[Demo] NLP Dataset for Customer Service Automation

Company Type	Home Security and Alarm Companies
Inquiry Category	Technical support for alarm system
Inquiry Sub- Category	Alarm monitoring and signal transmission
Description	Explaining the process of alarm monitoring and signal transmission to monitoring centers, assisting with setting up or troubleshooting communication paths, and ensuring proper signal transmission.
Data Size	5,038 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

Masked sample paraphrases of one "Home Security and Alarm Company" customer inquiry. (Purchased data will not be masked.)

How	test the between our systems and your central to alarm time?
	we sure that alarms are connected to central?
Let _ cente	know how conduct a test to sure communication security monitoring er.
When	n to alarm how often do you check communication ?
	want to guarantee, should we for a connection between our and central ?
Let _	know how often should to the our security and monitoring is
Shou	ld and center be frequently fail-proof transmission?
	make sure you transmission, should test the connection?
	verify between our and your monitoring unit?
	do security system connection at central ?
	tell I should test link our and central station?
	want to strong connection between our we should test it often.
	should we check a connection between your
	often should station our security systems sure the alarm stay on?
	should test security system-station connection for ?
	dependable between our security system your central center, we need how we
	·
How	check system connection with central station?
	we want to strong it frequently?
How	look make sure that monitoring is to our?
	often we test the our station, make sure you get alarm?
	necessary check secure communication channel set-up your to ensure dependable alarms.
	you know security systems?
How	should make and your central monitoring unit is ?
Let _	know how often should a sure communication the central is good.
	often should we sure central unit connected the transmission?
	tell us how tests sure our system and central center communicate.

conduct tests the between systems and central station?
How often should system's connection the central?
we required to our security alarms with station?
How should we test for a good central?
know should test that the between our security system and central
up to date.
If want make strong between our alarms central we it frequently.
Let know how we should ensure communication between and the monitoring.
How you check communication reliability the for delivery?
the alarms your be tested to they are?
should test the between your center guarantee transmission.
How we make our alarms and the central monitoring strong?
us know should tests to communication between our security system the monitoring
·
often do check make our alarms work your ?
How should look make sure our monitoring connected our?
How frequently we link between systems and ?
often do you security equipment make sure connects station?
Let a is needed ensure between our alarm system and monitoring.
Let us $___$ should conduct test $__$ ensure $__$ the communication $__$ our security $__$ and $___$.
need to be for checking the reliability of from setup to your ?
Can if we check the between security systems frequently?
How often system's connection to your central?
us know how often should to ensure between our alarm and and
Let when should a test ensure continuous between system and monitoring.
us of times we conduct a test ensure our security system the monitoring
should test our security system central station?
how frequently the test be to ensure system and central monitoring.
suggest effective regularly the of alarms your monitoring center?
How often we need to make the connection your monitoring good?
Let us we should conduct a test sure is communicating with
you appropriate testing are alarm transmissions from our systems to your
central station?
Can you tell the appropriate testing transmissions systems the central station?
Can tell us should the central station give consistent alarms?
How often we need make between our alarms your ?
know often should conduct a ensure communication between the central
monitoring.
often must check our system's connection with ?
When it comes how frequently you communication with the station?
me how often test the between our systems and ?
How often we check connection?
When to delivery, how frequently recommend checking communication reliability with ?
Can you tell that to ensure reliable transmissions from systems to central station?
often should test system-station?
How need reliability the central station secured alarm delivery?
How should we make systems are your station?
how aconductedcontinuous communication between the security system and
monitoring
often we check for strong and your monitoring unit
