## [Demo] NLP Dataset for Customer Service Automation

Company Type	Smartphone Manufacturers
Inquiry Category	Product features and specifications inquiries
Inquiry Sub- Category	Design and durability
Description	Customers seek information about the design aesthetics of their smartphone, including the materials used, available color options, and whether it has features like water and dust resistance, gorilla glass protection, or ruggedized construction.
Data Size	6,223 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

 $\begin{tabular}{ll} Masked sample paraphrases of one "Smartphone Manufacturer" customer inquiry. (Purchased data will not be masked.) \\ \end{tabular}$

Is possible give details of structural elements to enhance long-term ?  me the makes stronger.

possible to information about components that are reinforced to enhance
Does have something enhances with?
there improvements increase overall toughness?
Structural or can be for durability.
structural improvements to lifetime?
any new updates parts make them last ?
know about enhancements resilience.
strong are possible last longer.
s device capable lasting time, and is special elements into the?
you tell me about are intended for ?
that ensure?
and beefed up for longevity?
stronger elements to longevity?
me there are that its endurance.
there to increase overall?
there special elements in the construction of device will it stronger ?
Tell enhancements that were
any updates to endurance time?
What into over time?
s any stronger elements ?
the design of product to ensure its and toughness?
kind structural used this device's design lifespan?
it longevity to improved reinforcement components?
you increase materials and for longevity?
What reinforcements think lifespan?
Information about longevity.
I want you have any components or structural that to its
the years what taken to the?
Suggestions on components ?
What are integrated its?
Did you include any make?
strengthened elements long
there you tell the measures taken within of this product ensure its streng
What think make last a time?
you describe durable integrated the structure?
Is ensure its overall resilience during usage
you that will improve longevity?
Is there any built-in it ages?
Are structural for increasing ?
there things inside make it break easily?
it have that its as it?
Are enhancements it's lifetime?
Tell me about stronger components that
you add stronger to?
Is a place that its strength time?
Tell me components that it.
Tell structural elements
me about reinforcements.
Tell extra strong that its endurance.

Is anything stand time?
it have things as it ages?
How are to it can over?
Is it detail any measures taken product's and?
Is explain that will maximize lifespan?
Extra strong or it last
Is that can long-term?
are any durable into the over?
Is special reinforcing for?
you elements to longevity?
Are enhancements to increase ?
structure be up longevity.
to a description of taken within design product to ensure its and resilience?
Tell about improve resilience
are the taken to last?
reinforcement ensure long-term durability?
know any additions its structure over?
there any long-term strength?
Is it any measures taken the of the to ensure its usage?
Is there any elements of this device will make last longer?
the components longevity?
Structural enhancements used to ?
Tell which increase endurance.
Can there structural for?
Any components ?
Have any stronger longevity?
any place to its strength?
Are structural meant to ?
details elements strengthened.
there any special structural in construction of will it and last long ?
are that its lifespan?
Is any reinforced components elements are designed to over?
you recommend any components ?
you considered adding ?
do you any into the structure?
reinforcement parts ?
removement parts : the works to increase toughness?
the of this include structural to make stronger and ?
components for added strength?
any components or designed to its overallDurability over time?
there structural incorporated into construction this that it stronger and long time?
Share strengthened
reinforcing components or for resilience?
Is it possible there reinforcements lifespan?
Is there a system its time?
you describe any durable into its structure?
you use improve longevity?
Is reinforced components or ?
used to its?
Can there updates boost durability?

