

[Demo] NLP Dataset for Customer Service Automation

Company Type	Electricity Suppliers
Inquiry Category	Assistance in understanding the tariff structure
Inquiry Sub-Category	Tariff structure changes clarification
Description	Customers seek clarification on any recent or upcoming changes to the tariff structure, such as rate adjustments or modifications, to stay informed about potential impacts on their electricity costs.
Data Size	5,062 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Electricity Supplier" customer inquiry. (Purchased data will not be masked.)

____ peak/off-peak ____ adjusted, ____ variations throughout day/night cycles?

Did ____ peak/off-peak times cause ____ change?

Has ____ peak/off-peak ____ changed to ____ variations ____ the ____?

Has off-peak ____ changed ____ that they ____ bigger ____ on the cost ____ of the day and ____?

____ periods ____ affect cost fluctuations ____.

Have adjustments ____ been made?

____ peak/off-peak ____ costs throughout the ____?

____ will ____ by ____ peak or ____ times.

____ hours caused ____ movements ____ daytime and nighttime?

____ there ____ changes to ____ affecting rates throughout?

____ periods have ____ impacting costs throughout ____.

____ periods ____ to impact cost ____ throughout the ____?

Is ____ possible that ____ to ____ periods ____ changes in pricing?

Does changing ____ peak ____ day and night ____?

Did ____ time periods lead to changes ____?

____ adjustments ____ peak and ____ hours ____ the ____?

Has ____ off-peak periods ____ to affect ____ day?

____ changes ____ periods ____ price ____?

Cost variations will be ____ any changes ____ peak ____.

Are ____ changed ____ a ____ impact on ____ cost of the day ____ night?

Does ____ periods affect ____ differences?

____ the ____ to make ____ bigger difference ____ cost ____ day or night?

The changes ____ peak/off-peak ____ the ____ of prices throughout the ____.

Do ____ peak/off-peak times have ____ throughout the ____?

____ affected by ____ peak ____ off-peak times.

____ across ____ transitions if adjustments were ____ to ____ periods.

Is ____ possible ____ off-peak periods have ____ affect the cost ____?

Is ____ possible that ____ have changed ____ affect the cost ____ throughout the day?

Is the ____ of the ____ cycles ____ because of ____ periods?

Is ____ periods ____ so ____ the cost ____ the ____ cycles?

____ changed peak/off-peak times ____ the ____?

Does ____ have been ____ to have ____ impact on costs throughout ____?

The ____ the day may ____ affected ____ change in off-peak ____.

Have ____ to affect daytime/ ____?

Do ____ have been adjusted ____ reflect ____ the day?

____ the off-peak periods ____ so as ____ affect ____?

Have ____ peak periods ____ impact cost variation?

____ peak/off-peak times ____ to changes ____ pricing?

____ changing the ____ hours ____ how ____ change over ____?

____ peak periods have ____ to have a ____ impact ____ day?

____ periods been changed to ____ cost variations ____?

____ altering ____ times cause ____ costs?

____ periods ____ so that they ____ a ____ impact ____ cost ____ the day/night cycles?

Changing ____ times ____ costs ____ the day.

____ across ____ transitions ____ adjustments ____ made to ____ times.

Does alternating ____ peak-off ____ change during the ____?

Did ____ peak hours ____ cost movements between ____ and ____?

Pricing ____ day-to-night ____ due to adjustments to ____.

Cost ____ are affected ____ any changes ____.

____ peak-off ____ changed ____ prices?

____ the ____ periods ____ to ____ a ____ cost ____ throughout the rest of the day?

____ the ____ periods ____ costs?

____ day-to-night transitions when adjustments ____ peak/off-peak timeframes.

Changes ____ pricing across day to night ____ have ____ caused ____ adjustments ____.

____ you ____ the peak hours ____ cause shifts ____?

____ be affected by any ____ to ____ off-peak time ____.

Cost ____ can ____ changing peak/off-peak time ____.

____ periods changed to ____ cost ____ throughout ____ day?

____ periods ____ to ____ daytime/night costs?

____ periods changed ____ they ____ impact ____ the cost of ____ day/night cycles?

____ there any ____ in peak/off-peak windows impacting ____?

____ or off-peak ____ affect ____ variations over time?

____ adjustments ____ off-peak periods may ____ the cost variation.

Pricing ____ as ____ days went on ____ the ____ times.

____ peak/off-peak ____ impact cost variations ____?

Are ____ periods changed ____ a bigger ____ on the ____ day?

____ recent adjustments in ____ and ____ cost variations?

Have there ____ adjustments ____ off peak ____?

Does ____ change ____ cause ____ movements between daytime ____ nighttime?

Cost could ____ by altered peak ____.

____ off-peak periods ____ so that ____ affect ____?

____ peak/off peak ____ adjusted to have ____ on ____ throughout ____ day ____ night?

____ adjustments in on-peak ____ off-peak periods affect ____?

____ changes ____ day-to-night transitions were ____ by ____ times.

Pricing ____ as the days ____ the changes were made ____.

____ can be affected by changes ____ slots.

Has ____ changed so ____ they ____ a ____ on ____ of ____ throughout ____ rest of the day?

____ day/night ____ peak/off-peak periods?

_____ days went by, _____ made _____ peak/off-peak _____ lead to _____ changes?
 Have _____ periods _____ to _____ throughout the _____ and night?
 _____ periods changed so _____ they _____ a bigger _____ on _____ things during the rest of _____?
 Have off-peak periods _____ that they _____ a bigger impact on the cost _____ things _____?
 Cost _____ altered _____ or _____ hours.
 _____ there _____ changes _____ off-peak _____ that _____ rates throughout?
 _____ changes made to _____ periods _____ pricing _____ the _____ went by?
 Has the _____ they _____ a _____ impact on the price throughout _____?
 Is _____ the _____ or _____ changed _____ of off-peak periods?
 Did the _____ made to _____ pricing _____ days went _____?
 Does altered _____ the day?
 Adjusting _____ peak or off-peak _____ may _____ an _____ variations.
 _____ the _____ peak demand periods changed to affect _____ daily _____ basis?
 Is _____ possible _____ things _____ the rest _____ day _____ night has changed because of off-peak _____?
 Did _____ peak _____ off-peak to _____ cost _____?
 _____ peak hours _____ causing _____ fluctuations _____ daytime to _____?
 Does changing _____ periods affect _____ between _____ and _____?
 Is _____ the _____ cycles _____ as a result _____ off-peak _____?
 Does _____ peak/off peak periods _____?
 Has _____ the peak-off _____ prices?
 The _____ will _____ affected _____ altered _____ or off-peak _____.
 _____ peak/off-peak timing _____ done _____ cost _____?
 _____ by recent adjustments in _____ off-peak periods.
 Is _____ a _____ in peak _____?
 Does changing _____ times _____?
 Pricing changed _____ the _____ with _____ changes _____ peak/off-peak times.
 Does changing _____ change the _____?
 Do modified _____ times _____ to _____?
 Peak/off-peak _____ cost fluctuations _____ cycles.
 _____ it _____ the changes _____ to peak/off-peak _____ changes in _____?
 _____ peak/off _____ periods _____ changed to affect _____ variations?
 _____ changing _____ peak/off-peak _____ affecting _____ day and night?
 _____ peaks _____ throughout _____ day?
 Is it _____ that off-peak _____ so that they affect _____ cost _____?
 _____ the _____ affect how much _____ costs?
 _____ off-peak _____ changed so _____ they have _____ bigger _____ the cost _____ things throughout the _____?
 _____ off-peak periods _____ so that they _____ the _____ day _____ night?
 _____ peak/off peak times may _____ throughout _____ night.
 The _____ can be _____ peak or _____ times.
 Is _____ adjustment of peak/end-off _____?
 _____ timing _____ affected the _____?
 _____ might change costs _____ the _____.
 Is peak/off-peak _____ changed, _____ throughout _____ day?
 _____ changing peak _____ and _____ costs?
 Has _____ off-peak _____ changed _____ affect _____?
 _____ peak _____ have an effect _____ costs?
 Did _____ changes made _____ change prices as the _____ on?
 _____ it possible _____ the off-peak _____ changed so that _____ the cost of _____?
 Can _____ changes _____ off-peak _____ affect the _____ variations?
 Are _____ changed _____ they affect daytime/night _____?

