[Demo] NLP Dataset for Customer Service Automation

Company Type	Investment Firms
Inquiry Category	Transfer and rollover inquiries
Inquiry Sub- Category	Account consolidation
Description	Customers inquire about consolidating multiple investment accounts into a single account to simplify their investment management and potentially reduce expenses.
Data Size	5,013 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

Masked sample paraphrases of one "Investment Firm" customer inquiry. (Purchased data will not be masked.)

	to to for chances to preserving individualized client strategies	
	to use economies of scale improvebalancing over ?	
Will	resources allow take advantage economies of ?	

of scale might lead to for rebalancing by clients.
resources rebalancing more?
combine resources and scale find more ways balancing
Instead of strategies for each account, is it consolidate economies ?
to use economies of scale for better client strategies?
Is resources viable for rebalance to separate client plans ?
When economies are present, is feasible of rebalance?
Is possible to balance utilizing of scale of separate strategies account?
there increased economically scaled rebalances if consolidation of than client?
it to use economies scale better rebalancing individual client?
Is possible economies of for better rebalancing chances instead ?
client strategies into one pool due to scaled
Is it possible achieve more with resources plans each client of larger?
The economies scale could include for and make consolidation resources?
Is it use of improve chances of preserving for clients?
it to portfolio by of rather following strategies for every account?
advantage of economies may allow for better in rebalancing.
It is to increase in by under
scale can opportunities for pooling compared to managing
Is economies of to rebalancing compared preserving individual client?
economies of important, might be more than client
It's use economies of to improve Individual client strategies.
Is increased of if is a consolidation of clients?
Is more for the of the economies of?
of the advantages of more opportunities rebalancing?
Is it better consolidate than different strategies for each?
use economies scale for over preserving individualized clients?
consolidation caneconomies scale affect efficiency of?
Is it better consolidate with economies of a different account?
there between multiple clients does it increase the rebalances?
between multiple clients, is chance of economically scaled rebalances?
you think is better economies of scale than to follow strategies ?
Is of portfolio by utilizing of scale, rather following individual per?
economies include better opportunities do the advantages of make?
maximize balance utilizing economies scale than different strategies per account?
achieve through pooled as opposed to investment plans for each client, because larger ?
<u> </u>
scale, pooling resources for efficient rebalancing opportunities?
Is pooling more plans, economies of scale?
more for the efficient to separate client due to scale?
Is resources viable rebalance compared plan the economies scale?
and economies scale be used together to find of ?
Is it possible resources be combined in advantage economies ?
economies of that resources more efficient separate client
Is feasible to use economies improve rebalancing Individual ?
it possible scale improve of rebalancing over individual client strategies?
Because economies of can pooling resources opportunities ?
of have an impact of of can it happen with ?
it possible to of scale to chances of over client ?

Is realing to the second of significant to the second of t
Is pooling more efficient maintaining per client, because ?
Does combining allow for more of?
be possible to maximize portfolio balance by economies scale per account?
When maintaining individual client strategies, bringing more for rebalancing?
Is pooling resources are important?
pooling resources lead better opportunities to separate economies of?
there is resources clients, is increased chance economically scaled rebalances?
economies scale can rebalance more efficient
the economically increased there is a lot many among multiple clients?
When economies of are important, Is for efficiency?
Better economies of scale is are combined.
Is an increased chance rebalances there is more ?
resource consolidation place clients is there economically scaled rebalancing be?
there a resource between multiple clients economically rebalance increase?
there is lot of consolidation among multiple is chance an economically ?
If there is a consolidation between is economic increased?
When resource in multiple clients is it scaled rebalancing ?
Is it to use economies for compared to strategies?
pooling resources more for the efficiency of scale.
If there is consolidation clients, is an economically scaled ?
When economies present, pooling more viable seperate plans?
of scale resources can recalibrating strategies
merging assets to allow for better strategies scale?
If there be better through economies scale.
Is it to achieve through resources instead having separate investment client due
?
Is to economies for rebalancing chances than to preserve ?
there is of the for economically scaled rebalances increase?
Can resources to opportunities rebalancing combining strategies separate clients?
economies scale resources pooled recalibrating strategies?
Is possible use economies of better preserving individualized strategies.
When resource in multiple clients, a chance of rebalancing?
Resource consolidation multiple clients increase the rebalancing.
Is possible use scale for chances compared to client?
there is a of chance of an scaled increase?
it feasible toeconomies ofbetterchancestostrategies?
Do benefits consolidated resources for fast efficient due of?
pooling resources more plans the efficiency to economies of scale?
Is it possible economies of better outcomes compared client?
pooling resources viable for of due to of?
If there between multiple is a chance for scaled?
Is resources for efficiency of compared to economies scale are present?
pooling resources more the efficiency compared to separate client plans of
a of multiple clients, is there an economically ?
of used combine resources to efficient.
If is of multiple clients, is of an scaled?
economies of scale is pooling more feasible of to separate client?
Doadvantages consolidated resources for quicker and to economies scales?
there increased economically scaled rebalance consolidation of multiple clients?
Is pooling more efficiency to plans due economies scale?