Does the construction have structural that it long lasting?
anything built it hold over time?
Is anything longevity?
strong parts or stuff may last
Will any reinforcements?
there parts that more?
Is has reliable elements prolongs effectiveness?
Is possible for beef and structure?
Is there any that strengthened durability?
Is built enhanced endurance?
Let about extra-strong components increase its
Can be improvements overall?
Extra or material make last longer.
it to detail measures taken product its resilience during the usage period
Can give any or structural elements are designed its longevity?
Is this to last long elements incorporated into it?
Share details were
on reinforcing parts elements that them longer?
any its lifespan?
improvements would last?
Tell components that improve its endurance.
used to improve lifetime.
have any special components make more?
I'd like to hear that
Does the it last ?
Is to update reinforced long-term durability?
any reinforced or that are to increase its overall
it give description taken the design of this to ensure its and?
Is or elements can be durable?
I about that increase durability.
Tell me to
I to about benefiting lasting usage.
Is there updates reinforcing that help ?
there anything you tell the components elements are to long-term durability?
are structural elements may increase strength
anything you can tell me are to long-term durability?
there any reinforced are?
it add stronger improve longevity?
Tell enhancements are durability.
Is anything can me about the of product ensure its and toughness throughout
Mention strengthen
components are built for ?
information strengthened elements.
Can you additions integrated the over?
I to know added resilience.
structural for increased?
Tell that benefit usage.
be made its lifetime.
want to know if there are any reinforced components designed
What you about parts for increased robustness ?

Is the construction of device lasting a long is there _	structural ?
like hear about added long-term usage.	
the structural make them last.	
What via strong design?	
Is there anything can ?	
Share details strengthened	
Are you increasing structure?	
there in the works to strength?	
are that are intended for	
Have stronger included to ?	
Does the construction that make	longer lecting?
	e longer lasting:
it have structural elements place to ?	
Can boost ?	
want know if there are any reinforced elements	
it any measures taken within the design of usage?	ensure overall strength resilience
of this item sturdiness?	
Is there?	
Please $\_\_\_$ certain components are integrated $\_\_\_$ the build $\_\_\_$	
Tell me if there are	
Information about strengthened elements	
you tell about any components structural to	its?
Does structure and to be up?	
Is anything you can say lifespan?	
Tell me about the that	
Are aimed at increasing the ?	
Tell me elements	
What aspects for enhanced ?	
Is you tell me the of the product ensure	toughness during extended period?
it to me components or structural that	
made with longer life?	remiorced to emiance long-term:
it to detail any measures design	ensure its and toughness during usage?
there any aspect for?	
There are any reinforcing parts boost ?	
Is any sturdiness?	
reinforcements increase lifespan?	
Are enhancements stronger used to lifespan?	
there improved engineered?	
What are reinforcing aspects designed for?	
You about elements improve	
Is there any make it with?	
I want to are to _	its overallDurability time.
What integrated its over time?	
Is any new for endurance?	
aspect designed for endurance?	
I to know there any reinforced structural elements of	designed lifespan.
it additional components resilience?	<del></del> -
structural designed for robustness ?	
any components that ?	
Are elements in place improve it ?	
Does have any factors that its ?	

Is it to about components structural that reinforced to enhance long-term?
Please the reinforcements.
Can you describe any over time?
built factors that increase with age?
Can you any durable that been ?
me reinforced parts that better lifespan?
it extra for added?
toif there are any components or elements are designed its over
a in place will increase strength?
Are special structural included in construction this will make sturdier lon time?
device capable of and special structural elements built into?
Is in place to over time?
Can you me the structural parts overtime?
about that improves
know about structural that longevity.
Does it components to it ?
need to about to more durable.
construction of have special structural that make it last long time?
Referring to any?  Is it possible to measures in design of product ensure throughout usage
period?
Tell about from usage.
Is reinforcing features for?
you any durable integrated the structure over ?
Are there special the construction this it more sturdy and last a time?
I if any reinforced components are designed to increase
Is there elements in place to ?
structural in place increase strength?
me strong enhance its
about elements make resilience
Are there structural that ?
I know if the reinforced or elements to increase its overall over
any updates reinforcing that long-term durability?
Do you any reinforce ?
about that strengthened.
Are any aspects endurance?
you describe the structural that are increased ?
have any built factors that enhance ?
Are there to overall?
there a component for ?
want to know the reinforced structural designed to its longevity.
Is the of it stay over?
this device of atime haselements added to?
to it last longer with or parts?
Is there structural overall?
Some reinforce ?
reinforce longevity?
Do reinforcing for endurance?
Is it special components for durability?
Is there dependability?

