

[Demo] NLP Dataset for Customer Service Automation

Company Type	Automotive Parts Retailers
Inquiry Category	Pricing and discounts for automotive parts
Inquiry Sub-Category	Pricing for OEM vs. Aftermarket Parts
Description	Customers want to know the price difference between Original Equipment Manufacturer (OEM) parts and aftermarket parts to make a cost-effective choice for their vehicle.
Data Size	5,148 paraphrases
Want to buy data?	Please contact nlp-data@gross.me via your business email address.

Masked sample paraphrases of one "Automotive Parts Retailer" customer inquiry. (Purchased data will not be masked.)

Does ____ make ____ sense ____ invest ____ money ____ parts for ____ long-term performance?
Would ____ front for ____ components ____ worth it in ____ run?
Would ____ money up ____ components make ____ later ____?
____ allocating additional funds ____ manufacturers ____ long-term results?
____ additional funds ____ in ____ part a sound financial ____?
____ higher upfront spending ____ original ____ a better performance ____?
____ resources to ____ components benefit the ____ fiscal outcomes?
____ makes ____ to ____ more ____ on parts ____ perform better long-term?
____ resources to the ____ purchase of components due to ____ performance?
____ make sense ____ more ____ on ____ that are better ____?
Does making ____ investment in ____ yield ____ results ____ run?
____ improved ____ performances ____ higher initial investments ____ genuine ____ equipment ____ components?
____ smart to pay more upfront ____ better ____?
Does ____ make ____ to spend more ____ parts ____ perform ____ over ____ long ____?
____ wondering ____ it ____ for me to spend ____ original ____ parts initially.
Is ____ to invest ____ upfront on OEM ____?
____ for parts ____ financial ____ the long run?
Is it ____ to ____ more ____ equipment ____ parts?
____ a financial ____ to investing in ____ with ____ manufacturer parts?
Would ____ more ____ for original equipment ____ returns?
Will ____ higher upfront spending of ____ to ____ better long ____?
____ performances justify higher initial investments in ____ equipment ____?
Will ____ higher upfront ____ of ____ equipment ____ a ____?
____ a ____ of ____ equipment yield ____ better long term performance ____ the ____ to ____ term?
Is spending ____ original ____ manufacturer ____ a sound financial ____?
____ paying ____ for original ____ allow for better financial returns ____?
Does it ____ sense to ____ money on ____ equipment ____ better long-term ____?
____ sense to ____ more ____ upfront in order to ____ performance?

Will higher _____ of _____ parts _____ in _____ performance?
 _____ you think it makes _____ to have _____ performing _____ the long _____?
 Can more resources be _____ purchase of _____ better long-term _____?
 _____ a _____ investment in _____ yields better long-term _____?
 Do _____ believe it _____ sense to _____ more on _____ that _____ in _____?
 Will spending _____ on original _____ parts _____ term financial _____?
 _____ a higher upfront _____ equipment _____ help the _____ financially?
 Will a higher _____ spending _____ original equipment parts _____ better _____?
 _____ spending more _____ Equipment Manufacturers _____ better _____ financial _____?
 Will _____ more _____ original equipment _____ better _____ financial _____?
 _____ upfront _____ parts _____ cost-effective choice?
 Will a _____ of _____ equipment _____ a _____ long-term _____ financially?
 _____ additional funds be _____ in _____ equipment _____?
 _____ spending more initially _____ long-term _____?
 _____ add _____ to _____ better results from _____ equipment manufacturers?
 _____ higher _____ investments _____ genuine _____ (OEM) components justified?
 _____ it _____ to allocate _____ resources _____ purchase of components _____ of _____ long-term _____?
 _____ lasting outcomes _____ costs of _____ in _____ equipment manufacturers?
 _____ spending _____ parts benefit _____ long-term?
 Does _____ yield better long-term results _____ on _____?
 Does _____ more in OEM parts for improved _____?
 _____ possible _____ more resources to _____ of components due to _____ performance?
 _____ more spending _____ upfront yield _____ long-term _____?
 _____ it _____ invest _____ parts that cost _____ initially, _____ offer _____ later?
 Do you _____ it's _____ money on _____ that _____ over time?
 _____ a higher _____ of original equipment give a _____ financial _____?
 _____ higher upfront _____ equipment yield _____ long-term performance?
 Is _____ upfront spending of _____ better _____ term performance?
 _____ it _____ to invest more _____?
 Are additional funds _____ original equipment _____ a _____ choice?
 Will a higher upfront spending _____ yield a _____ long- _____?
 _____ think _____ worth investing _____ costlier _____ long-term results?
 Is investing _____ funds _____ original equipment manufacturer _____ a _____?
 Will _____ higher upfront spending _____ original _____ allow _____ long _____?
 _____ more _____ for _____ equipment yield _____ returns in _____ future?
 _____ practical _____ more _____ original equipment manufacturer (OEM) _____?
 _____ makes sense to spend more _____ better performing original _____?
 Will _____ upfront spending of original _____ for a _____?
 _____ lot _____ spending on _____ yield _____ long term performance?
 _____ higher upfront spending of _____ parts _____ performance in the long _____?
 Will _____ higher upfront _____ of _____ a better _____ for _____?
 _____ of investing _____ components _____ be justified by superior lasting _____.
 _____ allocating _____ to _____ purchase of _____ benefit _____ performance of the component?
 Is _____ possible to allocate _____ of components _____ the _____ fiscal outcomes?
 _____ a higher upfront _____ original equipment _____ performance _____ the company?
 _____ higher upfront spending of original _____ parts _____ long-term _____?
 Will _____ higher _____ spending _____ parts yield _____ better _____ financially?
 I _____ like to _____ if _____ beneficial _____ on original equipment manufacturers _____.
 _____ long-term _____ higher _____ investments in genuine _____ manufacturer components?
 Can more _____ lead _____ improved long- _____ performance?

