[Demo] NLP Dataset for Customer Service Automation

Company Type	Internet Service Providers
Inquiry Category	Domain name and website hosting support
Inquiry Sub-Category	Website backup and restoration
Description	Offering guidance on backing up website files and databases, as well as assisting with restoring websites from backups in case of data loss or security breaches.
Data Size	5,057 paraphrases
Want to buy data?	Please contact nlp-data@qross.me via your business email address.

Masked sample paraphrases of one "Internet Service Provider" customer inquiry. (Purchased data will not be masked.)

If malware infects only _____ part _____ _____ and _____ _____ (files), how can _____ _____ _____ _____ compromising _____ areas during _____?

Do _____ safe if _____ _____ but not _____ _____?

_____ do _____ recover the _____ without affecting _____ areas if _____ is only _____ _____ _____ _____ been compromised?

_____ _____ the database is _____ _____ _____ you _____ in a _____ that preserves unaffected _____?

_____ only the database _____ be _____ _____ _____ software, _____ to recover _____?

_____ databases _____ if _____ _____ but _____ other files?

If _____ _____ limited _____ databases, _____ does _____ _____ _____ without _____ intact file repository?

If it _____ only _____ _____ and notfiles, _____ yourestore _____?

If it _____ only _____ _____ _____ is being attacked, _____ you restore _____ _____ _____ _____ rest?

_____ restoration safe if _____ _____ but _____ other _____

_____ it _____ to restore _____ _____ it's only the _____ _____ notfiles.

_____ _____ infections _____ the _____ _____ that's affected, _____ restoration safe?

_____ _____ _____ _____ a _____ _____ _____ files, _____ it be possible to restore it?

Is _____ possible _____ restore it _____ it _____ only _____ database and _____ _____ _____?

Restoring database-only _____ _____ _____ _____ other parts _____ how?

_____ _____ restore it with no harm _____ it _____ _____ a _____ and not _____ _____ _____ targeted?

How _____ recover the database that _____ _____ _____ _____ malicious software _____ _____ _____ areas?

Can you _____ _____ _____ _____ the _____ if it is just _____ database _____ _____?

_____ you restore it _____ _____ are _____ the database _____ _____ _____ that _____ being attacked?

_____ safe _____ restoration if databases areinfecting but _____ _____ _____?

_____ it's _____ _____ _____ and not _____ _____ are targeted, can you restore _____?

How can _____ _____ _____ _____ without _____ if _____ only affects _____ database?

_____ restoration safe if _____ are _____ _____ exploited _____ not _____ other _____?

Is restoration possible without _____ _____ _____ in _____ if it's only _____ _____ _____ _____ infecting _____?

_____ _____ we recover the database without affecting _____ _____ _____ it's _____ _____ database that's _____?

How _____ _____ and preserve unaffected _____ if the _____ _____ _____ _____ by malware?

_____ databases _____ _____ _____ _____ _____ is making a restoration safe?