components designed increased?
you the durable integrated into structure?
Is structure that will its strength ?
any information about parts long-term durability?
Does it that its with?
Share of elements
structural elements used the construction this device it stronger and last long
?
would if you could tell added
there place to increase its strength time?
Is there a structure can over?
Tell me that for
Are there structural elements that incorporated the of device that will allow last
any designed for endurance?
Did elements to improve?
Is any durableness?
Is there last longer?
Is it give description measures taken the of this to ensure throughout the extended ?
Is any specific reinforcing features?
There components longevity?
any on reinforced parts that ?
any improve lifespan?
intended for increased overtime can give?
Structural enhancements parts used to its
information stronger
Let if there any components its endurance.
any reinforcements the lifespan?
have any elements longevity?
tell about reinforced that to its longevity?
strengthened elements.
Share information parts been
Should reinforced or stronger it last?
that increase its strength the future?
Are structural that for strength?
it possible give information structural parts for ?
about strengthened parts.
anyone have reinforcements design?
any aspects designed for enhanced?
Is there any structural elements last long?
Do you stronger elements ?
I like to any or structural that to increase overall durability over
if there are any aspects enhanced endurance.
I need to know any or are designed its
Tell structural that strengthen
I about that long-lasting usage.
this device of a if are any included in its construction?
Is reinforcement making parts?
Is unique for endurance?
you used stronger to?

Is there any getting ?
What of do think make it ?
Is reinforced structural elements durability?
Is place to its?
have any special for?
are parts?
any unique reinforcing designed?
Is for endurance?
Does it in that more resilient age?
Does in factors help its resilience?
there reinforcements lifespan?
Does have built-in that resilience?
Are to increase toughness?
there any lifespan?
it increase its with elements? tell me more reinforced?
I to know any structural that are increase overall durability over
there on the parts that meant increased overtime?
there structural improvements aimed increasing?
Is structural enhancements improve ?
Do about the that resilience?
want to enhancements for
Is a for endurance?
Is detail any measures the of to ensure its?
Is it detail any measures design this to its overall toughness?
Tell what elements
What the parts increased?
Are reinforced durable?
include any elements in order to ?
Can more reinforced parts?
have special components last?
I about any reinforced or structural are increase its overall resilience.
Are units been greater stability?
Is components for?
you included elements that?
there a design for the long?  Tell the reinforcements benefiting
Is there reinforced elements durability?
Is it possible to any measures taken design of product ensure extended ?
Tell components that will endurance.
Is designed for endurance?
Is used its overall?
What make it tougher?
Share parts that
Is it possible to details about or structural enhance its durability?
would like toabout any reinforced components designed durability.
Does it any built-in it more it?
Can you describe any made over?
that to increase overall toughness?
Is there increase its strength?

Are any updates made to ?
any parts strengthened?
there any specific will make it and break?
any reinforced increasing strength?
possible up the structure for longevity.
Are there any structural elements strength ?
improvements do think make it last ?
boost its?
Is for long-term?
What have to improve longevity?
the this include structural elements that it and last a time?
can benefit long usage.
it special components it more durable?
Are structural are to increase overall?
Are any structural elements the of device that make sturdy last long ?
Information strengthened longevity can
possible to measures to ensure overall strength resilience the extended period
areelements that improve resilience.
Tell me about extra components that
that any reinforcements the ?
know of elements improve?
any reinforced components or that are designed its overall over time?
you me about structural parts are for overtime?
Is it to beef structure ?
Is there in that ?
Is structural elements that reinforced ?
you elements improve longevity?
it possible to details about the and enhance long-term durability?
unique for enhanced endurance?
stronger parts it last?
any of components that
any or components that details regarding elements.
Information parts be
there any reinforcement of structural ?
Tell to last.
tell me reinforced and designed increase its longevity?
there any on reinforced parts that ?
there any on removed parts that its endurance.
any in the construction of this device, that will a long?
how reinforcements usage.
Is reinforced parts increasing?
Are meant the overall strength?
there on structural for robustness overtime?
tell the measures taken the design the product to ensure its strength and
information about
stronger improve longevity?
it things enhance its?
Contribute any components
special components make more resistant?
increase durability?