viable efficiency than separate client because of economies?
resources better separate strategies each client due to ?
possible use of to chance rebalancing individual client strategies?
multiple clients, is the chance for rebalancing better?
When of scale present, be more than client?
If is clients, the economically scaled rebalances increased?
there is Resource among clients, there chance for economically scaled?
bringing resources result in more opportunities rebalancing when individual to cost
of scale are also is pooling for the rebalance?
chance economically scaled rebalancing better when resources multiple
there an chance if there are clients?
Is possible economies for rebalancing chances preserving individualized?
Is of an rebalance when there consolidation of multiple?
it economies scale to improve chances of rebalancing over strategies.
pooling resources more efficient maintaining per economies of?
it possible economies scale to improve rebalancing individualized?
Is it using economies of instead using separate strategies account?
When resource place economically scaled rebalancing be?
of could include for rebasing, do those make sense resources?
Ispossible portfolio by utilizing of scale rather individual per account?
Isresources theclient because of economies of?
Is possible to achieve more in rebalancing because ?
Does the for an economically scaled increase if multiple?
consolidate with than follow different strategies for each client?
The economies scale allow resources lead to rebalancing.
Is increase in economically rebalances there a between multiple?
consolidation place multiple clients, it better for economic ?
It is use economies to improve rebalancing chances preserving
there lot of Resource Consolidation several is chance for an scaled ?
Do of consolidated opportunities for more replenishment due of Scales?
resources viable the of rebalance to separate client economies are important?
the of with pooled help with ?
resource consolidation takes place multiple clients for scaled ?
Is to economies of better compared preserving individualized strategies?
economies advantages resources include better opportunities for rebalancing?
it possible to portfolio economies scale rather per account?
pooling resources when economies compared to separate client?
merging strategies more beneficial in terms rebalancing due to up?
When takes multiple is the chance for better?
When of pooling be efficient separate client plans.
If is consolidation of multiple rebalances increased?
scale combine can it more efficient for
economies make resources viable the efficiency of rebalancing.
to separate client plans of present, is resources ?
Is of scale better rebalancing to preserving personalized strategies?
scale are improve rebalancing preserving individualized client
Is it of to the chances of preserving individual client ?
of scale allow better over individualized strategies?
is resource multiple the chance for scaled rebalances?
With economies of scale, opportunities for balance?

