[Demo] NLP Dataset for Customer Service Automation

Company Type	Auto Repair and Maintenance Shops
Inquiry Category	Tires worn out and need replacement
Inquiry Sub- Category	Balancing and Alignment Services
Description	Customers inquire about the benefits and necessity of tire balancing and wheel alignments, wanting to prevent uneven tire wear, vibration issues, and ensure optimal handling and tire longevity.
Data Size	5,010 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

Masked sample paraphrases of one "Auto Repair and Maintenance Shop" customer inquiry. (Purchased data will not be masked.)

	deviations	recommended	significantl	y impact long-terr	n 1	rebalanced/aligned set-ups?
		matter for _	setups?			
It	possible that _	from inflat	ion the lon	g-term performan	ces	_ set
	from	recommended inflation	on pressures	long-term perfo	ormances of _	?
	possible for	minor in	flation to have _	on	alignment?	
	the ch	nanges aff	ect aligned setup			
The im	npact small	deviations from rec	ommended inflation $_$		reba	lanced/aligned
	impact	_ small deviations	the pre	essures for re	balanced/alig	ned set-ups?
Is the	alignment	by	inflation?			
i	t possible that tl	ne long-term of		deviat	ions from rec	ommended inflation
How _	do	pressures affect a	lignments	run?		
Is	differenc	e long-ter	m setup when	slight de	eviation	inflation guidelines?
n	ninimal variatio	ns of inflation pressu	re ali	igned?		
n	nuch do little	inflation pre	essures matter	?		
Is the		from infla	ation significant	for set-ups?		
Is	that	inflation	guidelines will affect	set?		
i	s	_ the of	on the term	performance of _	setups.	
Minor	changes to	affect	of			
Are	changes to _		set-ups' outcome?			
Is the	on set-ups	changes	significant	?		
a	djusting inflatio	n ef	fect on for	properly balanced	l/setup	?
		small deviations fron	n recommended	pressures fo	r alignn	nent?
Is	that	recommended	l inflation affect	long-term _	reba	alanced/aligned Set?
Does n	ninimal variatio	ns in pressures	setu	ps long	?	
It	that	from inflation	impact the long	-term performance	e	•
i	t possible	from infla	tion pressures	long-ter	m performano	ces aligned sets?
Is	_ possible that _	recommen	ded inflation pressure	es affect the	perform	ances
	that _	small	guidelines may	affect the set-up?		

Is possible minor deviations from inflation pressures can ?	
effect have on aligned setup?	
of balanced/aligned setups could be inflation pressures slightly	
much can inflation pressures ?	
variations in matter to alignments long?	
Is there effect small changes to?	
Changing may performance for properly setups.	
Does minimal of aligned?	
The performance rebalanced/aligned Set affected from inflation pressures.	
The long-term Set be impacted recommended inflation pressures.	
there an effect long-term there minor inflation guidelines?	
Is it deviations from inflation the long-term rebalanced/aligned?	
long term of balanced/aligned would pressures were altered	
is possible that recommended affect the performance rebalanced/aligned setup.	
Is longevity realigned configurations?	
Is inflation affecting long-term performance properly ?	
Ispossible from inflation pressures on the long-term aligned set ups?	
long-term performances of aligned set be impacted from	
that from recommended inflation pressures of rebalanced sets?	
Ispossible recommended pressures significantly the long-term of up?	
The long-term performance of may from inflation pressures.	
possibledeviationsrecommendedpressures the long-term performances rebalancing?	
What minimal changes for alignments	
Do even slight affect rebalanced/aligned performances?	
How changes aligned setup?	
the long run, will changes mean for aligned ?	
it possible deviations inflation pressures the long-term performance ?	
Is	
alignment by small changes in level?	
minimal variations an aligned in the long term?	
Is the of recommended inflation pressures an aligned?	
Is the set-ups of changes inflation ?	
Would small differences in impact ongoing realigned ?	
Ispossible that performances are impacted by recommended inflation pressu	ırac
long term of setups be inflation pressures altered.	1103.
do minimal changes inflation pressures for setup the ?	
changing affect the long performance of balanced/aligned?	
Is possible that the performance rebalanced deviations from inflation? Is there any to deviations optimal for use rebalanced?	
Is long-term balanced/aligned setups different if inflation	
What the effects inflation on aligned setup?	
Can recommended inflation the efficiency balanced alignment?	
Is the of from recommended pressures for ?	
Minor from recommended have long term set ups.	
It is possible deviations recommended pressures can on the long-term of	_•
Is that deviations from pressures affect the long-term of ?	
is possible from recommended significantly the performance of rebalanced/aligned	
it possible recommended pressures can have impact rebalancing/aligned set	
performance rebalanced set-ups affected by deviations from pressures.	
Would in inflation affect efforts realign systems	