Can me any components or elements to long-term durability?
Is designed increase toughness?
Let me are components enhancing its
parts make last?
need know there are any components or structural elements designed
Are there elements longevity?
there any reinforced structural for long-term?
Do you any durable?
Is there structural reinforced that ?
Will engineered reinforcement ?
Extra strong parts last
there any structural designed to increase its over?
to parts that maximize lifespan?
me how long-lasting
the stronger elements improve?
parts to it's lifetime?
you to highlight any longevity?
Is reinforcements increasing ?
Is there factors that with age?
Is any reinforcing for ?
improvementsaimed at increasing the
to improve longevity reinforcement components?
Can you me parts intended increased ?
anything or reinforced make it longer?
I like if components or structural elements are designed increase durability
elements in to increase?
the for durability you tell the added reinforcements.
Are there?
Does have elements place increase strength ?
to increase through components?
are parts are intended for robustness
muchyouaboutstructural partsincreasedovertime?
Is it possible detail measures taken the ensure resilience toughness throughout the extended ?
Is there new on parts resilience?
Any key features longer?
want know are any durable reinforcements in
Is there any make last?
tell meabout reinforced?
Tell me prolong
I'm wondering if are components for
there inside would make tough and easily?
Structural made its lifetime.
it special components for added longevity?
What integrated into over time are you ?
there elements place to stronger?
Does it enhances resilience as it?
structural in increase its over time?
there be that make it tougher ?
there any reinforcing endurance?

I would know elements boost
its longevity by engineered ?
Are there parts for ?
Tell the components enhance its time.
you know any reinforcements the design?
are details the structural parts intended increased ?
Contribute any that ?
Is there strong make last?
any components that ?
Is that something within it will time?
Are to to increase strength?
durable additions into its over the years?
to if anything it that will over time.
know if there its lifespan?
Do you the and materials longer?
Are of the more?
Is any special included in the that will make it longer?
I to elements that durability.
Is there for endurance?
I to about elements to stronger.
on for longevity.
there be structural will increase ?
Is structural its lifetime?
Are that aim at increasing ?
the of this it long time?
Is there structural elements increase over?
Is there can about any structural elements are improve long-term durability?
the construction this special structural elements that help long time?
something in place its?
Structural might be in place to
there reinforced components or elements that ?
mention any components that ?
durable additions integrated into the structure ?
Can you tell reinforced components or that been to increase ?
Are reinforced?
Is structural increase overall?
Do increase and structure to last?
Structural and parts may used it's
Does the construction this device any structural make stronger and time?
Are in its structure?
Is provide any that are to enhance durability?
How it its via design?
if there any or structural that are designed to increase lifespan.
there information on parts intended robustness overtime?
a unique aspect for enhanced?
in benefiting long usage.
can it made last longer in ?
Is it there's built will protect over time?
Is a to add reinforced components enhance resilience?
the of one help over time?

would like know reinforced or elements designed increase its
appreciate it if could the of added reinforcements.
any elements could improve longevity?
ructural enhancements may be used improve lifetime.
pes have any reinforcements ?
you information share it.
there anything you tell components or structural elements reinforced long-term arability?
it have that makes resistant age?
an you me reinforced components structural elements that are increase over
were used the design to increase?
curious about any reinforced or that designed increase
re there are for robustness?
parts are stronger?
parts increased endurance?
s anyDurable design?
re parts to resilience?
there a redesign in long run?
ell components increase its endurance
any that makes it?
re there at increasing?
there any you included?
any strength make ?
the measures were taken make it ?
like to elements improve resilience.
the details elements
this device capable of lasting a time structural it?
would like about any or elements that designed increase
appreciate you point me the direction of any measures taken by the the the lifespan
it that it some built-in factors enhance ?
information the structural are increased robustness overtime?
re elements strength time?
are the taken to it last over?
s factors that improve its resilience it?
about the reinforcements benefit usage.
nformation elements for
there that can its toughness ?
ell about that improved
am looking information about components or that are its
the of elements
<del></del>
tructural stronger can used improve its
longevity improved reinforcement components?
type reinforcements were put in design to ?
tothere are any or structural elements thatits longevity over time.
g give about any are reinforced long-term durability?
there are strengthened?
structural elements in increase its over time?
oes construction device include any elements that help it time?
s there any parts that ?
ou share information