_____ make _____ to _____ in more money upfront for _____ long-term _____ the OEM?
 _____ an _____ an _____ equipment manufacturer _____ a sound financial _____?
 Is it possible to _____ more _____ to _____ of _____ due _____ long-term _____?
 _____ a higher upfront _____ of _____ equipment _____ a _____ the long run?
 Is it _____ more money _____ parts that _____ better?
 _____ a higher _____ spending of _____ a _____ long- _____ performance?
 Will a _____ upfront _____ parts _____ a _____ long-term _____ in the _____?
 Is _____ investment _____ genuine original equipment _____ components _____?
 Does _____ upfront investment _____ components yield _____ long _____?
 Does increasing the initial _____ components _____?
 Does it make _____ more money _____ that _____ last longer?
 Is it wise to _____ in _____ money upfront _____ long-term performance _____?
 Can _____ an _____ of _____ long-term benefits of _____ extra _____ parts?
 Will _____ higher upfront spending _____ equipment _____ a better _____?
 _____ tell me if _____ would be beneficial _____ to _____ equipment manufacturer parts initially?
 _____ a _____ investment in quality parts _____ improved financial _____ time?
 Does _____ bigger investment upfront in _____ better results _____?
 Will _____ higher upfront spending _____ equipment _____ a _____?
 _____ it wise _____ upfront on original _____ manufacturer _____.
 _____ higher upfront spending of _____ better _____ performance?
 _____ you think _____ to spend more money on parts _____ better _____ run?
 _____ better long-term _____ higher initial investments _____ equipment manufacturer components?
 _____ a higher _____ of original equipment parts _____ for _____ in the long _____?
 Do improved _____ performances justify higher _____ genuine _____ components?
 _____ spending _____ on parts _____ to _____ long-term results?
 _____ to fiscal _____ more _____ to initial purchase _____ components benefit?
 _____ sound financial _____ to _____ in original _____ manufacturer parts?
 Is higher initial investments in genuine original _____ justified _____?
 _____ make _____ to _____ more _____ on original equipment manufacturer _____?
 Will a _____ spending on parts upfront yield _____ results _____?
 Does it yield _____ to spend _____?
 Spending _____ original equipment _____ components may yield _____.
 _____ more on parts upfront result in _____?
 Does _____ make sense _____ more money _____ beginning for better _____ parts?
 Is _____ invested in _____ equipment _____ parts _____ it?
 _____ makes _____ to spend more _____ for _____ performance when you use _____.
 _____ it _____ for _____ resources to initial _____ of components _____ benefit _____ outcomes?
 _____ you believe _____ sense _____ spend more on _____ perform _____ in _____ run?
 Will _____ more _____ part upfront yields _____?
 Does making _____ bigger _____ yield better results _____ long _____?
 _____ wise to _____ funds into original _____ parts?
 _____ initial _____ in parts _____ long- lasting performance?
 _____ it make sense to _____ more _____ better-performing components?
 Will a _____ spending _____ equipment parts yield a _____ long-term?
 _____ a _____ financial _____ to invest _____ original equipment parts?
 Will spending _____ parts yields _____ long-term _____ results?
 _____ a higher _____ of original _____ give better long _____?
 _____ additional funds _____ in _____ equipment manufacturer parts _____ sense?
 _____ it _____ sense to _____ in _____ money _____ a better _____ performance when _____ OEM?
 Would paying _____ original _____ in the future?

_____ more on parts upfront _____ term _____?

Is _____ good _____ to invest _____ in _____ equipment manufacturer _____?

I'm wondering _____ beneficial _____ spend more _____ original equipment parts _____ benefits.

_____ worth _____ to put _____ up _____ for superior-performing _____ components?

_____ I use more _____ results from using _____ equipment manufacturer _____?

Does _____ to _____ money upfront for _____ long-term _____ when using the _____?

Does _____ money _____ initial parts _____ performance?

Will _____ spending of equipment _____ yield better results _____?

Does _____ make sense to _____ additional _____ in _____ equipment _____?

_____ an increase _____ upfront spending of equipment _____ performance?

_____ a _____ of _____ parts yield better _____ results?

_____ you tell me if it's beneficial _____ on _____ initially?

Does _____ sense to spend more money _____ better _____ performance _____ equipment manufacturers?

Will _____ higher _____ spending _____ give _____ better long-term performance?

_____ paying more _____ equipment _____ better financial _____ in _____ future?

_____ a higher _____ spending of equipment _____ term _____ performance?

Does making _____ upfront _____ the _____ yield better _____?

_____ it worth _____ in original equipment _____ for better _____?

_____ more _____ to initial _____ of components benefit _____ performance?

_____ investing _____ original _____ manufacturer's parts _____ better performance?

_____ makes financial sense to put _____ money _____ for better _____ parts.

_____ more _____ will yield better _____ results?

_____ it better to invest _____ OEM _____ better _____?

_____ put in _____ money initially _____ get better _____ equipment manufacturer parts?

_____ it wise _____ invest _____ money _____ original equipment manufacturer _____?

Will _____ spending _____ equipment parts _____ better performance?

Will _____ higher upfront _____ original _____ parts _____ better results _____ the _____?

_____ making _____ bigger investment upfront _____ you _____ results?

Does _____ make _____ put _____ for better long-term performance?

_____ it _____ sense to pay _____ original equipment _____?

_____ make financial sense _____ spend more money _____ better _____ performance _____ the _____?

_____ more funds _____ in _____ manufacturer _____ good financial decision?

Is it _____ more _____ initial purchase _____ to benefit overall _____ outcomes?

_____ it _____ good _____ invest additional funds in original equipment _____?

_____ higher upfront spending of original _____ parts improve _____ performance?

_____ a higher _____ equipment _____ yield _____ long-term performance?

_____ paying _____ upfront for _____ pay off _____ the _____?

_____ it worth spending more money _____ lasting _____?

Higher _____ costs of _____ in _____ manufacturer components _____ be _____.

Will spending _____ on _____ parts yield _____?

_____ a _____ upfront spend of _____ give _____ long-term performance?

Is allocating more _____ to _____ beneficial?

_____ funds invested _____ equipment manufacturer's parts a _____ decision?

_____ you think it makes financial _____ spend _____ on _____ are better performing _____ long _____?

Will a _____ spending _____ equipment parts _____ a _____ long-term _____?

_____ higher upfront spending _____ original equipment lead to a _____ the _____?

_____ spending more initially _____ long-term _____ financially?

_____ it make sense _____ invest more upfront _____ for _____?

_____ it a good _____ to invest _____ original _____ manufacturer parts _____?

It _____ sense to spend more money _____ better long-term performance _____ use _____.

Will _____ parts upfront _____ better _____ in _____ long term?

Do _____ in genuine original _____ manufacturer _____ justify improved _____?

_____ it _____ me _____ real bang _____ my _____ by shelling out extra _____ top-notch OEM components?

_____ it beneficial _____ to _____ more on original _____ parts _____?

Will splurging _____ premium _____ help _____ me in the long _____?

Does _____ in original _____ parts have _____ decision?

_____ it financially _____ to _____ in original _____ for _____ performance?

_____ a _____ original equipment give a better _____?

_____ more resources _____ purchase of _____ order to improve _____ performance?

Will a _____ upfront _____ original _____ give better _____?

When targeting _____ functionality, are _____ funds _____ original equipment manufacturer _____ financial _____?

Is it _____ for better long-term performance?

Are the funds invested in _____ equipment _____ parts _____?

It makes _____ more money _____ for better _____ the parts.

_____ a higher upfront _____ equipment _____ to a better _____?

Are _____ upfront investments in original _____ a _____?

_____ worthwhile _____ the original equipment _____ for better performance?

Would it _____ to _____ extra money _____ front for _____?

It makes sense to put _____ for better _____ when using the _____.

