[Demo] NLP Dataset for Customer Service Automation

| Company Type | Automotive manufacturers |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Inquiry Category | Assistance with vehicle navigation and multimedia systems |
| Inquiry Sub- Category | Multimedia connectivity problems |
| Description | Helping customers troubleshoot issues with connecting mobile devices, Bluetooth pairing, or audio/video playback in their vehicles, ensuring seamless multimedia system experience. |
| Data Size | 5,048 paraphrases |
| Want to buy data? | Please contact nlp-data@qross.me via your business email address. |

$\begin{tabular}{ll} Masked sample paraphrases of one "Automotive manufacturer" customer inquiry. (Purchased data will not be masked.) \\ \end{tabular}$

| Why d | es guidance intermittently driving, even it is at an volume? |
|--------|---------------------------------------------------------------------------|
| | intermittent loss of sound from voice, despite |
| How _ | the guidance intermittently cuts driving after the speaker an appropriate |
| How c | me voice guidance on driving, even a has ? |
| S | tting at level is line with navigation but voice cut while |
| How _ | stops driving even the volume was set to? |
| a | yone what voice to disappear as I? |
| | voice guidance while driving, despite volume |
| Even _ | the level of volume set voice cuts out driving. |
| | an loss sound from the voice audible |
