ excess rain?

_____ efficient deployment occurs when excess _____ is _____ structures _____ flood risks?

_____ reports _____ excessive rainfall _____ rising _____ that _____ a threat to _____ city, _____ pumps be deployed _____?

_____ water _____ we _____ on prompt pump _____?

_____ quickly _____ pumps _____ homeowner _____ if there is a _____ of _____?

_____ it _____ sense to _____ pumps _____ we _____ of _____ waters _____ could threaten _____ areas?

_____ pumps be _____ quickly after reports of _____ rains _____ to rise _____?

_____ have heavy _____ will you _____?

If reported rain poses _____ risks to _____ in place _____?

_____ excessive rains cause rising _____ the _____ pumps be _____ immediately?

_____ the _____ be dispatched _____ city homes?

_____ you immediately _____ pumps when there is _____ of _____ cause _____?

_____ deploy pumps _____ if rain _____?

Will emergency pumping begin _____ delay when _____ is _____?

Do _____ pumps when we _____ about rising waters _____ areas?
 _____ wondered _____ we could count _____ prompt pump _____ during _____.

Will _____ when the risk of _____ on _____ properties _____?

When _____ the pumps _____ report flooding _____ city?

Do _____ delay when _____ cause _____ levels _____ residences?

Will emergency _____ start when _____ risks _____ city increase?
 _____ pumps promptly _____ flood risks?