Will _____ spending on parts _____ results?

Are additional _____ invested in _____ a _____ decision?

Would _____ money up _____ for better-performing components _____?

Is _____ wise to invest more in the _____ better _____?

_____ a higher upfront spending of original _____ long- _____?

_____ it _____ invest _____ on parts for long-term _____?

Will more spending on _____ better long-term _____?

_____ resources _____ purchase _____ components help in the long-term?

_____ a _____ spending of _____ parts give _____ better _____?

_____ spending more on original equipment _____ results?

Is it _____ investing _____ expensive parts _____ results?

_____ increased _____ justify _____ initial investments in _____ original _____ components?

Can _____ initial _____ in _____ lead to _____?

Will _____ higher _____ of _____ parts _____ a better _____ term _____ financially?

Do you _____ it _____ sense to _____ parts _____ the long run?

 ____ a higher ____ equipment yield a ____ term performance?
 Will ____ money ____ parts make ____ the long run?

Is _____ for a greater initial investment _____ to _____ performance?
 _____ think it makes _____ more _____ having better _____ parts?

Does it _____ more _____ on parts for _____ performance?
 _____ making a bigger _____ result in _____ results _____ the _____ term?

Would paying more upfront _____ yield _____ returns _____ line?

Will _____ higher _____ of _____ yield better financial results?

Is it possible to _____ if you _____ parts?
 _____ a higher _____ of _____ equipment _____ better long _____ performance financial-wise?
 _____ investing _____ in original _____ manufacturers _____ performance financially _____?

Does _____ sense _____ invest _____ on parts _____ long-term _____ improvements?
 _____ higher upfront _____ of equipment parts _____ long-term performance?
 _____ it wise to invest _____ on _____ a long time?

Can allocating more _____ to _____ purchase _____ components _____ performance?
 _____ lot _____ on part upfront _____ better _____ in the _____ run?
 _____ a _____ spending _____ original _____ better long- _____ performance for the money?
 _____ it _____ to spend more upfront _____ parts?
 _____ paying _____ for _____ sense in the long run?

Is paying more _____ going to give _____ better financial _____ in _____?

Will more spending _____ parts upfront yield _____?

_____ higher upfront spending of _____ equipment _____ performance?
 _____ it _____ it to _____ extra money up _____ better-performing _____?

Do you think _____ it makes _____ more _____ that _____ over time?

Is _____ of spending on _____ upfront will yield better _____?
 _____ a higher upfront spending of _____ a _____ performance?
 _____ a _____ spending _____ original _____ a better long term performance for _____.

Is it possible _____ improve _____ performance _____ spending _____ on _____?

Will a _____ upfront spending _____ original equipment _____ better _____?
 _____ to get a _____ long-term performance with more _____?
 _____ you _____ it _____ to _____ more money if you _____ better performing _____?

Would paying more _____ original _____ a better _____ the _____?

Is it wise _____ increase the _____ in _____?

Is _____ in _____ to lead _____ improved performance?

Is _____ a _____ idea _____ invest _____ in _____ equipment _____ for improved long-term _____?
 _____ money initially _____ get better results from _____ equipment _____ parts?
 _____ I _____ in the beginning to _____ results from _____ equipment manufacturers?
 _____ makes _____ in more money _____ a _____ long-term _____ when _____ use the OEM.

Can a higher _____ parts result _____ financial _____ time?

Will a _____ spending of equipment _____ in _____ long _____?

Are additional funds invested _____ original _____ manufacturers _____?

_____ it make sense to invest _____ money _____ original _____ long-term performance?

Will _____ higher upfront spending of _____ equipment yield _____ better _____?
 _____ it possible _____ to initial purchase of _____ benefit _____ overall fiscal _____?
 _____ spending _____ early _____ the parts good _____?

Does it _____ financial _____ increase _____ initial _____ componentry?
 _____ higher upfront spend of _____ yield a better _____?
 _____ making a bigger investment _____ in _____ better results in _____?

Will _____ higher upfront _____ of _____ give _____ better long _____?

Does increasing initial investment _____?

_____ you tell me _____ to spend more on _____ equipment _____ parts _____?

Does making a _____ investment upfront _____ results?

____ a higher ____ of equipment give a ____ performance over ____?

Is ____ upfront ____ of original equipment ____ better ____ financial ____?

____ parts ____ benefit long-term performance financially.

Would ____ to put more money up front ____ superior-performing ____?

Would paying ____ for equipment give you ____ in ____?

____ a higher ____ equipment parts ____ in ____ better long-term ____?

Can allocating more ____ purchase ____ components ____ overall ____ outcomes?

Does ____ initial investment ____ genuine ____ manufacturer ____ justify improved ____?

____ upfront investments ____ equipment ____ parts ____ sense?

____ feasible ____ spend more initially ____ and ____ by selecting ____ pieces from ____?

____ higher upfront ____ original ____ parts ____ a better ____ term performance?

____ financial sense ____ in more money for better long-term performance ____?

____ long-term performance come ____ higher ____ spending of equipment ____?

Does ____ bigger investment ____ components yield better results ____?

____ spending more on ____ better long-term performance?

____ you think ____ a good idea ____ more on better ____ run?

Is ____ worth buying expensive ____ components ____ a ____?

____ there ____ justification for higher upfront ____ investing ____ OEM ____?

____ paying more ____ original ____ yield ____ financial returns ____ future?

____ I ____ funds ____ get better ____ using original equipment manufacturers?

Is ____ possible to ____ more ____ of components?

____ more on initial parts yield ____ over ____?

Is it possible to spend ____ on ____ results?

____ upfront costs ____ in OEM ____ justified ____ superior lasting outcomes?

____ higher ____ spending of ____ long-term financial performance?

____ in ____ makes ____ for better long-term performance?

____ spending ____ equipment manufacturer parts yield ____ results?

Is paying more ____ to yield better ____ returns?

____ higher ____ spending ____ yield better long- term results?

____ the ____ investment in Original ____ Manufacturers ____ sense?

Will a higher upfront spending of ____ for the ____ in ____ term?

____ more ____ in parts lead to ____ better ____?

____ higher investments in OEM ____ ensure better ____ over ____?

____ spending more ____ pay ____ long-term?

____ a bigger ____ components ____ better results?

Will higher ____ in genuine ____ equipment ____ components ____ long-term ____?

Is ____ to ____ better ____ results if ____ spend ____ on parts?

Is it ____ it to give more ____ for ____?

____ more ____ invested ____ original equipment ____ parts ____ a ____ financial decision?

Can the ____ resources to the initial ____ of ____ the ____?

Will ____ spending ____ improve performance ____ the long term?

Will ____ upfront expenditure ____ equipment yield a better ____ the ____?

Is it a ____ parts?

Does ____ make ____ to spend more ____ parts ____ long-term ____?

Does a ____ upfront ____ of ____ give a ____ long-term ____?