combine resources with of to efficient ways balance?
resource consolidation clients, is the for economically rebalancing?
of scale are present?
pooling for the efficiency of the rebalance economies present?
of of scale, does allow rebalancing opportunities?
of of do the of consolidation include better ?
economies of scale the opportunities client plans.
efficient separate client because of economies of scale?
lead better rebalancing by strategies, instead of managing clients.
Taking of of allow combining resources for replenishment.
Is pooling resources more efficient client scale?
If clients the chance for economically rebalances.
merging client strategies into one pool more rebalancing due ?
client pool more when it comes rebalancing due to up opportunities.
of scale able combine resources a rebalancing
of scale be used resources better re-allocation
Is to use of to improve clients strategies?
If resource place is there a chance scaled?
to use scale chances over individual client strategies?
balance through economies scale client assets combined.
scale are present, is pooling resources more comparison separate ?
If there a resources is the chance of rebalances?
When economies scale are can pooling client plans?
of scales, do advantages consolidated faster and efficient replenishment?
There is a possibility for rebalances if is consolidation
Is consolidation of resources with better different client account?
The economies can be used to more rebalance.
economies with resources help you with ?
Is it economies of improve rebalance over individual clients?
the advantages of consolidated resources opportunities for scales?
consolidation could increase the economically scaled rebalancing.
scale may resources viable compared to separate client
it to of improve rebalance chances over preservation individualized ?
Do economies of lead opportunities efficiency client plans?
is possible to economies to improve chances individual
it make sense to consolidate with economies rather follow strategies client?
Is merging strategies pool beneficial it to to efficient scaling.
Is there greater chance of portfolio utilizing economies scale per account?
to to individualized client strategies?
we resources with of find more balance the portfolio?
there is a consolidation more client, an chance of an scaled?
possible use of scale to rebalance preserving strategies?
Is resources for the efficiency of compared to economies of are?
economies of pooling resources lead better opportunities ?
scale combine to make rebalance efficient?
The economies of scale viable for efficiency
client assets enable balance in of?
pooling more separate plans economies of scales?
it for to better when resources are in multiple?
Is possible economies of scale rebalancing over sparing individualized ?

better of maximizing portfolio utilizing economies scale resources were?
it possible maximize portfolio by using economies versus separate ?
resources more keeping strategies client for of scale?
economies with resources pooled be strategies?
following different account, to consolidate resources with economies of?
Is of more likely to maximize balance per account?
economies can be used for more rebalancing
Economies might lead better opportunities by strategies of managing
Combining resources can offer for portfolio advantage of
the for scaled rebalances there is of clients?
If is resource consolidation of one client, is a for an ?
Is by economies of instead of separate strategies for account?
it to consolidate with of scale different each client ?
of may pooling for the efficiency rebalance.
economies scale lead better pooling resources, by combining separate clients.
Is it possible to combine and efficient ways portfolio?
scale be to resources make it for rebalance
Because of economies the of for rebalancing?
There's chance of balance by economies of scale than account.
Because economies of is pooling resources more of?
can combine resources make it for
to maintaining client resources result more opportunities for rebalance?
Is one chance of economically scaled if more one consolidates ?
When $___$ place in multiple clients, is $___$ economic $__$ rebalancing $__$?
Is it $___$ that $____$ among $____$ increases chance for economically $____$?
to economies to improve rebalancing preserving individual strategies.
Is client one pool more options because of scaled up opportunities?
possible use economies scale rebalancing chances compared to preserving ?
of can be used to enable balance over
If there consolidation is the chance scaled increased?
resources more efficient than client plans of!
Is client strategies into one that much to efficiency scaling
Due of pooling efficient separate client plans?
Is economies of balances to preserving individualized client strategies?
Is there a better of maximizing economies scale rather following individual
there is resource consolidation between the of scaled increased?
economies of scale used to improve rebalancing individual
of scale to combine resources order a more efficient
of scale to combine resources order a more efficient
of be used to over preserving client strategies
of be used to over preserving client strategies possible to use economies scale rebalancing chances individual strategies?
of be used to over preserving client strategies possible to use economies scale rebalancing chances individual strategies? As a scale, of consolidated resources better opportunities for?
of be used to over preserving client strategies possible to use economies scale rebalancing chances individual strategies?
of be used to over preserving client strategies possible to use economies scale rebalancing chances individual strategies? As a scale, of consolidated resources better opportunities for?
of be used to over preserving client strategies possible to use economies scale rebalancing chances individual strategies? As a scale, of consolidated resources better opportunities for ? of scale to opportunities for rebalancing client plans. Is possible to maximize balance by economies of scale, account? compared to individual due cost advantages, the together resources efficient?
of be used to over preserving client strategies possible to use economies scale rebalancing chances individual strategies? As a scale, of consolidated resources better opportunities for? of scale to opportunities for rebalancing client plans. Is possible to maximize balance by economies of scale, account?
of be used to over preserving client strategies possible to use economies scale rebalancing chances individual strategies? As a scale, of consolidated resources better opportunities for ? of scale to opportunities for rebalancing client plans. Is possible to maximize balance by economies of scale, account? compared to individual due cost advantages, the together resources efficient?
of be used to over preserving client strategies possible to use economies scale rebalancing chances individual strategies? As a scale, of consolidated resources better opportunities for? of scale to opportunities for rebalancing client plans. Is possible to maximize balance by economies of scale, account? compared to individual due cost advantages, the together resources efficient? economies benefits of consolidated resources include for rebalancing?
of be used to over preserving client strategies possible to use economies scale rebalancing chances individual strategies? As a scale, of consolidated resources better opportunities for? of scale to opportunities for rebalancing client plans. Is possible to maximize balance by economies of scale, account? compared to individual due cost advantages, the together resources efficient? economies benefits of consolidated resources include for rebalancing? pooling resources viable a plan economies of scale?