Changes to peak/off-peak time _____ changes in pricing _____ went _____.

Has _____ hours _____ how _____ change?

Is the _____ influential _____ prices?

_____ off-peak _____ they _____ a _____ impact on costs throughout the day?

I wondered if _____ were _____ during different _____ of _____.

_____ be affected by changed _____ off-peak _____.

Recent changes in _____ and off-peak _____ cost _____.

Did adjustments to _____ or off-peak _____ effect _____ cost _____ over _____?

_____ in pricing may _____ made _____ times.

_____ it _____ adjustments were _____ times to _____ changes in pricing?

Changes made _____ may _____ led _____ in pricing as _____ days went _____.

Have off-peak periods _____ order to _____ a _____ impact _____ the _____ or night?

Do adjustments to _____ and off-peak hours _____ variations _____ the _____?

Did the changes made _____ peak/off _____ times lead _____?

_____ night _____ were impacted by _____.

Do peak and off-peak _____?

_____ it _____ adjustments impact _____ price _____?

Did _____ peak hours _____ cost _____ between daytime _____?

Are off-peak periods changed to _____ on _____ cost of things throughout the _____ night?

If _____ have changed so _____ they make _____ on the cost of _____ the rest _____ night ,

_____ adjusted _____ cost variation throughout the day?

_____ to _____ peak times affect pricing?

Is _____ the day _____ the _____ changed _____ the off-peak periods?

Pricing _____ day-to-night _____ might have _____ adjustments _____ peak/off-peak timeframes.

Have _____ periods _____ in _____ make _____ bigger impact on the _____ things throughout _____ day _____?

Do off-peak _____ bigger _____ the cost _____ things throughout the rest of the day?

_____ across day-to-night transitions might _____ changed _____ to _____ to peak/off-peak _____.

Have you _____ peak hours _____ to _____ shifts _____ cost?

_____ the _____ made _____ time _____ cause _____ to change _____ days _____ by?

_____ modified peak/off-peak _____ costs _____ the day and _____?

Did _____ changes _____ peak/off-peak _____ periods _____ to changes _____ pricing _____ days _____ on?

_____ the _____ the _____ periods changed to _____ prices _____ a daily or _____?

_____ changes _____ may have _____ to changes _____ pricing.

_____ days _____ on, did _____ changes _____ time periods lead _____ pricing changes?

_____ across _____ transitions may _____ been affected by _____ timeframes.

Is _____ possible that _____ to _____ off-peak _____ cost variations?

Did the _____ the _____?

_____ changes _____ to peak/off-peak _____ affect _____ as the days _____?

Has the _____ changed _____ that _____ affect _____ all day?

_____ periods _____ to _____ cost variation?

_____ can affect _____ throughout the _____

Is _____ possible that the cost _____ the _____ because _____ the off-peak _____?

Is there _____ in _____ caused by _____?

Did _____ change _____ hours off-peak _____ cause _____ cost between _____ nighttime?

_____ to _____ off-peak hours may _____ variations.

Cost variations affected _____ peak/ off peak _____?

_____ periods have _____ to impact _____ variation?

Is the price _____ down across all _____ of day and _____ of _____ peak/off-peak _____?

_____ modify peak hours _____ cost fluctuations _____ daytime to _____?

_____ possible that off-peak _____ changed to affect _____?

_____ across day-to-night transitions could be affected _____ peak/off-peak _____.

_____ periods _____ so that _____ the day and night more?

Cost will _____ affected _____ peak _____ off-peak _____.

_____ it possible that _____ have _____ to affect _____?

_____ the changes made to peak/off-peak _____ pricing _____?

Did _____ to _____ and _____ schedules _____ daily cost _____?

_____ peak/off peak _____ have been _____ negative _____ on _____ the entire day?

_____ could be _____ any changes _____ time slots.

Pricing across _____ transitions might _____ to _____ made _____ times.

Did adjustments to _____ or off-peak _____ affect _____ time?

Have _____ changed _____ a _____ on the cost of things _____ the _____ and night?

Did the changes _____ to _____ time _____ change _____?

Is recent _____ affecting cost variations?

Did the changes _____ cause _____ in pricing?

_____ have changed _____ of _____ to peak/off-peak time periods.

_____ peak/off-peak periods _____ cost _____ day and night?

Did _____ prices?

Are _____ impacting price _____?

_____ pricing _____ because of _____ made _____ peak/off-peak time _____?

_____ to peak/off-peak _____ to _____ in pricing _____ the _____ went by?

Did you _____ peak _____ to cause cost _____?

_____ the off-peak periods changed so _____ a bigger _____ the cost of _____ throughout _____?

Pricing _____ be affected _____ day/night _____

_____ to make _____ bigger impact on _____ cost _____ the _____ or night?

Is _____ times causing _____ costs?

_____ been _____ to peak and _____ across the day _____?

Are _____ peak periods changed _____ the day?

_____ there _____ adjustment _____ impact _____ throughout the _____ and night _____?

Has the _____ of _____ to affect prices _____ a _____ basis?

_____ the timing of _____ peak _____ to impact prices _____ daily _____ nightly _____?

_____ the day/night cycles _____ impacted by the changing _____ periods.

Did the changes _____ peak/off-peak time _____ in _____ the days went _____?

Does adjusting _____ peak _____ schedules _____ daily _____ variations?

_____ the _____ periods changed so that _____ make _____ on _____ price _____ throughout the day?

Are _____ so _____ to affect daytime/night _____?

_____ peak/off-peak times may cause _____ changes _____.

Did _____ to peak or off-peak _____ affect _____?

Changes in _____ across day-to-night transitions may _____ to peak/off-peak _____.

_____ price changes adjusted during _____ of _____?

_____ day-to-night transitions _____ adjustments made to peak/off-peak times.

_____ the changes to _____ time _____ to _____ pricing?

Pricing across _____ transitions _____ of _____ to peak/off-peak times.

_____ the _____ affect costs _____ night?

_____ the _____ periods different so that they _____?

Cost _____ are affected _____ any _____ to _____ time _____

_____ different _____ of _____ were price changes _____?

Did _____ with _____ affect prices?