Does ____ higher ____ original equipment give a ____ performance?

____ more ____ be allocated to initial ____ improved long-term performance.

Does superior ____ outcomes ____ higher ____ costs of investing ____?

____ investment in components give you better ____?

Will ____ initial ____ parts lead to ____?

_____ makes sense to _____ money _____ for better _____ performance for _____.
 Is _____ for the _____ invest _____ original equipment manufacturer _____?
 _____ spending _____ on _____ equipment yield better long _____ financial _____?
 _____ make _____ for me to spend more on original _____ parts initially, _____ benefits?
 Is _____ to _____ better _____ results _____ a _____ investment in components?
 _____ initial investment _____ parts lead _____ performance?
 _____ higher upfront spending _____ provide _____ better _____ performance financially?
 Is it _____ spend _____ initially for superior _____ by _____ pieces _____ manufacturers?
 _____ the upfront investments _____ parts _____?
 _____ make sense _____ put _____ more money upfront for better _____ when _____ use _____?
 Are _____ in original _____ manufacturer _____ a sound financial _____?
 _____ you think _____ a good idea _____ spend _____ on _____ perform better _____ long run?

 Do _____ think it makes _____ spend more money _____ with _____?
 _____ a higher _____ spending of _____ parts _____ better _____?
 _____ spending _____ on _____ upfront _____ results?
 Will _____ upfront _____ of equipment part _____ term performance?
 _____ it make sense _____ components with _____ costs?
 Can more _____ investment in _____ lead to _____?
 Will a _____ expenditure _____ yield a _____ long term _____?
 Will _____ higher upfront _____ original _____ give a better _____?
 Is _____ invest more in the _____ equipment _____ improved long _____?
 Does _____ make _____ to _____ more _____ up _____ better long-term performance _____ the OEM?
 _____ paying more upfront _____ original _____ give you _____ in _____?
 _____ it _____ to _____ in _____ manufacturer _____ for longer performance?
 Will _____ additional funds _____ manufacturers ensure long-term _____?
 _____ a _____ upfront _____ of original _____ help _____ long term _____?
 Will a _____ spending of original _____ better long _____?
 _____ it _____ sense _____ parts _____ they cost more initially _____ better _____ later on?
 Will _____ upfront _____ performance _____ the long run?
 Does it make _____ more _____ into the original _____ for _____ long-term _____?
 _____ higher upfront _____ equipment parts yield a better _____?
 Is _____ sound _____ to invest additional funds in _____ equipment _____?
 Will a _____ spending _____ equipment parts provide _____?
 _____ more initial _____ improved performance in the long _____?
 Will _____ spending of original equipment _____ better performance _____ money?
 _____ a higher upfront _____ of an _____ part yield _____?
 _____ putting more _____ parts prove lucrative _____ the _____?
 _____ extra funds _____ invested _____ original _____ manufacturer _____?
 Does spending more _____ equipment manufacturer parts _____?
 Is it wise _____ equipment manufacturer's parts _____ performance?
 Is it wise _____ spend _____ on original _____ parts _____?
 _____ additional funds _____ in _____ parts _____ sound investment?
 _____ more on _____ early on _____ performance?
 _____ a _____ upfront spending of _____ equipment _____ better _____ performance?
 Is a _____ upfront _____ equipment parts _____ to yield _____ long-term _____?
 _____ upfront spending _____ original _____ part _____ a better _____ term performance?
 _____ it financial _____ to put more _____ upfront _____ better _____?
 Does it make sense to _____ equipment _____?

_____ financial _____ spend more money _____ for better long-term performance _____ the OEM?
 Will _____ higher _____ spending _____ better long- _____ financial performance?
 _____ spending _____ initially on parts _____?
 _____ it make sense _____ me _____ more on _____ initially, considering _____ long-term _____?
 _____ higher _____ spending _____ equipment parts _____ better results _____ long-term?
 _____ increasing the _____ in _____ equipment manufacturers make _____?
 _____ upfront _____ original equipment give a _____ term performance?
 Is more _____ in _____ equipment _____ a _____ decision?
 Will _____ spending of _____ a better long-term performance _____?
 _____ initial investments _____ genuine _____ equipment manufacturer's components _____?
 Will _____ upfront _____ parts _____ a _____ long-term performance?
 _____ on part yields better _____?
 _____ higher upfront _____ of _____ result in _____ long- term performance _____ money?
 _____ you believe _____ it makes _____ more _____ parts _____ better over time?
 Does _____ long-term performances _____ in _____ equipment manufacturer components?
 _____ it _____ good _____ more in original equipment manufacturer _____.
 _____ on more expensive _____ a _____ move for the _____?
 _____ the _____ funds _____ original equipment _____ parts _____ sense?
 _____ spending more _____ on the _____ pay off _____?
 _____ possible _____ get better results economically _____ more _____ original _____ manufacturer _____?
 Will a higher _____ of equipment parts _____ time?
 Will _____ upfront spending _____ equipment _____ better _____ performance for _____ money?
 Should _____ spend more money _____ get _____ results _____ using _____ manufacturers?
 _____ higher upfront spending of _____ better long-term _____?
 Does _____ more initially _____ parts _____ performance _____?
 _____ wise _____ more money _____ original equipment manufacturers _____ better _____?
 _____ it make sense _____ upfront for _____ performance?
 _____ upfront _____ of _____ in a better _____ term performance?
 Does it make sense _____ more money at the _____ with _____ equipment _____?
 _____ it _____ sense for me _____ spend _____ on original _____ manufacturer parts _____ their _____?
 Can higher _____ investment _____ parts _____ performance?
 _____ upfront on parts pay _____ the long _____?
 _____ additional funds _____ from original _____ manufacturers ensure improved _____?
 _____ higher _____ spending of _____ yield _____ performance over time?
 Does making _____ upfront in components make _____ difference in _____?
 _____ a _____ upfront _____ of equipment parts yield _____ better _____ term _____?
 _____ more _____ up front _____ components worthwhile _____ on?
 Do _____ think _____ makes _____ sense to _____ money on _____ performing _____?
 Is spending more on _____ good for _____?
 Does _____ for parts upfront _____ the _____ run?
 Spending _____ on _____ parts may benefit _____ performance.
 Is _____ wise _____ spend _____ money _____ equipment _____ for better long-term _____?
 _____ we _____ for improved lifespan?
 _____ a _____ upfront _____ original equipment parts yield better performance _____?
 _____ makes sense _____ put _____ more _____ better _____ performance _____ the _____ equipment manufacturer.
 Does making a bigger investment _____ better _____ time?
 _____ a higher upfront _____ of _____ over time?
 Does it make financial _____ to invest _____ upfront _____ for _____ parts?
 Will _____ higher upfront spending _____ financial results?
 _____ superior _____ outcomes justify _____ of purchasing components?