inflation guidelines affect set-up?
deviations pressure the longevity realigned configurations?
How much little pressures to an aligned?
Is it that deviations recommended inflation pressures of the ?
are of minimal in inflation for setups?
$_$ it $_$ that $_$ from recommended inflation $_$ greatly affect $_$ long-term $_$ of $_$?
Is it that some inflation guidelines could ?
realigned configurations be impacted variances in inflation
there difference in long-term setup when deviations from inflation?
it possible that can the long-term performance of?
it that the performances of set can deviations recommended pressures.
What the minimal changes inflation pressures aligned?
much does minimal pressure for setups?
there big on long-term setups if minor guidelines?
Is deviations from levels when gear?
crommended inflation pressures for set-up significant?
Is it deviations from recommended inflation affect sets?
outcome align by changes in inflation?
Is from recommended inflation pressures impact performance set
Can the balanced be affected by from ?
How on alignments?
What the impacts inflation pressures on aligned?
$____________________________________$
Is the longevity of affected small in ?
Does pressures matter to aligned setup?
Is it long-term of rebalancing/aligned set affected by deviations from recommended ??
the ongoing efficiency alignment by recommended inflation?
of rebalancing/aligned set be by from inflation pressures.
Is that deviations have impact the performance of aligned set ups?
Is it that deviations inflation performance rebalanced/aligned set?
The long-term performance of set-ups adversely affected pressures.
Is it possible deviations recommended inflation the setup.
the impact from recommended pressures significant set?
does the slight inflation affect aligned?
impact small from recommended pressures significant for and ?
ongoing efficiency of balanced affected inflation pressures.
Does minimal inflation aligned?
Does minimal variations affect setup?
What do minimal inflation aligned setup?
it possible deviations from recommended inflation set?
pressure differences the longevity of ?
Is the impact on set from pressures?
The of rebalanced set-ups adversely from recommended pressures.
Is from recommended inflation pressures impact the long-term performance
Is from recommended inflation pressures impact the long-term performance much do in pressures alignments in the ?
much do in pressures alignments in the ? Is it possible that recommended inflation impact the set-ups?
much do in pressures alignments in the ?
much do in pressures alignments in the ? Is it possible that recommended inflation impact the set-ups? Is the by small in inflation level Would in inflation significant on ongoing efforts to systems.
much do in pressures alignments in the ? Is it possible that recommended inflation impact the set-ups? Is the by small in inflation level