_____ can be _____ changes to peak/off-peak _____ slots.

_____ it _____ the cost of _____ day has _____ impacted by _____ off-peak _____?

_____ the change _____ hours _____ cost movements between daytime _____?

Is the cost change affected _____ on-peak _____ periods?
 _____ to _____ or off-peak _____ have _____ effect on daily _____?
 _____ timing _____ touched _____ cost reasons?
 _____ there _____ to peak and _____ that _____ variations?
 _____ the off-peak _____ changed _____ that _____ throughout the day?
 Peak/off-peak _____ affect day/night _____.
 _____ cost of _____ by _____ off-peak periods that have changed?
 Is _____ cost of _____ day or _____ as a _____ periods?
 Did changing _____ cause _____ daytime to nighttime?
 _____ peak _____ off-peak hours across _____ day and night?
 Has _____ periods been _____?
 _____ peak _____ may _____ cost variations over time.
 Did _____ to peak _____ the _____ cost variations?
 _____ off-peak _____ changed so that _____ affect the cost of _____?
 Did _____ modify peak _____ causing _____ in _____?
 Cost _____ any _____ to _____ time slots
 _____ this _____ during the _____ and night?
 Pricing _____ as _____ went on as _____ of _____ changes _____ peak/off-peak time _____.
 Have _____ periods _____ so they affect the _____ throughout _____?
 _____ change across _____ if adjustments _____ made _____ peak/off-peak.
 Is there _____ correlation between _____ to _____ or off-peak _____ and _____?
 Did changing peak hours _____ movements _____ and _____?
 _____ adjustments _____ day/night prices?
 _____ made _____ peak/off-peak periods _____ pricing changes?
 As the days went on, _____ the _____ times _____ change?
 _____ the changing _____ periods affect _____?
 Has _____ peak-off hours _____ change throughout the _____?
 _____ to _____ time slots _____ costs?
 _____ pricing _____ day-to-night transitions may have _____ by adjustments _____ peak/off-peak _____.
 Is _____ to _____ cost variations throughout _____ day?
 Do _____ changes _____ peak/off-peak _____ periods lead _____ changes in _____?
 _____ off-peak periods changed _____ to _____ a bigger _____ the cost _____ the _____?
 Is the _____ related to _____ across day _____ night _____?
 Did the change _____ peak _____ cost movements between _____?
 _____ off-peak _____ impact cost variations throughout _____ day?
 _____ across day-to-night transitions _____ caused by _____ peak/off-peak timeframes.
 Impact _____ day/night _____ peak _____ periods?
 _____ modifying peak/off-peak _____ change costs _____?
 As the _____ went _____ did the _____ to _____ times _____ changes _____ pricing?
 _____ changing _____ periods affect costs between _____?
 Are _____ periods adjusted to impact cost _____?
 Did _____ peak _____ off peak _____ cost _____ daytime _____ nighttime?
 _____ changes _____ lead to changes in pricing?
 _____ changes in _____ costs _____ day?
 Is _____ a change in off-peak periods _____ affect _____?
 Are there _____ changes _____ windows _____ daytime/nighttime pricing _____?
 _____ of periods _____ costs _____ day?
 _____ peak/off _____ adjusted _____ have a _____ costs throughout the day?
 Pricing _____ day-to-night _____ due _____ adjustments made _____ peak/off-peak _____.
 _____ off-peak _____ cost movements between daytime to _____?

Have _____ changed in order to have _____ on _____ the day?
 _____ affected _____ changing peak or _____?

Is _____ possible that _____ periods _____ impact the _____ things throughout the day?
 _____ of peak/off-peak periods affect _____?

Does changing peak hours _____ cause _____ during _____?
 _____ adjustments _____ and off-peak _____ affect costs.

Are _____ to _____ or _____ schedules impacting _____ variations?

Have off-peak _____ changed _____ impact _____ the cost of things _____ day?

Is _____ possible that _____ cause _____ peak/non-peak costs?
 _____ periods change _____ bigger impact on the cost of _____ throughout the _____?

Does _____ changes _____ and off-peak periods _____ cost _____?

Does _____ peak/off-peak periods _____ cost during _____ and _____?

Does modifying peak/off _____ throughout the _____?

Is _____ price _____ to go _____ across all _____ of _____ night _____ of the changes made _____?

Did _____ alter _____ fluctuations during _____ and dark _____?
 _____ adjustments in _____ off-peak periods _____ costs.
 _____ peak/off-peak time _____ may _____ price changes as the days _____ on.

Changes _____ off-peak schedules had _____ on daily cost _____.

Changes in _____ can be _____ peak/off-peak _____.
 _____ affected by altered day/ _____.

_____ the adjusted cycles _____ peak/non-peak _____?

Do _____ adjustments in _____ and off-peak _____ cost _____?

Is _____ periods changed _____ make _____ impact on the _____ day?

Are there _____ changes to peak and _____ night?

The _____ made to peak/off-peak _____ periods might _____ changes in _____ as the _____.

Has off-peak periods _____ so _____ they _____ cost of things _____ and _____?
 _____ may _____ been caused by _____ to peak/off-peak _____ periods.

Has _____ peak-off _____ influenced _____?

Is _____ day/night _____ variations _____ adjustments?

The _____ went by and did _____ changes _____ to peak/off-peak _____ changes _____?
 _____ changing of off-peak _____ costs?

Does changing _____ periods affect cost _____?

Have the off-peak periods _____ that _____ a bigger _____ of things _____ the day _____ night?
 _____ on-peak and _____ periods may affect _____ variations.

_____ the changes _____ times _____ changes in pricing _____ the _____ went by?

Cost variations _____ affected _____ any changes _____ time _____.

Changing peak or off-peak _____ daily _____.

The _____ in _____ and _____ periods _____ affect the _____ variations.
 _____ periods changed _____ daytime/night costs?

Is it _____ changes _____ to peak/off _____ led to _____ in _____?
 _____ made _____ peak/off-peak times leading _____ changes _____ pricing?

Is _____ changes _____ to peak/off-peak times leading _____ in pricing _____ by?
 _____ changing peak/off-peak times _____ costs?

Changes in _____ day-to-night _____ been _____ adjustments _____ to peak/off-peak periods.
 _____ the _____ changed _____ to make a bigger impact _____ the _____ the _____?

Are adjustments to _____ or _____ the _____ daily cost _____?
 _____ changing _____ peak/off-peak periods make a _____?

_____ changes _____ peak/off-peak coincide _____ changing _____ the day and _____.

_____ affected by Altered _____ cycles.

Changing _____ hours off-peak can _____ cost _____ and _____.

_____ variations affected _____ the changes to _____ slots?

Is _____ change _____ to _____ daytime/night costs?

Has the _____ of _____ peak _____ periods changed _____ affect prices _____ nightly _____?

Cost _____ by _____ peak or _____ times.

_____ changing _____ and night transitions _____ to peak/off-peak?

Changing _____ might _____ costs _____ the _____ and night.

Changing peak _____ cause _____ cost during daytime and _____.

_____ off-peak schedules can _____ rates _____?

_____ recent _____ on peak _____ off _____ might affect the _____ variations.

The _____ of the day/night _____ been _____ by _____ off-peak periods.

_____ be affected _____ to _____ cycles.

_____ affect _____ during the daytime and night?

_____ to peak coincide with changing prices _____ and night?

Does changing peak hours off-peak _____ daytime _____?

_____ adjustments in _____ and _____ peak periods _____ cost _____.

_____ peak/non-peak _____ to adjusted cycles?

Changes to peak/off-peak _____ have _____ to changes _____.

Is _____ changes _____ related _____ changing prices _____ the _____ and night?

_____ can be _____ by _____ day/night _____.

Is _____ that someone _____ during _____ and dark hours?

_____ to peak and _____ hours _____ cost _____?

_____ possible _____ the _____ to _____ coincide _____ changing of prices.

_____ been adjusted, impacting cost variations _____ day _____ night.

The _____ made _____ peak/off-peak coincide _____ changing _____ across day _____.

Will the _____ moments affect _____?

Did the _____ day/night _____?

Changing peak/off-peak times _____ cause _____ throughout _____.

Does _____ the _____ affect _____ between the hours?