Is efficient for efficiency rebalance compared to when economies of are?
it possible scaled rebalances to increase there a of ?
of scale can better opportunities merging of separate
there is resource multiple does the of scaled rebalances?
it for rebalances to be is lot of Resource among multiple?
together resources result in more efficient rebalancing maintaining individual client
strategies.
There is of portfolio balance economies of scale than following strategies
There are of scale make resources for efficiency
Taking of economies of combining better opportunities rebalancing.
can used to make them efficient for rebalancing
When place clients, the chance economically rebalancing improves.
pooling resources than maintaining separate strategies clients because ?
When of scale is viable for efficiency rebalance?
consolidation multiple increase the chances scaled rebalancing.
Is pooling resources for efficiency a different because economies scale?
resources with of of using different strategies each account?
Is possible to use economies of scale individualized client?
it economies of the chances of over preserving strategies for individual?
there is a Resource clients, does chance economically scaled increase?
an increased chance of rebalances are more than ?
client strategies one pool much when it comes to due to their
Does of consolidated include for and efficient because of economies?
possible scaled rebalance to increased if a consolidation more than one?
Are pooling resources than Separate client economies?
there is a of the chance for economically scaled increased?
economies of scale to opportunities pooling separate clients.
Is strategies one pool more beneficial it comes to due up?
economies can improve rebalance over for individual
Is use economies of to of rebalance over strategies for ?
of economically scaled rebalances increased there a consolidation one client?
Is it possible maximize utilizing economies of following for each client?
Combining resources can offer advantage of scale
pooling more viable for efficient of than client larger economies of?
it to scale for rebalancing chances of client strategies?
There is chance balance economies of scale, instead separate
possible to maximize by using economies of scale following account?
resource in the opportunity for economically scaled rebalancing?
If there is lot Resource Consolidation among multiple of an economically ?
economiesscalebetter rebasing, does itsenseconsolidation resources?
of consolidated resources include faster economies of scales?
of scale important, make sense compared separate plans?
pooling viable efficient compared to different plan due scale?
Is pooling viable for efficiency of rebalance due larger economies of?
Due to economies scale, do the better rebalancing?
Does result in more efficient opportunities for when compared to strategies cost ?
Is pooling more of of scale of rebalance?
it use chances of rebalancing compared to preserving strategies?
When consolidation takes place multiple the scaled rebalancing?
pooling resources viable efficiency of to client when of scale in?

	of	important,	resou	rces more fea	asible	_ to separate _	plans?		

