[Demo] NLP Dataset for Customer Service Automation

Company Type	Automotive Parts Retailers
Inquiry Category	Clarification on product specifications
Inquiry Sub- Category	Performance specifications
Description	Customers seek clarification on the performance specifications of a part, such as horsepower, torque, or speed ratings. They want to ensure the part meets their specific performance requirements.
Data Size	5,015 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

Masked sample paraphrases of one "Automotive Parts Retailer" customer inquiry. (Purchased data will not be masked.)

What	_ the	can		in place and	l fully optimized	d for performance?
When	_ parts are _	maximized,	fast can	?		
What wou	ld		of speed	the quality com	iponents?	
What	_ the	that can	by the	are ac	lapted?	
parts	s in place are	fully $__$ for $_$	is _	max speed	can	?
By maxim	izing wi	th compon	ents, is	speed?		
Any idea _	top spee	d	?			
What	maxim	num speed that _	be by	parts	time	their performance?
How quick	kly	parts	they are fully	?		
What	_ speed	be with	?			
What is th	e	can be	these parts	are?		
What	5	speed for the	place and	their?		
	the sp	eed that can	by pa	rts complete	and fully	performance?
I get	max	pa	arts in place?			
The parts	in	designed for	what	the	that can	achieved.
The	are	_ performance, _	the	e speed that	can be	
	place		performance, but v	what speeds	can achie	eved with them?
	limit on spec	ed co	mpletely?			
What is _	MPI	H with	_ these?			
What is th	e	can be read	ched these _	with full	?	
The	in place are _	perfor	mance but	can	_achieve?	
What are	the	_ that	with the par	rts are	?	
The	maximum spe	eed	the	in place are	for perfo	ermance.
	give	the upp	oer limit spee	ed these com	iponents?	
With prop	er tuning		can expect	t a maximum	_?	
is	fastest	with the	??

possible for a fullyOptimizing parts?
All fine-tuned, I reach ?
Is possible a fully optimizing parts?
Is it max velocity, parts in?
Can you tell me about speed using ?
Is a that I with these ?
The in place for performance, but the maximum can?
parts fully designed for performance but is maximum be
The that are in are performance what is the speed ?
The place are but what is the speed can reached?
maximum speed with parts the place are fully designed performance
you the speed with these upgraded parts?
it possible to maximum parts in?
is the these components?
Can what of speed is using these?
Is that these units greatest speed?
proper and what is the ?
What speed that you with these?
The optimum maximum that can be with place is what designed
is the limit on these completely?
is the fastest that achieved maximizing with these?
is fastest to achieve full?
The were but what is speed?
The in place are what is speed?
Is there to speed with completely maximized?
is the best the in?
The are what is maximum speed can achieved with them
is speed possible you use the?
is the max MPH these components?
is that can be achieved with the ?
The parts place are performance what that may be
is the optimum maximum speed that can be?
is the all components are maximized?
designed performance but what that can be with them.
designed performance but is the that can be with
be max achieved, optimal enhancements?
parts in are designed for what the that possible when?
What is the that these parts?
The optimum that be achieved parts not known.
The designed for performance, but the optimal for?
parts are fully for is the speed that they ?
What the best in and for the?
parts been for but is the can be achieved?
is speed be achieved these components?
is the possible with ?
The optimal maximum be achieved the place are
Precise top when connected?
possible to with the parts?
is the to use for parts performance?
fully for performance, but the speed may be possible fully?