_____ the days went _____ did the _____ made _____ peak/off _____ time _____ lead _____ in _____?

Has _____ hours influenced _____ prices _____?

Have _____ periods _____ affect _____ of things throughout the day _____ night?

_____ changed across day-to-night transitions _____ made _____ periods.

_____ to peak and off-peak _____ have _____ influence _____.

_____ to _____ if price variations _____ during different times _____ day.

_____ change the cost _____ during the day _____?

The changes made _____ may have led _____ changes _____ the _____ went _____.

Is it _____ the _____ the day _____ changed because of off-peak _____?

_____ to _____ off-peak _____ have _____ impact on cost variations?

_____ peak/offpeak _____ touched for _____ reasons?

_____ peak _____ off-peak _____ cause cost changes?

_____ the off-peak periods _____ changed so that they affect _____ of _____ throughout _____.

_____ to _____ times _____ costs throughout _____ day?

Has the time _____ peak _____ periods changed _____ on a daily _____?

Did adjustments _____ off-peak schedules _____ the _____ cost _____?

_____ peak/off peak _____ variation _____ day and night?

_____ be affected _____ altered _____ or off-peak times.

_____ off-peak _____ that they make _____ bigger impact on the _____ of things _____ rest _____ the _____ night?

_____ peak periods have been _____ throughout the day?

fluctuations _____ costs _____ by timing _____?

_____ periods _____ been _____ variation throughout the day _____ night.

Did the _____ to _____ periods _____ an effect _____?
 _____ anyone alter _____ fluctuations _____ the _____ night?
 Is _____ changes _____ peak/off-peak related to the _____ of _____ the _____ night?
 _____ the _____ of the peak _____ to affect prices on _____ nightly _____?
 Have _____ off-peak _____ changed _____ impact _____ the _____ and night?
 Did _____ peak/off-peak time periods _____ prices _____ the days went _____?
 _____ windows _____ daytime/nighttime pricing trends.
 _____ the off-peak periods change _____?
 _____ the _____ periods affect costs _____ the day _____?
 _____ made _____ peak/off-peak _____ periods affect _____?
 The _____ went _____ the changes made to _____ peak _____ affect _____?
 _____ could be changed _____ day-to-night transitions _____ were _____ to _____.
 _____ made to peak _____ across the day and night?
 Has _____ adjustment _____ influenced prices?
 Does changing the _____ periods have _____?
 Is the _____ changing _____ or _____ hours?
 Is _____ possible _____ the off-peak _____ changed _____ they _____ bigger _____ cost of things _____ the day?
 Have _____ adjustments in _____ off-peak periods _____ cost _____?
 During different times _____ day, _____ price _____?
 Does _____ the _____ off-peak _____ affect the cost _____?
 Is it _____ that off-peak periods have changed _____ that they affect _____ cost _____ rest _____ night?
 _____ changing _____ peak/off-peak _____ affect cost _____ and night?
 _____ cost of _____ or night _____ be _____ by _____ change _____ off-peak _____.
 Are _____ off-peak _____ so that they make _____ on the cost of _____ rest _____ the _____ and _____?
 Did _____ off-peak _____ to have an impact _____?
 Cost _____ be _____ by _____ peak _____ times.
 Have _____ so that _____ make a _____ impact on the cost _____ during _____ the day?
 Altered _____ or off-peak _____ will _____.
 _____ off-peak hours affect _____.
 _____ changing _____ periods _____ the cost _____?
 _____ the adjustments _____ peak/end-off _____ prices?
 _____ alternating _____ hours affect _____?
 _____ adjustments affect _____ night price _____?
 Have _____ changed _____ affect costs throughout the _____?
 Did _____ peak _____ off-peak _____ variations over time?
 Do _____ to peak _____ off-peak schedules affect _____?
 Does _____ the _____ affect _____ at night?
 _____ the _____ periods changed so that _____ night _____?
 Is it possible _____ made to _____ coincide with _____?
 _____ peak/off peak _____ impact _____ variations?
 _____ made _____ peak/off-peak times leading to _____ pricing?
 _____ change for peak/off-peak periods?
 The _____ the _____ affected by off-peak periods changing.
 The changes made to _____ periods _____ to _____ in _____ the days _____.
 Did changes _____ schedules impact daily cost variations _____?
 Is _____ by _____ peak or _____ times?
 _____ off-peak _____ so _____ have a bigger impact _____ the cost of _____ and night?
 _____ affected by the _____ made _____ peak/off _____ time _____?
 Has _____ the _____ demand _____ affect _____ prices on a daily/ _____ basis?
 Is the _____ to the _____ made to _____?

Does changing the _____ and nighttime _____?

Does changing _____ affect _____ costs?

_____ affect _____ price variations?

_____ changes _____ to _____ of prices across day _____ night transitions.

_____ the _____ periods _____ so that _____ a bigger impact on _____ cost _____ everything _____ and night?

Does the _____ made to _____ periods _____ to _____ pricing?

Is it possible _____ have _____?

Does changing peak/off-peak _____?

_____ recent _____ on-peak and off-peak _____ affect _____ variations?

Is _____ that _____ periods changed to _____ bigger _____ the cost of _____ day or _____?

_____ the day and _____ are _____ by off-peak _____?

_____ possible _____ cost fluctuations _____ affected by peak/off-peak _____?

Pricing changed _____ day-to-night transitions _____ to peak/off-peak _____.

Did _____ hours off-peak, causing _____?

Pricing _____ transitions may _____ changed _____ made _____ peak/off-peak timeframes.

_____ changing peak hours _____ movements between _____ nighttime?

Is _____ possible that _____ periods affect _____?

Do the _____ affect pricing?

_____ changed peak _____ did _____ cause cost _____ daytime and nighttime?

Is _____ make a _____ on the _____ throughout the day?

Is _____ that _____ have _____ so they affect the _____ throughout _____ day?

_____ it possible _____ the off-peak _____ have _____ make a _____ impact on _____ things _____ day long?

_____ off-peak periods _____ so they make a _____ impact on the _____ the _____?

Do peak/off _____ the day/night cycle?

Is it _____ that _____ periods have _____ to make a bigger _____ the _____ things _____?

Is the _____ off _____ influencing _____?

Is _____ periods have changed so _____ make _____ bigger impact _____ the cost throughout the _____?

_____ adjusted to impact cost variations throughout _____.

_____ peak _____ off-peak periods _____ adjusted?

_____ the _____ of prices across _____ transitions related to _____?

_____ you changed _____ hours _____ to cause _____ cost?

Cost _____ be affected _____ or _____ times.

_____ changing of prices across day _____ related _____ changes?

Is _____ shift _____ peak/off-peak?

Has _____ periods _____ adjusted, _____ variations _____ the day?

_____ the cost affected _____ adjusting _____?

Has _____ peak-off hours _____ prices change _____?

The _____ the _____ cycles _____ by the _____ the off-peak periods.

_____ adjustments _____ to peak/off-peak _____ leading to _____ in _____?

Did _____ change _____ peak/off-peak _____ messing _____ the _____?

_____ you change peak _____ to cause _____ in _____ daytime to _____?

Did changes _____ or off-peak _____ affect _____ cost _____?

_____ movements between _____ nighttime did _____ change _____ off-peak?

Does the changes _____ peak/off-peak _____ of prices?

Is _____ that off-peak periods _____ been changed _____ make a bigger _____ on _____ the rest of _____

Is the _____ of _____ day _____ night changed _____ the _____?

During the day and _____ off-peak periods _____?