Tell me extra-strong increase endurance time.
Are parts getting ?
Is there stronger that make last?
There structural that for long term
Is any for endurance?
Does it added?
there any stability?
Is there that reinforced long-term?
if there any components that improve
There parts increase durability?
like hear reinforcements benefiting usage.
Are components integrated the build ?
Does it its lifespan?
Is there anything that will it tougher ?
Are structural improvements strength?
reinforced durability?
describe durable additions have its structure?
details elements
Will reliable within design effectiveness?
parts specifically improve its?
Can used to overall?
Can you additions have been included ?
the measures taken improve the sturdiness?
it possible it last with parts?
Are to improve lifetime?
Is this device capable lasting long time has special it?
Are structural parts increased robustness?
updates elements that boost?
Are parts for overtime?
improvements intended increase overall?
there reinforced or elements for long-term?
appreciate if if there are reinforced components in this
Is something within it last over time?
it to reinforced parts improve?
Are increasing overall strength?
there any durable reinforcements?
there boosting lifespan?
you me reinforced that increase?
enhancements that it lasts?
Is give me details any structural are reinforced to enhance long-term?
Is there elements the construction that will make it stronger a time?
you mean improve longevity?
how parts increase lifespan?
could or parts to make it
Is lifespan improved components?
Are stronger elements improve? there measures in the design of this overall and?
What of do it last longer?
Is special for endurance?
Did stronger parts improve ?

Are	reinforcement components?
m	e reinforcements that usage.
st	rong parts can last
	possible to any measures taken the this product its resilience toughness during
: You she	ould about that increase resilience.
	parts reinforcement to make it are
	parts?
	ere anything can about reinforced components or structural?
	rong or could make it last
	possible raise the and structure ?
	ou what durable integrate its over?
	any detail on structural increased robustness?
	to detail measures the design of this product its extended ?
	stronger in to ?
	reinforcing designed endurance?
	a description on ?
	structural improve resilience.
	describe any durable additions ?
	is capable of time if there structural elements incorporated?
	to make and stronger parts to lifetime?
s there	anything at?
:	to that improve
aı	re parts?
	to know about any components structural elements increase its time.
it	built-in factors its resilience with?
	for increased endurance?
Is it po	ssible to update elements boost ?
aı	ny that strengthen
yo	ou tell me about components and elements increase longevity?
[s	any elements improve?
Extra _	parts reinforcement make last
s	$possible \ to \ give \ \_\_\_ \ any \ components \ \_\_\_ \ structural \ elements \ \_\_\_ \ to \ \_\_\_ \ long-term \ \_\_\_?$
Гell	aboutstrongthatits endurance.
yo	ou elements increase longevity?
yo	ou describe additions that were time?
yo	ou of additions over time?
Does it	reinforcements boosting ?
\re	_ structural to increase strength?
al	pout parts lifespan?
Гell	about are designed
	rong parts or make it last
st	
	elements that can be reinforced long-term
 Can	elements that can be reinforced long-term
 Can it	elements that can be reinforced long-term  tell reinforced parts help?
Can it w	elements that can be reinforced long-term tell reinforced parts help?  possible for to for enhanced?
Can it w	elements that can be reinforcedlong-term tell reinforced parts help?  possible for to for enhanced?  ant any reinforced components structural are to overall strength over time.
Can it w	elements that can be reinforcedlong-term tell reinforced parts help?  possible for to for enhanced?  ant any reinforced components structural are to overall strength over time.  durable in the over time?