_____ cost _____ in OEM components _____ superior outcomes?

Is it possible to _____ resources _____ purchase _____ components if it _____?

Can _____ more _____ initial _____ of components _____ fiscal _____ over time?

_____ paying more upfront for original _____ yield _____ returns _____?

Is it _____ to _____ more in Original Equipment _____?

Will _____ upfront _____ original _____ a better long-term performance?

_____ possible for _____ resources _____ initial purchase of OEM components _____ fiscal outcomes?

Does making _____ bigger _____ in components _____ better results _____?

_____ initial parts _____ the long-term?

_____ to _____ in more expensive parts for _____?

_____ investment _____ componentry yield better long-term results?

Is it wise to _____ but give _____ performance later?

Will a _____ spending _____ parts _____ better _____ financial performance?

_____ higher upfront _____ original equipment _____ better _____ performance?

_____ a higher _____ spending of _____ lead to better _____?

_____ makes sense _____ upfront _____ a _____ long-term performance when using _____ OEM.

_____ money up _____ superior-performing components be _____ later on?

_____ make sense _____ up front for better long-term _____?

_____ improved long-term performances _____ investments in genuine _____ components?

_____ it make sense to _____ in more _____ for better _____ use _____.

Does it _____ upfront for _____ long-term performance for parts?

_____ in OEM parts cost _____?

Will _____ higher upfront _____ equipment parts yield a _____?

Are _____ invested in original _____ parts _____ decision?

_____ sense to _____ a _____ investment upfront _____ the components?

Will _____ higher _____ equipment parts yield better _____ for the _____ in _____?

_____ it practical _____ more in original equipment manufacturer's _____?

Does it make sense to put _____ more money _____ performance _____?

Will _____ of original equipment _____ a _____ performance for the _____?

_____ bigger _____ in _____ help _____ results?

Do _____ makes sense _____ more _____ on better performing _____ from _____ equipment _____?

Is putting _____ up front for _____ a _____ financial _____?

Does _____ make _____ upfront in the _____ equipment _____ for improved long-term _____?

_____ a _____ upfront _____ equipment yield a better financial _____?

Is it wise _____ in manufactured _____ performance?

Will _____ higher _____ spending of _____ give a better _____?

Will a higher _____ of _____ equipment yields a _____ long- _____ for _____?

_____ more on better performing _____ long run makes sense?

Would it _____ put more _____ up _____ for better components _____?

Does it make sense _____ spend _____ money for _____ the _____?

Is _____ wise to put _____ into _____ original _____ manufacturer _____ better _____?

Can _____ initial _____ parts _____ to _____ lasting performance?

Will a higher upfront _____ yield _____ long-term _____?

Is _____ possible _____ allocate more _____ to _____ purchase of _____ long-term results?

Do better _____ performance justify _____ initial _____ in _____ components?

Will spending more _____ equipment manufacturers _____ long-term _____?

Does increasing the initial _____ financial _____?

Do you _____ beneficial _____ to spend more _____ original _____ manufacturer _____?

Will _____ upfront _____ equipment give a better financial _____?

I'm _____ if _____ for _____ extra _____ original equipment manufacturer _____ initially.

_____ it's worthwhile to spend _____ on parts _____ in the long _____?
 _____ spending _____ on parts _____ on _____ for performance?
 _____ wondering if _____ worth _____ to _____ on original equipment manufacturer _____.
 Should I _____ more money _____ results from using original _____?
 Is the _____ in original _____ manufacturer _____ sound?
 Will a _____ spending of _____ equipment _____ for _____ term _____?
 _____ spending _____ original _____ yield better long term results?
 Does _____ higher _____ spending of equipment _____ term performance for _____?
 Does it make sense to _____ upfront for _____ long-term performance _____ use _____ original _____?
 Is _____ to allocate _____ to initial _____ of components _____ benefit _____ fiscal _____?
 Will _____ to equipment from _____ equipment _____ ensure _____ results?
 _____ upfront spending _____ yield a better _____ term performance?
 _____ it _____ to _____ initial purchase _____ due to improved long-term performance.
 Will a _____ of original equipment parts _____ financial _____?
 Does it _____ sense _____ invest _____ money in the _____ equipment _____ for _____?
 _____ it _____ to spend more upfront _____ equipment _____.
 _____ higher _____ spending _____ original _____ give _____ performance in the future?
 _____ you think spending _____ components yields _____?
 Is it _____ to invest _____ original _____ parts _____ performance?
 Is _____ wise _____ put more _____ upfront _____ better long-term _____ the _____?
 Will _____ higher _____ equipment _____ yield _____ long term results?
 Is it wise to invest _____ upfront _____?
 Will _____ higher upfront investment _____ parts _____ a better _____?
 _____ benefit performance _____ initially on parts?
 _____ higher upfront _____ of original _____ allow for a _____?
 _____ a higher _____ spending of original _____ parts _____?
 Will _____ higher upfront _____ equipment _____ yields a better _____ long-term?
 _____ it _____ more _____ Original Equipment parts?
 _____ more on _____ equipment _____ parts _____ better _____ results _____.
 _____ it _____ worth it to put _____ up _____ for _____ components _____?
 _____ worth it to put more _____ front _____ superior-performing _____?
 Does _____ to put more money up front for better _____?
 Does improved _____ performances justify higher _____ investments _____ manufacturer components?
 _____ you _____ on _____ equipment manufacturer parts makes sense?
 _____ making a bigger _____ in _____ better long _____?
 Is _____ possible to _____ better long-term results _____ parts?
 Will _____ spending _____ parts _____ a better performance for _____ the long run?
 Does it benefit _____ long-term _____ more on _____?
 _____ make sense to put more _____ into _____ for _____ long-term _____?
 Is _____ spend more upfront on _____ equipment _____ better _____?
 Should additional _____ be _____ manufacturer's parts?
 Do _____ justify higher _____ investments _____ genuine _____ equipment manufacturer _____?
 _____ make sense _____ more _____ on better parts?
 Is it _____ to _____ in _____ equipment manufacturer _____ for improved _____?
 Is it _____ to _____ original equipment _____ parts?
 Does it _____ sense to _____ more _____ original _____ manufacturer _____ improved _____?
 _____ a higher upfront spending of _____ long- _____?
 Is _____ a good idea _____ invest _____ original equipment _____?
 Should _____ additional funds _____ in _____ equipment manufacturer _____?
 Is it _____ increase the _____ in _____ components?

Does it make _____ spend more money _____ manufacturer parts _____ better _____?

_____ justification for higher _____ of _____ in OEM components?

_____ resources be _____ the initial purchase of _____ due _____ long-term _____?

_____ a _____ spending _____ original equipment yield _____ better _____?

Will a _____ upfront _____ equipment _____ a better _____ the _____?

Is _____ putting _____ money to get better _____ using original _____?

Do _____ lot of _____ upfront _____ yield better results?

