## [Demo] NLP Dataset for Customer Service Automation

Company Type	Water and Wastewater Utility Companies
Inquiry Category	Water pressure and flow issues
Inquiry Sub- Category	Fluctuating Water Pressure
Description	Customers notice inconsistent water pressure that alternates between high and low levels. This may be attributed to problems such as water main breaks, valve malfunctions, air pockets in the pipes, or excessive demand during peak usage times.
Data Size	5,148 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

 ${\color{blue} \textbf{Masked sample paraphrases of one "Water and Wastewater Utility Company" customer inquiry. (Purchased data will not be masked.)}$