_____ any changes _____ schedules affecting _____ throughout?

_____ there _____ changes to off-peak schedules _____ affect _____?

_____ periods _____ adjusted _____ throughout the day and night?

_____ you change _____ hours off-peak, which caused _____ nighttime?
 Is there any _____ the _____ schedules affecting _____?
 _____ change in _____ across _____ and night _____ the peak/off-peak changes?
 _____ went _____ did _____ changes made _____ peak time periods _____ changes in pricing?
 _____ a cost change _____ off-peak _____?
 Is it possible that _____ have _____ on _____ cost of _____ throughout _____ day and night?
 Changing of prices across _____ night _____ may _____ related _____ the _____ to _____.
 _____ you modify peak _____ cause daytime _____ shifts _____ cost?
 Has _____ the _____ had _____ effect on _____ change?
 _____ off-peak _____ to _____ bigger _____ cost of things throughout the _____ and night?
 Is _____ possible _____ the cost _____ the _____ night have changed _____ of _____ off-peak periods?
 Cost _____ affected _____ to peak/off-peak time _____?
 _____ peak/ off _____ periods have _____ adjusted to _____ a negative _____ day _____?
 _____ the peak/off-peak _____ to impact costs throughout _____?
 Is the day/night _____ adjustments?
 _____ the off-peak _____ to affect _____ night costs?
 Does _____ times _____ changes in _____?
 Changes to peak or _____ schedules _____ daily _____.
 Is _____ periods changed _____ that _____ affect the cost _____ throughout _____?
 Is _____ any _____ on daytime/nighttime _____ from _____ in peak/off-peak _____?
 Is _____ off-peak _____ cause of cost _____?
 Is the _____ in prices across day _____?
 Has the _____ periods _____ costs?
 Are recent adjustments _____ off-peak _____ variations?
 _____ affecting how prices change?
 Is it _____ the off-peak _____ have changed to make _____ bigger _____ throughout the _____?
 Has there _____ to _____ off-peak hours across _____ day _____ night?
 _____ variations affected by any _____ to _____ off-peak _____?
 Were _____ adjusted during _____ day?
 _____ variations may be _____ by _____ to peak/ _____.
 _____ the changes _____ to peak/off-peak periods _____ to _____ days _____ on?
 _____ it possible that _____ to peak _____ daily costs _____ time?
 Do _____ periods have been _____ to _____ a negative effect _____ long?
 _____ you change peak hours _____ to cause _____?
 _____ the _____ night cycles have off-peak _____?
 _____ the _____ made to peak/off-peak time _____ a change _____?
 Is _____ cost _____ throughout the _____ the day _____ night _____ by _____ periods?
 Did _____ alter the _____ the day _____ night?
 Does the adjustment _____ prices?
 Did _____ cost _____ between daytime and nighttime?
 The _____ in on-peak _____ periods affect _____ cost _____.
 _____ could _____ affected by _____ or _____ hours.
 Recent changes _____ periods may affect _____ variations.
 Changing _____ hours off-peak can _____ from _____ night.
 Is _____ possible _____ adjustments impacted _____ and night _____?
 _____ the _____ period affect _____?
 _____ peak/off peak periods _____ altered _____ affect _____ variation?
 _____ peak _____ off-peak schedules effect _____ cost variations?
 Does peak/off _____ periods have _____ to have a _____ on costs _____?
 _____ cost of _____ throughout _____ and night _____ impacted _____ the _____ in off-peak _____.

Is _____ to peak _____ schedules impact _____ variations?

Day/night _____ variations _____ impacted by _____.

Did someone _____ the _____ fluctuations _____ the _____ the _____?

_____ the _____ go _____ all _____ of _____ night _____ to the changes _____ to peak/off-peak timing?

Changing peak _____ hours can have _____ on _____.

_____ the _____ peak demand _____ changed _____ impact prices _____ nightly _____ daily basis?

Is _____ that the off-peak _____ changed _____ they affect the cost _____ the rest _____ day and _____

_____ altering peak/off-peak _____ costs _____ day?

_____ there a change to peak _____ day _____ night?

_____ alter the peak hours off-peak _____ cause shifts _____?

_____ peak/off-peak time periods lead _____ changes _____ pricing as _____ went by?

_____ changes _____ peak/off-peak time periods _____ to changes _____ pricing.

_____ changing _____ across _____ night _____ related to peak/off-peak _____?

_____ modified peak/off-peak _____ affect _____ day?

_____ off-peak _____ changed so _____ have a bigger _____ on _____ day or _____?

Recent _____ in _____ off-peak periods _____ the cost _____.

Pricing changed _____ transitions due _____ to peak/off-peak _____.

Did you _____ hours off-peak _____ cause _____ in _____?

_____ off-peak schedules _____ an effect on cost variations?

Changing _____ off-peak _____ may _____ on daily costs.

_____ recent adjustments _____ off-peak _____ affect the _____ variations?

Is _____ in peak/non-peak _____ by adjusted cycles?

_____ periods been _____ to _____ cost _____ throughout the day?

_____ peak/off-peak _____ to impact _____ variations?

Timing changed _____ cost _____?

_____ the off-peak periods change _____ that _____ a bigger _____ on the _____ the day?

Have _____ and off-peak _____ changed _____ cost variations?

Cost could _____ affected by _____ peak _____ off _____.

During the day _____ night cycles, _____ off-peak _____ affect _____?

Does _____ times affect costs _____ the _____?

Have adjustments _____ and _____ cost variations?

Did _____ made _____ peak/off peak time _____ pricing _____ went by?

Did the changes made _____ peak time _____?

Is it possible _____ to peak _____ impact daily _____?

Is _____ to _____ off-peak schedules affect daily cost variations _____?

Does _____ changes made _____ peak/off-peak _____ to _____ pricing?

Has _____ peak demand periods _____ to affect _____ prices on a daily _____?

_____ peak _____ peak schedules affect daily _____ variations?

Cost _____ affected by any changes to _____.

Pricing _____ to _____ may _____ changed _____ to adjustments made _____ peak/off-peak _____.

_____ the changes _____ to peak/off _____ periods _____ in pricing?

_____ can cause changes in _____.

Did _____ prices?

_____ changing the peak _____ costs?

_____ have _____ adjusted to have a _____ on costs _____ the day.

Did _____ changes _____ to _____ time periods result in _____?

_____ the _____ periods _____ so _____ they can _____ bigger _____ on _____ of things throughout the _____ and _____?

_____ was changed _____ when _____ were made to _____ times.

_____ affect prices?

Were _____ to _____ that _____ in _____ in pricing?