What are of changes pressures on setup?
in inflation aligned setup?
What changes inflation mean for aligned?
Can there recommended inflation pressures the efficiency alignment?
the impact set up?
Will inflation affect realigned?
changes inflation pressures mean for aligned in the ?
variations in influence aligned?
Would small the designated measures affect to systems?
How do inflation pressures matter setup?
Minor deviations the pressures the long performance of set ups.
The impact of recommended inflation is for
Is the impact of deviations recommended significant ?
Will altering affect long-term balanced/aligned setups?
Is that the set-ups could be from recommended inflation pressures?
possible that deviations recommended inflation can affect performance aligned ?
Is it possible minimal in inflation aligned setup?
the run, inflation pressures for aligned setup?
does inflation pressure variation setups?
set-ups influenced by small ?
How much does impact ?
What the changes inflation pressures on aligned ?
Does adjusting long-term for setup?
Are changes inflation that have an ?
small differences measures ongoing to systems?
the long what are of minimal changes in ?
Is adjusting an performance properly balanced/ setup?
do changes in mean alignments in long ?
the term of setups different if was inflation pressures.
Is it possible deviations inflation pressures the balanced alignment?
Is it possible from can long-term of set?
it long-term performance of aligned can be from recommended pressures?
Is that long-term of rebalanced/aligned setup could by from recommended ?
Is possible that from pressures could the of rebalancing/aligned ?
it possible that long-term of rebalancing/aligned can deviations from recommended
of small deviations from recommended pressures significant adjusted?
inflation pressures an affect on alignment?
it possible deviations pressures performance of rebalanced ?
Is possible deviations recommended pressures can the of rebalanced ?
possible for deviations recommended inflation to affect the of ?
deviations from for using rebalanced/aligned gear?
the slight changes affecting ?
It is that recommended pressures impact the rebalancing/aligned
the impact small recommended inflation for rebalanced/aligned set
Is possible deviations inflation pressures can the aligned?
In do different inflation pressures matter alignments?
Is that deviations from affect the long-term of rebalanced
that deviations from inflation pressures the long-term of up
How do in inflation matter to?
Is it that from impact the of set?

Is of deviations inflation significant for set-up?
Is there effect long-term there is deviation from ?
Is there a effect there slight from inflation?
the impact deviations from recommended inflation for set-up?
deviations from recommended inflation pressures can affect long-term set.
pressure longevity of configurations?
there on set-ups small changes to?
minor deviations inflation effect on balanced alignment?
there big effect on long-term if there little guidelines?
adjusting inflation performance for a setup?
Does pressures affect performance properly setups?
How does minimal affect aligned long?
Is inflation pressure factor longevity of ?
Can a deviation from inflation of balanced?
by some small deviations from guidelines?
Can big effect on long-term if there is a ?
Small inflation a significant impact ongoing efforts systems.
there a large effect if there a from inflation?
inflation affect a properly ?
There is question whether a significant set-ups small changes inflation.
Is adjusting long-term for properly setup?
Is possible that deviations inflation pressures the of rebalanced/aligned ?
Is there a on the set-up inflation?
differences in inflation measures affect ongoing efforts ?
Is it that set?
Is it that deviations recommended could long-term of set?
Is the impact pressures significant for rebalanced/aligned?
minimal variations inflation matter aligned in long run?
Is there impact on from small changes ?
Is that from inflation pressures impact long-term of ?
Are any changes in inflation affect ?
it possible that aligned ups will be by deviations recommended inflation?
Is it possible recommended inflation pressures an the of set?
deviations pressures have effect the efficiency of balanced ?
Is possible performance setup be impacted by from recommended ?
Minor deviations recommended have to affect term set ups
slight changes in an?
it that the of will be affected by inflation pressures?
Is possible that recommended pressures long-term performance rebalanced/aligned set.
How much variation ininflation?
What will changes inflation do for ?
long run, minimal in inflation aligned setup?
Is it possible the performance aligned set could by deviations inflation?
variations inflationary pressures have an on ?
it possiblefrom recommendedaffectperformancerebalancing/aligned set up?
How do variations pressures matter long for aligned ?
possible deviations from could a impact on set ups?
the longevity be by small inflation?
alignment set-ups influenced small changes in!
changes in the inflation level the