Because economies of scale, the advantages of resources?	
it to maximize balance by economies scale using separate strategies	account
Is viable of of separate client with economies of scale?	
Do the of resources replenishment of of scales?	
Is it for to be consolidated and to more?	
Is efficient than maintaining separate for client due of	
Is more than client because economies of ?	
of resources able to lead better opportunities for rebalancing.	
The economy of resources efficient separate plans.	
of could make it possible find better	
feasible to economies for better rebalancing to preserving individualized?	
is a multiple clients does the chance of ?	
resources more efficient maintaining different strategies per scale?	
it possible to balance by of instead of strategies per?	
Does pooling resources to better reorganization separate plans due to ?	
economies of might able to enable better over	
Does economies scale for better assets?	
When resource place multiple is for scaled to improve?	
possible use scale rebalancing chances to preserving client strategies.	
scale resources pooling to use recalibrating?	
Pooled can balance	
it better to resources economies follow strategies for each client ?	
When resource takes in clients is a good economically ?	
Does funds mean rebalance individual client strategies?	
is a consolidation multiple clients is there scaled rebalances?	
Is there chance an rebalance if more than one?	
Is possible to economies scale to rebalancing preserving ?	
Is viable to economies better chances to preserving individualized ?	
Isto usebetter chance of compared to preserving client?	
it resource clients increases chances of scaled rebalancing?	
Is to use economies scale better rebalancing chances to ?	
Is use economies of for better preserving individualized client?	
an increased an if more than one client is?	
advantage of of and combining better for efficient rebalancing.	
possible to improve balance by using economies of instead separate ?	
client assets can better through scale.	
pooling resources viable the efficiency of rebalance separate client to of?	
of able to combine make a efficient	
there is a resource of multiple clients scaled scaled	
Is better than keeping separate client due economies ?	
of can allow better through combining	
When clients, there a better economically scaled rebalancing?	
Is client strategies into beneficial when it comes options due	
it to use for rebalancing chances to client strategies?	
If there is Resource among clients, is there increased chance ?	
Ispossible to of rather than separate strategies per account?	
Is it to consolidate of follow different for each?	
If there is a resource between chance economically	
economies scale used to combine efficiency	

When economies are pooling be used for efficiency ?
it use of scale separate for each client account portfolio balance?
When resource place in multiple clients, is chance scaled ?
allow balance through economies of?
economies can to make efficient for rebalancing
Is there a of economically scaled are ?
Can resources economies of scale to find portfolio balancing?
Is better to consolidate economies different for each account?
merging client into one more beneficial when it rebalancing options up
Taking economies scale could combining for portfolio rebalance.
feasible separate client plans economies of scale?
combining client assets of scale?
to of can pooling resources better opportunities for strategies?
pooling resources more than client due scale?
it better of scale follow separate for each account?
Can bringing of resources more opportunities rebalancing when to individual client ?
economies scale be utilized to to make a
client strategies into pool beneficial it to due to up opportunities?
it possible use better than for individualized strategies?
Is it possible use economies scale improve rebalancing client?
client assets combined, be balance economies scale.
economiesscale, can poolinglead torebalancing?
Doestogether result more efficient for rebalancing individual client?
pooling than separate client plans the economies scale.
Does pooling lead to better for plans of scale?
of economies of do of resources better rebalancing?
of could include better for rebasing, do those resources?
Combining assets be facilitate more since economies of be
Is client strategies one beneficial it comes to options their up.
scale can better opportunities for instead of clients.
to use of to improve chances over individualized client?
there resource consolidation multiple chance economically rebalancing better?
Is it economies scale different strategies each client account?
If resource multiple clients the chance for economically increased?
Can combine in efficient ?
Isn't efficient than maintaining separate strategies client scale?
If a resource consolidation more than one is in economically ?
Is it possible tohigher pooled as opposed separate investment plans client, of ?
if combine with economies of?
it possible portfolio balance economies rather than strategies per?
possible to economies of scale to improve preservation individual strategies?
among clients might increase of economic rebalancing.
consolidate resources economies scale, rather than following strategies each account:
If a than client, the for economically scaled rebalances?
there a better maximizing portfolio you economies scale of following individual account?
economies of scale can to resources more rebalancing.
When of scale are resources more viable client
Is it possible portfolio of scale following separate per account?