____ variations are affected ____ peak/off-peak ____ slots
 The ____ on and ____ the changes ____ periods affect pricing?
 ____ the ____ periods ____ that ____ bigger impact on ____ cost of the day ____ night?
 How ____ adjustments ____ peak ____ off-peak ____ cost variations?
 Does ____ peak ____ cause ____ change ____ the day?
 ____ to peak ____ off-peak ____ can ____ cost ____ throughout the day ____.
 Did pricing change ____ a result ____ made ____ peak/off-peak ____?
 Has changing the ____ prices change?
 ____ variations may be affected by the ____ to ____.
 Is ____ peak/off peak periods ____ have ____ impact ____ all day?
 ____ the ____ made ____ peak coincide ____ changing ____ throughout ____ day and ____?
 ____ may ____ across day-to-night transitions ____ adjustments made to ____.
 Did ____ timeframes ____ to changes in ____?
 Do changing ____ affect ____ day?
 Is ____ peak/off peak ____ adjusted to impact ____ day?
 The changes ____ to ____ may have ____ price ____ the ____ went on.
 ____ peak or off-peak ____ affect ____.
 Has the ____ changed so ____ a ____ impact ____ the cost ____ the day or ____?
 ____ changing peak ____ off-peak ____ shifts ____ cost during ____ nighttime?
 Is ____ a ____ change ____ peak/off-peak ____?
 Do the ____ been changed to ____ variation?
 Is there ____ for peak/off-peak ____?
 Is ____ of the day/night cycles ____ by ____ in ____?
 ____ possible ____ modified peak/off-peak times ____ throughout ____ day?
 The changes ____ time ____ led to ____ changes.
 Changes in ____ and ____ affect ____ variations.
 Is ____ off-peak ____ so that ____ daytime/night costs?
 ____ peak ____ been ____ impact ____ variations throughout the ____?
 ____ cost affected ____ adjusted ____ periods?
 ____ cost affected by ____ peak ____ times?
 ____ you modify peak ____ off-peak to cause ____ in ____?
 Cost variations ____ be affected ____ any changes ____ peak ____.
 Is recent adjustments in on-peak ____ periods ____?
 Are ____ periods changed to ____ on ____ cost of things ____ the day ____ night?
 Did changes made to ____ timing cause ____ across all ____ of the day ____?
 ____ modified ____ times ____ costs ____ change ____ the day?
 ____ times could cause ____ to change throughout ____.
 ____ affected by any changes ____ time ____?
 Is ____ an ____ prices?
 Did ____ hours off-peak, ____ shifts ____ cost ____ daytime ____ nighttime?
 Did ____ changing peak ____ cost ____ daytime ____ nighttime?
 Is ____ possible that changes ____ times ____ to ____ in ____?
 Has off-peak ____ to ____ costs ____ day?
 ____ off-peak ____ change so ____ a bigger ____ cost of the day or ____?
 ____ the days ____ on, did ____ changes ____ to peak/off-peak ____ to ____ in ____?
 Changes ____ to ____ may have led to ____ days went on.
 Is ____ peak/off ____ times cause ____?
 Is it ____ that you ____ peak hours ____ to ____?
 Do ____ cause variation ____ peak/non-peak ____?
 The recent ____ in ____ and off-peak periods ____ cost ____.

Changing of _____ day and _____ transitions coincide _____ changes _____.

Is adjustment of _____?

_____ peak/ off _____ periods _____ costs?

Cost _____ can _____ affected by _____ on-peak and off-peak _____.

_____ there any change _____ peak/off-peak _____ impacting _____?

Have _____ periods been changed _____ a _____ impact _____ the cost _____ day?

_____ the cost _____ by _____ adjustments _____ on-peak and _____?

_____ the peak _____ off-peak to _____ cost fluctuations?

Is the _____ of _____ day/night cycles affected _____?

_____ adjustments to _____ have an impact on daily _____?

Is it possible _____ off-peak _____ affected _____ cost variations?

Does _____ periods _____ costs between _____ hours?

Does _____ peak/ _____ costs?

Did changes to _____ or _____ impact _____ cost variations?

Do _____ periods _____ adjusted _____ cost variation _____ the day and _____?

Did _____ peak or _____ schedules _____ daily _____ variations?

_____ you modify peak _____ cause _____ fluctuations?

Is the _____ of prices across _____ night _____ off-peak?

_____ you alter peak _____ cause _____ in costs?

_____ peak/off-peak _____ affect _____ the day and night?

_____ and night can _____ altered by adjusting _____ off _____ hours.

Do recent changes _____ and _____ periods _____ cost _____?

Does _____ peak/off-peak _____ costs _____ daytime and night _____?

Has _____ timing _____ the peak demand periods _____ impacting _____ the _____ and evening?

_____ peak/off-peak _____ changed, impacting cost _____ throughout the _____?

Did _____ to peak/off-peak windows _____ pricing _____?

Does altered _____ an _____ on _____ throughout the _____?

Is _____ of the _____ cycles affected _____ periods _____?

Has _____ off-peak periods _____ to _____ a _____ cost throughout _____ day?

_____ changing the _____ periods _____ difference?

_____ adjustments to _____ off-peak schedules _____ an _____ daily costs?

Are _____ off-peak _____ that they _____ the cost of _____ throughout _____ and _____?

_____ the _____ to _____ off-peak _____ daily cost variations?

_____ the change _____ across the day and _____ related _____?

_____ as _____ days went _____ was _____ of the changes made to peak/off-peak _____?

Does _____ affect _____ costs?

Altered _____ or _____ hours can _____.

_____ in _____ and off-peak periods _____ the cost variations.

Is pricing _____ the _____ to _____ times?

Did _____ peak/off-peak _____ affect _____ pricing trends?

Did changing peak _____ cost movements between _____?

_____ someone alter _____ fluctuations during _____ or _____.

_____ the _____ to peak/off-peak _____ periods lead _____ price _____?

_____ changes _____ peak/off-peak _____ periods may have _____ an effect _____.

_____ variations are _____ by changes _____ peak _____ slots.

Do peak/off _____ periods affect costs _____ night?

Changes _____ or _____ affect daily cost variations.

Do _____ times _____ costs throughout _____ day _____ night?

Did _____ to peak or _____ schedules _____ variations over _____?

Changes to _____ hours have _____ affect on _____.

Have _____ to peak _____ schedules impacted _____ variations?

Pricing across _____ may have been affected _____ timeframes.

_____ variations _____ by any _____ slots?

Cost _____ by _____ peak _____ off-peak hours.

_____ the peak/off-peak _____ may _____.

Are _____ or off-peak schedules affecting daily _____?

The changes made _____ peak/off-peak time periods led _____ changes _____ pricing _____.

Altered _____ off-peak _____ might _____ the _____.

Cost variations _____ impacted by _____ to _____ slots.

_____ the off-peak _____ a bigger _____ on the _____ of _____ throughout _____ day and night?

Did _____ changes _____ peak/_____ timing cause the price _____ go down _____ all _____ of _____?

_____ changes _____ to peak/off-peak _____ change _____ as the _____ went by?

Did the _____ off-peak schedules affect cost variations _____?

_____ adjusted leading _____ cost _____?

_____ you altered _____ hours off-peak _____ cause shifts _____?

Pricing _____ change because _____ altered _____.

_____ could _____ by altered peak _____ off peak _____.

_____ going _____ across _____ of _____ day _____ night because of _____ changes made _____ peak/off-peak timing?

Changing peak/off-peak _____ can _____ the _____.

Has _____ the peak-off hours _____ during the _____?

Did adjustments _____ peak _____ schedules affect _____ variations?

_____ the _____ made _____ peak _____ with changing _____ prices _____ day and _____?

Is there _____ change to impact costs _____ the _____?

Is cost _____ adjusted peak/off-peak _____.

Are _____ off-peak _____ changed _____ a bigger impact on the _____ and _____?

Is _____ costs _____ to _____ cycles?

Is the off-peak _____ that they have a _____ impact _____ the _____ or night?

The cost _____ day _____ be affected _____ the _____ in _____ periods.

Are _____ the _____ and _____ due to off-peak _____?

Changing peak hours _____ can cause shifts _____ cost _____.

Has _____ the _____ periods changed _____ affect prices on _____ nightly basis?

Do off-peak _____ affect _____ cost _____ the day or night?

_____ changed _____ that they _____ the cost _____ the day/night cycles?

The _____ times might have _____ changes in pricing.

_____ have _____ effect on _____ variations?

_____ the peak/off-peak _____ affect cost _____?

Is the changing _____ prices across _____ and _____ the _____ made to _____?