Minor deviations recommended inflation can the performance
Is the $___$ term performance of $___$ different $___$ pressures $___$ slightly $___$.
$ \begin{tabular}{lllllllllllllllllllllllllllllllllll$
possible that deviations recommended inflation could long-term of rebalanced/aligned
Is the of small inflation rebalanced/aligned set-up
Is possible that inflation the performance of rebalanced setup?
a big on setup if deviations inflation guidelines?
possible that the performance rebalanced can adversely affected by from recommended
Does minimal matter an aligned setup in long?
long-term set-ups affected by deviations recommended inflation?
it deviations recommended inflation pressures can rebalancing/aligned ?
deviations inflation significant impact the ongoing efficiency of alignment.
How do inflation for aligned setups?
the alignment of small in the
the long-term performance could be affected by deviations recommended inflation?
changes inflation mean for aligned setup?
the impact of small deviations pressures significant?
pressures affect the efficiency of balanced?
do minimal inflation pressures do for ?
pressures in aligned setups?
What minimal inflation for aligned Setups?
Is plausible that deviations inflation pressures affect of ups?
Does changing inflation pressures performance properly ?
the long-term affected is minor deviation from ?
minimal pressures influence aligned?
the on alignments of minimal inflation ?
Does variations pressures a effect aligned ?
of rebalanced/aligned affected deviations from recommended inflation?
Is there a impact changes in inflation?
is impact set-ups minor to inflation?
Is the impact small from pressures significant set
How much minimal inflation ?
Does the slight changes?
do minimal changes inflation pressures aligned time?
longevity realigned configurations be by pressures?
What the of minimal in for aligned?
Is there large if there from inflation guidelines?
of set-ups may affected by in level.
Can inflation pressures the longevity realigned?
it possible inflation pressures impact long-term of rebalanced?
How pressure variations affect?
minimal variations in an effect on?
Is a big impact on small ?
minor deviations recommended pressures affect long-term rebalanced?
Do from optimal matter use rebalanced/aligned gear?
pressures affect long-term properly balanced/ aligned?
of rebalanced may by deviations from recommended pressures.
deviations from recommended inflation pressures to performance ups.
it possible that deviations from recommended have significant effect long-term performance
it possible that deviations from long-term performance rebalanced?

Is inflation pressures affecting for and setup?
impact of small from recommended inflation is rebalanced/aligned
Are there inflation that align ?
minimal in pressures an effect setups?
Is possible that from rebalanced/aligned long-term performance?
Do some inflation to?
the term performance different is slightly altered by pressures
Is alignment set-ups by in inflation?
Minor from recommended inflation in the long
Is it that the of rebalanced/aligned recommended inflation pressures?
Inlong run, minimal changes do with alignment?
variations in inflation alignments?
that inflation pressures significantly affect the long-term of set?
The performance set be impacted by deviations inflation
Small in might the alignment ups.
deviations recommended inflation affect long-term of rebalanced/aligned
Is there a between minute from optimal of gear?
Ispossible that performance of rebalanced be affected by from ?
changes in pressures alignments in the run?
it that deviations inflation pressures have a significant up?
that efficiency of balanced can impacted by from recommended ?
Is the setups different inflation pressures slightly altered?
In the run what in inflation pressures to setup?
Is the long-term rebalanced/aligned sets affected deviations recommended inflation pressures?
Is set-ups influenced by?
How influence inflation pressure aligned setups?
is impact minimal variation on setup term?
Is it deviations recommended inflation affect rebalanced?
it possible that from affect the term performance of
impact of deviations inflation consequential rebalanced/aligned set-up?
changes ininflation pressures for setup?
How inflation pressures alignments the long?
The of realigned configurations be small inflation
slight fluctuations in rebalanced/aligned?
How does minimal inflation pressure impact ?
Can slight from inflation affect the alignment?
Is a noticeable on long-term setup if is from ?
The long performance balanced/aligned different if inflation altered.
is possible from inflation pressures greatly long-term performance set-ups.
How do inflation an setup?
Is deviations from important for set-ups?
Is it of rebalancing/aligned set.
Is adjusting inflation a on performance balanced?
inflation pressures affect the properly aligned setup?
How inflation changes ?
much will minor inflation affect setup?
is inflation impact the long-term performance rebalanced/aligned sets.
Is it that from recommended pressures impact on the of set ?
long-term setups there are small deviations inflation guidelines?
What do the slight in inflation?