_____ you tell _____ if it's _____ to spend _____ manufacturer parts initially?

Will a higher _____ spending _____ original equipment parts _____ a better performance _____ long _____?

_____ bigger investment in components _____ to _____ results?

Can you tell me _____ it's beneficial for _____ to spend _____ equipment _____?

Does improved _____ performances justify higher initial _____ parts?

Is _____ money _____ original equipment _____ for better performance in the _____?

Does it benefit long-term _____ spend _____ on _____?

_____ you think additional _____ invested _____ equipment _____ parts _____ financial decision?

Are funds invested _____ equipment manufacturer parts _____?

Will spending _____ on _____ with _____ performance?

Is it _____ more _____ original _____ parts _____ improved long-term performance?

Is _____ to _____ more _____ into parts for better _____?

Does _____ investment in componentry _____ better results _____?

_____ it worth _____ in _____ to get better results from using _____?

_____ a higher upfront _____ yield better long-term _____?

Are _____ equipment manufacturers a good investment _____ more _____?

Can increased _____ investment _____ equipment parts lead _____?

Is _____ sensible _____ more in original _____ for improved _____ performance?

Is it _____ upfront _____ improved _____ with _____ equipment _____ parts?

_____ it make _____ spend _____ money _____ the beginning _____ components _____ will _____ longer?

_____ parts _____ more initially but _____ performance _____ it a wise _____?

Is it _____ to spend _____ parts _____ improved long-term _____?

_____ worthwhile _____ invest _____ in original _____ manufacturer parts?

_____ tell me if _____ it _____ spend more on OEM _____?

Is _____ wise _____ in original _____ parts _____ better performance?

_____ financial sense to _____ in _____ money _____ long-term performance when using the _____?

Is _____ upfront _____ of original equipment parts _____ performance _____?

_____ higher initial investments _____ equipment _____ components benefit _____ improved _____ performance?

Will _____ higher upfront _____ original equipment _____ better _____ financially?

Will _____ on parts _____ yield _____ long term _____?

Will _____ upfront _____ of _____ components yield _____ better long-term _____?

Is _____ investment _____ equipment manufacturer _____ a good _____?

Can allocating more _____ to _____ initial _____ the long-term _____?

_____ improved long-term _____ justify higher _____ in genuine _____ components?

Will higher _____ of _____ equipment give _____ performance?

Is it _____ good idea to _____ more in _____ equipment manufacturer _____?

It _____ financial sense _____ more money _____ for _____ when _____ the _____ equipment manufacturer.

Is investing in _____ parts _____ performance practical?

Will a higher _____ of original _____ better long-term _____ for _____?

Is a _____ of _____ a better _____ performance?

_____ funds _____ in original _____ manufacturer _____ a sound _____ decision?

_____ upfront _____ of equipment parts yield _____ long-term outcome?

Does _____ make sense _____ spend more _____ parts _____ the long run?

_____ a bigger _____ in _____ better long-term results?

Can you tell me if _____ beneficial _____ spend _____ on _____ equipment _____ ?

_____ it make _____ into the parts for _____ better future?

Will _____ upfront spending of _____ about _____ better long _____ ?

Does _____ make _____ to put _____ money _____ for a better _____ ?

_____ upfront _____ of equipment parts yield _____ results?

Does spending _____ on _____ pays _____ in the _____ ?

Is _____ wise to _____ more _____ for _____ performance?

_____ it justified _____ higher upfront costs of _____ ?

_____ long-term _____ justify higher _____ investment in _____ manufacturer components?

_____ of investing _____ OEM components _____ ?

_____ upfront _____ of equipment parts _____ a better _____ in the _____ ?

Can _____ me _____ it's _____ good idea _____ spend _____ equipment manufacturer parts?

Is _____ possible to _____ better _____ returns _____ paying more _____ original equipment?

Will a _____ upfront _____ of equipment _____ term return?

_____ a _____ idea _____ more upfront on _____ for _____ performance?

Does _____ the initial _____ the original equipment _____ financial _____ ?

I'm _____ if _____ beneficial _____ me to _____ on OEM _____ initially.

Will _____ higher _____ spending _____ equipment _____ term results for _____ money?

_____ increasing the _____ components _____ sense?

_____ original equipment _____ parts a cost-effective choice?

_____ it wise _____ upfront _____ original equipment manufacturer parts for _____ ?

_____ it make _____ to invest _____ original equipment _____ long-term performance?

Will _____ spending _____ original equipment _____ long term _____ performance?

_____ to spend _____ on parts for better long-term _____ ?

_____ wise to _____ money _____ parts _____ better performance?

_____ make sense _____ invest more in the original _____ long-term _____ ?

_____ a higher upfront _____ equipment _____ better _____ in the _____ ?

Is it _____ to _____ more _____ on parts _____ ?

_____ spending _____ upfront _____ better performance?

_____ wise _____ invest more in _____ .

Is it _____ greater _____ investment _____ improve performance?

Is _____ in original _____ parts a sound _____ ?

Is _____ idea to put in _____ get _____ using original equipment manufacturer parts?

Does _____ make _____ the _____ costs of investing _____ to _____ higher?

Can _____ tell me if _____ for me _____ spend _____ on original _____ manufacturer _____ initially?

Will _____ higher upfront spending _____ original _____ long- term financial _____ ?

_____ component upfront yield better _____ performance?

Will _____ higher _____ spending _____ equipment lead to _____ long-term _____ ?

Is _____ good idea _____ in OEM parts for _____ ?

Will a _____ spending of _____ equipment parts improve _____ ?

Does investing _____ in original _____ sound a _____ decision?

Can _____ tell _____ if it's worth it _____ spend _____ original equipment _____ ?

_____ it _____ in OEM parts?

Is _____ investment in original _____ parts a _____ financial _____ ?

Will a higher _____ spending of _____ long-term _____ financially?

_____ it better to use _____ expensive parts _____ performance?

_____ a higher upfront _____ of original _____ a _____ performance?

_____ possible that higher _____ in _____ parts make _____ last _____ ?

Does _____ benefit long-term _____ you spend _____ on _____ ?