_____ modifying peak/off peak times _____?

Is _____ adjusted _____ cost variations?

Did _____ peak and _____ daily costs?

_____ peak/off _____ to _____ cost _____ throughout the day?

_____ the cost fluctuations during _____ daylight or _____?

_____ there _____ costs because _____ adjusted cycles?

Is _____ change to _____ to changing _____ prices _____ and _____?

During the day and night cycles _____ off-peak _____?

_____ the _____ peak or _____ schedules affect _____ costs over _____?

_____ changing the peak/off-peak _____?

_____ so that they _____ impact on the cost _____ things throughout _____ day?

_____ cost of _____ day/night cycles _____ be _____ by off-peak _____.

The _____ variations _____ by the _____.

_____ peak periods have an _____ on _____ throughout _____ and _____?
 _____ you _____ to _____ to cause shifts _____ cost?
 Have peak/off-peak periods _____ impact _____ throughout _____ day?
 _____ peak and off _____ costs?
 _____ the _____ to _____ during the day and night?
 _____ the changes _____ peak/off-peak time periods _____ to _____?
 _____ off-peak periods _____ that they _____ bigger _____ the cost throughout _____ day?
 Is it possible that adjustments to _____ or _____ affect _____?
 _____ to peak and off-peak hours _____ on _____.
 Did _____ to peak/off-peak times _____ pricing _____?
 Have _____ off-peak _____ changed _____ they _____ a bigger _____ on _____ things _____ rest of the day _____ night?
 Does _____ with on/off _____ prices?
 Did _____ cost _____ during _____ dark hours.
 Changing _____ peak/off-peak periods _____ the _____ of _____.
 Do _____ periods change _____ affect _____?
 _____ made to peak/off-peak _____ cause changes in _____ the days _____?
 _____ might _____ because of adjustments made _____ peak/off-peak timeframes.
 _____ off-peak periods changed _____ that they _____ bigger impact _____ the cost of _____ or _____?
 _____ someone _____ the cost _____ during daylight _____ the _____?
 Are there _____ leading _____ cost _____?
 _____ adjustments affect _____ day and _____?
 Did _____ change _____ fluctuations during daylight _____?
 _____ peak periods have been _____ have _____ impact on _____ the _____ night.
 _____ the _____ the day/night _____ as a _____ off-peak periods changing?
 _____ possible _____ changes made to _____ with _____ prices?
 Cost _____ be affected _____ peak/off-peak time slots.
 Do _____ peak _____ off-peak schedule _____ cost variations?
 Did _____ periods change _____ they _____ bigger _____ the cost of the _____ cycles?
 Did adjustments _____ day/ _____?
 _____ the changes _____ periods affect _____ pricing _____ the days went _____?
 _____ that the _____ have changed _____ to affect the _____ of things throughout _____ day?
 Recent _____ in on-peak and off-peak _____ affect _____.
 Are peak/off-peak _____ changed _____ variations throughout _____ day?
 _____ the _____ periods changed so _____ they _____ bigger impact on the cost _____?
 Do _____ peak/off _____ times _____ changes _____?
 Changes _____ peak/off-peak _____ with _____ of prices _____ the day _____.
 _____ have _____ adjusted to _____ negative impact on cost _____ day _____ night?
 _____ impact on daytime/nighttime _____ trends from _____ in peak/off-peak _____?
 _____ if day/night costs _____ be affected _____.
 Does _____ modified peak/off-peak times _____ day?
 _____ variations _____ by _____ changes to peak/off _____ slots.
 _____ variations can be altered across _____ night _____ adjusting _____ and _____.
 Did _____ changes _____ peak/off-peak time _____ pricing as _____ days went _____?
 _____ price _____ impacted by the adjustments.
 _____ pricing _____ transitions was _____ to peak/off-peak times.
 _____ changed so that _____ cost of the day/night _____ more?
 _____ periods _____ to _____ bigger _____ on _____ cost throughout the day?
 _____ have been _____ by adjustments made to peak/off-peak _____.
 The changes made to _____ to changes _____ pricing.
 _____ peak/off peak _____ cause _____ to _____ the day.

The ____ of ____ cycles might be impacted by _____.
 ____ peak/off peak times ____ changes in ____ the ____?
 Is ____ off-peak periods ____ that ____ daytime ____ night costs?
 Did ____ affect ____ price ____?
 ____ peak/off-peak periods ____ cost?
 ____ periods ____ affect ____ cost of the day/night cycles?
 ____ peak ____ been adjusted to have ____ impact ____ the ____ and night?
 Modifications in ____ pricing trends.
 Cost ____ by altered peak and _____.
 Have peak/off-peak periods been adjusted, ____ cost ____ and ____?
 Do ____ periods change ____ that they ____ a ____ impact ____ the ____ of ____ throughout ____ day ____?
 Do peak/off peak ____ change ____?
 ____ periods adjusted to impact ____?
 ____ to make a bigger impact ____ the ____ the day?
 Does modifying ____ times cause ____?
 Did ____ periods change so ____ they ____ bigger impact on ____ of ____?
 Is adjustments to peak ____ cost variations?
 ____ periods ____ adjusted in order to ____ variations?
 Is ____ off-peak ____ so that it makes a ____ impact on ____ throughout the ____?
 Are adjusted ____ peak/non-peak ____?
 ____ off-peak periods changed ____ the day ____ night?
 Changing ____ cause changes ____ costs ____ the day.
 Have the off-peak ____ so ____ they have ____ bigger ____ cost of ____ the day and ____?
 Changing peak ____ in cost ____ daytime and ____.
 ____ cost ____ by ____ and off-peak periods?
 Is the pricing affected ____ changes ____ peak/off-peak ____?
 ____ it possible that changes made ____ peak/off-peak time ____ led ____?
 ____ day/ ____ cycles ____ pricing?
 The cost of ____ the rest ____ the ____ affected if off-peak _____.
 ____ off-peak periods changed ____ make ____ bigger impact on ____ the ____?
 ____ adjustments to ____ and off-peak ____ affect cost variations during ____?
 Does changing the ____ costs?
 ____ cost variations be ____ and night?
 ____ changes ____ day/night ____?
 ____ peak/off-peak ____ cause changes ____ costs?
 ____ wonder ____ altered cost ____ during daylight or _____.
 Is ____ impact changed ____ the ____ and night ____?
 Does ____ the ____ periods affect ____?
 ____ to ____ or off-peak schedules impact ____ over ____?
 Do you ____ peak hours off-peak causes ____ and ____?
 Is ____ peak/off peak periods changed ____?
 ____ peak ____ changed to ____ cost variation ____ day?
 Has the timing ____ peak demand ____ affect ____ a daily ____?
 Is the off-peak ____ changed ____ that ____?
 ____ altered peaks ____ throughout the ____?
 Have ____ off-peak ____ changed so that they affect ____ day ____ night?
 ____ peak/off peak ____ all day?
 As the days ____ did ____ made to ____ periods ____ in prices?
 ____ if ____ variations were adjusted ____ of the day.
 ____ peak/off ____ times affect ____ throughout the ____?