it possible a of any measures within the of the its resilience?
Should include to to longevity?
it any special added?
I'd hear benefiting long- lasting usage.
there any reinforcements that ?
should tell about the elements their
Is details the addition of reinforced or elements to enhance durability?
Are stronger improve lifetime?
there boosting it?
I want if have or elements that are increase durability over time.
Can the parts intended robustness overtime?
How can lifespan via strong ?
Discuss strengthened
Is there any durable?
stronger components enhance endurance.
Does anyone have updates on parts ?
Structural stronger be improve its lifetime.
any details structural increased robustness overtime?
if it has for added strength.
Does your need to beefed ?
tell about structural that
Are strengthened ?
are any components ?
Have you elements to ?
strengthened the to longevity?
Can tell parts lifespan?
Do remember reinforce longevity?
its boosted reinforcements?
on ensuring long-term durability?
Is there information on the for robustness?
me about components its endurance.
What reinforcements strong parts it last?
Do want the structure for?
Tell about that will
Is the device capable of lasting a and special structural elements?
Are any special structural incorporated into construction of will sturdy last longer?
need to know are components or structural are designed increase its
Is longevity improved by?
about added reinforcements.
component built endurance?
Are parts from material?
Is or strong parts will make it?
Is to me about components or structural are reinforced to durability?
Are components are for ?
want to know structural increase
there any reinforcing are?
there any designed endurance?
Is there special structural in of that will it to a long?
me any durable additions integrated into structure ?
you planning to the and structure ?

Let me know about that durability.
there on structural are for increased overtime?
Are there any that last for ?
Can about reinforced parts that lifespan?
about strengthened for longevity.
about structural that make them stronger.
want know there are for improved durability.
I'd to structural elements that durability.
What has been it more last ?
There are reinforced elements that boost durability?
included to increase longevity?
makes with age?
you tell me reinforced and elements designed to increase ?
I would appreciate it if could details any taken by reinforce the extend the your
Is possible to up longevity.
it special structural elements are incorporated into the construction to it ?
Is elements increase its strength over?
There are structural might strength over
to hear about the elements resilience.
Is structural elements will its strength time?
there be structural to strength time?
What this dependability and?
Is or structural dependability?
Is to in the design?
parts or reinforcement can make
you describe durable additions ?
Are there designed the the structure?
I need know there are reinforced components structural are designed to
Does of this it up over?
durable integrated into over time?
information about
Is there any parts ?
me about that increase its over
it possible detail taken within design this product to ensure toughness?
Is possible detail any taken in design overall toughness and resilience?
Any pieces age?
Extra strong reinforcement longer?
Is there any more?
me reinforcements long-term
Does have any reinforcements ?
anything can me the design of this product to its strength and?
it possible to give on structural increased ?
Is there component built ?
like to know if there measures taken the this product its resilience usage period.
possible to provide on parts for increased ?
Can you about parts that prolong?
Sharing of longevity
Does it have any resilience over?
Is special components for ?

Stronger longevity?
me about components that are reinforced to ?
Is there any?
$Is \underline{\hspace{1cm}} anything \underline{\hspace{1cm}} incorporated \underline{\hspace{1cm}} \underline{\hspace{1cm}} this device that \underline{\hspace{1cm}} make it sturdy \underline{\hspace{1cm}} last \underline{\hspace{1cm}} \underline{\hspace{1cm}} time$
Does there any ?
Is that longevity?
any elements?
Will increase its over?
to structural elements to make durable.
Share information elements.
about structural intended for increased?
Are updates elements boost long-term durability?
me the extra-strong it
Can more reinforced parts?
it possible increase toughness through time?
Is there reinforcing for endurance?
Does add components for resilience?
Is a that can built for ?
know reinforcements help long- lasting usage.
it components for strength?
any components reinforce
Are structural to lifetime?
Are improvements to the structure designed ?
any special included in construction of device that make and last?
explain if certain into the for enhanced
Is there update on reinforced long-term durability?
know there are any reinforcements its?
Is it to any measures taken within the of to to use?
$I \ \_\_\_ \ looking \ \_\_\_ \ about \ \_\_\_ \ components \ or \ structural \ elements \ that \ \_\_\_ \ to \ increase \ \_\_\_ \ \_\$
