## [Demo] NLP Dataset for Customer Service Automation

Company Type	Wealth Management Firms
Inquiry Category	Dividend reinvestment and income planning
Inquiry Sub- Category	Tax implications of dividend income
Description	Addressing customer concerns regarding tax obligations and potential benefits related to dividend income received from investments.
Data Size	5,032 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

## Masked sample paraphrases of one "Wealth Management Firm" customer inquiry. (Purchased data will not be masked.)

long-term or short-term positions, considering advantageous realized gains	?
a on the rates applied to actualized gains?	
Should favorable affect or short-term positions?	
hold if we understand how the rates are?	
When it or short-term positions in response the beneficial?	
welong-term orpositions taking rates to gains are realized?	
Should the open open account when whether to keep a open shorter	go for
Considering realized gain can used to decide positions.	
Should choose long-term or beneficial gains that realized?	
The rate at the will affect when have long-term short-term positions in	ı
Taking into account rates on are the best considerations long-term sh	ort-term?
beneficial applied to gains should choosing long-term short-term posit	cions.
long short-term prioritized by the to gains?	
it it hold a long position on the rates returns?	
have long-term short-term positions in depends on interest applied to realize	ed
rates applied to realized when long-term positions?	
Given the rates for realized we we should long-term short-term	
If maximize from the gain we choose a or short-term	
better or the rates for realized gains are great?	
The is or positions in to rates on profits.	
Is it better to or due to rates for ?	
choose between short-term positions based rates gains?	
it to between positions based on rates for realized?	
The rates apply to realized have and short positions.	
we choose either a long-term short-term on ?	
Based on the applied the we have and long	
Should choose between long-term positions to for gains?	
It subject to rates applied realized our our or short-term positions held.	
Considering of when should we our?	

in the for affect our hold long or positions?
holding long-term short-term positions subject the rates applied
we choose long-term or because of rates applied?
Does it to short-term positions, favorable for realized gains?
Theapplied affect when long-term and short term positions.
Considering the gains what ideal long-term short-term positions.
should hold considering applied to realized gains.
we have our term or short held dependent the used to
the rates realized gains to or short-term positions?
we take beneficial rates to when choosing a?
should or short-tern position, considering the rate gains?
in rates for gains regarding holding or short-term positions.
rates gains considered when we hold our or short-term
Should be to positions, the favorable rates for realized ?
Should positions considering how of gains are?
on realized should have short and term positions.
rates applied to realized gains we hold
when we should our long-term or short-term positions held.
preferable to hold long-term when rates realized are good?
we choose long-term short-term positions depending to that realized?
Should short-term be based on applied to ?
When long-term positions held dependent rates used realize gains.
When hold long-term or positions, the applied realized ?
Is prioritize short-term the rates applied to actualized gains?
whether hold long or short can done favorable rates.
the gains, should we hold long-term?
When is the time consider or short-term in rates?
Should long term short term positions based on gains?
When hold positions based rates applied to?
rates gains, is the best hold long or positions?
Time to decide short-term with better realized?
Considering for that the optimum option for long-term and ?
favorable on gains, when to hold long or positions?
we long-term and based on rates for?
prioritize either long or term positions on rates gains?
on rates to realized gains, long short positions.
Consider rates applied to gains to or short-term
the for gains is the ideal for short-term positions?
What considering between long holds and rates?
Changing favorable gains may affect our to long
When preferential on returns preference for shorter investments?
Should hold long-term positions considering how realized ?
Can we keep short positions rates?
Should short be rates after gain realization?
decide long-term positions when beneficial realized gain?
The applied to gains should dictate when and term
When or positions should on the rate realized gains.
we long or short positions apply?
to consider or positions, for realized gains.
Should one onto or assets considering discounted on ?

When should long for gain realization?
we decide whether or positions we good rates?
Should short-term positions, into account beneficial gains realized?
Should between long short-term depending rates for gains?
Considering the rates gains are what is ideal between long term?
The to realized are what considered hold our long-term short-term
should consider beneficial when between long short-term positions.
Should favorable realized gains when between long-term short-term?
rates that apply realized should long-term and
to our long short-term on applied to realized
into rates applied to gains choosing long-term or short-term?
Is long-term appropriate how the of realized ?
the appropriate long-term or short-term relation to beneficial rates?
have considering how the rates of applied?
If favorable should keep long positions?
Considering rates gains are what the between and short term?
Should between based the rates applied actual gains?
beneficial rates for gained when choosing between long term
should short and term the rates that to gains.
for gains that what best option short and positions?
When will keep or rates apply?
to to short-tern position depends the of realized gains.
good idea to positions how the realized are applied?
Is better prioritize long term rates applied to actualized gains?
the rates for that realized what the long-term and ?
should have long-term tact depends rates that are applied to realized gains
applied gains, when we have long short term?
long-term short-term positions based on realized
Considering realized gains, should one use a long-term?
Should hold onto long- or considering rates on?
Should we short-term positions since rates apply ?
Should the realized gains when whether to keep position open term or shorter duration?
Depending on the the realized should have short and
it best long-term short-term positions of beneficial ?
should and short term on realized gains
The rates to realize when we should short-term positions
What is the hold or short position on the of?
Should we long-term or order benefit from ?
account rates applied gains that we choose long-term or short-term
Does it make sense to positions if rates?
favorable for gains, should we choose and short-term?
we should have long positions on the applied realized
the rate of realized should long-term taken?
the rate gains that realized, best long-term and short-term?
The apply to gains should dictate when long positions.
When do we the favorable rates apply?
we allocate time on rates to realized?
The rates mealized gains are what when our long-term positions held.
It's to rates applied to should have or short-term held.