_____ changes _____ peak/off-peak _____ lead to price changes _____ the _____ on?
 Does _____ change _____ peak/end-off moments _____?
 _____ modified peak/off-peak _____ cause changes _____?
 Does changing _____ periods _____ during _____ day and _____?
 The _____ things throughout _____ the day _____ be _____ if _____ are changed.
 Did your change _____ peak _____ cost _____ to nighttime?
 _____ peak/ _____ affect costs _____ day and night?
 _____ day _____ have _____ off-peak periods changed to _____ costs?
 Changing _____ costs across _____ day/ _____.
 _____ peak _____ hours might affect _____ variations.
 Are _____ periods changed to make _____ bigger impact on _____ things _____?
 _____ periods changed _____ make _____ bigger impact on the cost _____ the _____?
 _____ it possible _____ costs _____ the day _____ night _____?
 Cost _____ altered peak _____ times.
 _____ cost _____ the day/night cycles may _____ change of off-peak _____.
 _____ impacted by altered peak _____ times.
 _____ it possible _____ to peak/off peak _____ to _____ in _____?
 _____ alternating _____ peak-off _____ how _____ change?
 _____ cost _____ the day/night _____ by the change in off-peak _____.
 _____ been changed to _____ a bigger impact _____ cost _____ things _____ the day?
 Does _____ peak/off-peak _____ affect _____ day?
 _____ that off-peak periods _____ they make a bigger impact _____ the _____ of _____ throughout the _____?
 _____ to peak/off-peak timeframes _____ to _____ in pricing _____ transitions.
 Is modifying _____ times _____ in _____?
 _____ change the cost _____ during daylight _____ hours?
 _____ changes to _____ cause the _____ go down across _____ times _____ day _____ night?
 _____ variations _____ to peak/off-peak time slots?
 _____ been _____ to affect cost variation _____ day and night?
 Pricing may have changed _____ a result of _____ peak/off-peak _____.
 _____ peak/off peak _____ impact _____ the day and _____?
 Did _____ peak _____ off-peak _____ affect _____ variations?
 Do _____ peak _____ have been adjusted to _____ negative _____ costs throughout _____?
 Did the changes _____ periods _____ change?
 Do _____ have been adjusted, _____?
 _____ changed as the _____ went _____ the changes _____ to _____.
 _____ you _____ the peak _____ to _____ cost fluctuations?
 Did you _____ hours _____ cause shifts in _____?
 Do _____ peak/off peak _____ have _____ changed _____ have a negative _____?
 _____ have been _____ to impact the _____ variation?
 _____ the cost _____ things throughout _____ day and night _____ because of _____ off-peak _____?
 _____ peak/off _____ times _____ cause _____ in _____.
 _____ peak/off-peak _____ with price changes across _____ day _____ night.
 _____ off-peak times _____ cost.
 _____ true that adjustments _____ peak or _____ cost variations?
 Did the changes _____ to _____ lead _____ changes in _____?
 Cost _____ and night can _____ changing _____ peak/off-peak periods.
 The _____ to _____ time periods _____ to changes _____ pricing.
 _____ adjusted during _____ of day?
 _____ peak/off _____ a negative impact _____ costs throughout the day/night _____?
 _____ changing _____ and night transitions related _____ peak/off-peak changes?

The recent adjustments _____ peak _____ peak _____ may _____ cost variations.
 _____ of the day _____ be impacted if _____ periods are changed.
 Is this change _____ impact _____ during _____ day _____?
 Are _____ periods _____ to _____ variations?
 _____ the _____ made _____ related to _____ of _____ day and night _____?
 Does changing the peak/off-peak _____?
 Cost variations effected _____ to _____ slots?
 Does peak/off peak periods _____ cost _____?
 Did the changes _____ timing _____ to _____ down _____ the _____ and night?
 _____ made _____ peak/off-peak _____ periods might _____ changes in _____ as the _____ by.
 Have off-peak periods been _____?
 _____ variations _____ by any _____ the peak/off-peak _____ slots.
 _____ variations _____ be affected _____ adjustments in on-peak _____ periods.
 Did _____ changes made to _____ affect _____ pricing?
 Does _____ costs _____ day and night?
 The changes _____ peak/off-peak _____ periods may _____ in _____ in _____.
 Is it _____ that _____ periods _____ to _____ impact _____ the _____ of the day or night?
 Does _____ changes to _____ time _____?
 _____ affected _____ peak or off-peak times.
 _____ changing _____ hours _____ cost _____ the _____ and night?
 Cost _____ affected _____ or off-peak _____.
 _____ the _____ periods _____ so _____ make a bigger impact on the _____ of _____ the _____?
 Did _____ change _____ affect daytime/night costs?
 Did _____ peak or _____ schedules affect _____ time?
 As the days _____ by, _____ changes _____ to changes in pricing?
 _____ the _____ changed _____ bigger impact _____ the price of things throughout the day?
 _____ the _____ related _____ changing of prices throughout the _____ and _____?
 Changes in _____ can be caused _____ peak/off _____.
 Pricing _____ be _____ to day/night _____.
 _____ the changes _____ peak _____ prices _____ day and night?
 _____ the changes _____ peak/off-peak time _____ have an effect _____?
 _____ peak _____ affect cost variation throughout the _____?
 _____ alternating _____ how prices change?
 Altered _____ or off-peak _____ affect _____.
 Pricing _____ have _____ as a _____ the _____ made _____ peak/off-peak _____.
 _____ off-peak periods _____ that they make a _____ on _____ cost _____ throughout the rest of _____?
 Do _____ periods have _____ adjusted _____ affect cost _____?
 Pricing changed _____ went by, did the _____ peak/off-peak _____ lead to _____?
 _____ may be affected _____ changes to peak/off-peak time _____.
 _____ the _____ hours made a difference in _____?
 Changes _____ night transitions may _____ by adjustments _____ to peak/off-peak timeframes.
 _____ changes _____ and _____ altered costs?
 Changing _____ times might _____ throughout _____.
 Pricing could be _____ by altered _____.
 _____ periods have been adjusted _____ impact _____ throughout _____ day?
 Modifications in _____ windows _____ pricing _____.
 _____ it _____ periods have been _____ to make a _____ impact _____ cost _____ the day?
 Does _____ peak _____ to effect cost variation?
 Pricing _____ across day-to-night _____ made to peak/off-peak times.
 _____ peak and _____ schedules _____ variations?

In _____ a bigger _____ on _____ cost _____ things _____ rest of the _____ night, have off-peak periods _____?
_____ modifications _____ costs throughout _____ day?

Is it _____ the off-peak periods _____ changed so _____ effect the _____ of things _____?

Is the off-peak _____ that they _____ day or night?

_____ cost _____ throughout _____ of the _____ could _____ impacted by off-peak _____ changing.

_____ might be affected _____ to _____ peak time slots.

_____ changed as _____ days _____ on, did the _____ peak/off-peak time _____ that?

_____ adjustments to _____ off-peak _____ daily cost variations?

Do recent adjustments _____ and _____ periods _____ cost _____?

_____ peak periods _____ been _____ impact _____?

_____ the _____ hours _____ how prices _____?

Has _____ changed _____ that they make a bigger _____ on the _____ of things throughout _____?

_____ the _____ on, _____ changes made to _____ periods lead _____ changes _____ pricing?

Did _____ to peak/off-peak times result _____ in _____?

_____ adjustments affect day/night price _____?

Recent changes _____ off-peak periods _____ affect cost _____.

_____ the off-peak periods changed _____ make _____ bigger _____ the cost _____ things _____ the rest of _____?

_____ changed as the _____ the changes made _____ times.

Does the adjustment of _____ impact _____ prices?

Do _____ change costs all _____?

_____ cost variations _____ have _____ impacted by _____ peak or _____.

_____ of _____ day/night cycles changed because _____ periods?

Is _____ change to _____ of prices across the _____ and _____?

_____ off peak _____ have _____ adjusted to _____ variation?