_____ make _____ to _____ in _____ front for better performance?
 _____ financial returns in _____ if we paid more _____ for original _____?
 _____ a _____ original equipment yield a _____ performance for _____ money?
 Will a _____ spending of original _____ part _____ a _____?
 _____ it beneficial _____ me _____ more on _____ manufacturers _____ considering their _____ benefits?
 Will _____ higher _____ expenditure of _____ parts _____ to _____ long-term _____?
 Can a _____ spending of _____ give _____ performance?
 Does _____ upfront spending on _____ in _____ long _____?
 _____ it a _____ investment to _____ in original _____ manufacturer _____?
 _____ higher upfront spending of original equipment _____?
 _____ spending _____ on original equipment components _____ results?
 _____ a _____ upfront spending of equipment _____ help _____ long _____?
 Can greater _____ investment in _____ to _____ performance?
 Is it _____ to allocate more _____ to _____ purchase _____ better _____?
 _____ there an _____ to buying _____ parts initially _____ better long-term _____?
 _____ expensive _____ components _____ it for improved _____?
 _____ a _____ upfront spending _____ original equipment _____ yield a better _____?
 _____ it _____ the _____ money to get better _____ the _____?
 Can _____ higher _____ spending of _____ equipment yield _____ long- _____ financial _____?
 _____ it practical to invest _____ in original _____ performance?
 Is _____ to allocate _____ initial purchase _____ parts due to _____ term _____?
 _____ more initial investment _____ parts _____ in _____?
 _____ sense to invest more upfront on _____ long-term _____?
 _____ upfront spending of original _____ parts _____ better performance?
 Is it _____ justify _____ upfront _____ investing in _____ manufacturer components?
 Is _____ to allocate _____ towards _____ OEM parts?
 Can a _____ initial _____ lead to _____ performance?
 Will a higher upfront _____ of _____ financial performance?
 Does _____ higher upfront _____ equipment yield _____ long-term _____?
 _____ initial investment in _____ lead _____ lasting performance?
 _____ good _____ decision to invest _____ in original _____ manufacturer's parts?
 _____ a higher _____ equipment _____ lead _____ a better performance over _____?
 Is the _____ in OEM components _____?
 Should I put in _____ to _____ better _____ from _____ manufacturers?
 Should I _____ in order _____ better results _____ original equipment _____ parts?
 _____ increased initial investments _____ genuine original _____ justified?
 Is it _____ sound financial _____ to _____ funds _____ original _____ manufacturer _____?
 _____ buying expensive OEM _____ improved lifespan?
 _____ investment _____ for components yield better results?
 _____ on parts upfront _____ yield _____ long-term _____.
 Will _____ higher _____ spending _____ parts lead _____ better performance for the _____ in the _____?
 Is _____ wise _____ invest more _____ manufacturer parts _____ better _____ performance?
 _____ increasing the initial investment _____ make _____ sense?
 Can allocating more _____ to _____ help _____ the _____ outcomes?
 _____ more resources be allocated _____ the _____ purchase _____?
 Does _____ make sense to invest _____ money _____ original _____?
 Is _____ a _____ decision _____ invest extra _____ original _____ manufacturer parts?
 Is spending _____ long-term performance?
 _____ make sense _____ put _____ into the _____ equipment manufacturer for better _____.
 _____ on OEM pieces increase _____?

Is _____ true that _____ parts make them better _____?

Do you think _____ more money _____ better performance?

Would _____ be _____ to _____ money up _____ for superior-performing _____?

_____ initial _____ in parts lead to _____ better _____?

_____ performances justify higher initial investments _____ manufacturer components?

_____ upfront for original equipment _____ in better financial _____ the _____?

Is it justified _____ higher _____ of _____ components.

_____ spending _____ lot _____ upfront yield better _____ the _____ term?

_____ improved _____ performances justifying higher _____ genuine _____ manufacturer components?

Would putting _____ front for _____ components be _____ on?

Will a higher _____ spending _____ original equipment yield _____ long- _____?

_____ worth _____ money at the _____ for _____ performance _____ original equipment _____ parts?

Do _____ it _____ sense to _____ on _____ that _____ better in the long _____?

_____ more initially on _____ better _____ over time?

_____ to increase initial investment _____ that _____ improved performance?

Does it make _____ upfront _____ equipment _____ for better _____ performance?

Is it better _____ invest _____ Original _____ Manufacturers?

_____ make sense _____ put in _____ money upfront _____ when using _____ OEM?

Is _____ wise _____ put more money into the _____?

Will a _____ upfront spending _____ to a _____ performance _____ the _____ term?

Is _____ better financial returns _____ future by paying _____ upfront _____ equipment?

Will a higher _____ spending _____ equipment _____ the long run?

Spending _____ on _____ equipment _____ parts may _____ results in _____ run.

_____ allocating _____ to initial purchase _____ components improve _____ performance?

_____ it make _____ invest more in _____ parts for better _____?

Will a _____ upfront _____ allow _____ better long _____ performance for _____ money?

_____ it _____ sense to spend more _____ long-term _____ of parts?

Does it make _____ to make _____ in _____?

_____ it make sense _____ more _____ upfront _____ long-term performance when _____ oem

_____ a _____ equipment parts yield _____ better _____ term performance?

Will a _____ spending of equipment _____ yield _____ better _____ over _____?

Does it make _____ initial _____ in OEM components?

Will a _____ upfront spending of _____ better _____ performance?

Will _____ upfront spending _____ equipment parts _____ better long-term performance _____?

_____ putting _____ money into the _____ long-term financial _____?

Does _____ the _____ investment _____ components _____ sense?

Is _____ worth _____ to _____ extra _____ up _____ for _____ parts later _____?

_____ initial investment in OEM _____ good idea?

_____ spending _____ money _____ parts yield _____ results?

Will a _____ equipment _____ yield _____ better performance in the _____?

_____ make _____ to _____ parts that will _____ better _____ the long run?

_____ making a _____ in components yields _____ results _____ long _____?

_____ it _____ for _____ of investing in OEM components to _____?

_____ higher _____ spending _____ parts yield _____ better long-term performance?

Is _____ spend _____ on parts that perform better in _____?

_____ more _____ in _____ to better _____ in the _____ term?

_____ a _____ spending of equipment parts lead _____ performance _____ the _____?

Will _____ lot _____ spending _____ upfront yields _____ results _____ time?

_____ higher upfront _____ investing in _____ equipment _____ justify _____ lasting outcomes?

Does _____ a bigger investment _____ long-term results?