What is the speed be complete fully adapted?
parts fully designed for performance, but what speed be available?
What maximum speed using the in?
Is for the max this assemblage?
The optimum speeds be with place are for performance.
What can be achieved with in place ?
The in are fully performance, what is the maximum that fully
is the these components?
The parts in for but what achieved?
What speed achieved maximizing performance ?
Is to max all in place?
What the speed parts are in
Can you about fast can go using ?
The parts in are designed performance, speed?
is the speed can be the fully for performance?
partsplace areperformance,what maximum speedcan be attained with?
there when fully optimizes ?
is maximum speed that reached parts that fully for ?
Is a when optimizes?
The parts are performance, is that will be achieved?
Do you know the top ?
What best speed the parts that in and performance?
maximum can be with the parts ?
What the achievable optimal?
you what top speed is for ?
possible reach of the are in place?
The parts fully for performance, but can be when fully installed?
What's speed with components?
The allower and a substitution a
The place are performance, what's the speed can reached?
parts in place designed performance but maximum they ?
parts in place designed performance but maximum they ? The maximum speed achieved with in fully performance.
parts in place designed performance but maximum they ? The maximum speed achieved with in fully performance. There parts designed for performance, what is can be ?
parts in place designed performance but maximum they ? The maximum speed achieved with in fully performance. There parts designed for performance, what is can be ? What is the pace full Optimization?
parts in placedesignedperformance but maximumthey? The maximum speedachieved withinfullyperformance. Therepartsdesigned for performance,what iscan be? What is thepacefull Optimization? Likelyispaceuse optimal components.
parts in place designed performance but maximum they ? The maximum speed achieved with in fully performance. There parts designed for performance, what is can be ? What is the pace full Optimization? Likely is pace use optimal components. What is that can be achieved the designed?
parts in place designed performance but maximum they ? The maximum speed achieved with in fully performance. There parts designed for performance, what is can be ? What is the pace use optimal components. What is the speed can attained with these place for ?
parts in placedesigned performance but maximum they ? The maximum speed achieved with in fully performance. There parts designed for performance, what is can be ? What is the pace full Optimization? Likely is pace use optimal components. What is that can be achieved the designed? What speed can attained with these place for ? is best for parts the for the performance?
parts in placedesignedperformance butmaximumthey? The maximum speedachieved with infullyperformance. Therepartsdesigned for performance,what iscan be? What is thepacefull Optimization? Likely ispaceuse optimal components. What isthat can be achievedthedesigned? Whatspeed canattained with theseplacefor? isbestfor partsthefor the performance? partsare fully designed forismaximum speed?
parts in placedesignedperformance butmaximumthey? The maximum speedachieved withinfullyperformance. Therepartsdesigned for performance,what iscan be? What is thepacefull Optimization? What is theyoureach with completeadaptedperformance? Thein placefullyfor performance,what optimum speeds
parts in place designed performance but maximum they ? The maximum speed achieved with in fully performance. There parts designed for performance, what is can be ? What is the pace use optimal components. What is greed can attained with these place for parts for parts are fully designed for is maximum speed? The parts designed performance can be ? What is optimal maximum speed that can parts place? What is optimal maximum speed that can parts place? What is the parts designed with the performance can be ? What is optimal maximum speed that can parts place? What is fast it's fully ? What is the you reach with complete adapted performance? The in place fully for performance, what optimum speeds With maximized performance what ?
parts in place designed performance but maximum they ? The maximum speed achieved with in fully performance. There parts designed for performance, what is can be ? What is the pace full Optimization? Likely is pace use optimal components. What is that can be achieved the designed? What speed can attained with these place for ? is best for parts the for the performance? parts are fully designed for is maximum speed? The parts designed performance can be ? What is optimal maximum speed that can parts place? Is it with this fast it's fully ? What is the you reach with complete adapted performance? The in place fully for performance, what optimum speeds With maximized performance what ? The are what are the speeds?
parts in placedesignedperformance but maximumthey ? The maximum speed achieved withinfullyperformance. Thereparts designed for performance, what is can be ? What is the pace use optimal components. What is that can be achievedthe designed? What speed can attained with these place for ? isbest for parts the for the performance? parts are fully designed for is maximum speed? The parts designed performance can be ? in designed performance can be ? What is optimal maximum speed that can parts place? Is it with this fast it's fully ? What is the you reach with complete adapted performance? The in place fully for performance, what optimum speeds With maximized performance what ? The are what are the speeds? parts place designed what the speed they can achieve?

The parts can for but is optimum?
these parts optimal?
Can I get to max the in?
Can max speed all in place?
The parts are for performance, are the that can be achieved
Is it for me to place?
is it you maximize with the?
What is using these components?
With maximized speed?
Is these fully enhanced to greatest of?
fully performance, but is the maximum can be achieved.
The are fully for what the best speed that achieved?
Is units able to the highest?
speed can be reached with complete for performance.
The place are designed for performance, what the speed achieved
Are to reach the ultimate Optimization?
How the top pace components?
The designed for but what are that be?
Are these fully units the highest of ?
How fast push fully tuning-up parts?
speed that parts can with complete and adapted performance?
speed can achieved with these placed ?
The are fully designed performance but what is speed can
I reach max with in place?
What speed can with in place and for ?
What the fastest accomplish with ?
What is maximum that parts that are in place.
are tuning, how fast they?
on with these fitted?
idea the maximum I achieve with pieces?
Is there I can these being maximized?
about upper limit of speed achieve components?
is the speed using components?
What the speed that may parts are designed?
By using components, what possible?
The optimum maximum speed can achieved fully not known.
it possible to speed optimizing parts?
How speed you achieve using these components?
What the speed parts can?
it possible achieve peak fully?
What's the speed in the best for performance?
is optimum that can be with the in?
What is max MPH after been adjusted?
possible precise top when fully refined connected?
What can be parts in and fully-designed?
speed for maximizing performance with these?
the be by these parts at the perfect ?
the maximum that with the designed parts place?
Do fully units best ?
The designed what is optimum maximum that can be from them?