_____ financial sense to invest _____ in _____ manufacturer _____ better performance?
 Does _____ a _____ investment _____ yields _____ results in _____ term?
 Do _____ it's worth it _____ in _____ better performing _____?
 Is _____ invest more in OEM _____ performance?
 _____ performances justify more initial _____ equipment manufacturer components?
 _____ a _____ upfront _____ of _____ equipment _____ a _____ performance?
 Does _____ better long-term results _____ more _____ on?
 _____ higher upfront _____ of original equipment _____ a better _____?
 _____ it _____ sense to _____ extra for _____?
 _____ performance justify _____ initial investments in genuine _____ manufacturer _____?
 _____ tell _____ it is _____ me _____ more _____ original equipment manufacturer parts?
 _____ it _____ good _____ to _____ parts for better performance?
 _____ a higher upfront _____ of _____ parts _____ better _____ the _____ the long-run?
 _____ paying _____ upfront for original _____ in better _____?
 _____ spending _____ on _____ help long-term _____?
 Will a _____ of original equipment parts yield _____ better _____?
 Is it _____ in original _____ manufacturers for better _____?
 Will a _____ upfront spending _____ equipment _____ result?
 Does _____ make _____ to _____ to get better long-term _____?
 Will _____ to original equipment _____ long-term results?
 Do _____ performances _____ higher _____ investments _____ genuine _____ equipment manufacturer _____?
 Would _____ for equipment _____ to _____ financial returns?
 Does _____ sense _____ spend more _____ upfront for _____ long-term _____ of _____?
 _____ a higher _____ expenditure of _____ yield a better _____ the _____?
 Can _____ initial _____ lead _____ increased performance?
 Does _____ lasting _____ upfront costs for _____?
 Does it make sense to invest _____ for _____.
 Will _____ equipment manufacturer parts yield _____ long-term _____?
 Is there more _____ manufacturer parts _____ targeting sustained _____?
 _____ it possible that _____ to initial purchase of _____ benefit _____ fiscal _____?
 _____ paying _____ upfront _____ original _____ good for financial _____ future?
 _____ a higher spending _____ equipment parts _____ better _____ for the _____ in _____ long _____?
 Is it wise to _____ in _____ money _____ for better _____ you _____?
 Is _____ initially on parts beneficial _____?
 Will _____ parts upfronthold _____ performance in the _____?
 Is _____ put extra _____ front for superior-performing components?
 Will _____ equipment _____ original equipment _____ ensure better results?
 Is it _____ invest _____ parts _____ better _____?
 Can an _____ in parts _____ to _____ performance?
 Will _____ spending of original equipment parts _____ in _____ better _____?
 _____ a higher _____ equipment _____ a _____ long- term performance?
 _____ spending _____ upfront on _____ better _____ results?
 _____ it _____ invest more in original _____ manufacturers _____ better _____ future?
 Is a _____ spending _____ equipment going _____ improve the _____?
 Is it _____ greater initial investment _____ will _____ performance?
 Does it _____ you make a bigger investment _____?
 _____ there a _____ higher upfront _____ investing in OEM _____?
 Will _____ upfront spending _____ parts _____ long-term performance?
 _____ higher upfront _____ better performance _____ the company in _____ long run?
 _____ targeting _____ is additional _____ invested in _____ manufacturer parts _____ decision?

Will _____ spending _____ parts yield a _____ financial _____?
 _____ higher upfront _____ of _____ parts yield better _____?
 Will _____ higher _____ of _____ yield _____ results in _____ long-term?
 Will a _____ upfront spending of equipment _____ money?
 _____ a _____ investment _____ lead _____ better results in _____ long _____?
 _____ cost of investing in OEM _____ by superior _____?
 _____ spending of _____ equipment part yield a _____ long _____ performance _____ the _____?
 Will spending more _____ equipment _____ improve _____ performance?
 _____ investments _____ original equipment _____ parts a _____ choice?
 _____ more upfront _____ original equipment yield _____ financial returns _____ future?
 Does _____ make sense _____ put more money _____ better performance _____?
 _____ a _____ upfront _____ of original _____ give a _____ long _____?
 Will higher upfront _____ original _____ better _____ for _____ company in the _____ term?
 Do _____ it makes sense to _____ more money _____ better _____ time?
 Do _____ think it _____ spend _____ on _____ better in the _____ run?
 Would _____ for _____ equipment produce better financial _____?
 Is spending on more _____ parts a _____ the _____?
 _____ higher upfront _____ equipment parts _____ to _____ better long-term _____?
 Is it worth _____ for better _____?
 _____ you tell me _____ it's a _____ spend _____ money on _____ equipment _____ initially?
 Is _____ increase _____ investment in components?
 _____ it wise _____ more initially _____ parts _____ will _____ better _____ later?
 _____ an increased _____ investment in _____ components justified?
 _____ money on parts in the _____ performance?
 _____ on parts _____ improve _____ performance?
 Will a _____ spending _____ equipment parts _____ long-term performance?
 Is it practical _____ invest _____?
 _____ higher upfront spending _____ original equipment _____ a _____ future _____?
 Does making a _____ investment _____ in _____ yield better _____ run?
 _____ it _____ invest in parts from the _____ long-term _____?
 Is _____ worthwhile to _____ in _____ that cost _____ initially _____ better _____?
 Does _____ sense _____ put in more money upfront _____ when _____ the OEM
 Would _____ more upfront _____ original equipment _____ better _____ in _____?
 _____ making a _____ in components give _____?
 _____ it make sense to put in more _____ using _____ OEM?
 _____ practical _____ in OEM parts for long-term performance?
 _____ feasible to spend more _____ for _____ longevity and effectiveness by _____?
 _____ higher upfront spending _____ equipment parts yield _____ better _____?
 Can _____ bigger investment _____ better _____?
 _____ more _____ on parts _____ for _____ performance?
 _____ it _____ it to _____ extra _____ up _____ for _____ later?
 _____ it make sense to _____ more _____ front _____ components?
 _____ a _____ upfront spending _____ original _____ better long term _____ performance?
 Is _____ upfront _____ for _____ in OEM _____?
 _____ more upfront on _____ pay _____ the long _____?
 _____ put more _____ into Original Equipment _____ better performance?
 Does increased long-term performances _____ higher _____ genuine _____ equipment _____?
 _____ worthwhile to _____ money up front _____ superior-performing _____?
 _____ long-term performance to spend more on _____?
 _____ it justified _____ higher _____ of investing _____ original _____ manufacturers?

_____ initial investments for _____ original _____ manufacturer _____ long-term performance?

_____ upfront _____ of equipment yield better _____ term _____ the money?

Does _____ more _____ equipment _____ yield better long-term _____?

Is it _____ to _____ additional _____ original equipment manufacturer _____?

Does _____ sense to _____ more _____ a better _____ performance when _____ the _____ equipment manufacturer?

Do _____ think it makes _____ on _____ that work _____ over time?

_____ it wise to _____ more _____ original _____ manufacturers _____ performance?

Will _____ more on original _____ manufacturers yields _____?

Is _____ to spend _____ upfront on parts for _____?

Is _____ a good _____ to invest _____ equipment _____ better _____ in the future?

_____ invest _____ funds in original _____ manufacturer parts?

Is a higher _____ spending _____ for the _____?

_____ it practical for _____ to invest _____ manufacturer parts?

_____ a good idea _____ additional funds _____ original _____ manufacturer _____.

_____ allocating more funds towards equipment _____ original _____ manufacturers _____?

Can _____ initial _____ the parts _____ to _____ performance?

_____ more investment in original _____ manufacturer _____ better _____?

Is it _____ it to put _____ front _____ components _____?

Will _____ more _____ equipment _____ parts _____ better _____ the long run?

_____ it _____ to _____ in OEM _____ for _____ performance?

_____ investment in _____ yield better results _____ time?

It _____ more money upfront for better _____ for parts.
